FCC RF EXPOSURE INFORMATION

WARNING! *Read this information before using your phone*

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards.

Use only the supplied or an approved antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations.

Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

Body-worn Operation

This device was tested for typical body-worn operations with the back of the phone kept 2.0 cm. from the body. To maintain compliance with FCC RF exposure compliance requirements, use only belt-clips, holsters or similar accessories that maintain a 2.0 cm. separation distance between the user's body and the back of the phone, including the antenna, whether extended or retracted. The use of third-party belt-clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure compliance requirements, and should be avoided.

Part 1. Overview

Chapter 1. Getting Started

Front View of Phone – Flip Closed

When TM910 phone's flip is closed, it looks like a regular phone with some special feature. Please see the description of each special feature.

1. Stylus Pen

Use when the flip is open to navigate the menu system and enter data in PIM mode. It is located on the back of the phone.

2. Jog Dial

You can adjust Audio Volume or navigate menu and list as you move Jog Dial up and down. If you push Jog Dial, you can select items.

3. Flip Button

Press to open the flip and change to PIM mode from Phone Mode.

4. Send Key

For making and receiving calls, Call Waiting and 3-Way call

5. End Key

Use to end a call, return to the main menu or turn on and off as pressing for 3sec.

6. Clr Key

Use to correct mistakes when you input data, and go to the Main Menu during Menu Navigation. It is also activated Voice Recognition in Idle state.

Front View of Phone – Flip Open

When TM910B phone's flip is open, it offers you all kind of data management tools and features using LCD and touch panel. This is PIM Mode. Please see the description of each special feature

Contacts : Phone book.

Phone : Phone when the flip open.

Call Log : Saving Call History(Incoming, Outgoing, Missed).

Date Book : Daily planner.

To Do : Daily task.

Memo : Taking notes.

Sketch : Making a note except text.

Calc : calculator.

Clock : Clock for the all cities.

Browser : Web browser

Message : Short Message Service .

Connect : PC Sync .

Settings : Setting a environment of the phone.

Game : Game .

BlueTooth : Bluetooth .(adding the icon later)

LCD Icons

This list identifies some of the more symbols you'll see on your display screen.

Icons	Descriptions
	Signal Strength. Current signal strength indicated as the number of bars displayed on the screen.
	No Service. The Phone is not receiving a system signal
	In Use. A call is in progress. * No icon indicates the phone is in standby mode
	Digital Indicator. Digital service is available
	Analog Indicator. Analog service is available.
	Roaming. The phone is outside of its home service area.
	Vibrate On Indicator.
	Text Message Indicator. Indicates you have new text messages waiting.
	Voice Message Indicator. When a voice message arrives.
	Charging Level Battery charge Level.

Using Phone Menu

TM910B phone is offering Application such as Call History, Phone Book and Call function such as Mute by Menu style in Phone mode

Menu Activate

There is no Menu in Phone Mode but only present State. If you press Jog more than one minute, the menu is activated.

Menu Navigation & Selection

If Menu appears in Phone Mode, you can navigate menu by using Jog up and down. Besides, if flip is opened, Menu Navigation is possible with Navigation key up and down inside of flip.

When the Menu is activated, highlight the item you want and press Jog then the item is selected. When flip is opened, you can select item with OK key of Navigation.

Common function of PIM Mode

Tray Bar

In PIM Mode, Tray Bar like above picture displays through all kind of screen. This Bar displays menu option, offer how to move between applications, end the present moving and store date. In addition, the Scroll Bar displaying amount of date is indicated .

Menu : If you press Tray Bar, it offers options you need in each screen.

Goto : To move from present screen to another application, press this button and the name of movable application displays. When you select the name of application you want, it moves to the screen.

Done(): Tap this button when you want to finish action at present screen. Changed item is saved and the screen disappears then it moves to previous screen or application.

How to Input in PIM Mode :Virtual Keyboard

To input a data, you can use Virtual Keyboard at each application in PIM Mode.

There are three kinds of Virtual Keyboard for alphabet and symbols like above pictures.

First letter is inputted a capital letter automatically. To change capital letter or small letter, tap  .

Cf. When you send E-mail, the first letter is inputted to small letter.

Tap  for Tap.

To move one space next, tap  and to move next line, tap .

Tap  for correcting.

Tap  for saving, when a text is completed.

To change Virtual Keyboard to alphabet or symbols, tap  .

Turning your phone on and off

TM910B is classified from phone mode and PIM mode. Phone mode is turned on and off in user's necessity. PIM mode works even the phone is off.

To turning your phone on, press  for 3 seconds. Once your phone is on, you can see the screen in condition of the flip is closed. You can use both phone mode and PIM mode in this condition, it doesn't matter flip is open or closed.

To turning your phone off, press  for 3 seconds. Your screen remains blank while your phone is off. When you open the flip you can use all applications in PIM mode.

Using the battery

The Duration period of the battery(Slim Battery)

Digital -> continuous call : about 200 minutes, call waiting status : about 40 hours

Analog -> continuous call : about 90, minutes, call waiting status: about 13 hours

- This continuous call and call waiting time is real measured material in LG electronics laboratory.

Installing and Charging the battery

Installing the battery :

Gently press down on the top of the battery until it snaps in place of phone.

Charging the battery

Use the phone after charging the battery.

1) Put the plug of the charger into the electrical outlet.

- You must use 110V.

- Flash once a red light when the power is on.

Insert the phone with the battery installed into the slot.

- A red light on the charger lets you know that the battery needs charge.

A green light on lets you know that the charge is finished.

Checking the battery level

To check your phone's battery level, look at the battery charge indicator located in the upper-right corner of the phone's display screen.

 **Caution:** - It generally takes about 3 hours to fully recharge.

When the red light is flickering, the contact may be wrong or the battery be out of order. In that case, check the cleanliness of battery contact and try it several times (4~5). If it were still in trouble, consult to the service center.

Effective control way of the battery

Use the right battery charger. (Using the wrong battery charger could cause damage to your phone or explosion.)

Don't attempt to disassemble or short-circuit the battery.

Keep and charge battery inside. (In case of very hot or very cool condition, this battery may not be recharged and the red light would be flickering. Further if this is extremely recharged, the duration for usage might be shorten, because the voltage could be down due to this characteristics.

It is very dangerous that you keep your charger and battery near by fire.

If you drop or hit the battery, it might be damaged or the duration for usage might be shorten.

With the Lithium battery, it is OK to recharge the battery before it becomes completely run down.

Don't store and charge the battery in this place. (hot place : near fire, in a car in summer etc. /cold place/the place can be reached by children)

In a case of high temperature and humidity condition our safety system will work and the power will be shut down. In that case, take the battery off from the body and try it again.

Keep the battery in room temperature after charging if you will not use for a long period of time. (The battery may need recharging if it has not been used for a long period of time.)

Part 2. Phone Mode

Chapter 2. Basic Functions

Making a Call

1. Make sure your phone is on

-> If the phone is off, press  to turn on the phone.

2. Dial the phone number with area code if you need.

-> If the KeyGuard is locked press  for 2 second to unlock KeyGuard.

3. Press .

4. Press the Jog to active menu then choose [Call]

-> If the phone is locked, select [Unlock] from the menu enter the lock code.

5. To disconnect the call, press .

6. If "The phone has been restricted" is on the screen, your phone is restricted. You can limit your outgoing calls to Emergency call and the numbers which is stored in the PhoneBook in this condition..

Correcting Dialing Mistakes

If you make a mistake while dialing, press  to erase one digit at a time. Or if you need to erase the entire number at once, press  for at least 1 second.

Receiving Calls

1. When your phone rings, press 

2. Highlight [Answer] when the menu is activated.

1 If press,  ,  or Jog Up & Down while your phone rings, ringer or vibration is stopped and you can answer the phone.

If Settings->Features->Any Key Answer is on, press any key except  ,  or Jog Up, Down, you can answer the phone.

3. To disconnect the call, press 

Using Quick Mode

Manner Mode

1. If you press  in Standby mode for 2 seconds, "Manner Mode Activated" displays on the screen and it changes to Manner Mode.

-> When the phone is in Manner Mode, "Manner Mode" displays on the screen and Vibrate icon is indicated.

-> When the phone is in Manner Mode, no key tone sound and ringer sound.

2. If you want to Deactivate Manner Mode press  for 2 seconds until "Manner Mode Deactivated" disappears from the screen.

Keyguard Mode

Keyguard is a safeguard against accidentally dialing numbers.

1. To enable Keyguard, press  for 2 seconds in standby mode. In this condition the screen is like below.

KeyGuard only works when the flip is closed and any key is not inputted. When the flip is open, all key is working even KeyGuard is set.

2. To disable Keyguard press  for 2 seconds when the flip is open.

Responding to Call Waiting

Your cellular service may offer the call waiting function. While you are answering a call, you may hear beeps indicating another incoming call. When call waiting is enabled, you may put the active call on hold while you answer the other incoming call.

1. To receive waiting call, press 

2. To switch call, press 

Using 3-Way Call

With 3-way calling, you can talk to two different people at the same time.

1. If you want 3-Way Call during a call, press 

2. The first caller's phone is in hold condition.

3. Dial the second number you want to call.

4. Press  and tri to call.

5. When you're connected to the second party, press  once more to bring your 3-Way Call.

6. If you press  again, you'll connect to the first people.

7. Press  to disconnect both call.

Mute

Your caller does not hear you during a call.

1. Highlight Menu during a call using Jog.
2. Select [Mute] from the menu. [Mute] displays on the screen.
3. To cancel Mute mode, select [Unmute] from the menu.

Redialing Calls

1. You can redial the last number by pressing and holding .

Pause Feature

Generally when you call an automated system like voicemail boxes or banks you are required to enter a password or calling card number. Rather than entering the numbers manually each time, you can store the numbers in your Phone book, separated by special characters, called pause.

Hard Pause

After connect the call, Select [Send Tones] from the menu or press .

This allows you to send a digit after a hard pause. It uses ">" for the hard Pause.

2-Sec Pause

The phone waits two seconds before sending the next string of digits. It used “,” for the 2-sec pause.

To use Pause, select [Hard Pause] or [2-Sec Pause] from the menu, during dial.

Adjusting the Volumes

You can adjust the volumes by using the Jog up and down in Phone Mode. The jog is used to adjust Key Beep volume in call waiting mode and used to adjust Earpiece volume during a call. Jog Up key is for volume up, Jog Down key is for volume down. Not during a call, Ringer Volume is adjusted in the menu. Earpiece Volume can be adjusted in the menu, during a call.

Power Save Mode

When the phone is in an area without service for 15 minutes, it stops searching for service and enters into the Power Save Mode. When your phone activates this features, “Power Save” is displayed on LCD. The phone automatically checks for service periodically or you can check manually by pressing any key.

Emergency Dialing

You can dial Emergency number in a emergency situation even if keypad is locked or your account is restricted

1. To call 911, dial  and press  or press and hold  for 2 seconds.

2. Dial "911" and press  for Emergency Call.

 The 3 numbers at Settings ->Security->Emergency Number are possible to Emergency Dialing.

Speed Dialing

With this feature, you can dial the 99 Phone Book entries through one or two key press.

1. Press the number of the phone book location then press 

2. Press and hold the key related to the phone book location for 2 seconds.

 Speed Dial 9 is for Emergency Call, so you cannot change.

Chapter 3. Managing Call History

The Call History list consists of outgoing, incoming and missed call. It memories 12 recent call each Category. It is updated as new numbers are added to the beginning of the list. Each entry may contain a phone number, name, length of call and time stamp of when the call occurred. It makes redialing a number fast and easily.

-  Phone Mode and PIM Mode have Call History list in common.

Viewing the Call History List

1. Highlight [Call History] from the menu and press JOG or “Ok”.
2. Highlight Outgoing Calls or Incoming Calls or Missed Calls then press JOG or “Ok”.
3. The list displays. Scroll to review the call history using Jog key or Navigation Up/Down key.

Viewing Call Detail

1. Highlight the phone number you want to review and press JOG or “Ok”.
2. Highlight Call [Time/Date]. The time, date and call length display. You can review receiving call time on Incoming Call and Missed Call list, making call time on Incoming Call and Missed Call list, call length on Incoming Call and Outgoing Call list.

Making a phone call from the recent call history

1. Highlight the phone number you want to make a call and move to Entry screen.
2. Highlight [Call] from the menu or press .

Connect to the Internal Phone Book

1. Highlight the phone number you want to make a call and move to Entry screen.
2. If the number is stored in Phone Book, [Alternate #] displays. If the number is not stored in Phone Book, [save] displays.
3. If [Alternate #] is indicated, you can review the Phone Book Entry which is saved the phone number.
4. IF [Save] is indicated, you can save the phone number to the Phone Book.

Erasing a Call History Entry

Erasing each Item

1. Highlight the phone number you want to erase from the Call History List and go to the Entry screen.
2. Select [Erase].
3. Select [Yes].

Erasing all Category

1. Highlight [Call History] from the menu.
2. Highlight [Erase History].
3. Highlight Outgoing Calls or Missed Calls you want to erase.
4. Select [Yes].

Viewing the Air Time

You can review the calling time in Home Service area, calling time in Roaming Service area and total calling time. You can reset Home Calls time and Roam Calls time. The time on the screen means reckoned time from reset recently.

1. Highlight [Call History] from the menu.
2. Highlight [Air Time].
3. Highlight Home Calls or Roam Calls or Life Call Timer you want to review.
4. If you want to reset the call time in Home Calls or Roam Calls, select [Reset] from the menu.

Chapter 4. Internal Phone Book

Internal Phone Book can store telephone number information for about 4,000 peoples maximum. Each person can have 5 telephone numbers. Each Phone Book Entry can have 32 letters for the names of

people, each telephone number can have 32 letters maximum. Among these Phone Book data, telephone numbers often used can save as Speed Dial. Speed Dial can store 99. Besides, It is possible to record 20 Voice Dial Entry among the telephone numbers stored in Phone Book.

 The data of Internal Phone Book is same with the date Contacts application in PIM Mode. Contacts application of PIM Mode can make a phone call, change and store data. Internal Phone Book can't change the data directly and offer only function to erase, search data and make a phone call in Phone Mode.

Finding a number using a person's name (Look Up Name)

1. From the main menu, highlight [Phone Book].
2. When select [Look up Name] people's name list appears. Names of people in the Phone Book that start with that letter are displayed at the top of Phone Book list.
3. Scroll to the name you want or enter the second letter of the name as it appears in the Phone Book. Names of people in the Phone Book starting with that two-letter combination are displayed at the top of the Phone Book.
4. Highlight the name you want then press Jog or "OK".
5. Detail Screen of Phone Book Entry you choose appears. If the Entry have two number or more, Alternate Phone Numbers display on the screen. When this Entry is set Secret Entry, [Secret] display instead of phone number.

Make a Phone Call from the Phone Book

1. Select the name you want to make a phone call from the Phone Book in Phone Mode and go to Detail Screen
2. Highlight [Call] or press .

Editing a Phone Book Entry

1. Highlight the name you want from the Phone Book in Phone Mode and go to Detail Screen
2. Highlight [Edit]. "Opening the flip" message displays, when the phone is in Phone Mode.

Erase a Phone Book Entry

1. Highlight a name you want from the Phone Book in Phone Mode and go to Detail Screen.

2. Highlight [Erase Entry] and “Erased” appears on the screen to confirm that you have successfully deleted the entry.
3. Highlight [Yes].

Speed Dialing

1. Highlight [Phone Book] from the menu.
2. Highlight [View Speed Dial] and the whole list of Speed Dial displays. Speed Dial Entry is arranged in Entry Index order. Speed Dial can be updated 99.
3. Use Scroll Up/Down and search Speed Dial Index you want in whole list or input index using keypad. In case user input number, Index come to top of menu, menu is updated continually
4. Highlight the list and press OK or JOG.
5. Highlight [Call] in Speed Dial screen and make a call to the number
6. If you select [Contact Info], Phone Book Entry screen displays so that review the number saved in the Entry

Listening to a Voice Dial

1. Highlight [Phone Book] from the main menu.
2. Highlight menu [Voice Dial Entry] and the Voice Dial list appears. If there is no Voice Dial recorded “No Voice Dial Entry” alert is indicated.

Viewing My Phone number

1. Highlight [Phone Book] from the main menu.
2. Highlight [My Phone #] and you can review your Phone number.

Refer to Chapter 13, Message.

Environment

Environment is setting beforehand in consideration of the user's situation that can be happened. As you customize the Environment you need, you can set Audio volume and Backlight easily and quickly.

TM910B provide 7 Environment like below.

- Normal
- Meeting
- Car
- Silent
- Noisy
- Custom1
- Custom2

Each Environment has numerical value of Ringer, Earpiece, Key Beep Volume and Backlight Setting. You can change the Setting each Environment.

The name of Normal, Meeting, Car, Silent and Noisy Environment are reserved, Custom1 and Custom2

can be changed the name what you want.

When you choose one Environment, audio volume and Backlight setting is changed.

Tap [Edit] from the menu and it moves to Environment Category in Setting of PIM Mode.

 For more information about editing Environment, see Environment at Setting.

Touch Calibration

Refer to Stylus in Setting.

Part 3. PIM Mode

Chapter 6. Contacts

You learned how to making calls to the numbers stored in Internal Phone Book. The data of Internal Phone Book is based on the data stored in Contacts application. Call Log stores contents based on the data of Contacts and in Databook, you can add peoples stored in Contacts to Attendee. In addition, the data of Contacts is the most fundamental data that use different Application of TM910B, because Message application sends a message to phone number and Email Address saved in Contacts.

Contacts can use phone number information about maximum 4000 people. Each person can have maximum 5 phone numbers and register maximum 3 Email Address. Each Phone Book Entry can input maximum 32 characters of people's name and each phone number is possible to input maximum 32 characters. Email Address can be stored 48 characters. People saved in Contacts are controlled to be classified to 7 Groups.

Among the Contacts data, phone numbers often used can be saved to Speed Dial. Speed Dial is possible up to 99. In addition, among the phone numbers saved in Phone Book can be recorded 20 Voice Dial Entry.

You can also synchronize your contacts with the contacts you have stored in Address Book of personal computer application like Microsoft Outlook 97,98, 2000.

Adding Contacts

1. If main menu appear in PIM mode, tap . If in the another application screen, tap "Goto" and then tap "Contacts" .
2. Choose the item from [New] in the "Contacts" list screen. Or tap "Menu" and then tap [New].
2. "Contacts" Edit screen appears.

Adding a Name

- 1 Tap [Name] in "Contacts Edit" screen or tap field next to  icon. The Virtual Keyboard appears.
2. Input a name of Contacts Item you want to add to your Contacts.
3. Tap [Done] in Virtual Keyboard.

Adding a Email Address

Contacts Items can have 3 Email Addresses.

To add Email Address

1. Tap  in "Contacts" Edit screen list and then choose one among Email1, Email2, Email3.
2. Tap the empty line next to  icon and The Virtual Keyboard appears.
3. Enter the Email Address.
4. Tap [Done] in Virtual Keyboard.
5. If you want to input another Email Address, tap  icon and then choose another label. Enter the Email Address.

Adding Phone Numbers

1. Select the type of phone number in "Contacts" Edit screen.

Type of phone number : Home, Home2, Work, Work2, Mobile, Fax, Fax2, Pager, Other

2. Tap the empty line to the right of phone type. The Virtual Keyboard appears.
3. Enter the phone number.
4. Tap [Done] in Virtual Keyboard.

Adding an ID Ringer

1. Tap pop-up next to  icon in the "Contacts" Edit screen. The ring types are displayed.
2. Tap the ring type you want used for the contact.

When the contact calls you, the phone rings with the ring type selected.

Setting up Groups

1. Tap pop-up next to  icon in the "Contacts" Edit screen. A list of groups appears.
2. Tap the group you want to file the contact into.

If you don't select the specific group when you save, the contact belongs to the "Unfiled" group.

Adding a Address

1. Tap the empty line next to **A** icon in the "Contacts" Edit screen and The Virtual Keyboard appears
2. Enter the Address.
3. Tap [Done] in Virtual Keyboard.

Adding Notes

1. Tap the empty line next to **N** icon in the "Contacts" Edit screen and The Virtual Keyboard appears
2. Enter any notes pertaining to the contact.
3. Tap [Done] in Virtual Keyboard and "Contacts" Edit screen appears.
4. Tap [Done] again. Contact inputted is saved and Contacts list screen appears.

Make Secret

You can make a phone number to Secret Entry, in order not to that the phone number saved in Contacts is changed by other people.

The phone number assigned to the Secret Entry is not displayed, but [Secret] is displayed. You can still make and receive calls, but it is impossible to edit or delete before input the Lock Code.

1. Tap "Menu" in "Contacts" Edit screen.
2. Tap [Make Secret].

Look Up Contacts

1. Tap "Menu" in "Contacts" Edit screen.
2. Tap [Look Up] and the Virtual Keyboard appears.
3. Enter the name of person you are searching. As you add each letter, the display updates to show names with the same characters.
4. Select the name of person you are searching.
5. The phone numbers for that person appear.
6. To view more details on the person, tap [Detail] and it moves to Edit screen. You can change by using Virtual.

Making a Phone Call from the Contacts

1. Tap the name of group contained the people you want to call or tap [All] in "contacts" list screen.
2. Highlight the tap which have the first letter of the name.
3. Select the name you want to call from the list.

5. The selected name and the phone number of that person is displayed.
6. Tap  to the right of the phone number and you can make a call.

Erasing Contacts

1. Go to “Contacts” Edit screen you want to erase.
2. Tap “Menu”.
3. Tap [Erase] and the “Erase Contacts” screen appear.
4. Tap [OK].

Editing Contacts Group

1. Tap [Edit Group] from the top right of Contacts. Or tap “Menu” then tap [Edit Group] and “Edit Group” screen appears.
2. Tap the group name you want to change. “Group Name as” keyboard appears..
3. Enter the new name for the group..
4. Tap [Done] and “Edit Group” screen reappears.
5. Tap [OK].

Viewing Speed Dial

TM910B can have total 99 Speed Dial Entry. You can only assign the people saved in Contacts to the Speed Dial.

To view Speed Dial list, tap [Speed Dial] to the upper-right of Contacts. Speed Dial List appears.

Assigning Speed Dial

1. Tap [Speed Dial] in the Contacts.
2. Tap [Empty] Item from the list. “Speed Dial Edit” appears.
3. Select “Speed Dial #” next to label. Speed Dial Index list is displayed.
4. Select Speed Dial Index you want assign.
5. Select the field next to the “Name” label. “Look up Contacts” keyboard appears.
6. Enter the name of the Contacts you want assign to Speed Dial.
7. Select name and “Speed Dial Edit” screen reappears. Name, Number and Phone Type is displayed according to Contact you select.

Making a call from the Speed Dial

Chapter 15. Connect

input about PC Sync, Bluetooth **Connect**

Chapter 16. Calculator

The calculator of TM910B provides basic calculations and storing in memory.

You can input number of 12 figures maximum.

You will arrive at the correct calculation amount, only when there are no errors to the calculation formula, and the error sign will appear when there is an internal error to the formula or/and the calculating amount is out of range.

The calculator consists of the Display Window that shows a numerical formula and result and the buttons.

In display window, there are input value, selected operator and memorized value.

Memory section has the memorized value which is non zero.

The functions of button in bottom are summarized as follows

-           : When you input a value
-     : the fundamental rules of arithmetic buttons
-  : a prime number point button
-  : The calculated value subtracted from memorized by will be stored in memory
-  : The memorized value added with the calculated will be stored in memory.
-  : recall value stored in memory
-  : erase the memory value
-  : Do the percentage operation. Input a value, select an operator(+,-,*,/), input second value, and press "%" character to make it calculated.

For instance, if press " 50 * 25 %", 12.5 will be shown. If you press "50+25%", 25% of 50 will be added to 50. So, you get "62.5"

-  : Square the value.
-  : Get the square root of input value.
-  : Get the result of the input equation
-  : Change the sign of input value
-  : Clear the whole input equations.
-  : Clear the input value just before

Performing simple calculations

1. Open the flip.

2. If the main menu appears, tap  icon. If the main menu is not appear, tap Go to and then tap “Calculator”
