- ⑥ Battery box
- ⑦ Magnetic and adsorptive battery cover

Operation details

1. Startup and connection

Push switch to ON position, start up through mouse and the white indicator lamp will be illuminated for 1s, which prompts the success of startup; the mouse can be connected automatically if it was matched before; the white indicator lamp will go out after quick flashing of 3s if connection is successful.

2. Manual matching

The white indicator lamp will have quick flashing every 2s if it is matched for the first time or connection failed and it is in waiting state. Activate Bluetooth function of device or connect the Bluetooth transmitter, click Bluetooth icon in control panel to enter "Bluetooth device" window, click "Add device" in "Bluetooth guide", press left, middle and right mouse keys simultaneously and hold it for 3–4s, select the searched new Bluetooth device and enter the next step; tick "Using password: No" and enter next step; the system will have Bluetooth mouse connected automatically. The indicator lamp will have quick flashing for 3s, be off and quit code matching state if connection succeeds; the white indicator lamp will have quick flashing once every 2s if connection fails and it is in waiting state.

3. Low battery prompts

The red indicator lamp will have quick flashing twice every 2s if the mouse has low battery. Remove the magnetic battery cover to replace battery.

Remarks

1. Based on energy and power saving design, the mouse will enter sleeping mode if it is idle for more than 3 minutes and can be awakened by clicking keys.
2. It is normal if sensitivity or use distance is reduced when the mouse has low battery; please replace the battery on time to keep normal usage.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
