2. Computer instructions

Connect the power cords properly to grounded electrical outlets.

Connecting the wired keyboard and mouse to your computer (Selected models only)

Connect the keyboard cable to the appropriate keyboard connector (USB connector).

Connect the mouse cable to the appropriate mouse connector (USB connector).

3. Computer stand

Adjust the angle for the best viewing experience. It can be rotated from horizontal or vertical.
The stand provides stability to the computer; it is not a removable part.

5. Wireless keyboard and mouse instructions (Only some models are equipped with wireless keyboard and mouse)

Method 1

1

Remove the battery tabs from both the keyboard and the mouse.

CONNECT LASER
OFF ON

Make sure the power switch on the back of the mouse is in the ON position (the keyboard does not have a power switch).

2

CONNECT

CONNECT
OFF ON

Press the wireless connect buttons on the right side of the keyboard and the back of the mouse for over 5 seconds.

3

When the keyboard and mouse wireless indicator lights blink green, turn the computer on immediately.
Once the wireless connection is successfully established, the indicator lights on the keyboard and mouse will turn off and they will work properly.

### Method 2

If the wireless keyboard and mouse still do not work, do the following:

Make sure the wireless indicator lights still blink. If they stop blinking, press the connect buttons on the keyboard and mouse again, then press the bluetooth connect button on the base stand for over 5 seconds until the indicator lights turn off and the wireless connection established.

Bluetooth connect button

Mode switch button

If connection is not established successfully, refer to "Wireless keyboard and mouse instructions" in the *User Guide*.
