Guidelines

Read these simple guidelines. Breaking the rules may be dangerous or illegal. Further detailed information is given in this manual.

Exposure to radio frequency energy

Radio wave exposure and Specific Absorption Rate (SAR) information

This mobile phone model U8210 has been designed to comply with applicable safety requirement for exposure to radio waves. This requirement is based on scientific guidelines that include safety margins designed to assure this safety of all persons, regardless of age and health.

- The radio wave exposure guidelines employ a unit of measurement known as the Specific Absorption Rate, or SAR. Tests for SAR are conducted using standardized method with the phone transmitting at its highest certified power level in all used frequency bands.
- While there may be differences between the SAR levels of various LG phone models, they are all designed to meet the relevant guidelines for exposure to radio waves.
- The SAR limit recommended by the international Commission on Non-Ionizing Radiation Protection (ICNIRP), which is 2W/kg averaged over ten (10) gram of tissue.
- The highest SAR value for this model phone tested by DAS3 for use at the ear is 0.638 W/kg (10g).
- SAR data information for residents in countries/regions that have adopted the SAR limit recommended by the Institute of Electrical and Electronics Engineers (IEEE), which is 1.6 W/kg averaged over one (1) gram of tissue (for example USA, Canada, Australia and Taiwan).
- To maintain compliance with FCC RF exposure requirements, use only belt-clips, holsters or similar accessories that maintain a 1.5 cm. separation distance between the user's body and the back of the phone, including the antenna. The use of belt-clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Product care and maintenance

Warning: Use only batteries, charger and accessories approved for use with this particular phone model. The use of any other types may invalidate any approval or warranty applying to the phone, and may be dangerous.

- Do not disassemble this unit. Take it to a qualified service technician when repair work is required.
- Keep away from electrical appliance such as a TV, radio or personal computer.
- The unit should be kept away from heat sources such as radiators or cookers.
- Do not drop.
- Do not subject this unit to mechanical vibration or shock.
- The coating of the phone may be damaged if covered with wrap or vinyl wrapper.
- Use dry cloth to clean the exterior of the unit.
(Do not use solvent such as benzene, thinner or alcohol.)
- Do not subject this unit to excessive smoke or dust.
- Do not keep the phone next to credit cards or transport tickets; it can affect the information on the magnetic strips.
- Do not tap the screen with a sharp object; otherwise, it may damage the phone.
- Do not expose the phone to liquid or moisture.
- Use the accessories like an earphone cautiously.
Do not touch the antenna unnecessarily.

Efficient phone operation

To enjoy optimum performance with minimum power consumption please:

- Hold the phone as you speak to any other telephone. While speaking directly into the microphone, angle the antenna in a direction up and over your shoulder. If the antenna is extendable/retractable, it should be extended during a call.
- Do not hold the antenna when the phone is in use. If you hold it, it can affect call quality, it also may cause the phone to operate as a higher power level than needed and shorten talk and standby times.
- If your mobile phone supports infrared, never direct the infrared ray at anyone's eye.

Electronics devices

All mobile phones may get interference, which could affect performance.

- Do not use your mobile phone near medical equipment without requesting permission. Avoid placing the phone over the pacemaker, i.e. in your breast pocket.
- Some hearing aids might be disturbed by mobile phones.
- Minor interference may affect TVs, radios, PCs, etc.

Road safety

Check the laws and regulations on the use of mobile phones in the areas when you drive.

- Do not use a hand-held phone while driving.
- Give full attention to driving.
- Use a hands-free kit, if available.

- Pull off the road and park before making or answering a call if driving conditions so require.
- RF energy may affect some electronic systems in your motor vehicle such as car stereo, safety equipment.
- When your vehicle is equipped with an air bag, do not obstruct with installed or portable wireless equipment. It can cause serious injury due to improper performance.

Blasting area

Do not use the phone where blasting is in progress. Observe restrictions, and follow any regulations or rules.

Potentially explosive atmospheres

- Do not use the phone at a refueling point. Don't use near fuel or chemicals.
- Do not transport or store flammable gas, liquid, or explosives in the compartment of your vehicle, which contains your mobile phone and accessories.

In aircraft

Wireless devices can cause interference in aircraft.

- Turn off your mobile phone before boarding any aircraft.
- Do not use it on the ground without crew permission.

Children

Keep the phone in a safe place out of children's reach. It includes small parts which if detached may cause a choking hazard.

Emergency calls

Emergency calls may not be available under all cellular networks. Therefore, you should never depend solely on the phone for emergency calls. Check with your local service provider.

Battery information and care

- You do not need to completely discharge the battery before recharging. Unlike other battery systems, there is no memory effect that could compromise the battery's performance.
- Use only LG batteries and chargers. LG chargers are designed to maximize the battery life.
- Do not disassemble or short-circuit the battery pack.
- Keep the metal contacts of the battery pack clean.
- Replace the battery when it no longer provides acceptable performance. The battery pack may be recharged hundreds of times until it needs replacing.
- Recharge the battery if it has not been used for a long time to maximize usability.
- Do not expose the battery charger to direct sunlight or use it in high humidity, such as the bathroom.
- Do not leave the battery in hot or cold places, this may deteriorate the battery performance.

Installing the USIM card

Your USIM card contains your phone number, service details and contacts and must be inserted into your handset.

If your USIM card is removed then your handset becomes unusable until a valid one is inserted. Always disconnect the charger and other accessories from your handset before inserting and removing your USIM card.

Your USIM card may only be used in handsets which are enabled for 3 services. Any attempt to use the USIM card in other handsets may result in serious damage to the handset and may prevent you from being able to use it, including the making of emergency calls.

Installing the USIM card

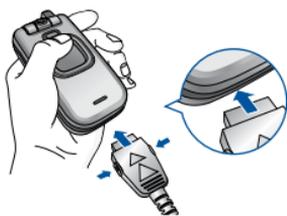

Notice

Before installing always make sure that the phone is switched off and remove the battery.

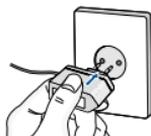

The metal contact of the USIM card can be easily damaged by scratches. Pay special attention to the USIM card while handling and installing. Follow the instructions supplied with the USIM card.

Charging the Battery

To connect the travel adapter to the phone, you must have installed the battery.

1. With the arrow facing you as shown in the diagram push the plug on the battery adapter into the socket on the bottom of the phone until it clicks into place.

2. Connect the other end of the travel adapter to the mains socket. Use only the included packing charger.

⚠ Warning Do not force the connector as this may damage the phone and/or the travel adapter.

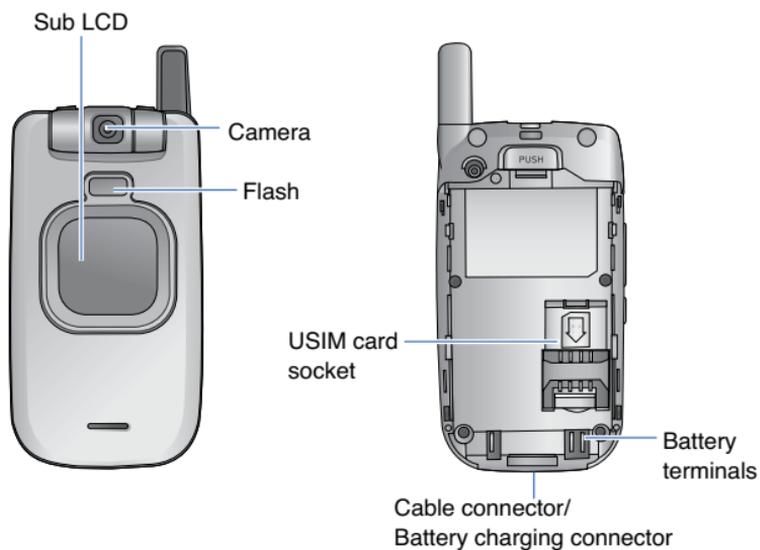

Disconnecting the charger

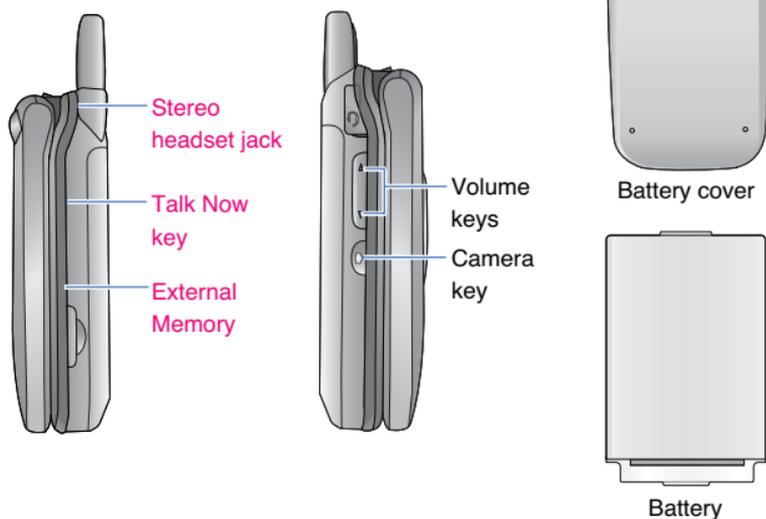

Disconnect the travel adapter from the phone by pressing its side buttons as shown in the diagram.

- ❗ **Note**
 - Ensure the battery is fully charged before using the phone.
 - Do not remove your battery or the SIM card while charging.
 - The moving bars of battery icon will stop after charging is complete.
 - If the battery is completely discharged, the charge could take some minutes before starting.
- ❗ **Note** If the battery does not charge,
 - switch the phone off.
 - ensure the battery is correctly fit.

Part of the Phone

Side of handset Keys

Key functions

- Note** While the folder is closed, long press the 3rd side key to turn on the backlight of the Sub LCD. By pressing the key again briefly in this mode, you can open the Entertainment menu.

Display information

No Sim Idle Screen

This is the initial screen of the phone that appears when there is no Sim card installed in the phone, or the installed Sim card is invalid. In this screen, users can only make emergency calls, and turn the phone off. To turn off the phone, press and hold the End key for a while.

Screen Structure

If there is no Sim card installed, an animation telling you to insert a Sim card appears. If the Sim card inserted into the phone is invalid, an animation telling you that the Sim card is locked appears.

Emergency Call Function

The left soft key is represented by “SOS” on the screen. Key in your desired emergency call number using the number keys, and then press the OK key to make an emergency call.

Idle Screen

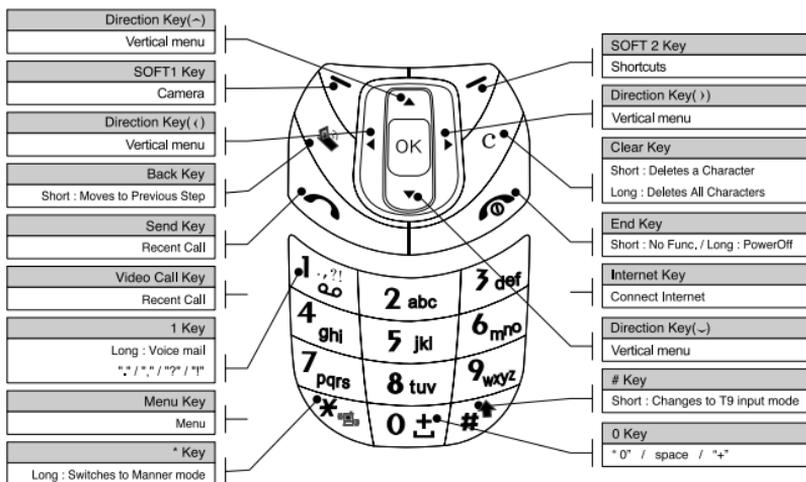

The idle screen appears when you have installed a proper Sim card and turned the phone on.

Screen Structure

Idle screen consists of the operator’s name, indicators, date, and time on a background image. You can configure the background
Display → **Main display** → **Home Screen** → **Wallpaper**.

Key Functions

The functions of the keys in the idle screen status are described below.

Numbering Screen

The numbering screen appears when a number key is pressed in the idle screen.

Screen Structure

The numbering screen consists of status indicators, dialled number, and soft menu. Status indicators are the same as that of the idle screen. The dialled number is displayed in the size and colour configured in Display → Font. You can make a call while dialling a phone number by pressing the Send or Video Call key.

The numbering screen appears when a number key is pressed in the idle screen.

Soft Key

You can use the soft keys for several functions while dialling a number. Using the left most soft key, you can send a message to the current dialled number, you can search for numbers in addressbook, and using the  key, you can input hyphen, manual hold, or time hold characters within the number. Using the middle soft key, you can save the current dialled number to the electronic organiser. Using the right most soft key, you can search the current dialled number in the electronic organiser.

Phone Lock Screen

When the phone lock function is selected, you can only make an emergency call, release the lock, and turn off the phone in this screen. As always, you can turn the phone off by pressing and holding the End key for a while.

Screen Structure

The screen structure of the Phone Lock screen is the same as that of the idle screen, except that the lock message appears instead of the idle screen banner.

Emergency Call Function

You can make an emergency call using the left soft key. Like the No Sim Idle screen, the emergency numbers are displayed.

Unlock Function

If you press the OK key, a popup screen appears asking you to input the PIN code to unlock the phone. The PIN code is configured by selecting **Settings** → **Security** → **Change codes**. If you key in an incorrect PIN code, the phone will remain in phone lock status. If you key in the correct PIN code, the phone will be unlocked, and the idle screen will be displayed. If you have turned the phone off in

the phone lock status, you will find the phone remains in phone lock status when you turn it on.

Turning your handset on

Ensure that your USIM card is in your handset and the battery is charged.

Press and hold the  key until power is on.

Enter the USIM PIN code that was supplied with your USIM card if PIN code setting is on.

After a few seconds you will be registered on the network.

Turning your handset off

Press and hold the  key until power is off.

There may be some delay while the handset powers down.

Do not re-power the handset during this time.

Access Codes

You can use the access codes described in this section to avoid unauthorized use of your phone. The access codes (except PUK and PUK2 codes) can be changed by using the Change codes feature [Menu 3.5.2].

PIN code (4 to 8 digits)

The PIN (Personal Identification Number) code protects your USIM card against unauthorized use. The PIN code is usually supplied with the USIM card. When the PIN Code Request is set to Enable, your phone will request the PIN code every time it is switched on. When the PIN Code Request is set to Disable, your phone connects to the network directly without the PIN code.

General Functions

PIN2 code (4 to 8 digits)

The PIN2 code, supplied with some USIM cards, is required to access functions such as Fixed Dial Number. These functions are only available if supported by your USIM card.

PUK code (4 to 8 digits)

The PUK (PIN Unblocking Key) code is required to unlock a blocked PIN code. The PUK code may be supplied with the USIM card. If not, contact Orange Customer Service for the code. If you lose the code, contact Orange Customer Service.

PUK2 code (4 to 8 digits)

The PUK2 code, supplied with some USIM cards, is required to unlock a blocked PIN2 code. If you lose the code, contact Orange Customer Service.

Security code (4 to 8 digits)

The security code protects the unauthorized use of your phone. The default security code is set to '0000' and the security code is required to delete all phone entries and to restore the handset to factory setting.

Barring Password

The barring password is required when you use the call barring function. The password is obtained from the Orange Customer Services when you subscribe to this function.

Making and Answering calls

Ensure you tell the other party before recording a voice call.

Making and Answering a video call

You can make/answer a video call to a 3G video phone the other party must have a 3G video phone and be in a video service area.

To make/answer a video call, do the following.

1. Input the phone number using the keypad, or select the phone number from the calls made/received lists.

Note To correct mistakes, press the  key briefly to delete the last number, or press and hold the  key to delete all numbers.

2. If you do not want to use the speakerphone, ensure you have the headset plugged in.

3. To start the video function, press .

Note You will be notified that you will need to close other applications to make the video call.

Note The video call may take some time to connect. Please be patient. The connection time will also depend on how quickly the other party answers the call. While the video call is connecting, you will see your own images; after the other party has answered, their image will be displayed on screen.

4. Adjust the camera position if necessary.

5. Press the end key to finish the call, or close the handset.

Making a voice call

1. Make sure your handset is powered on.

2. Enter the number including the full area code.

▶ To delete a digit press the  key.
To delete all digits press and hold the  key.

3. Press the  key to make the call.

4. Press the  key to finish the call, or close the handset.

Note To activate the speakerphone during a call, you have to press and hold the  key for at least 2 secs.

Making a voice/video call from Contacts

It is easy to call anyone whose number you have stored in your Contacts.

Press the down navigation key to access contact list.

Scroll to your chosen contact and press the  key. To make a voice call press the  key.

To make a video call press the  key. Press the  key to finish the call.

Making International Calls

1. Press and hold the  key for the international prefix. The '+' character can be replaced with the international access code.
2. Enter the country code, area code, and the phone number.
3. Press the  key.

Adjusting the Volume

During a call, if you want to adjust the earpiece volume, use the side keys of the handset. In idle mode with the flip cover open, you can adjust the key volume using the side keys.

Answering a Call

When you receive a call, the phone rings and the flashing phone icon appears on the screen. If the caller can be identified, the

General Functions

caller's phone number (or name if stored in your Contacts) is displayed.

1. Open the flip and press the  key to answer an incoming call. If the Press any key menu option has been set to  key, Press any key will answer a call except for the  key.

Note • To reject an incoming call, press the  key or the right soft key twice.

• If you set "Answer mode" as "On flip open" (Menu 1.9.4), you can answer the call simply by opening the flip.

2. End the call by closing the handset or pressing the  key.

Note You can answer a call while using the Contacts or other menu features.

Signal Strength

If you are inside a building, being near a window may give you better reception. You can see the strength of your signal by the signal indicator see the strength () on your handset's display screen.

Entering Text

You can enter alphanumeric characters using the keypad. For example, storing names in the Contacts, writing a message, creating a personal greeting or scheduling events in the calendar all require entering text.

Following text input methods are available in the handset.

Changing the Text Input Mode

1. When you are in a field that allows characters to be entered, you will notice the text input mode indicator in the upper right corner of the display.

2. Short pressing the  key cycles between  ,  ,  and  . A long press changes mode to  .

Using the T9 Mode

The T9 predictive text input mode allows you to enter words easily with a minimum number of key presses. As you press each key, the handset begins to display the characters that it thinks you are typing based on a built-in dictionary. As new letters are added, the word changes to reflect the most likely candidate from the dictionary.

1. When you are in the T9 predictive text input mode, start entering a word by pressing keys  to . Press one key per letter.
 - ▶ The word changes as letters are typed - ignore what's on the screen until the word is typed completely.
 - ▶ If the word is still incorrect after typing completely, press the  key once or more to cycle through the other word options.

Example

Press     to type Good

Press the  key to get Home

- ▶ If the desired word is missing from the word choices list, add it by using the ABC mode.

2. Enter the whole word before editing or deleting any keystrokes.
3. Complete each word with a space by pressing the  key.

To delete letters, press the  key.

Press and hold down the  key to erase entire words.

Using the ABC Mode

Use the  to  keys to enter your text.

1. Press the key labeled with the required letter:
 - ▶ Once for the first letter
 - ▶ Twice for the second letter
 - ▶ And so on
2. To insert a space, press the  key once. To delete letters, press the  key. Press and hold down the  key to clear the display.

Using the 123 (Number) Mode

The 123 Mode enables you to enter numbers in a text message (a telephone number, for example).

Press the keys corresponding to the required digits before manually switching back to the appropriate text entry mode.

Using the Symbol Mode

The symbol mode enables you to enter various symbols or special characters.

To enter a symbol, press the center soft key [Symbol]. Use the navigation and numeric keys to select the desired symbol and press the **OK** key.

Key description

Each key can be used for several symbols. There are shown below.

| Key | Characters in the Order Display | |
|-----|---------------------------------|-------------------------|
| | Lower case | Upper case |
| 1 | . , ? ! 1 | . , ? ! 1 |

Multi Tasking

Task Manager works on sub-LCD, displaying the list of modules currently running. It uses this list to control switching between modules, present status confirmation and close modules.

Multi-tasking can be enabled using the Menu key.

- **Menu key (short press)**

Displays the menu list on the main or sub-LCD. This function ensures that the menu is displayed regardless of which module is running.

- **Menu key (Long press)**

Displays a list of applications currently running on the sub-LCD. You can use the Navigation key and CENTER key to switch to the application you want. Alternatively, you can use the END key to close a module.

- **Menu key (double press)**

Works through applications running on the main LCD and Sub-LCD one at a time.

Main Menu

You can launch a menu by pressing the Menu key over numeric key 2 in the idle screen. Move to a desired item and press the OK key to go into the sub menu.

You can also go into a submenu by directly pressing the corresponding numeric key as follows.

The main menu consists of the following high-level and sub menus.

1 Call manager

- Call history

1. Call Manager

1.1 Call history

You can view missed, received, dialled and entire call records.

Each call record menu provides the following functions.

- You can make a voice or video call to the number in the call record.
- You can save the number in the call record in the addressbook.
- You can send a message to the number in the call record.
- You can view detailed information of the call records such as the date, time and call time.
- You can clear call records.

1.1.1 Missed calls

Allows you to view missed call records, make a call, send a message, and save the number in the addressbook.

1.1.2 Received calls

Allows you to view received call records, make a call, send a message, and save the number in the addressbook.

1.1.3 Dialed calls

Allows you to view dialled call records, make a call, send a message, and save the number in the addressbook.

1.1.4 All calls

Allows you to view all of the missed, received, and dialled call records. You can make a call, or send a message to the number you have selected from the records. You can also save the number in the addressbook.

1.2 Video call

- 1. Hide my picture:** Option to determine whether to send my picture during VT.
 - **On:** Do not send my picture.
 - **Off:** Send my picture.
- 2. Substitute picture:** Option to determine a video to send during VT.
 - **On:** Send substitute video instead of my picture.
 - **Off:** Send my picture.
- 3. Substitute picture file:** Option to select substitute video to send instead of my picture during VT.

1.3 Call duration

You can view call time by types. Press Soft2 Key for initialisation. Initialisation will require your PIN number.

1.3.1 Last Call

Shows the latest call time in units of hour/minute/second.

1.3.2 Received calls

Shows incoming call time.

1.3.3 Dialed calls

Shows outgoing call time.

1.3.4 All calls

Shows total call time.

1.4 Call costs

1. This function displays your call cost of the last and entire calls.
2. To initialise, press 'Clear' button, and input PIN code.
3. Select Cost Setting to configure call cost settings and call cost limit.
4. You can select either Unit or Currency in call cost settings. According to your setting, call cost is displayed when a call is terminated.
5. In the call cost limit configuration, select On to configure the cost limit. When cost limit is configured, and call cost reaches the limit, making a call will not be allowed

1.5 Call divert

Call divert menus for video, voice, data and fax calls are provided. However, available menus are determined by the SIM supporting CPHS.

The menu consists of Video calls, Voice calls, Fax calls, Data calls.

The Video calls menu provides menus to divert video calls and the Voice calls menu provides menus to divert voice calls. The Video calls and Voice calls menus have the following submenus.

If you select Video calls, The All video calls, If busy, If no answer and If unreachable menu list appears.

If you select Voice calls, The All voice calls, If busy, If no answer and If unreachable menu list appears.

1.5.1 Video calls

1.5.1.1 All video calls

1. When the off menu is selected – Deletes Call Divert Number registered to the network. While waiting for the result from the network, Requesting message and animation appears. When the network answers, the result of the operation is displayed.
2. When the To voicemail centre is selected, it activates or deactivates a Voicemail centre number. To register the VMS number, select Messages ? Settings ? Voice mail centre from the menu. If you select this menu when there is no registered number, the “VMS not activated” message appears. Selecting this menu when there is a registered number displays Requesting message and animation. When the network answers, the result of the operation is displayed.

3. When To other number is selected – A dialogue window appears allowing you to enter a phone number to divert to. Input a phone number to divert calls to, and press OK button. While waiting the result from the network, Requesting message and animation appears. When the network answers, the result of the operation is displayed.
4. When Input dial number (DN) is selected – A menu appears, a user selects To other number, and inputs a number. Divert registration is performed with the selected number. Select the number, and press the OK button. While waiting for the result from the network, a Requesting message and animation appears. When the network answers, the result of the operation is displayed.
5. Options menu – After activating the All video calls menu, selecting the Options menu at the bottom of the menus displays the Activate, Deactivate, Cancel all, View status and clear list menus. Activate: Move to Settings menu (above 1~4) to activate call divert. The View status menu shows the settings on the network. If you select this menu, Requesting.. message and animation appear. View status menu enables users to view the current network configuration. Selecting View status menu displays Requesting message with animation and the result of the operation when the network answers. Barring password menu enables users to change current barring password.

International calls

1. When OK button is selected. It operates the same to Outgoing calls menu.

2. When Options menu is selected – It activates and operates International calls menu. It operates the same to Outgoing calls menu.

International except home country

1. When OK button is selected It operates the same to Outgoing calls menu.
2. When Options menu is selected – It activates and operates International except home country menu. It operates the same to Outgoing calls menu.

Incoming calls

1. OK button select It operates the same to Outgoing calls menu.
2. When Options menu is selected – It activates and operates Incoming calls menu. It operates the same to Outgoing calls menu.

Incoming calls when abroad

1. OK button select. It operates the same to Outgoing calls menu.
2. When Options menu is selected – It activates and operates Incoming calls when abroad menu. It operates the same to Outgoing calls menu.

1.8 Call waiting

This menu consists of All Calls Voice call, Video call.

If you select one, activate/deactivate/view status menu list appears.

1. **Activate:** Activates waiting service. Selecting this item, displays requesting message and animation. When the network answers, the result of the operation is displayed.
2. **Deactivate:** Deactivates Call waiting service. Selecting this item displays requesting message and animation. When the network answers, the result of the operation is displayed.

- 3. View status:** Displays activated Call waiting service group item of the network. Selecting this item displays requesting message and animation. When the network answers, the result of the operation is displayed.

1.9 Settings

1.9.1 Call reject

Automatic menu: Users can configure to reject all or a specific number calls by selecting Deactivate, Reject on list, or Reject all calls menu. Selecting Deactivate disables Automatic call reject. Selecting Reject on list rejects only reject target numbers saved in Phone book. Selecting Reject all calls rejects all arriving calls unconditionally by silent or disconnecting. When you configuring Reject on list mode, you can add number to reject by using 'List' menu. When you adding a number to the list, you can select either 'Silent', or 'Disconnect'. You can input number directly or by searching Addressbook using 'Search' key.

Manual menu: When On is selected, press and hold the side key for a while to reject a call by silence, and press and hold the side key for a while once again to reject a call by disconnecting. When Off is selected, side key does not work for call reject operation.

1.9.2 Send my number

- 1. Set by network:** Configures with the default settings determined by the service provider.
- 2. On:** Configures to send my phone number when making an outgoing call.
- 3. Off:** Configures not to send my phone number when making an outgoing call.

1.9.3 Auto redial

Allows you to set the auto redial function when a call attempt has failed.

1.9.4 Answer mode

Allows you to set the answering method. You can choose between opening the folder, pressing the Send key, and pressing any key.

1.9.5 Minute reminder

Determines whether to sound a 1 minute tone every 1 minute when you are on the phone.

1.9.6 Select line

In case of dual line, you can select line.

2. Address Book

This is an addressbook function to record and manage contact addresses. Using the Addressbook Management menu, you can register new contact addresses, or can search for desired addresses by name, phone number, or groups.

2.1 Add new

You can register a new contact address.

You can input the name, phone numbers, Email addresses, assign it to groups, include memo, company / party, position / occupation, home address, office address, home page URL, ring tone, and avatar or image (photograph) in the contact address information.

You can input and manage contact addresses depending on the memory usage.

2.2 Search

Performs the contact address search function. The search operation is performed based on a name as a default. The current search method and results found are displayed in the Search window. On the right side of the screen, an image or avatar registered to the selected contact address appears. You can make a phone call or send a message to the selected phone number. An address search can be performed based on the phone number, the Email address or group information.

2.3 Speed dials

Using this menu you can manage speed dials. Speed dials are configured between 2~9. You can register speed dials for any number of 5 numbers for a specific contact address, and a contact address may have multiple speed dials.

2.4 Group manager

Using this menu you can manage group information. There are 4 default groups: Friend, Family, Colleague and School. You can add, edit and delete groups. You can also assign an image and a ring tone for each group. When a bell for a number is not specified, a call from the number sounds the group ring tone assigned to the number for the group.

2.5 Own number

You can save up to 2 own numbers being used in the USIM card, and send the number to another person through Card.

2.6 Settings

2.6.1 Display data

Determines where phone book data is stored. You can select mobile phone memory, USIM (SIM) card, or both of them. Handset & SIM is the default setting. You can change the setting by using the left and right keys.

2.6.2 Show image/Avatar

You can select whether checking only name or name with image on the list of search or contacts.

- **On:** name with image on the list of search or contacts
- **Off:** only name on the list of search or contacts

2.6.3 Copy all

You can copy contact address information from the phone memory to the USIM (SIM) or from USIM (SIM) to the phone memory. You can copy just selected items or all of them.

2.6.4 Move all

You can move contact address information from the phone memory to the USIM (SIM) or from the USIM (SIM) to the phone memory. You can move just selected items or all of them.

2.6.5 Clear address book

Clears contact address information. You can delete a contact address saved in the mobile phone memory as well as in the USIM (SIM) card.

3. Settings

3.1 Time & Date

Although the current time is automatically configured when the phone is registered to the network, users can configure time and date directly using 'Time & Date' menu. The time configured by user is valid only while the phone is turned on.

3.1.1 Time

Scroll down to select the hour indicator format i.e Off, Cuckoo clock or Chime bell.

1. Select the 'Time' item from the Time & Date list, and then press [OK] [Select].
2. Move to your desired field, 'Time', 'Minute', or 'AM'/ 'PM' field using the navigation keys.
3. Input 'Time', and 'Minutes' using the number keys.
4. Press the [OK] or [Confirm] key to set the time with the specified value.

3.1.2 Date

1. Select 'Date' item from the Time & Date list, and then press [OK] [Select].
2. Select date format using Left and Right navigation keys or by pressing the [Setup] key.
3. Input 'Year', 'Month', and 'Day' using the number keys.
4. Press [Done] [Confirm] to set the date with the specified value.

3.1.3 Auto Update Data/Time

When Auto Update is configured to **On**, the time and date are automatically updated according to the current location. If **Confirm first** is selected, time and date update are confirmed before the automatic update.

When Autoupdate is **On**, the option selected in daylight saving will

not make any effect.

3.1.4 Daylight Saving

Configuring Daylight saving to On Applies daylight saving time for the currently selected home city in world time. If the home city does not support summer time, Daylight saving can not be set to **On**.

3.2 Network

3.2.1 Network selection

1. If you select Network selection you can select either Automatic or Manual.
2. If you select Automatic, connection continues according to the Automatic network selection procedures.
3. If you configure the Network mode to GSM-preferred, UMTS-preferred or Automatic, all the currently available PLMN lists are found, and you can select one item from the list for registration. If you configure the Network mode to GSM only, the currently available UMTS PLMN list is found, and you can select one item from the list for registration. If you configure the Network mode to UMTS only, the currently available GSM PLMN list is found, and you can select one item from the list for registration.

3.2.2 Preferred lists

1. Select Preferred lists to display the preferred list saved in the current SIM card.
2. You can edit and save a preferred list in the SIM card by selecting the menu when the preferred list is displayed.
 - **New:** Adds an item selected from the popup list to the preferred list.
 - **Delete:** Deletes the value of the preferred list item.
 - **Move up:** Moves the preferred list item up.
 - **Move down:** Moves the preferred list item down.

3.3 Access points

Access points

This menu shows the access point list. You can register, delete and edit by using the Option Menu. However, you cannot delete or edit default configurations provided by Orange .

You can edit the following configuration items by selecting the right soft key.

| | |
|-------------------------|---|
| Connection title | Access Point profile name |
| Bearer | Choose the bearer from the list. (Default is "Packet Switching") |
| Authentication | Choose the authentication from the list. (Default is "No auth") |
| Username | Information provided by Service Provider. |
| Password | Information provided by Service Provider. |
| APN | APN name to access network. Information provided by service provider. |
| Traffic Class | Choose the Traffic Class from the list. (Default is "Subscribed") |

| | |
|----------------------------|---|
| Req. Max UL Bitrate | Choose the Request Maximum Upload Bitrate from the list. (Default is “Subscribed”) |
| Req. Max DL Bitrate | Choose the Request Maximum Download Bitrate from the list.(Default is “Subscribed”) |

- Press “Save” key to save any configuration changes.

3.4 Security

You can activate a PIN code. When it is activated, a window asking you to enter the PIN code appears when you turn on the phone so as to prevent unauthorized use of the phone.

3.4.1 PIN code request

You can activate a PIN (Personal Identification Numeric). You can check the current status of configuration from the status bar.

| Item | Description |
|---------------------|---|
| Enable PIN Request | You have to input the PIN code each time the mobile phone is turned on. |
| Disable PIN Request | You do not have to input the PIN code when the mobile phone is turned on. |

PIN request and release procedures

1. Select ‘PIN request’ item from the list, and press [Select]. Then a window allowing you to select ‘Enable’ or ‘Disable’ appears.
 - Select ‘Enable’/‘Disable’ from the list, press [Select], and input the current PIN code to set the PIN request. If ‘PIN request’ is already enabled/disabled, an “Already enabled”/ “Already disabled” message will be displayed.
2. 3 incorrect PIN code entries in the PIN code input window would invalidate the PIN code. In this case, you have to input the PUK (PIN Unblock Key) code to configure the PIN code again.

3. The maximum allowed numeric of attempts of PUK input is 10 times. 10 occasions of incorrect PUK entries would limit the mobile phone use.

Press the Back key in the PIN code input window to return to the previous step.

3.4.2 Handset lock

You can lock your mobile phone to prevent it being used by other people. The following 4 lock functions are provided.

- **When switching on:** Whenever the mobile phone is turned on.
- **If SIM Changed:** When the mobile phone's SIM card has been changed.
- **Immediate:** Locks the phone immediately.
- **None:** Cancels lock function.

3.4.3 Change code

You can change PIN, PIN2, the mobile phone password and the call barring password.

3.4.3.1 PIN

PIN is the abbreviation of Personal Identification Numeric, and is used to restrict the use of an unauthenticated user.

PIN Password Change Procedure

1. Select 'PIN' from the 'Change code' list and then press [Select].
2. Input the current PIN, and press [Select].
3. Input the new PIN, and press [Select].
4. Input the new PIN once again, and press [Select].
 - If the PIN is different from that of step 3, the procedure is restarted from step 3.

5. When the PIN is properly changed, a “Successfully Changed” message as well as new PIN code appears. With an incorrect PIN input in step 2, the procedure is restarted from step 2, and the remaining allowed numeric of input attempts is decreased by 1.
6. Press the Back key in the PIN code input window to return to the previous step.
 - * 3 incorrect PIN code entries in the PIN code input window would invalidate the PIN code. In this case, you have to input the PUK (PIN Unblock Key) code to configure the PIN code again. The maximum allowed numeric of attempts of PUK input is 10 times. 10 occasions of incorrect PUK entries would limit the mobile phone use.

3.4.3.2 PIN 2

PIN2 is the abbreviation of Personal Identification Numeric 2, and is used to restrict the use of unauthenticated users like PIN. PIN2 numeric change procedure is the same to that of PIN. 3 incorrect PIN2 code entries would invalidate the PIN2 code. In this case, you have to input PUK2 to use the PIN2 code again. The maximum allowed numeric of attempts of PUK2 input is 10 times, like PUK1. 10 incorrect PUK2 entries would invalidate the PUK2.

3.4.4 Certificates

If stored, a list of root/ca certificates required for WTLS/TLS can be found here. Certificates can be viewed or deleted from the list.

3.4.5 Session clear

Secure (WTLS/ TLS) session data can be cleared using this option. Session data should be cleared to establish a new secure session.

3.5 Language

This function changes the language used in the phone.

Automatic

English

Français

Italiano

Deutsch

Nederlands

3.6 Memory Status

This function shows the usage of the memory of the mobile phone that can be used to save user data. User data is saved in a FLASH memory, a type of non-volatile memory, keeping saved data permanently unless the data are deleted by user.

3.6.1 Common memory

This function shows the status of the user memory of the mobile phone. This gives the used size of each component in terms of bytes and kilobytes. Since this function scans the overall file system for statistics, a few seconds are required.

3.6.2 Reserved memory

Displays the amount of memory the phone(PIM) is using.

This gives the used size of each component in terms of percentage.

3.6.3 SIM memory

This function shows the status of the SIM card user memory. This function requires a few seconds to display the memory usage statistics.

3.6.4 External memory

This function shows the status of the External card user memory. If the card is not inserted it gives warning message.

This function displays the In-use and free memory usage statistics.

3.7 Handset info

This function shows the version of the mobile phone software. It displays the handset number of the mobile phone. It displays the model number of the mobile phone.

3.8 Reset Settings

It displays the handset number of the mobile phone. It displays the model number of the mobile phone.

In Clear memory “Phone content” will reset Address book, Messages, Diary, Calls, Favourite. “Phone personal info” will reset Video, Audio, Image, Java, Book mark and saved pages. “USIM memory” will reset SIM memory. “External memory” will reset the external memory.

4. Multimedia

4.1 Camera

4.1.1 Taking a Picture (Still picture)

1. Select Camera or press the numeric key (#1) from the Media album menu.
2. Environment Setting.
 - Select the [Option] key.
 - **Size:** Select 'Size ' and choose one from 1280x960 (only for the outside camera), 640x480, 320x240, 160x120, wallpaper size and address book size. 320x240 means the width of picture is 320 pixels and the height is 240 pixels.
 - **Quality:** You can select the desired quality of picture by selecting either super fine, fine or standard.
 - **Flash:** Select either Always on (always use flash), When taking (only when taking a picture) or Always off (do not use flash).
 - **Zoom:** You can select zoom level according to the picture size and preview size, and the range of zoom level is 0 to 10. For pictures with 1280x960 for the outside camera and 640x480 for inside camera, only zoom level 0 (1:1) is supported.
 - **Brightness:** You can select a level from -2.0 to 2.0 with step size 0.5. The higher the level, the more brighter the screen.
 - **White balance:** Using this function you can adjust the tone of the background picture according to the weather by selecting either Auto, Daylight, Cloudy, Shade or Fluorescent.
 - **Delay timer:** Using this function you can delay the camera shutter time by selecting either Off, 3 seconds, 5 seconds or 10 seconds.
 - **Camera Effect:** Using this menu you can select special camera effect by selecting either Normal, Mono or Sepia.
 - **Shutter sound:** You can select the camera shutter sound by selecting either No sound, Sound1 or Sound2.

3. Taking a Picture

- Adjust the camera position so that object is in the center of the screen, and then press the Take key to take a picture of the object. A taken picture saved in the internal (phone)flash memory or the external flash memory. To view existing taken pictures, select album soft menu. Then the Picture album is launched, and displays existing pictures as thumbnails. Move to a desired picture to view, and select [View: View] to view the picture. You can also send a selected picture to the other party through the MMS or Email service by pressing the Send key in the thumbnail list screen.

Summary)

[Take a Picture] → Press the Take key.

[Option] → Size → Select 1280*960, 640*480, 320*240, 160*120,
Wallpaper or address book size
→ Zoom → Select zoom level

[Album] → View pictures taken

4.2 Video recorder

1. This function is selected when you select 2. Camcorder from the Multimedia album keys in 1 Camera mode.
2. Environment Settings
 - Press the [Option] key.
 - **Quality:** You can select the desired quality of video by selecting either Super fine, Fine or Standard (just as you can in Camera)
 - **Flash:** Select either Always on (always use flash), When recording (only when recording a picture) and Always off (do not use flash).
 - **Zoom:** Same as Camera

- **Brightness:** Same as Camera Recording time: You can select recording times of 30 seconds, 1 minute, 2 minutes, 5 minutes, unlimited, MMS. MMS means that the recording time is restricted by the maximum file size can be sent.
- **Effect:** Using this menu you can select a special camcorder effect by selecting either Normal, Mono or Sepia.
- **Recording time:** You can select recording times of 10 seconds, 30 seconds, or 1 minute.

3. Recording a video

Put the camcorder where you want it and press the “Rec.” key to start recording. Press the “Stop” key again to stop recording. The recorded video is saved in the gallery. To view the recorded video, select [List], select a desired video thumbnail from the video list and press “Play”.

Summary)

[Record] → “Rec.” button.

[List] → Play recorded video

4.3 Voice Recorder

Press the left soft key to display the option pop up menu before recording.

Move to the desired menu item using the up and down key and press the OK key.

1. **Quality:** You can select a recording quality from Super Fine, Fine and Normal.
2. **New Recording:** Select this menu to start recording to a new file.
3. **Album:** Select this menu to move to the Sound album. The recorded files are saved in the Voice Records folder.
4. Press the right soft key to close the sub-menu popup window.

Pressing the OK key starts recording. When a recording is started, the recording time and the current recording file name appear on the LCD. To cancel the recording, press the right soft key.

Pressing the left soft key during recording allows you to select either Stop Recording or Cancel Recording. Select the desired function by using the up and down key and press the OK key.

When you finish the recording, press the OK key to stop. The recorded file is automatically saved in Sounds → Voice Records folder.

When no recording is in progress, pressing the OK key starts recording on a new file.

When no recording is in progress, press the right soft key to send a recorded file.

Select one from Via Picture Msg, Via Email, and Via Bluetooth using the up and down keys and press the OK key.

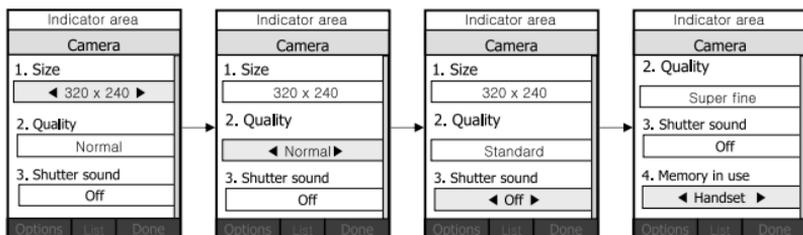

Press the left soft key to select various options after the voice recording.

Select the desired menu using the up and down key and press the OK key.

- 1. Record New:** Select this menu to start a new voice recording.
- 2. Send:** Select this menu to send the recorded file.
Select one from Picture Msg, Email, and Bluetooth using the up and down keys and press the OK key.
- 3. Ring tone:** You can select a ring tone for a voice and for a video call using the up and down keys.
- 4. Album:** Select this menu to move to the Sound album. The recorded files are saved in the Voice Records folder.
- 5. Delete:** Select this menu to delete a recorded file.
- 6.** Press the right soft key to close the sub-menu pop-up window.

7. Select the Power off: Select the Power off option to enable or disable the alarm at Phone Power off.

When you have completed configuration, press the [] key [Save] to save the changed alarm configuration.

12.3 Connetivity

12.3.1 Bluetooth

Menu → **Extras** → **Connectivity** → **Bluetooth**

1. Paired Device (Registering a Device)

- Initial Screen: Shows the (paired) devices within the phone.
 - Press Option Key
1. Add new: Using this menu you can register new Bluetooth devices.
 - A. If you select the Add new, surrounding Bluetooth devices are found and listed.
 - B. If you select a model and click OK, you can view the device information.
 - C. If you press Bond, Passcode Input screen is displayed where you can register a paired device to add the device to the paired device list.
 2. Assign short name: You can rename the other phones registered to your phone if necessary.
 3. Connect: Using this menu you can connect an audio device. This option menu appears only for audio devices.
 - A. It is activated in the Option menu only when you have selected an audio device. Otherwise, it is disabled.
 - B. Select Connect and press OK. Then the audio device is immediately connected.
 4. View Detail: Shows the information about the selected device.

5. Set as authorised (<-> Set as unauthorised): This option determines whether to prompt data transmission when data from another device arrives or whether just to receive the data. This option soft key is toggled whenever you select the key. (Set as authorised (<-> Set as unauthorised))
6. Delete: Using this menu, you can delete a registered Bluetooth device.
7. Delete all: Using this menu, you can delete all the registered Bluetooth devices.

2. Settings (Setting Bluetooth)

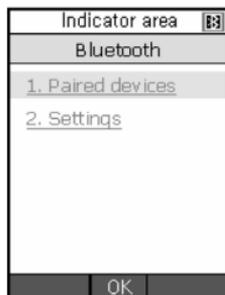

1. Bluetooth: Using this menu, you can determine whether to enable or disable the Bluetooth function.
2. Audio path: Using this menu, you can determine whether to connect to the headset or the handsfree.
3. My handset's visibility: Using this menu, you can determine whether to show your device to the other devices or to hide it from the other devices. (Shown to all / Hidden)
4. My handset's name: Using this menu, you can the name the Bluetooth device to be used in your phone.
5. Passcode request: Using this menu, you can determine whether to ask Passcode for data transmission or reception. Even if one of the two devices has configured this option to On, Passcode is required for data communication. Passcode is not a PIN code. The two communicating devices must have the same Passcode.
6. BD address: Unique Bluetooth device address.

<Registering a Bluetooth Device>

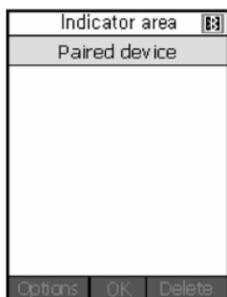

1. Select 2. Settings from the initial Bluetooth menu.
2. Select Bluetooth and then press the Done key to activate the Bluetooth function. (Bluetooth icon will be displayed in the Indicator area.)

3. Press the Back key again to return to the initial Bluetooth menu and select 1. Paired devices.

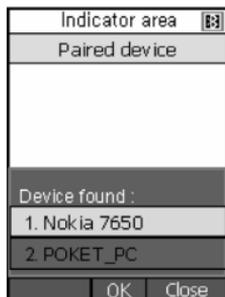

4. Press the Options key.

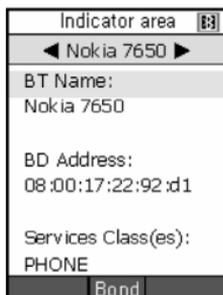

5. Move to and press 1. Add new.

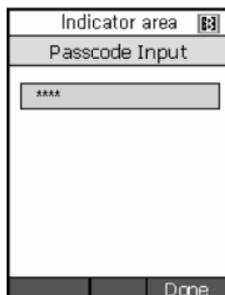

6. Select a device to be registered from the found device list and press the OK key.

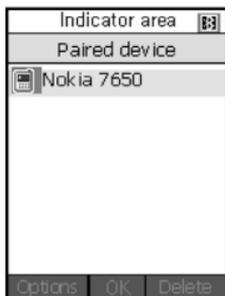

7. The information about the selected device appears. To register the device, press the Bond key.

8. Enter the passcode and press the Done key.

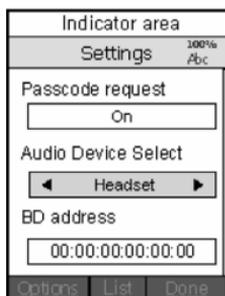

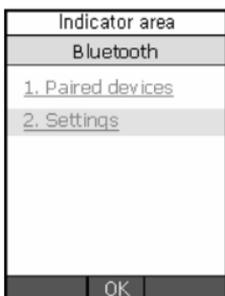

9. The list of registered devices will be displayed.

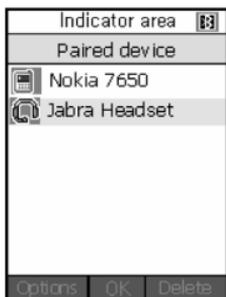

<Connecting a Headset>

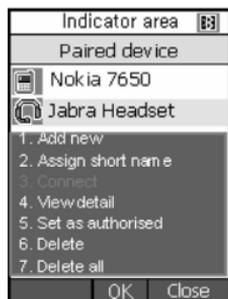

1. Select 2.Settings from the initial Bluetooth menu, and check that Audio Device Select is configured to Headset. (If the Bluetooth function is off, activate the Bluetooth function.)

2. Select Bluetooth and then press the Done key to activate Bluetooth. (→AG, FTP and OPP functions are all activated.) You will therefore find this device is in operation as an FTP server when you see it from another Bluetooth device.

<Sending a Vcard >

Menu → 2. Address Book

1. Select Search and press the OK key.

2. Select a Vcard recipient, press the Option key, select 1. Send business card, press the Select key, select 3. Bluetooth and then press the Select key.

3. Select a Bluetooth device to send and press the OK key. The Vcard is then sent to the recipient.

4. To search another device and send a Vcard, select 1. Search devices, press the OK key and send the Vcard as above.

< Receiving a Vcard >

1. When a Vcard is received, the New Vcard arrived popup window appears, and Phone Book screen is displayed.

12.3.2 Sync Service

- The Sync Service function synchronizes the data in a phone and the data on a server such as contact address information and schedule items via a wireless network.

12.3.2.1 Connect

- **Menu** → **Extras** → **Connectivity** → **Server Sync**

1. Select the Connect item and then press the OK key.

2. Connect to the server with the selected server profile and the synchronization animation is displayed while the synchronization is performed.

12.3.2.2 Log

• **Menu** → **Extras** → **Connectivity** → **Server Sync**

1. Select the Log item and then press the OK key to view the log for the last synchronization operation performed.

12.3.2.3 Sync types

• **Menu** → **Extras** → **Connectivity** → **Server Sync**

1. Select the Sync Types item and then press the OK key to view the synchronization types.

A. Normal

The phone and the server are required to exchange information about the modified data.

B. Backup

The phone sends all its data from a database to the server. The server is expected to replace all data in the target database with the data sent by the phone. This means that the phone overwrites all data in the server database.

12.3.2.4 Settings

• **Menu** → **Extras** → **Connectivity** → **Server Sync**

1. Select the Settings item and then press the OK key.
2. This menu allows you to configure the profile for a synchronization server.

12.3.4.1 Select a profile

• **Menu** → **Extras** → **Connectivity** → **Server Sync** → **Settings**

1. Move the cursor on the profile which you want to select.
2. Press [OK].

12.3.4.2 Adding a new profile

• **Menu** → **Extras** → **Connectivity** → **Server Sync** → **Settings**

1. the Settings screen, press the left soft key [Option] and select Add new to add a new profile. And then press OK.
2. Enter or choose the Profile name, Host address, User name, Password, Contact, Contact name, Calendar, Calendar name, To do, Todo Name and Access point.
3. Press the Done key to add the new profile.

12.3.4.3 Deleting profiles

• **Menu** → **Extras** → **Connectivity** → **Server Sync** → **Settings**

1. Move the cursor on the profile which you want to delete.
2. Press the left soft key [Options] and select Delete.
3. Select Yes to delete the selected profile.
The default profile cannot be deleted by user.

12.3.4.4 Editing a profile

• **Menu** → **Extras** → **Connectivity** → **Server Sync** → **Settings**

1. Move the cursor on the profile which you want to edit.
2. Press the left soft key [Options], select Edit, and edit the selected profile.
When you select default profile, you cannot change all items except for user name and password.

12.3.4.5 View

• **Menu** → **Extras** → **Connectivity** → **Server Sync** → **Settings**

1. In the Settings screen, press the left soft key [Options] and select View.

12.4 Calculator

You have a calculator function that provides 4 calculations of addition, subtraction, multiplication and division.

1. Press [Func].
2. Select Useful functions.
3. Select Calculator.

You can input numbers using the number keys, and operators using the up, down, left, and right direction key. You can input a decimal point by pressing the left soft key. Whenever you press the Delete key, characters are sequentially deleted in reverse direction.

When calculation is completed and the result is displayed on the screen, pressing a number or decimal point (.) clears the previous result and the calculator waits for new input, even though you did not press AC key. When calculation is completed and the result is displayed on the screen, pressing a symbol saves the result into the symbol, and continues calculation.

12.5 Unit Converter

Using this menu, users can convert the unit of 7 weights and measures of currency, length, width, weight, and volume velocity & temperature.

1. Press [Menu].
2. Select Useful functions.
3. Select Unit converter.

12.5.1 Currency

1. Select the Currency menu.
2. Users can set a currency exchange rate using [Rate].
3. Input currency rates for upto 5 currencies equivalent to USD and then press [Save]. Then you can convert to one currency to another.
4. You can view the value of between 5 currency units
5. Press [Reset] to clear the current input filed.
6. To exit currency conversion function, press the [Back] key.

12.5.2 Length

1. Select length menu.
2. Select the desired unit to convert using [Unit].
3. Input the standard unit and view your converted value.
4. Press [Input again] to clear the current input filed.
5. To exit length conversion function, press [Back] key.

12.5.3 Surface

1. Select Surface menu.
2. Select desired unit to convert using [Unit].
3. Input standard unit and view converted value.
4. Press [Reset] to clear the current input filed, and locate the cursor in the input field.
5. To exit Surface conversion function, press [Back] key.

4. Press [Go] to resume the stopwatch.
5. Press [Lap] during operation to record the duration of time at the moment, and continue the stopwatch.
6. Users can save up to 6 time records by pressing [Lap]. If the number of recorded time exceeds 6, the oldest one is deleted.
7. Press Details to see recorded Lap timings.. Press [Reset] to initialise the stopwatch.

Troubleshooting

Please check to see if any problem which you may have with your phone is described here before taking it for service or calling a service engineer.

Q How do I view the list of outgoing calls, incoming calls and missed calls?

A Press  .

Q How do I clear all call history?

A Press the left soft key and then    .

Q How do I view all numbers saved in the memory?

A Press the right soft key and then  .

Q  does not disappear from the screen.

A Check whether you are in a service area. If you continue to see  , turn off the power and wait for approximately 2 minutes before turning it back on. If there is no change, relocate to another area and check again.

Q Connection is poor or is not audible in certain areas.

A In certain areas, signal strength can vary dramatically. Try moving to a different location. Heavy network traffic may affect the ability to connect, or the stability of the call.

Q Connection is poor even when established.

A In certain areas, signal strength can vary dramatically. Try moving to a different location. Heavy network traffic may affect the ability to connect, or the stability of the call.

Q LCD does not turn on.

A Remove and replace the battery and turn on the power. If the phone still does not turn on, charge the battery and try again.

Q An echo can be heard during connection with a certain telephone in a certain area.

A It is called 'Echo Phenomenon'. It occurs if the volume is too high or caused by special properties (semi electronic telephone exchange) of the machine on the other end.

Q The phone gets warm.

A During long calls, or if games/Internet are used for a long time, the phone may become hot. This is perfectly normal and has no effect upon the life of the product or performance.

Q The bell does not ring, or lamp or LCD blinks only.

A The phone is set to 'Vibrate' or 'Silent' in the Profiles menu. Please select 'General' or 'Loud'

Q Standby duration of the phone gradually becomes shorter.

A Batteries have a limited life. When the battery lasts for half its original time, it requires replacement. Only use authorised replacement parts.

Q Usage time of battery becomes shorter.

A If the battery time is short, it may be due to the user environment, or large volume of calls, or weak signals.

- Q** No number is dialled when you recall a phonebook entry.
- A** Check that the numbers have been saved correctly, by using the phonebook Search feature. Resave them, if necessary.
- Q** You cannot be contacted.
- A** Is your phone switched on ( pressed for more than three seconds)? Are you accessing the right cellular network? Have you set an incoming call barring option?
- Q** I cannot find the lock, PIN, or PUK code, or password?
- A** The default lock code is '0000'. If you forget or lose the lock code, contact your phone dealer. If you forget or lose a PIN or PUK code, or if you have not received such a code, contact your network service provider.

Accessories

There are a variety of accessories available for your mobile phone. You can select these according to your personal communication requirements. Consult your local dealer for availability.

Supplied adapter

This adapter lets you charge the while at home or in the office.

Battery

Standard battery is available.

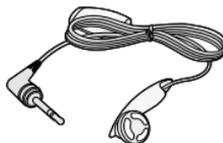

Cigarette lighter adapter

Operate the phone and trickle charge the phone's battery from your vehicle.

Headset

Allows hands-free operation. Includes earpiece and microphone.

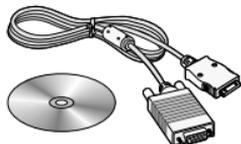

Data cable kit

Connects your phone to a PC.

On the CD-Rom, there are programs like:

- PC-Sync: to synchronise phonebook with PC and Outlook.
- Phone Manager: to download wallpapers, ring tones and video clips on the phone.
- Internet Kit: to use the phone as a modem to be connected to a PC.

- ! **Note** The programs listed above may vary depending on the version of the CD and the market.
- ! **Note**
 - Always use genuine LG accessories. Failure to do this may invalidate your warranty.
 - Accessories may be different in different regions; please check with our regional service company or agent for further enquiries.
