Application & Access

Screen display

Volume

① Calculated by 2 hours in normal daily use with a new fully charged battery.

Introduction

The Keyboard can be used to control a tablet with different hot keys; for details, see the special function keys. The keyboard and the tablet can be combined for easy carrying.

LED Indicator

Flashing red	The battery capacity is insufficient.
Brighting red	The battery is charging, the indicator will turn off after the charging is completed.
Flashing blue slowly	The keyboard is attempting to connect to the last paired device. If the keyboard connects successfully, the indicator will turn off after being on for three seconds.
Flashing blue quickly	The keyboard is in pairing mode and can be discovered by other devices. If pairing is successful, the indicator will turn off after being on for three seconds.

Combining with tablet and folio case

1. Place the tablet into folio case as shown figure A;

2. Then the magnets in the folio case will attach the keyboard, when using the keyboard, open the folio case to the standing position as shown figure B;

3. If need to use the tablet, the case can be separated from the keyboard as shown figure C.

Connecting to a tablet

★ Before using the keyboard for the first time, please connect it to the tablet.

Step 1: Turn the keyboard power switch to the On position, and press the Fn+. The LED indicator will start to flash quickly, and the keyboard can then be discovered by other devices.

Step 2: On the tablet, tap Settings > Bluetooth, then tap the switch to turn on Bluetooth.

Step 3: Select "Bluetooth keyboard BKC700" from the list of available devices on the tablet screen. When the prompt indicating that the "Connected" is displayed, the keyboard has successfully connected to the tablet.

★ If the Keyboard has previously connected to the tablet successfully, it will automatically connect to the tablet via Bluetooth when it is turned on. If the connection fails, check the tablet to see if Bluetooth is set to On, or then press the Fn+ in pairing mode, reconnect using the previous three steps.

Caution

This product contains a built-in battery, don't take out for replacement.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
