Congratulations

Congratulations on your purchase of the BSD-500 Bluetooth Presenter. This Presenter allows you to communicate wirelessly through your mobile phone, computer or other Bluetooth devices, and includes a built-in microphone and stereo earphone socket. It uses Bluetooth 1.2 technology, but is also compatible with devices using Bluetooth version 1.1. Your BSD-500 Bluetooth Presenter uses an AAA battery, which is readily available and easy to change.

Package Contents

- 1. BSD-500 Bluetooth Presenter
- 2. Stereo earphones
- 3. Quickstart guide
- 4. This user guide
- 5. AAA battery

Optional:

- 5. BHD-2XX Bluetooth dongle (with software CD)
- 6. External speaker

Presenter Features

Power On/Off Mode

Enter Connection Mode

Music Mode

Phone Mode - Stand by

Phone Mode – HFP (Hands free profile) (During a Call)

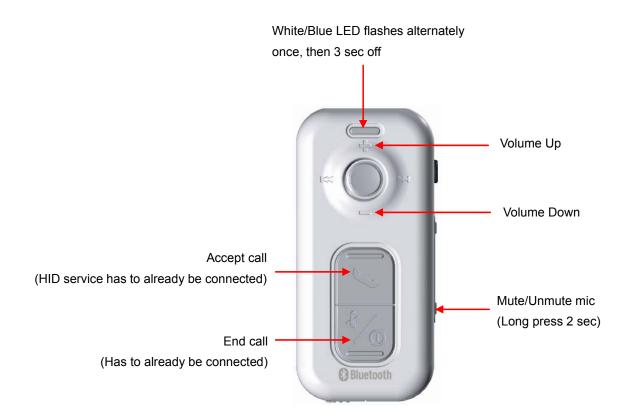

Phone Mode – HSP (Headset profile) (During a Call)

Presentation Mode

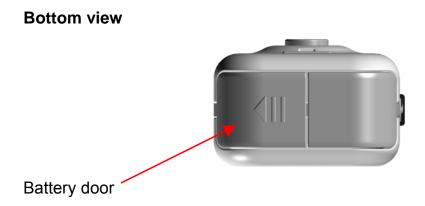

Skype Mode

Inserting the battery

Before using your BSD-500, please make sure you have inserted a suitable battery. The BSD-500 uses one AAA battery.

To insert the battery:

- 1. Slide the battery door away from the center (Follow the arrow on the battery door).
- 2. Hinge the battery door to an open position.
- 3. Insert the battery, making sure that the end marked "-" goes in first (The "+" end will then be closest to the battery door).
- 4. Hinge the battery door to a closed position.
- 5. Slide the battery door back towards the center to secure.

Note: When the battery is running low, the LED will flash red. When this happens, please replace the battery.

Switching the Presenter on or off

To switch on:

Press and hold the **power on/off button** for approximately 2 seconds until the white LED lights.

To switch off:

Press and hold the **power on/off button** for approximately 4 seconds until the blue LED flashes quickly 5 times.

Pairing procedure

Your BSD-500 Bluetooth Presenter needs to be paired to another Bluetooth device (e.g. Mobile phone) before it can be used. This is a two part process; one part is carried out on the Presenter and the other is carried out on the other Bluetooth device. Note that different Bluetooth devices use a different method to go through the pairing process. To pair your BSD-500 Bluetooth Presenter:

- 1. With your Presenter turned off, press and hold the **power on/off button** for approximately 2 seconds until the LED flashes quickly between blue and orange, which indicates that the Presenter is in discovery/pairing mode.
- 2. Use your other Bluetooth device's menu to search for the BSD-500. When it has been found, confirm that you want to pair it and your other Bluetooth device together. If you are unsure how to go through the pairing process on your other Bluetooth device, please consult its user manual.
- 3. When asked for a pin button, enter "0000".

Note: There is usually a time limit to pair devices, for example 1 minute.

Using the (optional) BHD-200 Bluetooth dongle with your Computer

The optional BHD-200 dongle can be used to enable Bluetooth communication between your computer and your BHD-500 Presenter. With this you can use many more functions available on your device. These can be seen in the table below: Please refer to the enclosed software CD for more information on installation, pairing and usage.

Mode	Profile
Presentation	HID (Human Interface Device)
AV	A2DP (Advanced Audio Distribution Profile), AVRCP
	(Audio/Video Remote Control Profile)
Phone	HF (Hands-Free), HS (Headset)
Skype	HS (Headset)

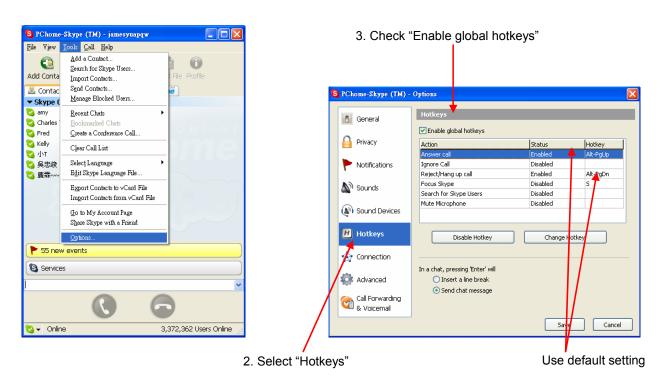

Using your BSD-500 Presenter with other Bluetooth devices

Please see the documentation of your other Bluetooth device to see how to pair it with your BSD-500 Presenter, as well as what functions are available.

Note: To use the various functions available on your BSD-500, your other Bluetooth device must support the appropriate profiles (see table above).

1. Click button to accept call.

2. Double-click Bluetooth icon when icon changes to green.

Using the (Optional) External Speaker with your BSD-500

Using the (optional) external speaker, you can convert your BSD-500 into a speakerphone, or listen to music without wearing earphones.

To attach the external speaker:

- 1. Remove the earphones if they are plugged in.
- 2. Plug the external speaker into the earphone socket, making sure that the speaker faces forward.
- 3. Ensure that the plastic stabilizer locates into the laser pointer indent.

Phone call use

Making a call from the mobile phone

While your mobile phone is paired with your Presenter, you can use the mobile phone to make phone calls in the same way as normal. The only difference will be that the earphone and microphone functions of the Presenter will be used instead of the phone's.

Voice dialing through the Presenter

In order to use the voice dial feature of your Presenter, your phone must support voice dialing and must have voice tags stored.

To use voice dialing:

- 1. Switch the Presenter on and pair it with your phone, if this is not already the case.
- 2. Press the talk button twice
- 3. Follow the instructions for voice dialing on your particular mobile phone.
- 4. Your phone will make the call.

Last number redial

When the Presenter is in standby mode (not in conversation), press the **End button** twice, and your phone will redial the last number that you called.

Note: This function only works on Bluetooth phones that support the Hands-free profile

Answering a call

When someone calls you, a ring tone will sound in your Presenter. To answer the call, press the **talk button**.

Note: You can set your mobile phone to automatically answer calls, meaning that you do not even need to press the **talk button**. Please refer to your mobile phone's user guide for more information about this setting.

Call swap

Some mobile phones support call swap. This means that if you receive a second call, you can put the first caller on hold while you speak to the second caller. If your phone supports this feature:

- Press and hold the talk button for two seconds to put the first caller on hold and answer the second call
- 2. When the second call has ended, the first caller will automatically be taken off hold. Note: Please press the **page up button** if the first caller will not be taken off hold.

Ending a call

During a call, press the **end call button** to hang up. If the other person hangs up first, then the call will end automatically.

Rejecting a call (Supports HFP (Hands Free Profile) only) If you do not wish to accept a call, press the **end call button** to reject it.

Note: To use this function, your mobile phone must support the Hands-free profile.

Muting a call

During a conversation, press and hold the **page down button** for 2 seconds. The microphone will mute. To cancel mute, press the **page down button** once.

Transferring a single call

When activating a call, you can press and hold the **page up button** for 2 seconds to switch conversation between the BSD-500 Presenter and the mobile phone.

Adjusting the volume

The Presenter offers 6 pre-set volume levels.

- To increase the volume, press the **up directional key**.
- To decrease the volume, press the **down directional key**.

Controlling Music Playback (AV Mode)

If your other Bluetooth device is compatible with this feature, you can control music playback from the Presenter itself. Please see the documentation of your other Bluetooth device to see how to pair it with your BSD-500 Presenter, as well as what functions are available.

In AV mode, the following keys can be used:

Enter key – plays or pauses track
Right directional key – skips forward one track at a time
Left directional key – skips back one track at a time
Up directional key – increases volume
Down directional key – decreases volume

Note 1: Your other Bluetooth device must support this profile.

Note 2: Make sure the volume on your music player is not at zero, as the BSD-500 can only increase or decrease the volume relative to this.

Bluetooth Presenter specifications

Compatible with Bluetooth Ver.1.1 or 1.2 devices Maximum distance 30 Feet (10 meters)

Dimensions 64x30x18mm

Weight of Presenter Approximately 35 grams (excluding battery)

Typical standby time up to 200 hours Typical talk time up to 5.5 hours

Battery type AAA

Cautions

- 1. Always store the Presenter safely.
- 2. Avoid storage at temperatures below -20°C or above 70°C. (Storage at high or low temperatures can degrade performance and reduce battery life.)
- 3. Avoid operating at temperatures below -10°C or above 50°C.
- 4. Do not expose the Presenter or any of its supplied parts to rain or other liquids.
- 5. Avoid humidity below 10% RH or above 95% RH.
- 6. Never aim the laser pointer at anyone's eyes, or at moving vehicles, including airplanes, as this could cause damage and/or lead to prosecution.

Certification and safety approvals/general information

This product is CE, FCC, BQB marked. Please note that this product uses radio frequency bands not available for use within some areas of the EU. This product is intended to be used in Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, The Netherlands, Portugal, Spain, Sweden, United Kingdom and within EFTA in Iceland, Norway and Switzerland.

Users are not permitted to make changes or modify the device in any way. Changes or modifications not expressly approved by your distributor will void the users' authority to operate the equipment.

Bluetooth is a registered trademark owned by Bluetooth SIG, Inc.

Important information on safe and efficient operation. Read this information before using your phone. Users are not permitted to make changes or modify the device in any way. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference. (2) This device must accept any interference received, including interference that may cause undesired operation. 15.105 Federal Communications Commission (FCC) Requirements, Part 15

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: ---Reorient or relocate the receiving antenna. ---Increase the separation between the equipment and receiver. ---Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. --- Consult the dealer or an experienced radio/TV technician for help. Any changes or modifications (including the antennas) made to this device that are not expressly approved by the manufacturer may void the user's authority to operate the equipment. FCC RF Radiation Exposure Statement: This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.
