

## Overview

This is the Belkin Product Replacement Matrix for North America. On this page you will find a listing of Belkin Non-Networking products and their comparable replacements. Using this matrix you will be able to quickly find a suitable replacement for a customer's product if one is available. This matrix will be updated as necessary.

## How to read the matrix

For ease of use the matrix has been divided into product categories. Each category has its own table with a title showing what type of products are in that table. You can scroll through the list to find the category that the product the customer is trying to replace would be in.

Portable Battery Packs					
Product	SKU	Replacement 1	Replacement 2	Replacement 3	EOL

Under each category is a listing of products by name and their SKU. If you are not sure what category a product would fall under you can search for the product by its SKU or name. Each SKU has an alternate product replacement listed for up to 3 products (if applicable) along with a column to show if the product is EOL or not.

Product	SKU	Replacement 1	Replacement 2	Replacement 3	EOL
MIXIT Power Pack 4000	F8M979	F7U019			N
MIXIT Metallic Power Pack 6600	F8M989				N

↑

↑  
2

↑  
3

↑  
4

1. The name of the product as shown on our website and the product packaging.
2. The product's base SKU. Products can have additional characters after this to denote color or packaging options.
3. Alternate product SKU's that can be used as replacements for this product.
4. EOL Status. Products that are EOL are noted with a Y in this column.

## How to use the matrix

The matrix should be used when the customer's product is not available and an alternate SKU needs to be found.

- 1. Check if the exact SKU the customer is calling about is stock**
  - If YES, process the RMA.
- 2. If the exact SKU is not available, check for an alternate color or packaging option.**
  - If an alternate is available process the RMA.
- 3. If there is no alternate versions of the customer's product check for a suitable replacement SKU from the matrix.**
  - Start with the first replacement option.
  - Check to see if there are any suitable replacements in that SKU.
  - If no suitable replacements for that SKU move on to the next suitable replacement SKU.
  - Once you have exhausted your suitable replacement options consult your TC for how to proceed.
