CL4210SS	Tubular Deadlocking Latchbolt	Stainless Steel	**267.50**

600 SERIES HEAVY DUTY MECHANICAL PUSHBUTTON LOCK-Grade 2

The CL610 is a heavy duty tubular mortise latch. The outside lever handle will retract the latch after a correct code is entered.
The spring loaded latchbolt will lock automatically when the door is closed.

Quick Code change!
The CL600 range incorporating the new Quick Code system allows on door code change in seconds. Typically most mechanical digital locks require the lock to be removed from the door or partly disassembled to change the code.

• Internal doors and External doors
• Quick Code change - no need to remove lock from door
• The 615 allows for passage mode, code free entry
• Levers are field adjustable, for doors hung on the Left or Right

CL615BS	Passage Mode	Brushed Steel	**369.15**

400 SERIES MEDIUM DUTY MECHANICAL PUSHBUTTON LOCK

A medium duty pushbutton lock with full size lever handles, allowing use as the primary lock on doors where a knob-operated lock would be unsuitable.

The 415 model allows for passage mode, code free entry.

Outside lever handle has clutch to avoid damage to the mechanism if forced.

CL1000 CABINET LOCK

The KitLock 1000 locker locks are a quick retrofit for keyed cam locks supplied as standard on a wide range of lockers, cabinets and cupboards. The keyless locks are easy to fit, taking just a few minutes to remove the existing cam lock and then making an additional top fixing for the new lock. KL1000 can also be fitted to a locker or cabinet that does not have an existing locking device already fitted, giving the user immediate, simple, keypad access without the hassle of keys! Once in place the lock will perform 15,000 openings on just two AAA batteries.

• Easy fit
• 11 individual round buttons
• 15,000 openings from 2 x AAA cells (supplied)
• Battery override
• Ideal for cabinets, lockers, cupboards, medical carts, data racks, gun boxes, safes
• Silver grey & black finishes available from stock
• Left, right and vertical versions
• RAL colour locks available on request, minimum order quantities apply
• IP55 rated when used with the rubber door gasket - separate part
• Use in offices / schools / warehouses / hospitals / care homes / nurseries / hotels / leisure facilities / the home

The KL1000 has 4 code levels available:

8 digit Master Code   4 digit User Code
8 digit Sub-Master Code   6 digit Technician Code

KL1200

The KitLock 1200 locker locks is a popular choice for more challenging environments. A tougher, more robust lock range with all the benefits of the KL1000 plus additional features and functions.

CL460 NARROW STILE MECHANICAL LOCK

The mechanical CL460 is a narrow stile mechanical push button Codelocks for aluminium doors. An alternative to electronic keypads, electric strikes, magentic locks and other systems used on aluminium framed doors.

The narrow strike locks are medium duty and ideal for new or retrofit applications.

Please note: Designed as a retrofit for Adams Rite 4510 lockcase or similar style ANSI round cylinder mortise deadlatches.

The CL460 range has 2 different models with varying functions.

P/N	Finish	List
CL460SS	Stainless Steel	**240.75**

CL500 SERIES HEAVY DUTY MECHANICAL LOCKS

The CL500 push button locks are a heavy duty range with full size lever handles, allowing use as the primary lock on most doors, particularly in high traffic situations.

The locks allow for various ways of managing entry by code, by key and by passage mode operation of the lever handle on the CL515 model.

The key can be used to retract the latchbolt and so it may be issued for cleaning and security staff use.
