USER'S MANUAL

Thanks for choosing our product.

This User Manual is designed to guide you through the functions and features of the device. And we reserve the right to change spec. without prior notice as continuous product improvement. To ensure your proper use of the device, please read through the Manual carefully. And the description in this Manual is based on default setting. Important safety and warning guidance to make sure normal function of the device:

Warning

To reduce the risk of fire or electric shock, do not expose this device in rain or moisture.
- Please do not try to dissemble the device by yourself
- Please do not place the device near water, fire, dusty, high temperature and humid environment
- Please do not drop, or collide and shake the device with force, esp. touch panel.
- Please do not clean the device by alcohol, or other chemical detergents, clean the surface only with soft cloth.
- Please do not charge the device in high temperature environment such as near oven, electric warmer etc. And do not cover the device or adaptor with quilt, or clothes while charging.
- Please use only with supplied AC adaptor.
- Please charge the device regularly should the device not to be used for long to keep battery in good condition.
- Replace battery only with authorized personnel.
- Please handle the device with care, dropping or collision accidentally may lead to device damage or internal data loss.
- Please do not use the device when driving or during walking.
- Please regularly duplicate your data and files saved in this device.
- You're solely responsible for any data loss or damage if due to negligence on above or repair and battery replacement and other individual reasons.
- Please do not disconnect while the device is formatting or in data-transmitting.
- Always keep away from fire or fire source.

Other points to be noted:

- This device is with internal memory of 8G, while the programs pre-stored plus Android system already take part of the memory. That's why when you check File Manager from App list and you will notice less internal storage. In order to achieve better performance or to download new programs, please turn off or unload programs used no more to help speeding up demand and make room for new programs.
- When CPU is working with high speed, esp. in 3D games or playing back HD video long, the device will get hot and this is normal, while we suggest to cool down for a while.

Attentions

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.
