safety

1 network services

The mobile phone described in this guide is approved for use on the Orange network. A number of features included in this guide are called Network Services. These are special services that you can arrange through Orange. Before you can take advantage of the Network Services, you must subscribe to them through Orange. Instructions for these services are included in this guide.

2 everyday use of your phone

Hold your phone as you would any other telephone, with the antenna pointing up and over your shoulder. If your phone has an extendible antenna, extend it fully. Do not touch the antenna unnecessarily when the phone is switched on, as this will affect call quality and may cause the phone to

operate at a higher power level than is needed. As with any other radio transmitting equipment, you are advised that for the satisfactory operation of your phone and for your own safety, you should use your phone only in the normal operating position.

3 using your Orange phone in a vehicle

Safety comes first, and is the ultimate responsibility of the driver. Therefore:

- Orange recommend that you do not use your phone when driving, unless you are using a wired personal handsfree kit or personal handsfree car kit.
- If you need to make or receive a call and you have a personal handsfree kit or personal handsfree car kit, make sure it is done sensibly using speed dialling or voice activation where possible, and

keeping calls brief and to a minimum.

- If you don't have a personal handsfree kit or personal handsfree car kit, stop and park your vehicle safely with the engine off before using your phone, although never on a motorway slip road or hard shoulder even if it is urgent.
- Do not store or carry inflammable liquids, gases or explosive materials in the same compartment as your phone, its parts or accessories and always store your phone safely and securely.
- You should always use a phone holder in your car to secure your phone safely. Never place the phone on the passenger seat or where it can break loose in a collision or sudden stop.

Remember: Always give your full attention to driving. There is a personal handsfree kit and personal handsfree car kit available for most Orange phones which you can purchase separately by calling the Orange Accessories Hotline on 0500 178 178 or by visiting your local stockist.

4 car kit installation

- Only qualified personnel should install or service the personal handsfree car kit or the phone in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty which may apply to the unit.
- For vehicles equipped with an air bag, remember that an air bag inflates with great force. Do not place objects, including both installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If a personal handsfree car kit is

reference

improperly installed and the air bag inflates, serious injury could result.

- Check regularly that all mobile phone equipment in your vehicle is mounted and operating properly.

Your mobile phone is a low power radio transmitter and receiver. When it is switched on, it receives and sends out radio frequency (RF) signals. Most modern electronic equipment is shielded from RF signals. However, RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles (eg electronic fuel injection, electronic anti-lock braking, electronic speed control or air bag systems, etc). Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to

your vehicle.

5 fuse replacement

- Always replace a blown fuse with a fuse of the same type and size. Never use a fuse of a higher rating.

6 emergency calls

If your phone offers the features listed below, and if you have restricted or barred outgoing calls from your phone, calls to emergency numbers (999 or 112 in the UK) may still be possible. The features are:

- Restricted dialling lists
- Call barring
- Fixed dialling lists
- Calls to closed user groups
- Keypad locking

Ensure the phone is switched on and in service. Give your location to the operator.

To make an emergency call:

- 1 If the phone is not on, switch it on.
Check for adequate signal strength.
- 2 From the main display key in the emergency number for your location (eg 999, 112 or other official emergency number).

When making an emergency call, remember to give all the necessary information as accurately as possible. Remember that your phone may be the only means of communication at the scene of an accident - do not cut off the call until given permission to do so by the operator.

7 one touch emergency dialling

If your phone supports preprogrammed one touch emergency dialling, using the 9 key to call the emergency number may not be possible when you have restricted or barred outgoing calls from your phone. This depends on the type of restriction you have chosen, and the type of barring option you have selected.

One touch emergency dialling does not operate when certain other features are in use (such as keypad locking and others).

Note: Official emergency numbers (e.g 999, 112 or other official emergency number) may vary by location. However, only one official emergency number is programmed into your phone, which may be incorrect if you are using your phone overseas. Please check with our Partner Network abroad for the emergency number that is used in that location.

reference

Your Orange phone, like any mobile phone, operates using radio signals, mobile and fixed line networks which cannot always guarantee connection in all conditions. Therefore never rely solely upon your mobile phone for essential communication such as medical emergencies. Do not hang up during an emergency call until you are told to do so by the operator.

Note: When using voice dialling you must say the name exactly as you said it when you recorded it, which may be difficult in, for example, a noisy environment or during an emergency. Do not rely solely upon voice dialling in all circumstances.

Note: A valid SIM Card must be inserted in your phone in order to make emergency calls. Pay as you go customers do not need to have talk time available, but need to have used the phone in the previous six months.

8 operating environment

Remember to follow any special regulations in force in any area, and always turn off your phone wherever it is forbidden to use it, or when it may cause interference or danger. When connecting the phone or any accessory to another device, read its user guide for detailed safety instructions.

Do not connect incompatible products.

9 pacemakers

- Pacemaker manufacturers recommend that a minimum separation of 16 cm (6 inches) be maintained between a handheld phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research of and recommendations of Wireless Technology Research.

Users with pacemakers should therefore:

- Always keep your phone at least 20 cm (8 inches) away from your pacemaker when the phone is switched on.
- Never carry your phone in your breast pocket.
- Use the ear opposite to the pacemaker to minimise the potential for interference.
- Switch off your phone immediately if you suspect that interference is being caused.

10 hearing aids

Certain hearing aids can be interfered with by your mobile phone. If this occurs, please consult the hearing aid manufacturer.

11 other medical equipment

Operation of any radio transmitting equipment, including mobile phones, may interfere with the working of other inadequately protected medical devices. Consult a physician or the manufacturer of the medical device if you have any questions. Always switch off your phone in health care facilities when any regulations posted in these areas instruct you to do so.

12 aircraft safety

Using your phone while in the air is prohibited. Switch off your phone before boarding any aircraft. The use of mobile telephones in an aircraft may be dangerous to the operation of the aircraft, disrupt the mobile telephone network, and is illegal.

Note: Failure to observe this instruction may lead to suspension or denial of Orange phone services to the offender, or legal action or both.

reference

13 explosive materials

- You are advised to switch off your phone when at a petrol station or other refuelling point. You must observe restrictions on the use of radio equipment in fuel depots (fuel storage and distribution areas); chemical plants or where blasting operations are in progress.
- Areas with a potentially explosive atmosphere are often but not always clearly marked. They include: below deck on boats; chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust or metal powders; and any other area where you would normally be advised to turn off your vehicle engine.

Note: The functioning of your phone can be affected by localised conditions, and we cannot guarantee coverage inside buildings. If you have difficulty in making or receiving calls, you should contact Orange customer services.

14 general safety information

- When changing your phone's cover, always switch off the power and disconnect the phone from the charger or any other device. Always store the phone with the covers attached.
Never use a phone without a cover.
- Remember to always make backup copies of all important data.

- Your phone must be switched on to access games, ring tone composer, calendar, calculator, wap, infrared, timer and other similar features. Do not switch your phone on when mobile phone use is prohibited or when it may cause interference or danger.
- The information or services you have accessed using wap are stored in the cache of your phone, which is a memory used to store data temporarily. You should empty the cache of your phone after each use to ensure that any confidential information cannot be accessed by anyone using your phone.
- Parts of the phone are magnetic. Metallic materials may be attracted to the phone. Always secure the phone in its holder because metallic materials may be attracted by the earpiece. Do not place credit cards or other magnetic storage media near the

phone, because information stored on them may be erased.

- Always switch your phone off in any facility where posted notices so require.

15 phone and battery care

Warning: Use only batteries, charger and accessories approved for use with this particular phone model. The use of any other types may invalidate any approval or warranty applying to the phone, and may be dangerous.

- Do not charge the battery when either of your phone's covers are removed.
- Keep the phone and all its parts and accessories out of children's reach.
- Your phone is not water resistant. Keep it dry. Precipitation, humidity and all types of liquids or moisture can contain minerals that will corrode electronic circuits.

reference

- Do not use your phone in dusty, dirty areas. Its moving parts can be damaged.
- Your phone is powered by a rechargeable battery. Note that a new battery's full performance may only be achieved after two or three complete charge and discharge cycles.
- The battery can be charged and discharged hundreds of times but it will eventually wear out. When the operating time (talk time and standby time) is noticeably shorter than normal, it is time to buy a new battery.
- Temperature extremes may affect the ability of your battery to charge: allow it to cool down or warm up first.
- Never use any charger or battery which is damaged or worn out.
- Always unplug the charger when not in use. Do not leave the batteries connected to the charger for longer than a week, since overcharging may shorten its lifetime. If left unused, a fully charged battery will discharge itself over time.
- Do not paint your phone as this can clog its moving parts and prevent operation.
- Only use the antenna supplied or an approved replacement antenna. Unauthorised antennae, modifications or attachments could damage the phone and may violate regulations governing use of mobile phones.
- Keep all SIM Cards out of children's reach.
- Use your phone battery only for its intended purpose, and never use any charger or battery which is damaged or worn out.
- Never allow the battery terminals to short circuit, as this can cause damage to the battery or to the connecting object (a short circuit can occur if a metallic object such as a coin, clip or pen causes direct

reference

connection between the + and - terminals of the battery). Therefore, always take adequate precautions when carrying a spare battery in a purse or pocket.

- Batteries must be recycled or disposed of properly and according to your local regulations, and must never be disposed of in household waste. Never dispose of batteries in a fire.
- When you disconnect the power cord of any accessory, including the charger, grasp and pull the plug, not the cord.
- For good operation times, discharge an NiMH battery from time to time by leaving your phone switched on until it turns itself off.
- Do not attempt to open the casing on your phone or its battery. Non-expert handling may damage it.
- Do not drop, knock or shake the phone. Rough handling can break the internal circuit boards.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean your phone. Wipe it with a soft cloth slightly dampened in a mild soap and water solution.
- Do not store it in hot areas. High temperatures can shorten the life of electronic devices, damage batteries and warp or melt certain plastics.
- Do not store your phone in cold areas. When it warms up (to its normal temperature) moisture can form inside the phone which may damage electronic circuit boards.

All of the above suggestions apply equally to your phone, battery, charger or any accessory. If any of them is not working properly, contact Orange customer services on 07973 100 150 or, if you are a pay as you go customer, on 07973 100 451, from any other phone for assistance.

radio waves and your phone

Specific absorption rate, or SAR, is an internationally accepted way of measuring how much radio frequency (RF) energy is absorbed by the body when a mobile phone is used.

All phones on the Orange network are designed by the phone manufacturers to comply with the relevant recommendations and standards. Orange believes that new and existing customers should be fully informed about SAR.

The SAR value for your LG C1100 is 1.12w/kg.

Note: The SAR value for your phone has been provided to Orange by the manufacturer. By acting as facilitator for conveying this information to our customers, Orange is fulfilling its duty as a responsible retailer.
