lenovo.

IdeaPad Z460/Z465/Z560/Z565

User Guide V1.0

Read the safety notices and important tips in the
included manuals before using your computer.

ideapad

------ **Notes** ------

- Before using the product, be sure to read *Lenovo Safety and General Information Guide* first.

- Some instructions in this guide may assume that you are using Windows® 7. If you are using other Windows operating system, some operations may be slightly different. If you are using other operating systems, some operations may not apply to you.

- The features described in this guide are common to most models. Some features may not be available on your computer and/or your computer may include features that are not described in this user guide.

- The illustrations used in this manual are for Lenovo IdeaPad Z560 unless otherwise stated.

- The illustrations in this manual may differ from the actual product. Please refer to the actual product.

Chapter 1. Getting to know your computer

◼◼ Top view

- **Z460/Z465**
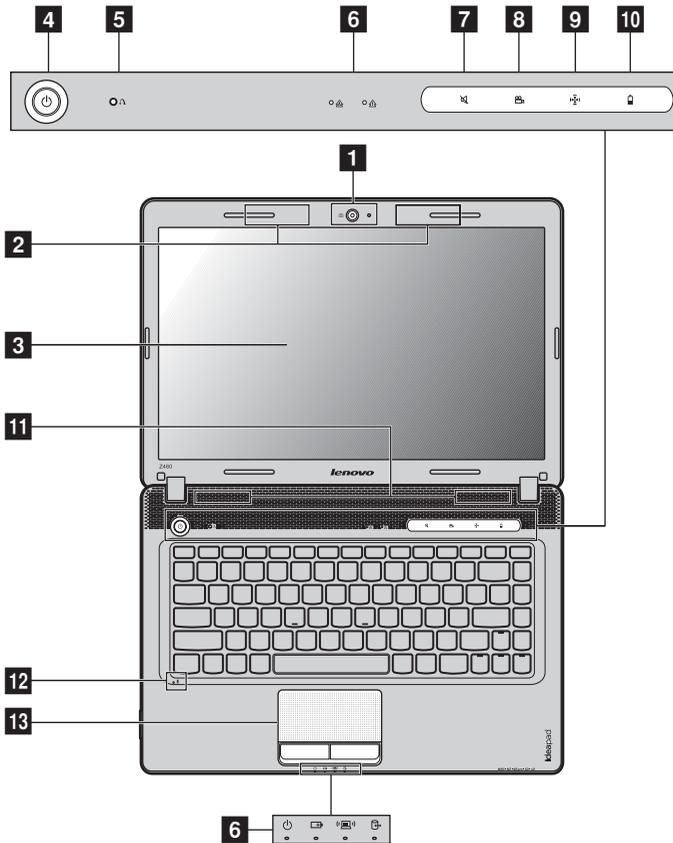

Note: The illustrations in this manual may differ from the actual product. Please refer to the actual product.

⊙ **Attention:**

- Do NOT open the display panel beyond 130 degrees. When closing the display panel, be careful NOT to leave pens or any other objects in between the display panel and the keyboard. Otherwise, the display panel may be damaged.

■ **Z560/Z565**
	Integrated camera	Use the camera for video communication.
2	**Wireless module antennas (Select models only)**	The built-in antennas ensure optimal reception of wireless radio.
3	**Computer display**	The LCD display with LED backlight provides brilliant visual output.

4	**Power button**	Press this button to turn on the computer.
5	**OneKey Rescue system button**	Press this button to open OneKey Rescue system (If OneKey Rescue system has been preinstalled) when the computer is powered off.

Note: For details, see "OneKey Rescue system" on page 36.

6	**System status indicators**	For details, see "System status indicators" on page 26.
7	**Mute/Unmute button**	Touch this button to mute/unmute system sound.
8	**OneKey Theater button**	Touch this button to select a preferred scenario mode.

Note: For details, see "OneKey Theater button" on page 23.

9	**Smart noise control button**	Touch this button to control fan speed. Touch and hold this button for three seconds to activate dust cleaning feature.

Note: For details, see "Smart noise control button" on page 24.

10	**Energy Management button**	Touch this button to launch Lenovo Energy Management.

Note: For details, see "Energy Management button" on page 25.
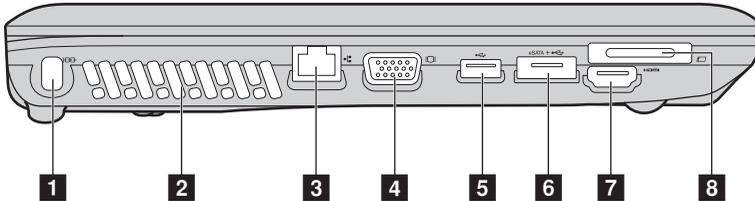

11	**Speakers**	The stereo speakers provide rich and powerful sound.
12	**Built-in microphone**	The built-in microphone (with noise reduction) can be used for video conferencing, voice narration, or simple audio recordings.
13	**Touchpad**	The touchpad functions as a conventional mouse.

Note: For details, see "Using the touchpad" on page 15.

Left-side view

a **Kensington slot**   Attach a security lock (not supplied) here.

Note: For details, see "Attaching a security lock (not supplied)" on page 27.

b **Fan louvers**   Dissipate internal heat.

Note: Make sure that none of the fan louvers are blocked or else overheating of the computer may occur.

c **RJ-45 port**   This port connects the computer to an Ethernet network.

Note: For details, see "Wired connection" on page 29.

d **VGA port**   Connects to external display devices.

e **USB port**   Connect to USB devices.

Note: For details, see "Connecting a universal serial bus (USB) device" on page 20.

f **USB port or eSATA/USB combo port**   Connect to eSATA or USB devices.

Note: For details, see "Connecting a universal serial bus (USB) device" on page 20.

g **HDMI port**   Connects to devices with HDMI input such as a TV or a display.

h **ExpressCard®
slot (Select
models only)**   Insert ExpressCard devices here.

Note: For details, see "Connecting an ExpressCard device (Select models only)" on page 20.

■■ Right-side view ──────────────────────
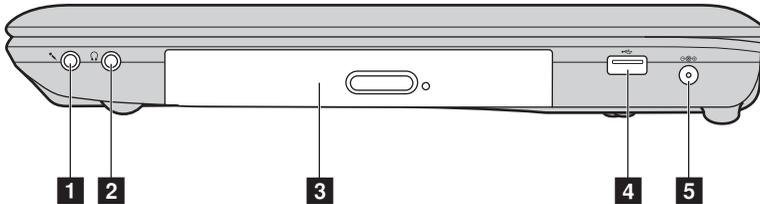

a **Microphone jack** Connects to external microphones.

b **Headphone jack** Connects to external headphones.

◉ **Attention:**
  • Listening to music at high volume over extended periods of time may damage your
    hearing.

c **Optical drive** Reads/Burns optical disks.

d **USB port** Connects to USB devices.

Note: For details, see "Connecting a universal serial bus (USB) device" on page 20.

e **AC power adapter jack** Connect the AC adapter here.

Note: For details, see "Using AC adapter and battery" on page 13.

5

∎∎ Front view
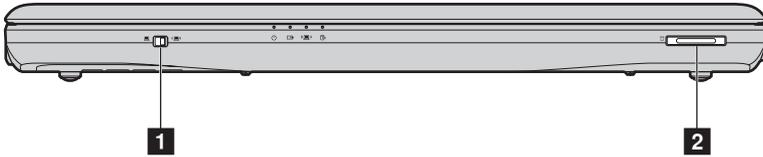

1	**Integrated wireless device switch (Select models only)**	Use this switch to turn on/off the wireless radio of all wireless devices on your computer.
2	**Memory card slot**	Insert memory cards (not supplied) here.

Note: For details, see "Using memory cards (not supplied)" on page 19.

◼◼ Bottom view ────────────────────────────────

◼ **Z460/Z465**
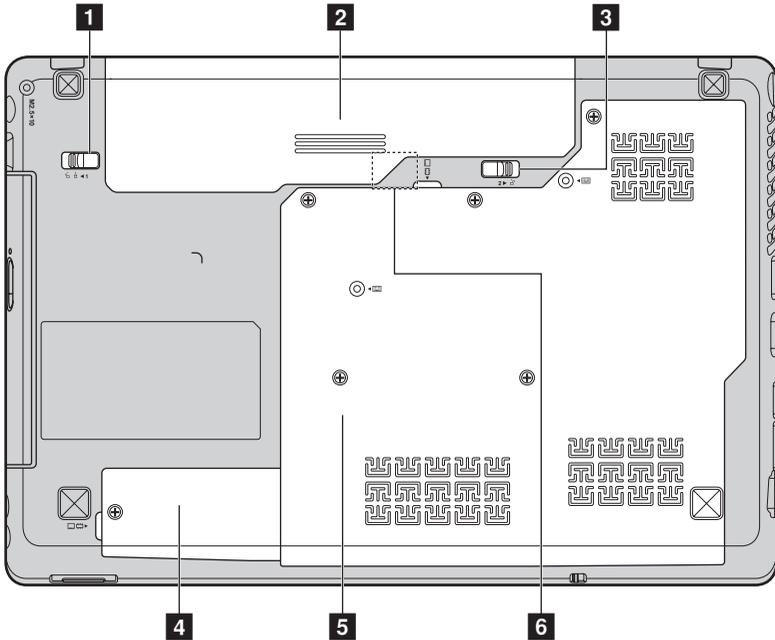

1	**Battery latch - manual**	The manual battery latch is used to keep the battery pack secured in place.
2	**Battery pack**	For details, see "Using AC adapter and battery" on page 13.
3	**Battery latch - spring loaded**	The spring-loaded battery latch keeps the battery pack secured in place.
4	**Mini PCI Express Card slot compartment**	

5 **Hard disk drive (HDD)/Memory/ CPU (Central processing unit) compartment**

6 **SIM card slot (Select models only)**   Insert a SIM card (not supplied) for using Mobile Broadband.

Notes:
- In order to be able to insert a SIM card into this slot, you must first disconnect the AC adapter and remove the battery pack.
- For details, see "Using Mobile Broadband (Select models only)" on page 33.

■ **Z560/Z565**

The manual battery latch is used to keep the battery pack secured in place.

b **Battery pack**

For details, see "Using AC adapter and battery" on page 13.

c **Battery latch - spring loaded**

The spring-loaded battery latch keeps the battery pack secured in place.

d **Hard disk drive (HDD)/Memory/ CPU (Central processing unit)/ Mini PCI Express Card slot compartment**

5 **SIM card slot (Select models only)**   Insert a SIM card (not supplied) for using Mobile Broadband.
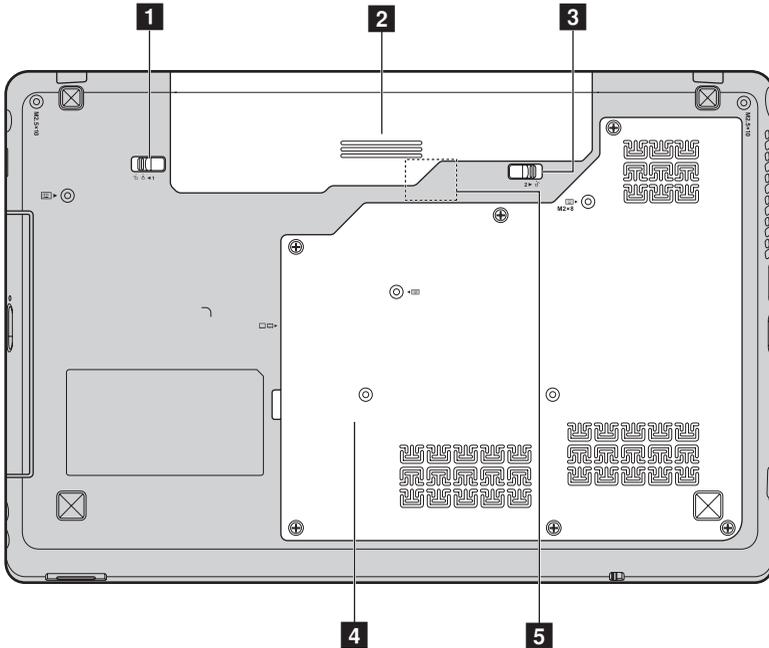

Notes:
- In order to be able to insert a SIM card into this slot, you must first disconnect the AC adapter and remove the battery pack.
- For details, see "Using Mobile Broadband (Select models only)" on page 33.

Chapter 2. Learning the basics

■■ First use

■ Reading the manuals

Read the supplied manuals before using your computer.

■ Conncting to the power

The supplied battery pack is not fully charged at purchase.
To charge the battery and begin using your computer, insert the battery pack
and connect the computer to an electrical outlet. The battery is automatically
charged while the computer is running on AC power.

Installing the battery pack

Refer to the supplied *Setup Poster* to install the battery pack.

Connecting the computer to an electrical outlet

❶ Connect the power cord to the AC adapter.

❷ Connect the AC adapter to the AC power adapter jack of the computer
firmly.

❸ Plug the power cord into an electrical outlet.

■ Turning on the computer

Press the power button to turn on the computer.

■ Configuring the operating system

You may need to configure the operating system when it is first used. The
configuration process may include the procedures below.

• Accepting the end user license agreement

• Configuring the Internet connection

• Registering the operating system

• Creating a user account

■ **Putting your computer into sleep state or shutting it down**

When you finish working with your computer, you can put it into sleep state or shut it down.

Putting your computer into sleep state

If you will be away from your computer for only a short time, put the computer into sleep state.
When the computer is in sleep state, you can quickly wake it to resume use, and bypass the startup process.

To put the computer into sleep state, do one of the following.
• Click 🌀 and select **Sleep** from the Start menu.
• Press **Fn + F1**.

Note: Wait until the power indicator light starts blinking (indicating that the computer is in
       sleep state) before you move your computer. Moving your computer while the hard
       disk is spinning can damage the hard disk, causing loss of data.

To wake the computer, do one of the following.
• Press the power button.
• Press any key on the keyboard.

■ **Shutting down your computer**

If you are not going to use your computer for a day or two, shut it down.
To shut down your computer, click 🌀 and select **Shut down** from the Start menu.

▉▪ Using AC adapter and battery

■ Checking battery status

You can determine the percentage of battery power remaining by checking the battery icon in the notification area.

> **Note:** As each computer user has different habits and needs, it is difficult to predict how long a battery charge will last. There are two main factors:
> • The amount of energy stored in the battery when you commence work.
> • The way you use your computer: for example, how often you access the hard disk drive and how bright you make the computer display.

■ Charging the battery

When you find that the battery power is low, you need to charge the battery or replace it with a fully charged one.

You need to charge the battery in any of the following situations:
• When you purchase a new battery
• If the battery status indicator starts blinking
• If the battery has not been used for a long time

> **Notes:**
> • You are advised to insert the battery pack when using your computer to prevent small particles from entering the inside of your computer.
> • To increase the life of the battery pack, the computer does not start recharging the battery immediately after it drops from fully charged.
> • Charge the battery at a temperature between 50 °F and 86 °F (10 °C-30 °C).
> • Full charge or discharge is not required.

■ **Removing the battery pack**

If you are not going to use the computer for an extended period of time, or if you need to send your computer to Lenovo for service, etc. remove the battery pack from the computer. Before removing the battery pack, make sure the computer has been shut down.

■ **Handling the battery**

If the rechargeable battery pack is replaced with an incorrect type, there may be danger of an explosion. The battery pack contains a small amount of harmful substances. To avoid possible injury and detriment to the environment, pay attention to the following points:

• Replace only with a battery of the type recommended by Lenovo.

• Keep the battery pack away from fire.

• Do not expose the battery pack to water or rain.

• Do not attempt to disassemble the battery pack.

• Do not short-circuit the battery pack.

• Keep the battery pack away from children.

• Do not put the battery pack in trash that is disposed of in landfills. When disposing of the battery, comply with local ordinances or regulations and your company's safety standards.

▪▪ Using the touchpad ─────────────────────────────
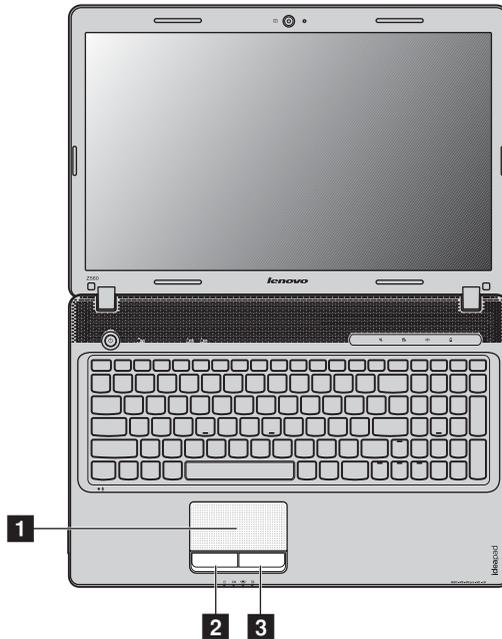

1	**Touchpad**	To move the cursor on the screen, slide your fingertip over the pad in the direction in which you want the cursor to move.
2	**Left click button**	The function corresponds to that of the left mouse button on a conventional mouse.
3	**Right click button**	The function corresponds to that of the right mouse button on a conventional mouse.

Note: You can enable/disable the touchpad using **Fn+F6**.

▪▪ Using the keyboard

Your computer has a numeric keypad and function keys incorporated in its standard keyboard.

▪ Numeric keypad

Z460/Z465

The keyboard has keys that, when enabled, work as a 10-key numeric keypad. To enable or disable the numeric keypad, press **Fn**+**F8** .
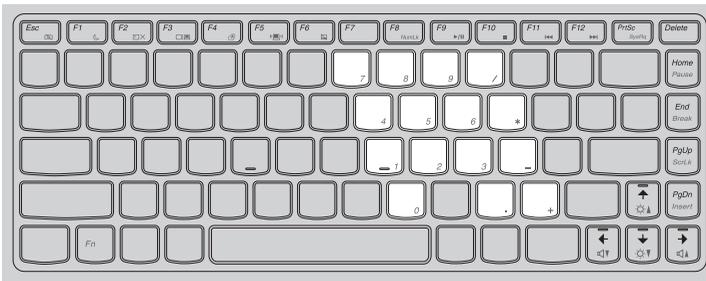

Z560/Z565

The keyboard has a separate numeric keypad. To enable or disable the numeric keypad, press the **Num Lock** key.
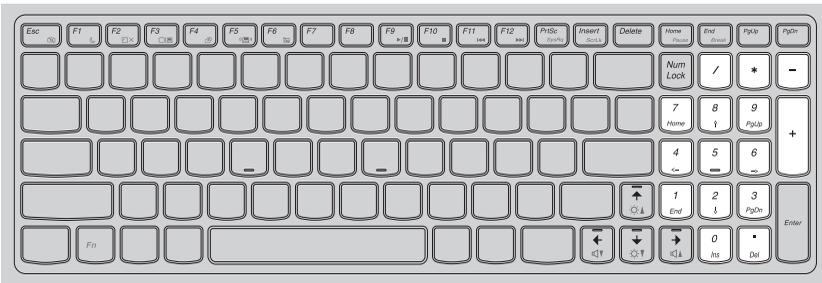

Note: The Num lock indicator will light on if the numeric keypad is enabled.

■ **Function key combinations**

Through the use of the function keys, you can change operational features instantly. To use this function, press and hold **Fn** **1** ; then press one of the function keys **2** .

The following describes the features of each function key.

|	
Fn + Esc:	Turn on/off the integrated camera.
Fn + F1:	Enter sleep mode.
Fn + F2:	Turn on/off the backlight of the LCD screen.
Fn + F3:	Open the interface for the display device switch to select this notebook or an external display.
Fn + F4:	Open the interface for display resolution settings.
Fn + F5:	Open the interface for integrated wireless devices settings (on/off).
Fn + F6:	Enable/Disable the touchpad.
Fn + F8 (Z460/Z465):	Enable/Disable the numeric keypad.
Fn + F9:	Start/Pause playback of Windows Media Player.
Fn + F10:	Stop playback of Windows Media Player.
Fn + F11:	Skip to the previous track.
Fn + F12:	Skip to the next track.
Fn + Insert (Z560/Z565): **Fn + PgUp (Z460/Z465):**	Enable/Disable the scroll lock.
Fn + PrtSc:	Activate the system request.
Fn + Home:	Activate the pause function.
Fn + End:	Activate the break function.
Fn + PgDn (Z460/Z465):	Activate the insert function.
Fn + ↑ / ↓:	Increase/Decrease display brightness.
Fn + → / ←:	Increase/Decrease sound volume.

▪▪ Connecting external devices ─────────────

Your computer has a wide range of built-in features and connection capabilities.

■ Using memory cards (not supplied)

Your computer supports the following types of memory cards:
• Secure Digital (SD) card
• MultiMediaCard (MMC)
• Memory Stick (MS)
• Memory Stick PRO (MS PRO)
• xD-Picture (xD) card

Notes:
• Insert ONLY one card in the slot at a time.
• This card reader does not support SDIO devices (e.g., SDIO Bluetooth, etc.).

Inserting a memory card

❶ Push the dummy card until you hear a click. Gently pull the dummy card out of the memory card slot.

Note: The dummy card is used for preventing dust and small particles from entering the inside of your computer when the memory card slot is not in use. Retain the dummy card for future use.

❷ Slide the memory card in until it clicks into place.

Removing a memory card

❶ Push the memory card until you hear a click.
❷ Gently pull the memory card out of the memory card slot.

Note: Before removing the memory card, disable it via Windows safely remove hardware and eject media utility to avoid data corruption.

■ **Connecting a universal serial bus (USB) device**

Your computer comes with two USB ports and an eSATA/USB port compatible with USB devices or three USB ports compatible with USB devices.

Note: When using a high power consumption USB device such as USB ODD, use the external device's power adapter. Otherwise, the device may not be recognized, and system shut down may result.

■ **Connecting an ExpressCard device (Select models only)**

Your computer comes with an ExpressCard/34 slot used for connecting ExpressCard devices.

Note: Only use the ExpressCard/34 devices.

Inserting an ExpressCard/34 device

❶ Push the dummy card until you hear a click. Gently pull the dummy card out of the ExpressCard slot.

Note: The dummy card is used for preventing dust and small particles from entering the inside of your computer when the ExpressCard slot is not in use. Retain the dummy card for future use.

❷ Slide the ExpressCard device in with the front label facing upward until it clicks into place.

Removing an ExpressCard/34 device

❶ Push the ExpressCard device until you hear a click.
❷ Gently pull the ExpressCard device out of the ExpressCard slot.

Note: Before removing the ExpressCard/34 device, unable it by Windows safely remove hardware and eject media utility.

■ **Connecting a *Bluetooth* device (Select models only)**

If your computer has an integrated *Bluetooth* adapter card, it can connect to
and transfer data wirelessly to other *Bluetooth* enabled devices, such as
notebook computers, PDAs and cell phones. You can transfer data between
these devices without cables and up to 10 meters range in open space.

> **Note:** The actual maximum range may vary due to interference and transmission barriers.
> To get the best possible connection speed, place the device as near your computer as
> possible.

Enabling *Bluetooth* communications on your computer

❶ Slide the integrated wireless device switch from 🖳 to ⟨🖳⟩.

❷ Press **Fn** + **F5** to make configuration.

> **Notes:**
> • When you do not need to use the *Bluetooth* function, turn it off to save battery power.
> • You need to pair the *Bluetooth* enabled device with your computer before you can transfer
>   data between them. Read the documentation supplied with the *Bluetooth* enabled device
>   for details on how to pair the device with your computer.

▪▪ Special keys and buttons ─────────────────────
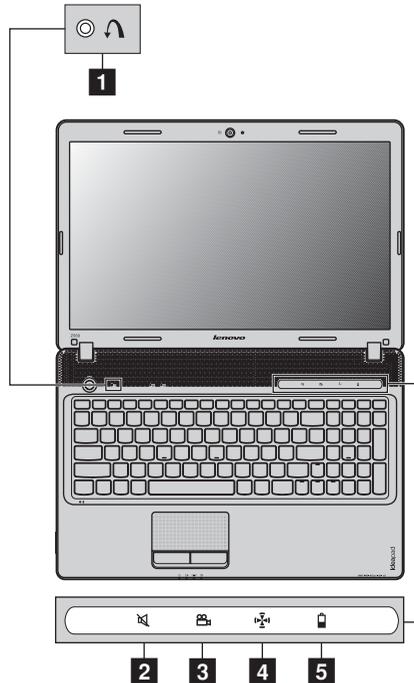

■ **OneKey Rescue system button** `1`

- When the computer is powered-off, press this button to enter the OneKey Rescue system if Lenovo OneKey Rescue system has been preinstalled.
- In Windows operating system, press this button to start Lenovo OneKey Recovery.

Note: For details, see "OneKey Rescue system" on page 36.

■ **Mute/Unmute button** `2`

Mute/unmute the sound from the computer.

■ **OneKey Theater button 3**

Lenovo OneKey Theater provides five scenario modes for using your computer in different ways: normal mode, movie mode, music mode, picture mode, and intelligent mode. These modes are preset enhancements by Lenovo to improve visual and aural experiences via your computer in different usage scenarios. You can manually choose between normal, movie and intelligent mode. Picture or music mode is automatically selected if your computer is in intelligent mode.

To manually select a desired mode:
• Press and release the OneKey Theater button to display the on-screen menu;
• Keep pressing and releasing the button until the icon of your desired mode is highlighted.

The computer switches to the selected mode after 2 seconds.

Normal mode

The default mode.

Movie mode

Provides enhanced visual and audio output.

Music mode

Provides enhanced audio output.

Picture mode

Provides enhanced contrast and color saturation.

Intelligent mode

Lenovo OneKey Theater switches intelligently between movie mode, music mode, and picture mode according to the application you are using.

Notes:
• You can enable or disable the OneKey Theater feature via the Start menu.
• Some applications may not be compatible with intelligent mode.

■ **Smart noise control button** **4**

Smart noise control button enables you to control fan speed during computer operation. You can choose between normal or silent mode by a touch of this button; you can also activate the dust cleaning feature by touching and holding this button for three seconds.

Switching to silent mode

If your computer is not running large applications and you want a silent work environment, you can switch the computer to silent mode. The icon ⌖ is displayed on the computer screen for a few seconds and the touch-sensitive button is illuminated, indicating that the computer has been switched to silent mode.

Note: The fan of the computer is spinning at relatively low speeds in silent mode, and thus dissipates less heat than in normal mode. If large applications are running, the system may lower the voltage of the central processing unit (CPU) automatically to decrease the heat produced by the CPU. You might experience lower system performance when the computer is running in silent mode, especially in the case of graphics-intensive applications.

Switching to normal mode

For high system performance when running large applications, you can switch the computer to normal mode by touching this button. The icon ⌖ is displayed on the computer screen for a few seconds and the touch-sensitive button illumination turns off, indicating the computer has been switched to normal mode. The fan spins at higher speeds when the computer is operating in normal mode.

Activating dust cleaning feature

Dust tends to build up around the heat-sink of a computer's CPU over time. Accumulated dust can reduce the dissipation capability of a heat-sink, resulting in an increase in batter power consumption. You can activate the dust cleaning feature by touching and holding the touch-sensitive button for three seconds. The touch-sensitive button will flash, indicating that the dust cleaning feature has been activated. The fan will spin at high speed and then stop alternately for about two minutes to discharge the accumulated dust. Upon completion of dust cleaning, the computer will revert back to the previously-selected mode.

Notes:
- When using the dust cleaning feature, make sure your computer is placed in a clean work area with good ventilation.
- We recommend that you perform dust cleaning at least once a month to prevent dust accumulation.

■ **Energy Management button** 5

Lenovo Energy Management provides you control over the performance and power consumption for each component of your notebook through the collaboration of software and hardware, thus extends battery life and improves battery runtime.

■■ System status indicators ─────────────────────

These indicators inform you of the computer status.
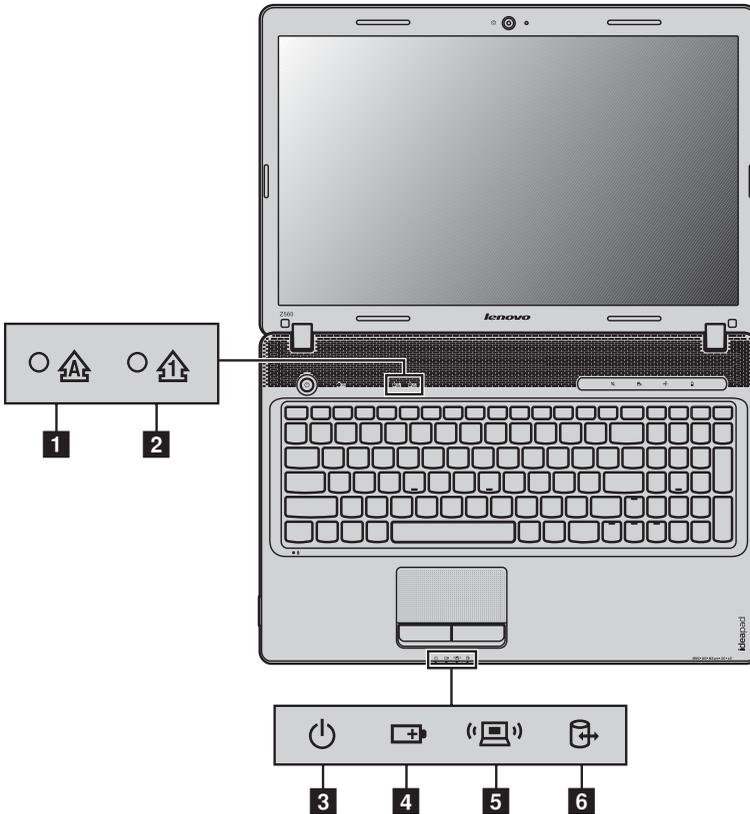

a **Caps lock indicator** ⚿

b **Num lock indicator** ⚿

c **Power status indicator** ⏻

d **Battery status indicator** 🔋

e **Wireless communication indicator** «💻»

f **Hard disk drive indicator** 🗄

▪▪ Securing your computer ─────────────────

This section provides information about how to help protect your computer from theft and unauthorized use.

■ Attaching a security lock (not supplied)

You can attach a security lock to your computer to help prevent it from being removed without your permission. For details on installing the security lock, please refer to the instructions shipped with the security lock that you have purchased.

Refer to the "Left-side view" on page 4 for the location of the Kensington slot.

Notes:
- Before purchasing any security product, verify that it is compatible with this type of security keyhole.
- You are responsible for evaluating, selecting, and implementing the locking devices and security features. Lenovo offers no comment judgement or warranty regarding the function, quality or performance of locking devices and security features.

■ Using VeriFace™

VeriFace is a face recognition software which takes a digital snapshot, extracts key features of your face, and creates a digital map that becomes the system's "password".

If you want to activate VeriFace for the first time, click the VeriFace icon on the desktop to register your facial image.

Notes:
- The face registration and verification works best in an environment with steady and even light.
- You can determine whether to use this function when you log on the system.

For more details on VeriFace, see the software help.

■ **Using passwords**

Using passwords helps prevent your computer from being used by others. Once you set a password and enable it, a prompt appears on the screen each time you power on the computer. Enter your password at the prompt. The computer cannot be used unless you enter the correct password.

Note: This password can be from one to seven alphanumeric characters in any combination.

For details about how to set the password, see the Help to the right of the screen in BIOS setup utility.

Note: To enter BIOS setup utility, press **F2** when the Lenovo logo appears on the screen while the computer is starting up.

Chapter 3. Connecting to the Internet

As a global network, the Internet connects computers worldwide, providing services such as e-mailing, information searching, electronic commerce, Web browsing and entertainment.

You can connect the computer to the Internet in the following ways:
Wired connection: use physical wiring to connect.
Wireless network technology: connect without wiring.

▪▪ Wired connection ——————————————————————

Wired connections are a reliable and safe way to connect the computer to the Internet.

Cable	Cable Internet services use a cable modem connected to the residential cable TV line.
DSL	DSL is a family of related technologies that bring high-speed network access to homes and small businesses over ordinary telephone lines.

■ **Hardware connection:**

Cable   **DSL**
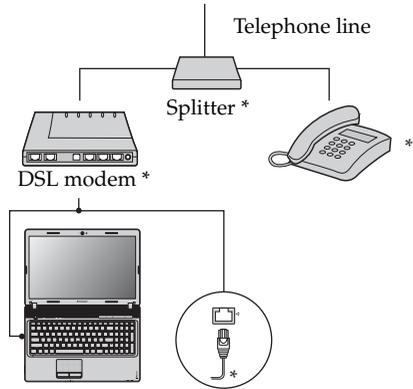

* Not supplied.

Note: The above diagrams are for reference only. Actual connection method may vary.

■ **Software configuration**

Consult your Internet Service Provider (ISP) for details on how to configure your computer.

▪▪ Wireless connection

Wireless connections provide mobile access to the Internet, allowing you to stay online anywhere the wireless signal covers.

Divided by the signal scales, wireless connection to the Internet can be built based on the following standards.

Wi-Fi	Wi-Fi networks cover a small physical area, like a home, office, or small group of buildings. An access point is necessary for the connection.
WiMAX	WiMAX networks connect several Wireless LAN systems to cover a metropolitan area, providing high-speed broadband access without the need for cables.
Mobile Broadband	The Mobile Broadband network provides Internet access to computers, cell phones and other devices over a large geographic area. Mobile networks are used for data transmission, and access is usually provided by a mobile network operator. A Mobile Broadband SIM card is necessary for the connection.

Note: Your computer may not support all wireless connection methods.

■ **Using Wi-Fi/WiMAX (Select models only)**

Enabling wireless connection

To enable wireless communications, do the following:

❶ Slide the integrated wireless device switch from 🖳 to "🖳".

❷ Press **Fn + F5** to make configuration.

Hardware connection

Wi-Fi/WiMAX network   - - - -   Access point *
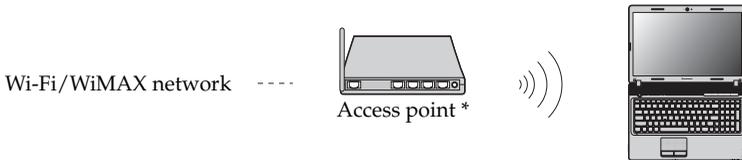

* Not supplied

Software configuration

Consult your Internet Service Provider (ISP) and search Windows Help and
Support Center for details on how to configure your computer.

■ **Using Mobile Broadband (Select models only)**

Before getting started with Mobile Broadband, you first need to choose a mobile network operator and make sure you are in the coverage area of the network. After that, you also need:

• To activate the Mobile Broadband service through your local mobile network operator. You will get a Subscriber Identity Module (SIM) card after activation. For instructions on inserting the SIM card, refer to For details, see "Inserting the SIM card" on page 34.

Notes:
• Various standards are in use by mobile operators to provide Mobile Broadband services. The Lenovo Mobile Broadband module may support one or more of the following standards:
  ▪ GSM (Global System for Mobile Communications)
  ▪ TD-SCDMA (Time Division-Synchronous Code Division Multiple Access)
  ▪ SCDMA (Synchronous Code Division Multiple Access)
  ▪ EV-DO (Evolution Data Optimized)
  ▪ HSPA (High Speed Packet Access)
• Mobile Broadband is a subscription service. Refer to your local mobile network operator for availability, cost and other information.
• A SIM card is a type of smart card used by mobile network operators to identify their service subscribers on the mobile network. You will get the SIM card from your mobile network operator after you have activated the Mobile Broadband service.

• A connection management utility to connect/disconnect to your Mobile Broadband network.

Note: In general, your mobile service provider provides this utility.

Inserting the SIM card

To insert the SIM card:

1 Turn off the computer; then disconnect the AC adapter and all cables from the computer.

2 Close the computer display and turn it over.

3 Remove the battery.

4 Insert the SIM card in the card slot until it clicks into place as shown in the illustration.

Note: Inserting the SIM card in the wrong direction may damage the SIM card slot.

Notched Corner
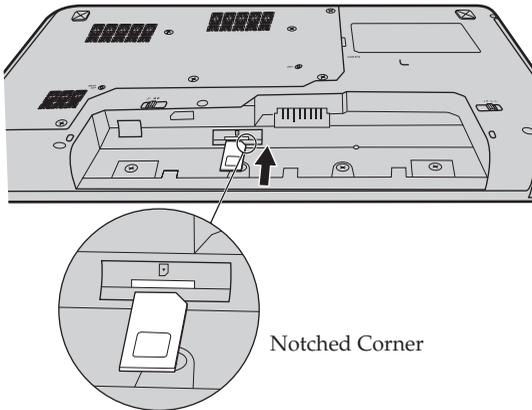

5 Put the battery back in place. Turn the computer over and reconnect the cables.

Removing the SIM card

To remove the SIM card:

❶ Turn off the computer, then disconnect the AC adapter and all cables from the computer.

❷ Close the computer display and turn it over.

❸ Remove the battery.

❹ Push the SIM card in until you hear a click, and then pull the SIM card out.
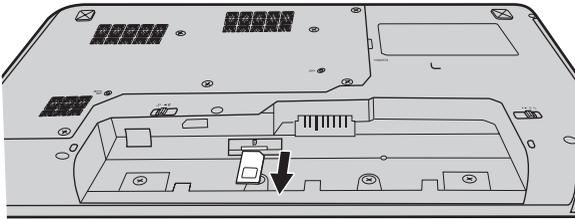

❺ Put the battery back in place. Turn the computer over and reconnect the cables.

Note: Never insert or remove the SIM card while the computer is on. Doing so may cause permanent damage to the SIM card as well as the SIM card reader.

Chapter 4. OneKey Rescue system

■■ OneKey Rescue system ——————————————————————

■ **Introduction**

The Lenovo OneKey Rescue system is an easy-to-use application that can be used to back up the data on your system partition (C drive) for easy restore when required. You can run Lenovo OneKey Recovery under the Windows operating system, and the OneKey Rescue system without starting the Windows operating system.

⊙ **Attention:**
In order to utilize the features of the OneKey Rescue system, your hard disk already includes a hidden partition by default to store the system image file and OneKey Rescue system program files. This default partition is hidden for security reasons and is the reason the available disk space is less than it claims. The exact available hard disk space depends on the file size of the mirror image file (based on the size of operating system and preinstalled software).

■ **Using Lenovo OneKey Recovery (within Windows operating system)**

In Windows operating system, double click the OneKey Recovery system Icon on the desktop to launch Lenovo OneKey Recovery.
Within the program, you can back up the system partition on the hard disk drive, other storage devices, or by creating recovery discs.

Notes:
• The backup process and creation of recovery discs may take some time, connect the AC adapter and battery pack to your computer.
• After the recovery discs are burned, please number them so that you can use them in the correct order.
• Computers without an integrated optical drive support the creation of recovery discs; however an appropriate external optical drive is needed to physically create the recovery discs.

For more instructions, see the Help file of Lenovo OneKey Recovery.

■ **Using Lenovo OneKey Rescue system (without Windows operating system)**

In the event that the operating system cannot be loaded, follow the steps below to access OneKey Rescue system.

• Shut down your computer.

• Press the ⌒ key to launch OneKey Rescue system.

Within the program, you can choose to restore your system partition to the original factory status, or to a previously generated backup.

> **Note:** The recovery process is irreversible. Make sure to back up any critical data before using the recovery feature.

Appendix A. CRU instructions

Notes:
- The illustrations used in this chapter are of the Lenovo IdeaPad Z560, unless otherwise stated.
- The following steps about upgrading and replacing devices are the same for the Z460, Z465, Z560 and Z565.

■■ Replacing the battery

Note: Use only the battery provided by Lenovo. Any other battery could ignite or explode.

To replace the battery, do the following:

❶ Turn off the computer, or enter hibernation mode. Disconnect the AC adapter and all cables from the computer.

Note: If you are using an ExpressCard device, the computer might not be able to enter hibernation mode. If this happens, turn off the computer.

❷ Close the computer display, and turn the computer over.

❸ Unlock the manual battery latch **1** . Holding the spring-loaded battery latch in the unlocked position **2** , remove the battery pack in the direction shown by the arrow **3** .
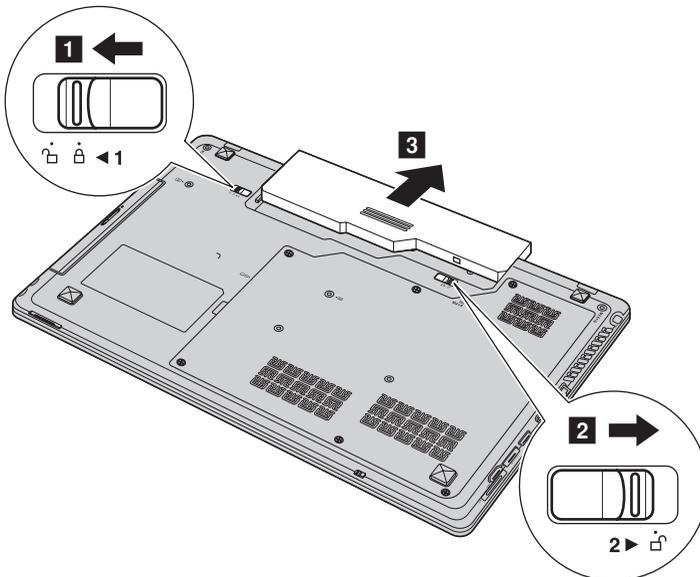

4 Install a fully charged battery.

5 Slide the manual battery latch to the locked position.

6 Turn the computer over again. Connect the AC adapter and the cables to the computer again.

▪▫ Replacing the hard disk drive ─────────

You can increase the storage capacity of your computer by replacing the hard disk drive with one of greater capacity. You can purchase a new hard disk drive from your reseller or Lenovo marketing representative.

Notes:
- Replace the hard disk drive only if you upgrade it or have it repaired. The connectors and bay of the hard disk drive were not designed for frequent changes, or drive swapping.
- The preinstalled softwares are not included on an optional hard disk drive.

Handling a hard disk drive

- Do not drop the drive or subject it to physical shocks. Put the drive on a material, such as soft cloth, that absorbs the physical shock.
- Do not apply pressure to the cover of the drive.
- Do not touch the connector.

The drive is very sensitive. Incorrect handling can cause damage and permanent loss of data on the hard disk. Before removing the hard disk drive, make a backup copy of all the information on the hard disk, and then turn the computer off. Never remove the drive while the system is operating, in sleep mode, or in hibernation mode.

To replace the hard disk drive, do the following:

1 Turn off the computer; then disconnect the AC adapter and all cables from the computer.

2 Close the computer display, and then turn the computer over.

3 Remove the battery pack.

4 Remove the Hard disk drive (HDD)/Memory/CPU (Central processing unit)/Mini PCI Express Card slot compartment cover.

a. Remove the four screws **1**, and then loosen the other screws **2**.

b. Remove the compartment cover **3**.
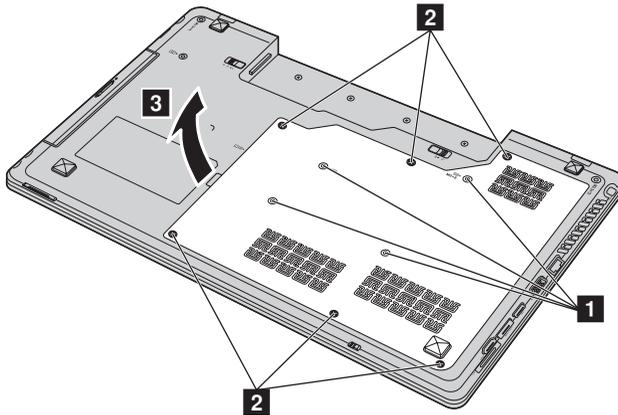

❺ Remove the frame fixing screws ▪4 .
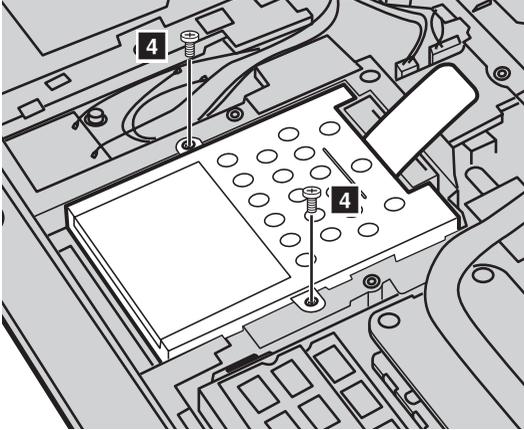

❻ Pull the tab in the direction shown by arrow ▪5 .
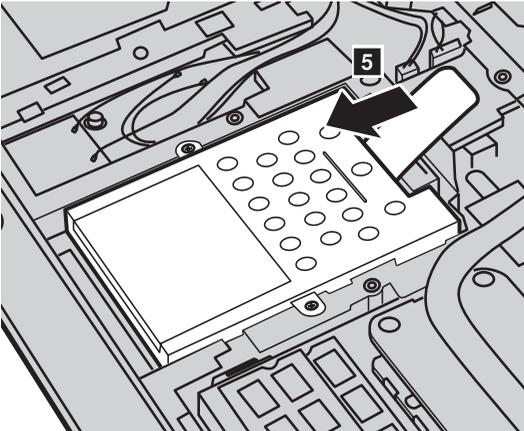

❼ Take out the hard disk drive secured in a metal frame ▐6▌ .
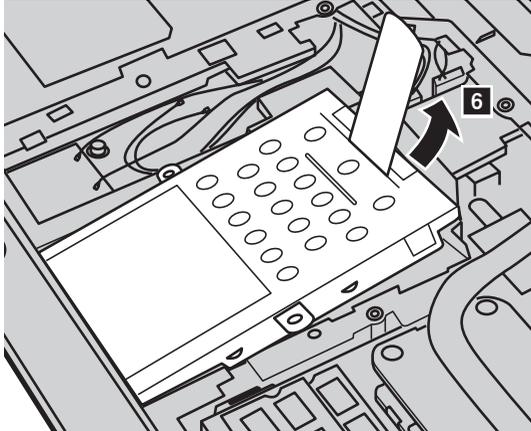

❽ Remove the screws and detach the metal frame from the hard disk drive.

❾ Attach the metal frame to a new hard disk drive and tighten the screws.

❿ Put the hard disk drive gently into the hard disk drive bay with the tab facing upwards and the connectors facing each other; then push it firmly into space.

⓫ Reinstall the frame fixing screw.

⓬ After aligning the attachment clips with their matching gaps, reinstall the compartment cover.

⓭ Tighten the screws.

⓮ Reinstall the battery pack.

⓯ Turn the computer over again. Connect the AC adapter and the cables to the computer again.

∎∎ Replacing memory ──────────────────────────────

You can increase the amount of memory in your computer by installing a double-data-rate three synchronous dynamic random access memory (DDR3 SDRAM)-available as an option-in the memory slot of your computer. DDR3 SDRAMs are available in various capacities.

> **Note:** Use only the memory types supported by your computer. If you incorrectly install optional memory, or install an unsupported memory type, a warning beep will sound when you try to start the computer.

To install a DDR3 SDRAM, do the following:

❶ Touch a metal table or a grounded metal object to reduce any static electricity in your body, which could damage the DDR3 SDRAM. Do not touch the contact edge of the DDR3 SDRAM.

❷ Turn off the computer. Disconnect the AC adapter and all cables from the computer.

❸ Close the computer display, and turn the computer over.

❹ Remove the battery again.

❺ Remove the Hard disk drive (HDD)/Memory/CPU (Central processing unit)/Mini PCI Express Card slot compartment cover.

　a. Remove the four screws **1** , and then loosen the other screws **2** .

　b. Remove the compartment cover **3** .
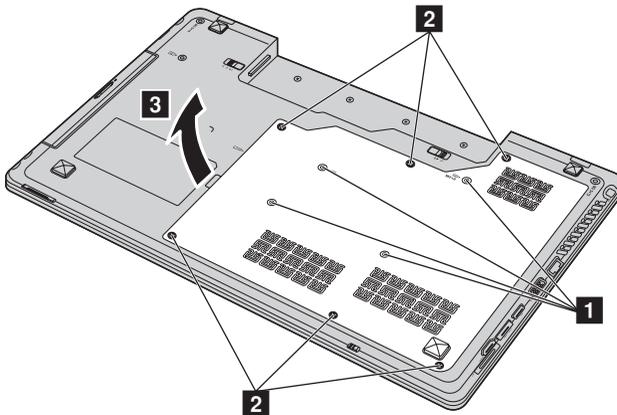

⑥ If two DDR3 SDRAMs are already installed in the memory slot, remove one of them to make room for the new one by pressing out on the latches on both edges of the socket at the same time. Be sure to save the old DDR3 SDRAM for future use.
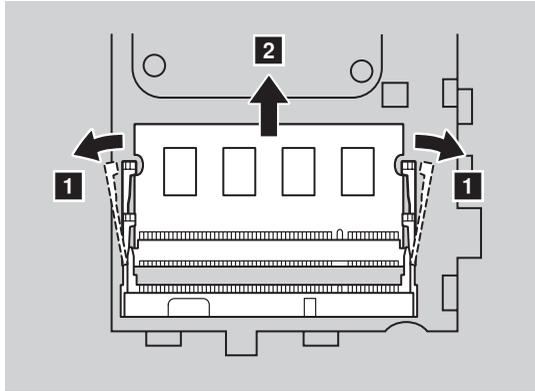

⑦ Align the notch of the DDR3 SDRAM with the protrusion of the socket and gently insert the DDR3 SDRAM into the socket at a 30-45° angle.

⑧ Push the DDR3 SDRAM inward toward the socket until the latches on both edges of the socket are pushed into the closed position.
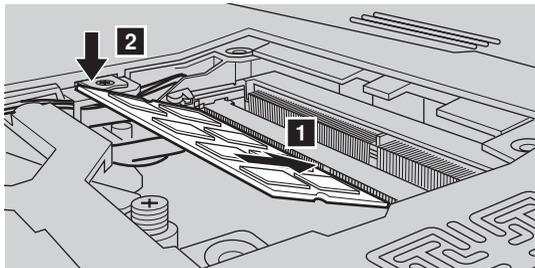

⑨ After aligning the attachment clips with their matching gaps, reinstall the compartment cover.

⑩ Reinstall and tighten the screws.

⑪ Reinstall the battery.

⑫ Turn the computer over again. Connect the AC adapter and the cables to the computer again.

Appendix A. CRU instructions

> **Note:** If only one DDR3 SDRAM is used on the computer you are servicing, the card must be installed in SLOT-0 (**a** : lower slot), but not in SLOT-1 (**b** : upper slot).
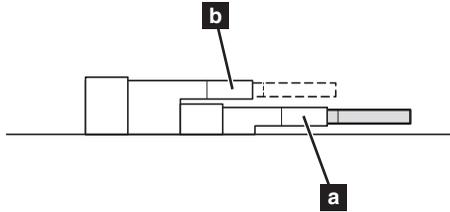

To make sure that the DDR3 SDRAM is installed correctly, do as follows:

1 Turn the computer on.

2 Hold F2 during startup. The BIOS setup utility screen opens. The **System Memory** item shows the total amount of memory installed in your computer.

■■ Removing the optical drive ────────────

To remove the optical drive, do the following:

❶ Remove the Hard disk drive (HDD)/Memory/CPU (Central processing unit)/Mini PCI Express Card slot compartment cover.

❷ Remove the screw shown in the illustration ◼1◼.

❸ Gently pull the optical drive out ◼2◼
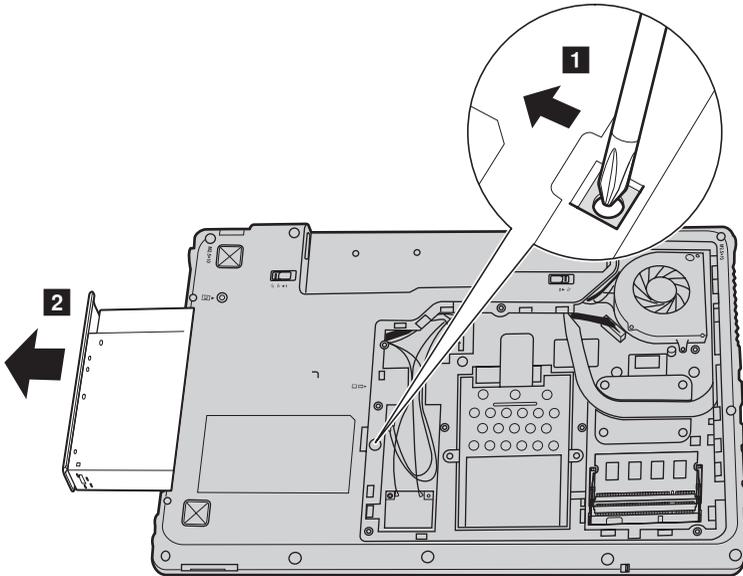

Appendix A. CRU instructions

The following table provides a list of CRUs (Customer Replaceable Units) for your computer, and informs you of where to find replacement instructions.

Appendix B. Lenovo limited warranty

L505-0010-01 04/2008

This Lenovo Limited Warranty applies only to Lenovo branded hardware products you purchased for your own use and not for resale.

This Lenovo Limited Warranty is available in other languages at www.lenovo.com/warranty.

■ **What this warranty covers**

Lenovo warrants that each hardware product that you purchase is free from defects in materials and workmanship under normal use during the warranty period. The warranty period for the product starts on the original date of purchase specified on your sales receipt or invoice unless Lenovo informs you otherwise in writing. The warranty period and type of warranty service that apply to your product are designated below under the section titled "**Warranty information**".

THIS WARRANTY IS YOUR EXCLUSIVE WARRANTY AND REPLACES ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. SOME STATES OR JURISDICTIONS DO NOT ALLOW THE EXCLUSION OF EXPRESS OR IMPLIED WARRANTIES, SO THE ABOVE EXCLUSION MAY NOT APPLY TO YOU. IN THAT EVENT, SUCH WARRANTIES APPLY ONLY TO THE EXTENT REQUIRED BY LAW AND ARE LIMITED IN DURATION TO THE WARRANTY PERIOD. NO WARRANTIES APPLY AFTER THAT PERIOD. SOME STATES OR JURISDICTIONS DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION ON DURATION MAY NOT APPLY TO YOU.

Appendix B. Lenovo limited warranty

■ **How to obtain warranty service**

If the product does not function as warranted during the warranty period, you may obtain warranty service by contacting Lenovo or an approved service provider. Each of them is referred to as a "Service Provider." A list of Service Providers and their telephone numbers is available at www.lenovo.com/support/phone.

Warranty service may not be available in all locations and may differ from location to location. Charges may apply outside a Service Provider's normal service area. Contact a local Service Provider for location-specific information.

■ **What your service provider will do to correct problems**

When you contact a Service Provider, you must follow the problem determination and resolution procedures specified.

Your Service Provider will attempt to diagnose and resolve your problem over the telephone, e-mail or through remote assistance. Your Service Provider may direct you to download and install designated software updates.

Some problems can be resolved with a replacement part that you can install yourself called a "Customer Replaceable Unit" or "CRU." If so, your Service Provider will ship the CRU to you to install.

If your problem cannot be resolved over the telephone or remotely, through your application of software updates or the installation of a CRU by you, your Service Provider will arrange for service under the type of warranty service designated for the product under the section titled "**Warranty information**".

If your Service Provider determines that it is unable to repair your product, your Service Provider will replace it with one that is at least functionally equivalent.

If your Service Provider determines that it is unable to either repair or replace your product, your sole remedy is to return the product to your place of purchase or to Lenovo for a refund of your purchase price.

■ **Replacement of a product or part**

When the warranty service involves the replacement of a product or part, the replaced product or part becomes Lenovo's property and the replacement product or part becomes your property. Only unaltered Lenovo products and parts are eligible for replacement. The replacement product or part provided by Lenovo may not be new, but it will be in good working order and at least functionally equivalent to the original product or part. The replacement product or part shall be warranted for the balance of the period remaining on the original product.

Before your Service Provider replaces a product or part, you agree to:

❶ remove all features, parts, options, alterations, and attachments not under warranty service;

❷ ensure that the product or part is free of any legal obligations or restrictions that prevent its replacement; and

❸ obtain authorization from the owner to have your Service Provider service a product or part if you do not own it.

■ **Your additional responsibilities**

Where applicable, before service is provided, you agree to:

❶ follow the service request procedures that your Service Provider specifies;

❷ backup or secure all programs and data contained in the product;

❸ provide your Service Provider with all system keys or passwords and sufficient, free, and safe access to your facilities to perform service; and

❹ ensure that all information about identified or identifiable individuals ("Personal Data") is deleted from the product or that, with respect to any Personal Data that you did not delete, you are in compliance with all applicable laws.

Appendix B. Lenovo limited warranty

■ **Use of personal information**

If you obtain service under this warranty, Lenovo will store, use and process information about your warranty service and your contact information, including name, phone numbers, address, and e-mail address. Lenovo will use this information to perform service under this warranty and to improve our business relationship with you. We may contact you to inquire about your satisfaction regarding our warranty service or to notify you about any product recalls or safety issues. In accomplishing these purposes, we may transfer your information to any country where we do business and may provide it to entities acting on our behalf. We may also disclose it where required by law.

■ **What this warranty does not cover**

This warranty does not cover the following:
• uninterrupted or error-free operation of a product;
• loss of, or damage to, your data;
• any software programs, whether provided with the product or installed subsequently;
• failure or damage resulting from misuse, accident, modification, unsuitable physical or operating environment, natural disasters, power surges, or improper maintenance by you;
• damage caused by a non-authorized service provider;
• failure of, or damage caused by, any third party products, including those that Lenovo may provide or integrate into the Lenovo product at your request; and
• any technical or other support, such as assistance with "how-to" questions and those regarding product set-up and installation.

This warranty is voided by removal or alteration of identification labels on the product or its parts.

■ **Limitation of liability**

Lenovo is responsible for loss or damage to your product only while it is: 1) in your Service Provider's possession; or 2) in transit in those cases where the Service Provider is responsible for the transportation.

Neither Lenovo nor your Service Provider is responsible for any of your data including confidential, proprietary, or personal data contained in a product. You should remove and/or backup all such information from the product prior to its service or return.

Circumstances may arise where, because of a default on Lenovo's part or other liability, you may be entitled to recover damages from Lenovo. In each such instance, regardless of the basis of your claim against Lenovo (including breach, negligence, misrepresentation, or other contract or tort claim), except and to the extent that liability cannot be waived or limited by applicable laws, Lenovo shall not be liable for more than the amount of actual direct damages suffered by you, up to the amount you paid for the product. This limit does not apply to damages for bodily injury (including death) and damage to real property or tangible personal property for which Lenovo is liable under law.

This limit also applies to Lenovo's suppliers, resellers, and your Service Provider. It is the maximum amount for which Lenovo, its suppliers, resellers, and your Service Provider are collectively responsible.

UNDER NO CIRCUMSTANCES SHALL LENOVO, ITS SUPPLIERS, RESELLERS, OR SERVICE PROVIDERS BE LIABLE FOR ANY OF THE FOLLOWING EVEN IF INFORMED OF THEIR POSSIBILITY: 1) THIRD PARTY CLAIMS AGAINST YOU FOR DAMAGES; 2) LOSS OR DAMAGE TO YOUR DATA; OR 3) SPECIAL, INCIDENTAL, INDIRECT OR CONSEQUENTIAL DAMAGES, INCLUDING LOST PROFITS, BUSINESS REVENUE, GOODWILL OR ANTICIPATED SAVINGS. AS SOME STATES OR JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

Appendix B. Lenovo limited warranty

■ **Dispute resolution**

If you acquired the product in **Cambodia**, **Indonesia**, **Philippines**, **Vietnam or Sri Lanka**, disputes arising out of or in connection with this warranty shall be finally settled by arbitration held in Singapore and this warranty shall be governed, construed and enforced in accordance with the laws of Singapore, without regard to conflict of laws. If you acquired the product in **India**, disputes arising out of or in connection with this warranty shall be finally settled by arbitration held in Bangalore, India. Arbitration in Singapore shall be held in accordance with the Arbitration Rules of Singapore International Arbitration Center ("SIAC Rules") then in effect. Arbitration in India shall be held in accordance with the laws of India then in effect. The arbitration award shall be final and binding on the parties without appeal. Any award shall be in writing and set forth the findings of fact and the conclusions of law. All arbitration proceedings, including all documents presented in such proceedings, shall be conducted in the English language, and the English language version of this warranty prevails over any other language version in such proceedings.

■ **Other rights**

THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS AND YOU MAY HAVE OTHER RIGHTS WHICH VARY FROM STATE TO STATE OR JURISDICTION TO JURISDICTION. YOU MAY ALSO HAVE OTHER RIGHTS UNDER APPLICABLE LAW OR WRITTEN AGREEMENT WITH LENOVO. NOTHING IN THIS WARRANTY AFFECTS STATUTORY RIGHTS, INCLUDING RIGHTS OF CONSUMERS UNDER NATIONAL LEGISLATION GOVERNING THE SALE OF CONSUMER GOODS THAT CANNOT BE WAIVED OR LIMITED BY CONTRACT.

■ **European Economic Area (EEA)**

Customers in the EEA may contact Lenovo at the following address: EMEA Service Organisation, Lenovo (International) B.V., Floor 2, Einsteinova 21, 851 01, Bratislava, Slovakia. Service under this warranty for Lenovo hardware products purchased in EEA countries may be obtained in any EEA country in which the product has been announced and made available by Lenovo.

■■ Warranty information ─────────────────────

Product or machine type	Country or region of purchase	Warranty period	Type of warranty service
notebook: 20059, 0913 20065, 4309 20060, 0914 20066, 4311	China (Hong Kong S.A.R.), China (Macau S.A.R.), India, Indonesia, Malaysia, Thailand, Philippines, Vietnam, Egypt, South Africa, Saudi Arabia, UAE	parts and labor - 1 year battery pack - 1 year	1, 4
	Austria, Belgium, Croatia, Cyprus, Denmark, Estonia, France, Finland, Germany, Greece, Iceland, Israel, Ireland, Italy, Latvia, Lithuania, Luxembourg, Netherlands, Norway, Romania, Slovenia, Spain, Sweden, Switzerland, the United Kingdom		1, 4
	United States of America, Canada, Mexico, Brazil, Argentina, Colombia, Peru, Venezuela, Bolivia, Uruguay, Chile, Paraguay, Ecuador		
	Singapore		1, 3, 4
	Australia, New Zealand, Japan		1, 3
	Taiwan, Korea		3, 4
	Russia, Ukraine, the Republic of Kazakhstan, Belarus, Sri Lanka		4
	Poland, Turkey, Czech Republic, Hungary, Slovakia, Bulgaria	parts and labor - 2 years battery pack - 1 year	1, 4

If required, your Service Provider will provide repair or exchange service depending on the type of warranty service specified for your product and the available service. Scheduling of service will depend upon the time of your call, parts availability, and other factors.

Appendix B. Lenovo limited warranty

■ **Types of warranty service**

❶ Customer Replaceable Unit ("CRU") Service

Under CRU Service, your Service Provider will ship CRUs to you for installation by you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. CRUs that are easily installed by you are called Self-service CRUs, while Optional-service CRUs may require some technical skill and tools. Installation of Self-service CRUs is your responsibility. You may request that a Service Provider install Optional-service CRUs under one of the other types of warranty service designated for your product. An optional service offering may be available for purchase from Lenovo to have Lenovo install Self-service CRUs for you. You may find a list of CRUs and their designation in the publication that ships with your product or at www.lenovo.com/CRUs. The requirement to return a defective CRU, if any, will be specified in the materials shipped with a replacement CRU. When return is required: 1) return instructions, a prepaid return shipping label, and a container will be included with the replacement CRU; and 2) you may be charged for the replacement CRU if your Service Provider does not receive the defective CRU within thirty (30) days of your receipt of the replacement.

❷ On-site Service

Under On-Site Service, your Service Provider will either repair or exchange the product at your location. You must provide a suitable working area to allow disassembly and reassembly of the Lenovo product. For some products, certain repairs may require your Service Provider to send the product to a designated service center.

❸ Courier or Depot Service

Under Courier or Depot Service, your product will be repaired or exchanged at a designated service center, with shipping arranged by your Service Provider. You are responsible for disconnecting the product. A shipping container will be provided to you for you to return your product to a designated service center. A courier will pick up your product and deliver it to the designated service center. Following its repair or exchange, the service center will arrange the return delivery of the product to you.

❹ Customer Carry-In or Mail-In Service

Under Customer Carry-In or Mail-In Service, your product will be repaired or exchanged at a designated service center, with delivery or shipping arranged by you. You are responsible to deliver or mail, as your Service Provider specifies, (prepaid by you unless specified otherwise) the product, suitably packaged to a designated location. After the product has been repaired or exchanged, it will be made available for your collection. Failure to collect the product may result in your Service Provider disposing of the product as it sees fit. For Mail-in Service, the product will be returned to you at Lenovo's expense, unless your Service Provider specifies otherwise.

❺ Product Exchange Service

Under Product Exchange Service, Lenovo will ship a replacement product to your location. You are responsible for its installation and verification of its operation. The replacement product becomes your property in exchange for the failed product, which becomes the property of Lenovo. You must pack the failed product in the shipping carton used to ship the replacement product and return it to Lenovo. Transportation charges, both ways, are paid by Lenovo. Failure to use the carton in which the replacement product was received may result in your responsibility for damage to the failed product during shipment. You may be charged for the replacement product if Lenovo does not receive the failed product within thirty (30) days of your receipt of the replacement product.

Appendix C. Product specific Notices

The notices in this appendix are specific to the product with the given MT number. Notices that are common for most Lenovo products are included in "Appendix A. Notices" of the *Lenovo Safety and General Information Guide*.

▪▫ Energy star information

ENERGY STAR® is a joint program of the U.S. Environmental Protection Agency and the U.S. Department of Energy aimed at saving money and protecting the environment through energy efficient products and practices. Lenovo® is proud to offer our customers products with an ENERGY STAR compliant designation. Lenovo computers of the following machine types, if the ENERGY STAR mark is affixed, have been designed and tested to conform to the ENERGY STAR 5.0 program requirements for computers.

- 20059, 0913
- 20065, 4309
- 20060, 0914
- 20066, 4311

By using ENERGY STAR compliant products and taking advantage of the power-management features of your computer, you reduce the consumption of electricity. Reduced electrical consumption contributes to potential financial savings, a cleaner environment, and the reduction of greenhouse gas emissions.

For more information about ENERGY STAR, visit

http://www.energystar.gov.

Lenovo encourages you to make efficient use of energy an integral part of your day-to-day operations. To help in this endeavor, Lenovo has preset the following power-management features to take effect when your computer has been inactive for a specified duration:

Table 1. ENERGY STAR power-management features

Windows® 7

Power plan: Energy Star
• Turn off the display:
  After 10 minutes
• Put the computer to sleep:
  After 25 minutes
• Advanced power settings:
  - Turn off hard disks:
   After 20 minutes
  - Hibernate: After 1 hour

To awaken your computer from a Sleep mode, press any key on your keyboard. For more information about these settings, refer to your Windows Help and Support information system.

Appendix C. Product specific Notices

▪▪ Electronic emissions notices ─────────────

The following information refers to Lenovo IdeaPad Z460 / Z465 / Z560 / Z565, machine type 20059, 0913 / 20065, 4309 / 20060, 0914 / 20066, 4311.

■ **Federal Communications Commission (FCC) Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee the interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.

• Increase the separation between the equipment and receiver.

• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

• Consult an authorized dealer or service representative for help.

Properly shielded and grounded cables and connectors must be used in order to meet FCC emission limits. Proper cables and connectors are available from Lenovo authorized dealers. Lenovo is not responsible for any radio or television interference caused by using other than recommended cables or connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

■ **Industry Canada Class B Emission Compliance Statement**

This Class B digital apparatus complies with Canadian ICES-003.

■ **Avis de conformité à la réglementation d'Industrie Canada**

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

■ **German Class B Compliance Statement**

Deutschsprachiger EU Hinweis:

Hinweis für Geräte der Klasse B EU-Richtlinie zur Elektromagnetischen Verträglichkeit
Dieses Produkt entspricht den Schutzanforderungen der EU-Richtlinie 2004/108/EG (früher 89/336/EWG) zur Angleichung der Rechtsvorschriften über die elektromagnetische Verträglichkeit in den EU-Mitgliedsstaaten und hält die Grenzwerte der EN 55022 Klasse B ein.

Um dieses sicherzustellen, sind die Geräte wie in den Handbüchern beschrieben zu installieren und zu betreiben. Des Weiteren dürfen auch nur von der Lenovo empfohlene Kabel angeschlossen werden. Lenovo übernimmt keine Verantwortung für die Einhaltung der Schutzanforderungen, wenn das Produkt ohne Zustimmung der Lenovo verändert bzw. wenn Erweiterungskomponenten von Fremdherstellern ohne Empfehlung der Lenovo gesteckt/eingebaut werden.

Appendix C. Product specific Notices

Deutschland:

Einhaltung des Gesetzes über die elektromagnetische Verträglichkeit von Betriebsmittein

Dieses Produkt entspricht dem "Gesetz über die elektromagnetische Verträglichkeit von Betriebsmitteln" EMVG (früher "Gesetz über die elektromagnetische Verträglichkeit von Geräten"). Dies ist die Umsetzung der EU-Richtlinie 2004/108/EG (früher 89/336/EWG) in der Bundesrepublik Deutschland.

Zulassungsbescheinigung laut dem Deutschen Gesetz über die elektromagnetische Verträglichkeit von Betriebsmitteln, EMVG vom 20. Juli 2007 (früher Gesetz über die elektromagnetische Verträglichkeit von Geräten), bzw. der EMV EG Richtlinie 2004/108/EC (früher 89/336/EWG), für Geräte der Klasse B.

Dieses Gerät ist berechtigt, in Übereinstimmung mit dem Deutschen EMVG das EG-Konformitätszeichen - CE - zu führen. Verantwortlich für die Konformitätserklärung nach Paragraf 5 des EMVG ist die Lenovo (Deutschland) GmbH, Gropiusplatz 10, D-70563 Stuttgart.

Informationen in Hinsicht EMVG Paragraf 4 Abs. (1) 4:

Das Gerät erfüllt die Schutzanforderungen nach EN 55024 und EN 55022 Klasse B.

■ **European Union Compliance Statement Class B Compliance**

European Union - Compliance to the Electromagnetic Compatibility Directive

$$C \, E$$

This product is in conformity with the protection requirements of EU Council Directive 2004/108/EC on the approximation of the laws of the Member States relating to electromagnetic compatibility. Lenovo cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product, including the installation of option cards from other manufacturers.

This product has been tested and found to comply with the limits for Class B Information Technology Equipment according to European Standard EN 55022. The limits for Class B equipment were derived for typical residential environments to provide reasonable protection against interference with licensed communication devices.

Properly shielded and grounded cables and connectors must be used in order to reduce the potential for causing interference to radio and TV communications and to other electrical or electronic equipment. Such cables and connectors are available from Lenovo authorized dealers. Lenovo cannot accept responsibility for any interference caused by using other than recommended cables and connectors.
