What is TWS?

TWS means true wireless stereo. Let's say two Bluetooth speakers are able to be paired and playing music synchronously.

How to pair your device?

- Please make sure these two speakers to be paired disconnect from your bluetooth device before you turn them on. Then please turn on two speakers.
- Select either of the speakers. Press "MODE" button for 2 seconds. until you hear indicator tone
- When successfully paired , The LED indication light on either speaker will stay blue,and the other speaker will flash blue .
- Select the searching mode on your device , When your device finds "Turbo", select it and connect.
- The LED indication light on both the speakers will turn blue when your device is connected. They will perform as the stereo sounding system.
- Once the speakers are well paired at the first time, they will be automatically paired next time without the above pairing operation.
- If the speaker used to be paired, it is suggested to press "MODE" button for 5 seconds to forcibly cut off the power . Then restart and have the same speaker re-paired with the required new speaker according to the above instruction item 1 – item 5.
- When speakers are paired , only the "master" speaker will answer the phone.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
