

Improve the reception of your wireless devices!

The best place to locate wireless network antennas is out of the way of any reflective or signal blocking obstacles such as furniture, cabinets, mirrors, or even people. The Linksys Antenna Stand allows you to relocate your wireless networking device's current antenna, or better yet, a Linksys High Gain Antenna, to a location with clearer signal paths to the other devices in your wireless network.

The Antenna Stand comes with mounting slots to attach it to the ceiling, high on a wall, or it can just stand on a tall bookcase or shelf. Note that although the Antenna Stand's cable and connector cause some loss to the wireless signal, effective placement of the antenna above signal obstacles can easily create a net gain in wireless communications range and reliability.

Increase your wireless network's performance with the Linksys Antenna Stand.

Relocate your antenna to avoid reflective or signal blocking obstacles

Mounts on a desktop, wall, or ceiling

Antenna Stand for R-SMA Connectors

Product Data

Antenna Stand for R-SMA Connectors

Features

- Relocate your antennas to avoid obstacles and improve signal strength
- Easy to install and use, no configuration necessary
- 3 Year Manufacturer's Warranty
