Description

2.4 / 4.9 / 5.8 GHz Tri Band Rubber Duck Antenna RP-SMA

Tri Band Rubber Duck Antenna for Indoor Use

The TriBand Indoor Rubber Duck Omni-directional Antenna is used to extend the range of indoor access points or client bridges in 2.4-2.5 GHz, 4.9-5.3 GHz and 5.7-5.8 GHz wireless LAN environments. The antenna is a "TriBand" rather than "Wide Band" antenna design in that it will reject out of band signals between the bands of interest. This feature helps to minimize interference and system noise.
