Lenovo YOGA 730

YOGA 730-13IKB  |  YOGA 730-15IKB

User Guide

⚠️⚠️⚠️
Read the safety notices and important tips in the included manuals before using your computer.
Notes

- Before using the product, be sure to read Lenovo Safety and General Information Guide first.
- The latest electronic compliance and environmental information are available from the Lenovo compliance information Web sites.
  - To view compliance information go to: http://www.lenovo.com/compliance
  - To download environmental information go to: http://www.lenovo.com/ecodeclaration
- Some instructions in this guide may assume that you are using Windows® 10. If you are using another Windows operating system, some operations may be slightly different. If you are using other operating systems, some operations may not apply to you.
- The features described in this guide are common to most models. Some features may not be available on your computer or your computer may include features that are not described in this user guide.
- The illustrations used in this manual are for Lenovo YOGA 730-15IKB unless otherwise stated.
- The illustrations in this manual may differ from the actual product. Please refer to the actual product.

Regulatory Notice

- For details, refer to Guides & Manuals at http://support.lenovo.com.

Chapter 1. Getting to know your computer

- Lenovo YOGA 730-15IKB

![Diagram of Lenovo YOGA 730-15IKB](image)

**Note:** The dashed areas indicate parts that are not visible externally.

**Attention:**
- When closing the display panel, be careful *not* to leave pens or any other objects in between the display panel and the keyboard. Otherwise, the display panel may be damaged.
Chapter 1. Getting to know your computer

1 Integrated camera
   Use the camera for video communication or taking photos.

2 Built-in microphone
   Captures sound which can be used for video conferencing, voice narration, or audio recording.

3 Multi-touch screen
   The LCD display with LED backlight provides brilliant visual output. Multi-touch function is available on this display.

4 Wireless LAN antennas
   Connect to a wireless LAN adapter to send and receive wireless radio signals.

5 Fingerprint reader
   Registers fingerprints that can be used as passwords to secure your computer.

6 Touchpad
   The touchpad functions as a conventional mouse.
   **One piece multi-touch ClickPad:** To move the pointer on the screen, slide your fingertip over the pad in the direction in which you want the pointer to move.
   **Left-click area:** Clicking in this area corresponds to the functions of clicking the left button on a conventional mouse.
   **Right-click area:** Clicking in this area corresponds to the functions of clicking the right button on a conventional mouse.

**Note:** You can enable/disable the touchpad by pressing **F6** ( ).
Chapter 1. Getting to know your computer

- **Using the keyboard**

**Function key combinations**

Through the use of the function keys, you can change operational features instantly. To use this function, press and hold **Fn** 1; then press one of the function keys 2.

The following describes the features of each function key.

<table>
<thead>
<tr>
<th>Function Key Combination</th>
<th>Feature Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Fn + B:</strong></td>
<td>Activates the break function.</td>
</tr>
<tr>
<td><strong>Fn + P:</strong></td>
<td>Activates the pause function.</td>
</tr>
<tr>
<td><strong>Fn + K:</strong></td>
<td>Enables/disables the scroll lock.</td>
</tr>
<tr>
<td><strong>Fn + S:</strong></td>
<td>Activates the system request.</td>
</tr>
<tr>
<td><strong>Fn + ↑:</strong></td>
<td>Activates the Pgup key function.</td>
</tr>
<tr>
<td><strong>Fn + ↓:</strong></td>
<td>Activates the Pgdn key function.</td>
</tr>
<tr>
<td><strong>Fn + ←:</strong></td>
<td>Activates the home key function.</td>
</tr>
<tr>
<td><strong>Fn + →:</strong></td>
<td>Activates the end key function.</td>
</tr>
<tr>
<td><strong>Fn + Space:</strong></td>
<td>Adjusts the keyboard backlight (off → dim → bright → off).</td>
</tr>
</tbody>
</table>
Chapter 1. Getting to know your computer

Hotkeys

You can access certain system settings quickly by pressing the appropriate hotkeys.

Note: You can use the Lenovo Setting to enable/disable the hotkey function.
Chapter 1. Getting to know your computer

- Positioning the display panel

  The display panel can be opened to any angle up to 360 degrees.

  ![Positioning the display panel diagram]

  Notebook Mode

  Suitable for tasks that require a keyboard and mouse (such as creating documents, writing e-mails, and so on).
Chapter 1. Getting to know your computer

Stand Mode (Theater Mode)

Suitable for tasks that require little or no touch (such as viewing photos or playing videos).

Tablet Mode

Suitable for tasks that require touching the screen often (such as surfing the Web, playing games, and so on).
Chapter 1. Getting to know your computer

Tent Mode (Presentation Mode)

Suitable for tasks that require limited interaction with the touch screen (such as displaying graphs or PowerPoint presentations).

⚠️ **Attention:**
- Do not open the display with too much force, otherwise the panel or hinges may be damaged.

**Note:** The keyboard and touchpad are automatically locked when the screen is opened beyond 190 degrees (approximately).
Screen orientation

You can rotate the display panel to your preferred orientation. The orientation of the display automatically changes (alternating between portrait and landscape modes) depending on how you hold it.
Chapter 1. Getting to know your computer

</tr>
</tbody>
</table>

**Note:** For the Lenovo YOGA 730-13IKB, the Type-C port may be used as an AC power adapter jack.

| **4** Combo audio jack | Connects to headsets. |

**Notes:**  
• The combo audio jack does not support conventional microphones.  
• The recording function might not be supported if third-party headphones or headsets are connected, due to different industry standards.

| **5** Novo button | When the computer is off, press this button to start the recovery system or the BIOS setup utility, or to enter the boot menu. |

**Notes:**  
• You can use the tip of an unfolded paper clip (or similar object without a sharp tip) to gently press the Novo button.  
• For details, see “Recovery system” on page 28.

| **6** USB 3.0 port | Connects to USB devices. |

**Notes:**  
• The USB 3.0 port supports the AOU (always on USB) function.  
• For details, see “Connecting USB device” on page 12.
Chapter 1. Getting to know your computer

- Connecting USB device

You can connect a USB device to your computer by inserting its USB plug (Type A/Type C) into the USB port on your computer.

The first time you plug a USB device into a particular USB port on your computer, Windows automatically installs a driver for that device. After the driver has been installed, you can disconnect and reconnect the device without performing any additional steps.

**Note:** Typically, Windows detects a new device after it has been connected, and then installs the driver automatically. However, some devices may require you to install the driver before connecting. Check the documentation provided by the device’s manufacturer before connecting the device.

Before disconnecting a USB storage device, make sure your computer has finished transferring data to that device. Click the **Safely Remove Hardware and Eject Media** icon in the Windows notification area to remove the device before disconnecting.

**Note:** If your USB device uses a power cord, connect the device to a power source before connecting it. Otherwise, the device may not be recognized.

4. ![Rear Bluetooth module battery replacement step 4](image)
5. ![Rear Bluetooth module battery replacement step 5](image)

**Note:** Select the appropriate coin or screwdriver for removal.
Chapter 2. Starting to use Windows 10

Note: Windows® 10 has an updated version. If you are using the updated version, some operations may be different. Please refer to the actual product.

Configuring the operating system for the first time

You may need to configure the operating system when it is first used. The configuration process may include the procedures below:

• Accepting the end user license agreement
• Configuring the Internet connection
• Registering the operating system
• Creating a user account

Operating system interface

Windows 10 comes with a powerful and useful start menu. To open the start menu, do one of the following:

• Press the Windows key on the keyboard.
• Select Start on the lower-left corner of the desktop.
Chapter 2. Starting to use Windows 10

- **Settings**

  *Settings* lets you perform basic tasks. You can also search for more settings with the settings search box in the upper-right corner.

  To open the settings, do the following:
  
  - Open the start menu, and then select **Settings**.

- **Personalize the start menu**

  You can personalize the start menu with your favorite apps.

  To personalize the start menu, do the following:

  1. Open the start menu and find the apps list on the left.
  2. Right click the app you want to add to the start menu, and then select **Pin to Start**.

  *Note:* You can also drag apps from the apps list to add them to the start menu.
Putting the computer to sleep or shutting it down

When you have finished working with your computer, you can put it to sleep or shut it down.

Putting your computer to sleep

If you will be away from your computer for only a short time, put the computer to sleep. When the computer is in sleep mode, you can quickly wake it to resume use, bypassing the startup process.

To put the computer to sleep, do one of the following:
- Close the display lid.
- Press the Power button.
- Open the start menu, and then select Power $\rightarrow$ Sleep.

Note: Wait until the power indicator light starts blinking (indicating that the computer is in sleep mode) before you move your computer. Moving your computer while the hard disk is spinning can damage the hard disk, causing loss of data.

To wake the computer, do one of the following:
- Press any key on the keyboard. (Notebook mode only)
- Press the Power button.
Chapter 2. Starting to use Windows 10

Shutting down the computer

If you are not going to use your computer for a long time, shut it down. To shut down the computer, do one of the following:

• Open the start menu, and then select **Power ➔ Shut down**.

• Press and hold or right-click the **Start** button in the lower-left corner and select **Shut down or sign out ➔ Shut down**.
Task and desktop management

Task view

To open the task view, do one of the following:

• Select the Task view button on the task bar.
• Press the Windows key + Tab.
• Swiping in from the left edge of the screen.

Virtual desktop management

Windows 10 supports the ability to create, manage and switch between virtual desktops. To create a new virtual desktop, do one of the following:

• Open the task view, and then select New desktop.
• Press the Windows key + Ctrl + D.

To switch between different desktops, do one of the following:

• Open the task view and select the desktop you want active.
• Press the Windows key + Ctrl + / to scroll through the desktops you’ve created.
Chapter 2. Starting to use Windows 10

Connecting to a wireless network

Enabling wireless connection

To enable wireless functions, do the following:

1. Press F7 (верхний правый угол) to disable airplane mode.
2. Click the WiFi icon on the lower-right corner of the task bar to open the network configuration page.

Connecting to a wireless network

After wireless has been enabled, the computer will automatically scan for available wireless networks and display them in the wireless network list. To connect to a wireless network, click the network name in the list, and then click Connect.

Note: Some networks require a network security key or passphrase for connection. To connect to one of those networks, ask the network administrator or the Internet service provider (ISP) for the security key or passphrase.
Chapter 2. Starting to use Windows 10

Touch screen operation

The display panel can accept inputs like a tablet, using the multi-touch screen, or like a traditional notebook computer, using the keyboard and touchpad.

Multi-touch gestures

You can touch the screen with one or more fingertips to perform a variety of tasks.

<table>
<thead>
<tr>
<th>Frequently used gestures</th>
<th>Tasks performed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tap</td>
<td></td>
</tr>
<tr>
<td>Tap once on an item.</td>
<td>Performs an action, such as starting an app, opening a link, or performing a command. Similar to left-clicking with a mouse.</td>
</tr>
<tr>
<td>Press and hold</td>
<td></td>
</tr>
<tr>
<td>Press your finger down and leave it there for a moment.</td>
<td>Enables you to see detailed information before selecting an action. Can also open a menu with more options. Similar to right-clicking with a mouse.</td>
</tr>
</tbody>
</table>
### Frequently used gestures | Tasks performed
--- | ---
**Zoom**  
Move two fingers together or apart while touching the screen.  
Zooms in and out on visual apps, such as pictures and maps. Can also jump to the beginning or end of a list.

**Rotate**  
Place two or more fingers on an item and then turn your hand.  
Rotates an object (Note: Not all items can be rotated, depending upon the app.).

**Slide**  
Drag your finger across the screen.  
Pans or scrolls through lists and pages. Can also move an object or be used to draw or write, depending upon the app. Similar to pressing and holding to pan and to scrolling with a mouse.
Frequently used gestures | Tasks performed
--- | ---
**Swipe**  
Start from left/right edge of the screen, then swipe inwards toward the center.  
![Gesture](image1.png)  
![Gesture](image2.png)  
Swiping in from the left edge of the screen can open the task view.  
Swiping in from the right edge of the screen displays the action center.
Chapter 3. Recovery system

Reset this PC

Introduction

Reset this PC is a built-in recovery tool that enables users to restore their operating system to its original state. This preserves their data and important customizations, without the need to back up their data in advance.

The following Reset this PC features are available to users from multiple locations within Windows:

Keep my files

Fixes software problems by reinstalling the factory default configuration. This preserves personal files, and deletes apps and settings.

Remove everything

Prepares the computer for recycling or transfer of ownership. This reinstalls the factory default configuration and returns all user data and applications to the state of their original Out-of-Box Experience (OOBE).

Using Reset this PC

Reset this PC can be launched using one of the following methods:

- Novo Menu:
  - Shut down the computer and wait at least five seconds. Press the Novo button to open the Novo Menu, then select System Recovery → Troubleshoot → Reset this PC.

- Windows PC settings:
  - Windows PC settings → Update & security → Recovery → Reset this PC → select Get started.

For more instructions, see the Windows Help and Support file on your computer.
Chapter 4. Troubleshooting

Frequently asked questions

This section lists frequently asked questions by category.

Finding information

What safety precautions should I follow when using my computer?
Read and follow all safety precautions included in Lenovo Safety and General Information Guide.

*Note: To view Lenovo Safety and General Information Guide, select the [Companion](http://support.lenovo.com) (or [Lenovo PC Manager]) icon on the taskbar. You can also download it from the Lenovo Support Web site.*

What is the address of the Lenovo support Web site?
http://support.lenovo.com

Where can I find warranty information?
Visit the Lenovo Support Web site and type the serial number for your computer to look up warranty information.

Lenovo preinstalled operating system and software

What is the Lenovo preinstalled operating system?
Some Lenovo computers come with copies of the operating system installed at factory. Lenovo provides computers with a preinstalled operating system for your convenience. If you purchased such a computer, you can use your computer out of the box and do not need to install a separate operating system.

What is Lenovo preinstalled software?
This is software (developed by Lenovo or other software vendors) installed and licensed at the factory for your convenience. The license for some preinstalled software may be for trial versions. When the trial period expires, you may need to purchase a license if you want to continue to use the software.

*Note: If a license agreement is displayed when you first start the software, read the agreement carefully. If you don’t accept the terms of the agreement, do not use the software.*

When I purchased my computer, it included a copy of Windows. How can I determine whether the copy of Windows is preinstalled by Lenovo?
On the outside of the sales package of your computer, you should find a label containing configuration information for your computer. Check the printed string next to OS. If it contains Windows or WIN, the copy of Windows was preinstalled by Lenovo.

I uninstalled a preinstalled software, but there is no significant increase in the free drive space.
The copy of Windows running on your computer may be Compact-enabled. For computers with Compact-enabled Windows, the majority of files needed for preinstalled software are installed on the Recovery Partition and won’t be deleted through normal uninstallation.
Chapter 4. Troubleshooting

How can I determine whether the Windows running on my computer is Compact enabled?

Compact technology is normally enabled on copies of Windows 10 Update running on SSD (or eMMC) -only computer models. To check your computer,

1. Right-click the Start button in the lower-left corner and select Disk Management.
2. The Disk Management program starts.

If Compact is labeled on the Windows partition, Compact is enabled on your copy of Windows.

Where can I find drivers for the various hardware devices of my computer?

If your computer is preinstalled with a Windows operating system, first check the installation program on the C partition of your hard disk (for select models, on the D partition). If you cannot find the drivers for all the hardware devices that you need there, download the drivers from the Lenovo consumer support website.

Note: The Lenovo support Web site contains the latest drivers.

■ BIOS setup utility

What is the BIOS setup utility?

The BIOS setup utility is ROM-based software. It communicates basic computer information and provides options for setting boot devices, security, hardware mode, and other preferences.

How can I start the BIOS setup utility?

To start the BIOS setup utility:

1. Shut down the computer.
2. Press the Novo button and then select BIOS Setup.

How can I change the boot mode? (on select models)

There are two boot modes: UEFI and Legacy Support. To change the boot mode, start the BIOS setup utility and set boot mode to UEFI or Legacy Support on the boot menu.

When do I need to change the boot mode? (on select models)

The default boot mode for your computer is UEFI mode. If you need to install a legacy Windows operating system on your computer, you must change the boot mode to Legacy Support. The legacy Windows operating system cannot be installed if you don’t change the boot mode.

■ Getting help

How can I contact the customer support center?

## Troubleshooting

### Display problems

<table>
<thead>
<tr>
<th>When I turn on the computer, nothing appears on the screen.</th>
</tr>
</thead>
<tbody>
<tr>
<td>• If the screen is blank, make sure that:</td>

<tbody>
<tr>
<td>• If your computer is in sleep mode, connect the AC power adapter to the computer, then press the Power button.</td>
</tr>
<tr>
<td>• If the system still does not return from sleep mode, stops responding, or cannot be turned off, reset the computer. Unsaved data may be lost. To reset the computer, press and hold the Power button for eight seconds or more. If the computer is still not reset, remove the AC power adapter.</td>
</tr>
</tbody>
</table>
### Chapter 4. Troubleshooting

#### Display panel problems

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
</table>
| The screen is blank. | - Do the following:  
  - If you are using the AC power adapter or the battery pack, and the battery status indicator is on, press **F12** (⌘+↑) to make the screen brighter.  
  - If the power indicator is blinking, press the Power button to resume from sleep mode.  
  - If the problem persists, follow the solution in the next problem “The screen is unreadable or distorted.” |
| The screen is unreadable or distorted. | - Make sure that:  
  - The screen resolution and color quality are correctly set.  
  - The monitor type is correct. |
| Incorrect characters appear on the screen. | - Is the operating system or programs installed correctly? If they are installed and configured correctly, have the computer serviced. |

#### Sound problems

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
</table>
| No sound can be heard from the speakers even when the volume is turned up. | - Make sure that:  
  - The Mute function is off.  
  - The combo audio jack is not being used.  
  - Speakers are selected as the playback device. |

#### Battery pack problems

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
</table>
| Your computer shuts down before the battery status indicator shows empty. | - Recharge the battery.  
  -or-  
  Your computer operates after the battery status indicator shows empty. |
### Other problems

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
</table>
| Your computer does not respond.                             | • To turn off your computer, press and hold the Power button for eight seconds or more. If the computer still does not respond, remove the AC power adapter.  
• Your computer might lock when it enters sleep mode during a communication operation. Disable the sleep timer when you are working on the network. |
| The connected external device does not work.                 | • Do *not* connect or disconnect any external device cables other than USB while the computer power is on. Otherwise, you might damage your computer.  
• When using high power consumption external devices such as an external USB optical disk drive, use an external device power adapter. Otherwise, the device may not be recognized, or the system may shut down as a result. |
