IMPORTANT PRECAUTIONS

WARNING: To reduce the risk of serious injury, read the following important precautions before using the SYSTEM 300.

- Read all instructions in this manual and in the accompanying literature before using the SYSTEM 300.
- Use the SYSTEM 300 only on a level surface.
 Cover the floor underneath the SYSTEM 300 to protect it.
- 3. Inspect and tighten all parts each time you use the SYSTEM 300. Replace any worn or frayed parts immediately.
- 4. Keep small children and pets away from the SYSTEM 300 at all times.
- 5. The SYSTEM 300 is designed to be used by only one person at a time.
- Keep hands and feet away from moving parts.
- 7. Always wear athletic shoes for foot protection.

- Make sure that the cables remain on the pulleys at all times. If the cables bind as you are exercising, stop immediately and make sure that the cables are on all of the pulleys.
- Remove the lat bar from the high pulley station when performing any exercise that does not use the lat bar.
- If you feel pain or dizziness at any time while exercising, stop immediately and begin cooling down.
- When using the butterfly arms, always apply equal force to both arms. Never attempt to use the arms separately. Doing so could permanently damage the SYSTEM 300.
- It is the responsibility of the owner to ensure that all users of the SYSTEM 300 are adequately informed of all warnings and precautions.

44. Make sure that all parts are correctly assembled and tightened. Use of the remaining parts will be explained in HOW TO USE THE SYSTEM 300, beginning on page 18 of this manual.

Before using the SYSTEM 300, pull the end of each cable a few times to make sure that the cables move smoothly. If the cables bind, correct the problem before using the SYSTEM 300. See the CABLE DIAGRAMS on pages 22 and 23 of this manual to make sure that the cables are properly routed. IMPORTANT: If the cables have been incorrectly routed, they will be damaged when heavy weight is used.

HOW TO USE THE SYSTEM 300

The instructions below describe how each part of the SYSTEM 300 can be adjusted. Refer to the EXERCISE GUIDE accompanying this manual for exercise guidelines, and to see how the SYSTEM 300 should be set up for each exercise.

IMPORTANT: When attaching the lat bar or nylon strap, make sure that the attachments are in the correct starting position for the exercise to be performed. If there is any slack in the cable or chain as an exercise is performed, the effectiveness of the exercise will be reduced.

SELECTING A WEIGHT SETTING

The weight stack includes twenty 10 pound weights. To change the weight setting, insert the Weight Pin (49) under the desired Weight (46). Make sure to insert the Weight Pin until the bent end is touching the Weights, and turn the bent end downward. The weight setting can be increased from 10 pounds to 200 pounds in increments of 10 pounds. Note:

Because of the cables and pulleys, the actual amount of resistance at each exercise station may vary from the weight setting. See the WEIGHT RESISTANCE CHART on page 20 of this manual.

USING THE BUTTERFLY ARMS

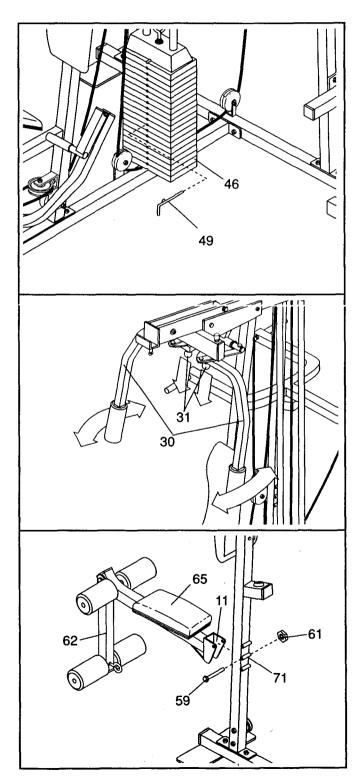

If desired, the starting position of the Butterfly Arms (30) can be adjusted. Pull one of the Spring-Loaded Knobs (31), so that the Butterfly Arm can pivot. Release the Knob when the Butterfly Arm is in the desired position. Pivot the Butterfly Arm back and forth slightly to make sure that it is locked in place. Adjust the other Butterfly Arm in the same manner.

WARNING: When using the Butterfly Arms (30), always apply equal force to both Butterfly Arms. Never use only one Butterfly Arm. Doing so could cause permanent damage.

REMOVING AND ATTACHING THE SQUAT SEAT

For some exercises, the Squat Seat (65) must be removed. Make sure that the long chain is not attached to the Leg Lever (62). Remove the 5/16" Knob (61) and the 5/16" x 2 3/4" Carriage Bolt (59). Lift the Squat Seat Frame (11) off the Squat Upright (71).

To attach the Squat Seat (65), align the holes in the Squat Seat Frame (11) with one of the welded tubes on the Squat Upright (71). Attach the Squat Seat Frame with the 5/16" x 2 3/4" Carriage Bolt (59) and the 5/16" Knob (61). The Squat Seat can be attached at any of three heights.

ATTACHING THE LEG LEVER TO THE LOW PULLEY STATION

To use the Leg Lever (62), the Squat Seat (65) must be attached to the Squat Upright (71) (see REMOV-ING AND ATTACHING THE SQUAT SEAT on page 18). Attach the Long Chain (97) to the Long Cable (45) with a Cable Clip (53). Attach the Long Chain to the Eyebolt (55) with another Cable Clip. Make sure that there is no slack.

ATTACHING THE LAT BAR OR NYLON STRAP TO THE HIGH PULLEY STATION

Attach the Lat Bar (96) to the Short Cable (44) with a Cable Clip (53). For some exercises, the Long Chain (97) should be attached between the Lat Bar and the Short Cable with two Cable Clips. Adjust the length of the Chain between the Lat Bar and the Short Cable so that the Lat Bar is in the correct starting position for the exercise to be performed.

The Nylon Strap (98) can be attached in the same manner.

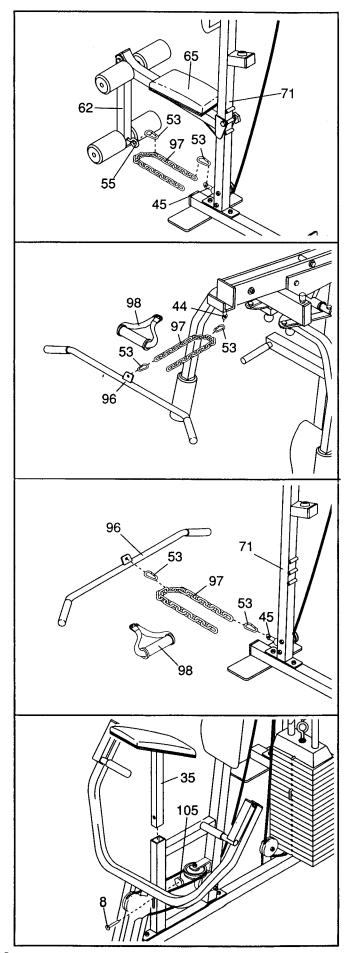

ATTACHING THE LAT BAR OR NYLON STRAP TO THE LOW PULLEY STATION

Attach the Lat Bar (96) to the Long Cable (45) with a Cable Clip (53). For some exercises, the Long Chain (97) should be attached between the Lat Bar and the Long Cable with two Cable Clips. Adjust the length of the Chain between the Lat Bar and the Long Cable so that the Lat Bar is in the correct starting position for the exercise to be performed.

The Nylon Strap (98) can be attached in the same manner.

ADJUSTING THE HEIGHT OF THE PRESS SEAT

To adjust the height of the Press Seat (35), remove the 3/8" Knob (105) and the 3/8" x 2 1/4" Carriage Bolt (8). Position the Press Seat at the desired height. Reattach the 3/8" x 2 1/4" Carriage Bolt and the 3/8" Knob.

TROUBLE-SHOOTING AND MAINTENANCE

Inspect and tighten all parts each time you use the SYSTEM 300. Replace all worn parts immediately (see ORDERING REPLACEMENT PARTS on the back cover of this manual). The SYSTEM 300 can be cleaned using a damp cloth and a mild detergent. Do not use solvents or abrasives.

ADJUSTING THE CABLES

If there is too much slack in the cables, they should be tightened. Find the Eyebolt (55) in the Small Weight (103). Loosen the 3/8" Nut (56). Thread the Eyebolt further into the Small Weight, until there is no slack in the cables. Finger tighten the 3/8" Nut (56) against the Small Weight (103).

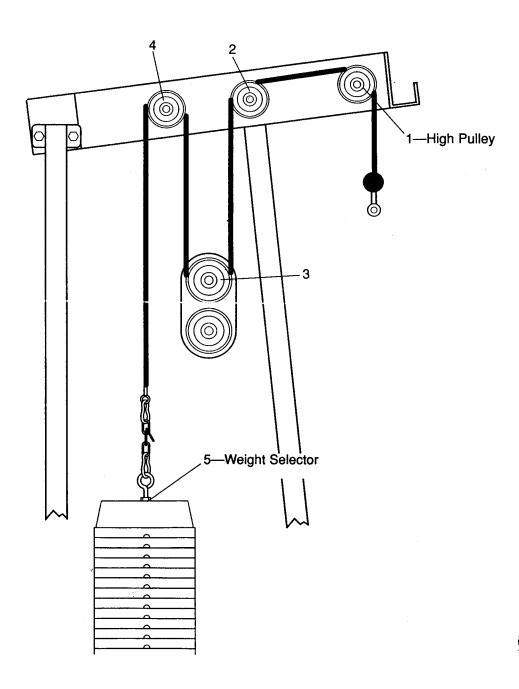

If the Eyebolt (55) is threaded into the Small Weight (103) as far as possible, and there is still slack in the cables, the Short Chain (52) should be adjusted. Open the indicated Cable Clip (53) and slide the next link of the Short Chain (52) onto the Cable Clip. Adjust the Eyebolt as described above. When the cables are properly adjusted, there should be no slack in the cables, and the Small Weight (103) should be resting on the Weight (46) below it.

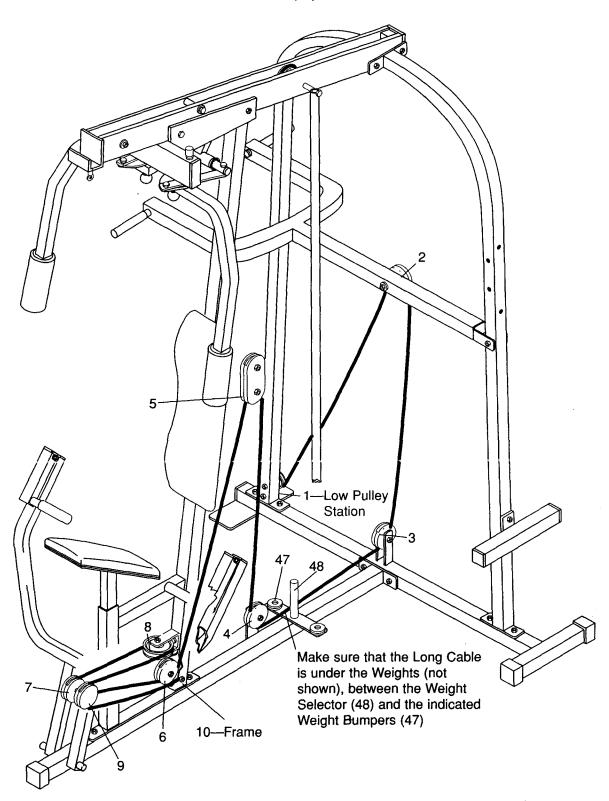

CABLE DIAGRAMS

The cable diagrams below and on page 23 show the proper routing of the Short Cable (44) and the Long Cable (45). Use the diagrams to make sure that the two Cables are routed correctly.
