•KEY MACHINES

1200CMB BLITZ™ CODE MACHINE

The introduction of the Blitz™ Machine revolutionized cutting keys by code. No more fumbling around with time consuming depth keys. No more confusing micrometer measurements and complicated machine set-up. The "key" to this revolution was translating the lock manufacturers' depth and space measurements to code coards. Most often, just replacing the code card is all that is required to cut a key for a different lock. The high-performance, long-life motor provides ample torque for cutting a high volume of keys. The Blitz™ comes with 150 code cards and 2 cutters. Additional specialty code cards, cutters and adapters are available separately. The Extreme Blitz™ version adds 25 additional code cards, the CW-47MC cutter, the Tubular Adapter Kit and the Calibration Kit. In addition, receive the full version of CodeSource®, MasterKing® and How to Create Master Key Systems software programs.

Weight: 35 lb.

1200CMBX EXTREME BLITZ™

Comes with 3 cutters, an expanded deck of 175 code cards, the Tubular Key Adapter Kit and the Blitz™ Calibration Kit. Plus the free software when you register your Extreme Blitz™.

TUBULAR KEY ADAPTER KIT

The Tubular Key Adapter Kit cuts standard 7-pin tubular keys by code on your Blitz™ machine quickly, accurately and economically. Separate versions are available for the Tiger SHARK™ (No. TKA-SHARK) and Switch Blitz™ machines (No. TKA-SWITCH).

HPTKA-SHARK 536.00
HPTKA-SWITCH 560.00

1233CMSB SWITCH BLITZ™

The Switch Blitz™ combines the best of both worlds. The Original Blitz™ code machine combined with a heavy duty semi-automatic duplicator. Now in the bench space of 1 machine you have 2 top quality key machines. The brilliant design and engineering makes the switch from code cutting to duplicating as easy as 1-2-3.

INCLUDES FREE SOFTWARE

Cutters Supplied:
Tool Steel, 100° large cylinder
Tool Steel, 90° small cylinder
Tool Steel Duplicating Cutter

Comes with 150 code cards & binder.
Also available in AC/DC and 240VAC.

THE PUNCH MACHINE™

HP1200PCH

3,280⁰⁰

INCLUDES FREE SOFTWARE

The Punch Machine™ works on the same principle as the Blitz™, making it the most versatile punch machine on the market. It is extremely accurate and completely portable. Depth and space adjustments are not required in changing from one manufacturer to another. The Punch Machine™ comes with 104 code cards and 3 punches, making it ready to punch most commercial, residential, automotive and furniture keys right out of the box.

Punches Supplied:

PCH-14
PCH-47
PCH-1011

**THE AUTOMATE™
AUTOMATIC KEY MACHINE**

A fully automatic, hands-free key duplicator. Entire cutting cycle takes only 12 seconds. Comes with 4-way jaws and a spring-loaded carriage, for accurate cutting of a wide variety of keys.

Has 4-way jaws allowing it to hold a wide variety of keys.

Cutter Supplied: CW-42HQT
High Quality Tool Steel

Machine Size: 12"W x 16"D x 11"H

Weight: 32 lbs.

•KEY MACHINES

Tiger SHARK™

From the inventors of the first computerized code machine over 25 years ago.

Intuitive Touch Screen control!

Polished steel back plate for added visibility!

Extensive code database for commercial, residential, automotive, high-security and more.

Automatic Swivel Cutter head for Medeco® Angle Cuts

Wide open carriage area makes loading keys super-easy!

4-Way Jaws holds virtually all keys including double-sided automotive keys.

Sturdy, solid construction ensures many years of reliable service.

Cutters Supplied:

CW-14MC	Tool Steel, 100° large cyl.
CW-1011	Tool Steel, 90° small cyl.
CW-90MC	Tool Steel, 90° large cyl.
CW-20FM	Tool Steel, 76° Sargent
CW-47MC	Tool Steel, 87° some auto
CW-1012	Tool Steel, 86° Medeco®

Specs:
Motor: 120VAC(1/6hp,4.7 amps)
Shipping Wgt: 81 lbs.
Machine Size: 12 1/2"W x 16"D x 21"H
Bench Size: 21" x 16" 21"

- The HPC Tiger SHARK™ is the easiest code machine to use and will quickly become your favorite.
- The HPC Tiger SHARK™ has an extensive database of automotive, padlock and furniture codes; a complete database of lock manufacturers' commercial and residential direct digit codes; and a vast key blank cross reference making the Tiger SHARK™ ideal for independent and institutional locksmiths.
- The HPC Tiger SHARK™ has an intuitive touch-screen with easy to follow prompts, so you'll be cutting all types of keys right out of the box.
- The HPC Tiger SHARK™ has a wide-open carriage area with a polished steel back plate providing a mirror image of the carriage for added visibility, the Quick Nut makes changing cutters easy, 4-way jaws topped with the Easy Grip Wing Nut securely hold virtually all keys including double-sided automotive keys.
- The HPC Tiger SHARK™'s versatile design and innovative optional adapters allow you to cut specialty keys including tubular and Tibbe.
- If you are looking for one machine to handle all of your code cutting, from single keys to complex master key systems, the HPC Tiger SHARK™ is your answer.

CodeMax®

CodeMax® is the Original Computerized Code Machine. Based on the "Standard of the Industry" Blitz™, CodeMax® has an internal computer chip that contains Depth & Space Data (DSD) for more than 950 different lock types. It has a micrometer function in both inch and metric formats. This versatility allows it to cut virtually all standard vehicle, commercial, residential and furniture keys throughout the world.

On the Automatic Angler model, (CodeMax®AA) the cutter pivots automatically to cut high-security angle keys, such as Medeco®, eliminating the need to turn the cutter head manually. Simply enter the depth and direction of the angle, and the CodeMax® AA does the rest. All models of CodeMax® are equipped with a shoulder gauge safety switch. This feature ensures the shoulder gauge is out of the way before you start cutting a key.

The high-performance, long-life motor on CodeMax® provides ample torque for cutting a high volume of keys. It is available in 120VAC or 240VAC for use in locksmith shops around the world.

The total power of CodeMax® is realized when you connect it to your PC. All machines come with a 25-foot (7.5m), 9-pin serial cable for easy connection to your PC. This gives you the ability to download information from MasterKing®, KeyTrail® and CodeSource®. This makes creating new keys as simple as looking up the code on your computer and downloading it to your HPC CodeMax®.

Backed by a 1-year warranty and HPC's Expert Technical Support Department, the CodeMax® is the answer for computerized code cutting!

QuickSilver No. 7000QS

Introducing QuickSilver, the evolution of rapid key cutting. With the best features of the RapidKey™ 7000 and the TigerSHARK we now offer you unsurpassed cutting brilliance, speed and accuracy. QuickSilver will cut 100's of keys per hour. You probably won't need to cut that many, but it's nice to know that you can. With a cutting cycle of 4 to 6 seconds, the slowest part of cutting keys will be loading and unloading blanks. If you're concerned about accuracy, don't be. QuickSilver calibrates itself. All you have to do is insert the calibration key, click through a few screens and let this intelligent machine do the rest. It really is that easy. QuickSilver is overflowing with depth and space data from the most popular keys to be cut. But if cutting by code wasn't enough, QuickSilver will impress you with its electronic touch that will read the depths of an inserted key so you can cut a new one to factory specs. No need to make duplicates of worn duplicates when you're backed with this type of technology. Don't spend \$6,000, \$8,000, \$10,000 or more on a machine that claims to do everything QuickSilver can. Get yourself the QuickSilver for a whole lot less and start enjoying the profits right away!

HP7000QS QuickSilver RapidKey™ **8198.00**

RapidKey™ 7000

The RapidKey™ 7000 is a revolutionary and extremely affordable electronic key cutting machine. Available in 6 countries, the RapidKey 7000 machine features a 7" full-color touch screen and is able to cut a 6-pin key in 4-seconds with precision accuracy of +/- .001".

Other features include: built-in automobile key codes for searching, self-calibration, ability to cut keys by code and duplicate, over 1,600 internal manufacturer setup key cards, no need to switch cutters, interface with popular code programs, accepts Silca/HPC/ITL card numbers, over 100 user intuitive interface screens, software updates using USB drive or Wi-Fi, and more!!!

HP7000RK RapidKey™ 7000 **7998.00**

- Large 7" color touchscreen
- Interface with popular code programs
- Built in key codes
- Cut keys by code or duplicate
- Over 1600 internal manufacturer DSD specs
- Over 100 user intuitive interface screens
- Plunger/laser/half step cutting modes
- Software updates using USB drive or Wi-Fi
- Self calibration
- 7 second cut cycle
- Precision accuracy: +/- .0015"

8100 BIG GROOVE™

The HPC Big Groove™ is new from the ground up. It incorporates American precision CNC machining with over 55 years of HPC Key Cutting expertise!

This supremely accurate, heavy-duty track key duplicator will set a new standard of excellence in track key duplication!

Big Groove™ cuts the most popular 2-track and 4-track keys (internal and external) without additional adapters. Plus, it cuts many luxury and specialty keys! Its unique swing-away head allows for easy key loading and with its easy-glide carriage it cuts perfectly accurate keys effortlessly.

Once found only on a few luxury cars such as Mercedes and BMW, track keys (also known as laser or sidewinder keys) are now used on many models from nearly all of the auto manufacturers, including Chrysler, Ford, GM, Honda, Hyundai, Toyota and VW.

Duplicating track keys is highly profitable. The new Big Groove™ makes it easy and affordable to get into this lucrative market. The precision engineering and manufacturing put into this heavy-duty duplicator ensures generations of accurate keys.

- Motor: 120 VAC 50/60hz .18hp 1 amp
- Shipping Weight: 38 lbs./17.5 kg
- Machine size: 9"W x 11"D x 15"H
- Bench size: 20"W x 11"D x 17"H

TUBULAR DUPLICODE™

747XU

The HPC/Scotsman 747XU Tubular Duplicode™ is a lightweight key machine designed to cut most sizes of tubular keys. The capabilities of the machine include: dead pin cuts, right and left hand cuts, 8-cut, 10-cut, 11-cut and pin within a pin in any position. It can also duplicate a key from an HPC tubular pick. A unique aspect of the machine is that you can duplicate any key, even if it has non-standard space increments. The positive decoding mechanism is the first of its kind. This same mechanism allows you to cut by code, leaving no guesswork. The Tubular Duplicode™ is the answer for tubular key duplicating and code cutting.

- 115VAC 60hz, 1/15 hp 1.5 amps
- Shipping weight: 11 lbs.
- Machine size: 16"W x 5"D x 5"H
- Bench size: 20"W x 6"D

**HP747XU
2,660⁰⁰**

TUBULAR DUPLICUT™

The Tubular Duplicut™ duplicates standard size 7-pin tubular keys. It is equipped with a carbide cutter and a safety cover. It duplicates keys with any depth and space configuration, as well as from an HPC Tubular Pick. It is an economical choice for cutting a large volume of tubular keys.

- 115VAC 60hz, 1/15 hp 1.5 amps
- Shipping weight: 11 lbs.
- Machine size: 16"W x 5"D x 5"H
- Bench size: 20"W x 6"D

**HP747E
1,360⁰⁰**

POCKET CUT-UP™

The Pocket Cut-Up™ is a compact, portable tubular key machine. It is factory preset to cut standard size center sequence tubular keys by code. Offset left and offset right sequence (including dead pin cuts) can be cut with one simple adjustment. It also cuts most Greenwald style tubular keys. The tubular key blank is held firmly in place by the swing-away key holding fixture, that locks the depth adjustment knob at pre-selected depths. By turning the cutter knob, brass or steel key blanks are cut with ease.

- Shipping weight: .8 lbs.
- Machine size: 2"D x 4"L

9120RM MINI SPEEDEX® KEY DUPLICATING MACHINE

The most accurate small machine on the market; with high performance and expert engineering at a super low cost.

Comes with the CW-23RM Rotary Milling Cutter and HPC's famous Softie rotary brush.

Features HPC's state-of-the-art 4-way Cutting Jaws for cutting regular and double-sided keys, durable construction, and bronze bearings. Shipping Weight: 17lb.

HP9120RM

9180MC POWER SPEEDEX KEY DUPLICATOR

The Power Speedex® (9180MC) is a semi-automatic duplicator that has all the features of the Premier Speedex®, plus it is operated by a spring-loaded lever. This design allows the carriage to move smoothly when cutting keys. The 9180MC also has a molded plastic cover that encloses the motor. It is designed to cut large bow keys and has 4-way jaws for cutting longer automotive keys. The 9180MC is mounted on a sturdy base and comes equipped with the HPC Softie™ rotary brush. Its durable construction and bronze bearings combine for a long lasting, accurate machine.

9160MC PREMIER SPEEDEX® Manual Key Duplicator

Cutter: HPCW-23MC 161.70

The Premier Speedex® (9160MC) is a manual duplicator, perfect for duplicating even the largest of keys. It is equipped with 4-way jaws for holding a large variety of different blanks, including longer automotive keys. The reversible copy dog allows you to cut flat steel keys with the optional slotting cutter-kit (CW-16KIT). The 9160MC is mounted on a sturdy base and comes equipped with a heavy-duty motor. It also comes equipped with the HPC Softie™ rotary brush. Its durable steel construction and bronze bearings combine for a longer lasting product.

Weight: 30 lbs.
Cutter Supplied: CW-23MC

3344HQT TRACE-A-KEY®

The Trace-A-Key® is a semi-automatic duplicator designed to be the fastest, most accurate and most dependable duplicator available. This machine is loaded with must-have features. The spring-loaded carriage assures consistent duplication. The lever-operated carriage and high-quality cutter combine for fast action. It is equipped with a high-performance motor for trouble free cutting and the Softie™ Brush to swiftly deburr keys. The rugged single-casting construction makes it a very durable machine.

**STRAIGHT YOKE MICROMETER
FOR MEASURING THE DEPTHS OF CUTS ON FLAT STEEL & CYLINDER KEYS**

The STRAIGHT YOKE Micrometer is designed to support the cut key while checking the depths. Has a hardened anvil, thin enough to check all cylinder keys, as well as flat steel keys with cuts as narrow as .030" in width. A genuine leather case is included.

**HPSKM-1
357⁹²**

This straight yoke key micrometer has a ratchet thimble to assure proper tightening for an accurate reading. Satin chrome body and yoke. Includes a leather case.

ULTIMATE MICROMETER

The Ultimate Micrometer allows for precise measuring of depths of cuts. The easy to see digital display gives accurate readings in thousandths of an inch or millimeters, without eye strain. The SKM-2D is satin chrome plated with heavy duty construction for years of service.

DOUBLE "D" METAL PUNCH & DIE SET

HPC's Metal Punch and Die Set punches a double "D" hole. It is a necessary aid to locksmiths for installing vending machine and cam locks on metal cabinets or desks, sheet metal lockers, filing cabinets and cash boxes made of single wall, sheet metal of 18 gauge or lighter. The HDPS-4 punches a .645" x 770" hole for standard size camlocks.

HPHDS-4 288.38

GIVE-AWAY KEY RINGS

HPC's Give-Away Key Rings are manufactured from hardened .0475" (1.21mm) diameter spring steel wire. They are bright zinc plated to resist tarnishing. These rings are so inexpensive that they can be given away with every 1000/box key you cut. Packed 1000 per box.

KEKAB® KEY SECURITY CONTROL SYSTEMS

The best security & control for your keys by locking them securely in central locations. Perfect for apartment buildings, industrial plants, offices, schools and institutions.

Designed to be mounted on a wall or near a desk or workstation.

Heavy duty steel construction with piano hinged doors and key panels.

The HPC Single-tag key security control system provides:

- 1) Organized and Locked Key Storage
- 2) Availability of keys which are sometimes lost or misplaced.
- 3) Accountability of keys within the system.

Each Kekab® System includes-

- Durable white key tags with reusable snap hooks. Each tag can hold multiple keys and are numbered for easy identification
- Durable steel key racks.
- "Out Key" Key Control Tags
- Numbered key control booklet.

Here's how it works-

Keys are attached to white numbered key tags via a snap-hook. Each corresponding key is then hung on a slot along the steel key rack. When a key from the system is loaned out, a yellow "Out Tag" (or key receipt slip) is issued. Once all pertinent information is completed on the Out Tag, the key is loaned out and the yellow key receipt slip is placed on the slot where the loaner key was hanging. Once the loaner key is returned, the Out Tag is disposed of and the system is ready for the next user.

- Heavy gauge steel construction
- Locking door - 5 disk tumbler cam lock
- Piano type hinges on doors and panels
- 12 different capacities

Code	Capacity	Dimensions	Price

HPKEKAB-730	730 Keys	25 1/4" x 18" x 5 1/2"	771.10

DIGITAL KEKAB®

HPC's Digital KeKab® series utilizes a new electronic lock to provide a unique combination of convenience and security. The Digital KeKab® has many intelligent features. There are 3 levels of access including the Master Code, Supervisor Code and User Code. Any of these codes can be instantly reprogrammed. Each level can set, change or delete the lower levels.

The Digital Lock requires no wiring or central processors. It is powered by a single CR2032 - 3 volt lithium watch battery. The lock is very energy-efficient and will easily last 5-10 years under normal usage. No more changing batteries every year. A low-battery indicator warns when the battery power is low. The battery is easily replaced from the outside and the internal memory retains your code.

The Digital Lock comes set to the default multi-user mode where there is 1 code number at each level. For special applications, the lock can be programmed to a Locker mode in which the User Code will lock and unlock the cabinet until the next code is entered.

- White Plastic Key Tags with bright nickel plated snap-hooks which can hold multiple keys on each snap-hook. The tags are numbered for easy identification.
- Durable Steel Key Racks that are slotted to store key tags uniformly for immediate identification.
- "Out Key" Control Tags that are made of yellow paper. They are used for accountability.
- Numbered Key Control Booklet for lock location data.
- Unique sand color powder textured painting process. Heavy Gauge Steel Construction with piano hinged doors and key panels.

KEYABLE KEKAB®

This HPC exclusive line of cabinets allows you to add your own mortise cylinder and key it into existing master key systems. Uses standard 1" mortise cylinder. Includes numbered key-tags, snap hooks and out-tags. **Cylinders not included**

HPKEKAB-KK65	65 keys	17"x13"x3 1/4"	266.30

•PICK SETS

HPC IS YOUR BEST PICK

DELUXE PICK SET

- Shirt Pocket Size
- Genuine Leather Case
- Spring Steel Tools
- 10 Picks, 4 Tension Tools & 2 Extractors

HPNDPK
7700

HPC picks are the standard choice of the industry. Each pick is made of hard finished clock spring steel, tempered to the correct degree of hardness. If you are working on wafer tumbler locks or six or seven pin tumbler locks, HPC has the finest quality tools for the job at hand.

SUPERIOR PICK SET

HPNDPK-32
113⁵⁰

- Shirt Pocket Size
- Genuine Leather Case
- Spring Steel Tools
- 22 Picks, 7 Tension Tools & 3 Extractors

This pick set gives you more of a choice of a particular tool. It is one of our most popular pick sets. With this set as with all of our pick sets you can depend on the HPC name to give you the finest quality in workmanship. This is proven when you use our tools on the job.

PROFESSIONAL PICK SET

- Genuine Leather Case
- Spring Steel Tools
- 40 Picks, 14 Tension Tools & 6 Extractors

HPNDPK-60
217⁵⁰

This set is a wise choice for the master locksmith or the novice. It contains a general assortment of the most popular picks, tension wrenches, key extractors and feelers. This set is manufactured by HPC, the largest producer of locksmith picking tools in the world.

Contains full, half and three quarter rakes. Diamond tip picks, single, double, half double ball picks; light, medium and heavy weight tension wrenches of various styles and length, hook and saw type key extractors and many more tools vital to the trade.

COMPUTER GENERATED PICK SET

- 9 picks & 2 tension too
- Designed for more picking possibilities

HPCOMP-1
148⁵⁰

Complete with instructions in a handy leather case.

These pick configurations were designed on a computer to conform to the greatest possible amount of 5 & 6 pin and disc tumbler curve configurations. The set consists of 9 stainless steel picking tools (18 configurations) and 2 spring steel tension tools. Set comes complete with directions in a genuine leather case.

Individual replacement picks are available.

PADLOCK SHIM PICKS

This 20 piece Padlock Shim Pick Set is a fantastic alternative to picking, and in many situations is the only way to open a padlock in seconds. Especially useful with laminated padlocks, but will open almost any lock which has a spring lever latch locking bar (as opposed to a ball locking latch), providing there is enough clearance to allow the shim to operate. Contains 5 each of the 4 most common shackle diameters.

HANDS FREE TENSION TOOL KIT

Takes the difficulty out of picking. No need to fumble with the tension. Simply slip the Hands-Free Tension Tool into your cylinder keyway (vertical or horizontal), slide and set the weight to adjust the amount of tension, and then let go! All that's left is raking the pins! The Hands-Free Tension Tool Kit comes complete with a Hands-Free Tension Tool and a matching 2-sided Rake/Diamond. The Tension and Picking tools clip together with a specially designed holder.

•PICK SETS/EXTRACTORS

JACKKNIFE PICK SET

HPJKP-5
35⁵⁴

A complete compact pick set to use on pin and disc tumbler locks. Has 2 rakes, 1 diamond, 1 hook and 1 tension wrench. A big performer that folds into a compact case. Keep one in your pocket, on the workbench and in your travel kit.

MODEL B TUBULAR LOCK PICK

Model B
HPTLP-CMODB
185⁰⁰

This tubular pick features an advanced method of feeler tension adjustment. Internal neoprene "O" rings, together with knurled collar, provide the necessary holding tension on the feelers.

Each tool comes in a genuine leather case, with the TKPD-1 decoder.

7-PIN MINI BORE TUBULAR PICK

This pick will pick the small tubular locks common on many laptop computers. Allows you to pick and manipulate all 7 pins at one time and open the lock in seconds. Comes with a genuine leather case

HPTLP-7MB
185⁷⁰

QUICK RESET

Works on 7-pin locks, including the small bore size. Features the Quick Reset button; just push the button and pump the barrel to reset the pick. Has an aluminum handle, stainless steel barrel, spring steel feelers and comes in a genuine leather case, with the TKPD-1 decoder.

HPTLP-7SB
243⁵⁰

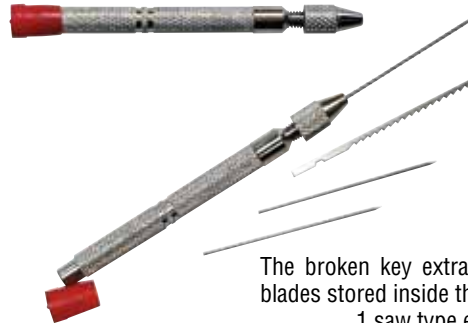

GUARD

Designed to easily defeat tubular locks which are factory equipped with steel shrouds, frequently utilized in vending machine applications. Leather case included.
Comes with Tubular Key & Pick Decoder (TKPD-1)

HPTLP-GUARD
411⁵⁰

INTERCHANGEABLE EXTRACTOR SET

HPEZ-6
39⁷⁰

The broken key extractor set includes 4 changeable blades stored inside the handle.
1 saw type extractor blade
2 round extractors, .040" diameter
1 round extractors, .050" diameter
Replacement blades available.

DOUBLE-SIDED DISC TUMBLER LOCK PICKS

HPDSP-1
37⁷⁰

Set of 4 picks. For use on the most popular double-sided, disc tumbler, showcase, cam and padlocks.

Includes plastic case.

STAINLESS STEEL EXTRACTOR SET

HPC "2000 SERIES" Extractor Set is the ultimate in broken key removal. The tools are designed to slide next to broken keys along the side mill, and ride along the bottom pins to hook into a cut in the key. This set makes all other extractors obsolete. They're real on-the-job time savers!

- High grade stainless steel.
 - Can be bent to side angles to reach around many obstacles.
 - Faster extraction.
 - 4 piece set.
 - Genuine leather case.
- Extractors also sold individually.

HPES-2000
55⁵⁰

WARDER PADLOCK SET

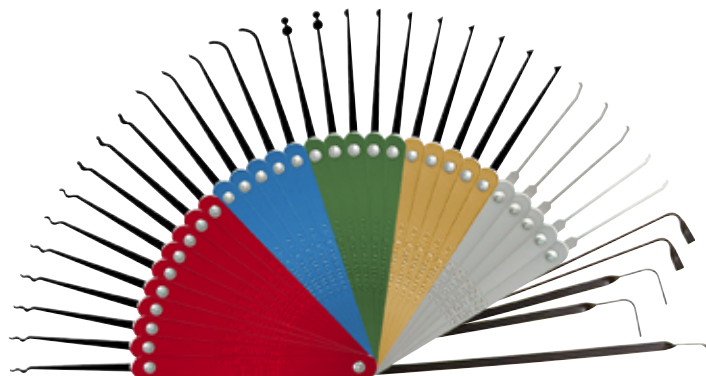

Made specifically for warded padlocks. Works like tryout keys. Has 5 different patterns.

HPPKS
20⁹⁰

COLOR CODED PICKS

HPC's Color Coded Picks add a level of efficiency in identifying the picks in your case. Each style of pick blade has a different color of handle:

Rakes - Red Diamonds - Gold Balls - Green
Extractors - Silver Hooks - Blue

These aluminum handles provide for a lighter feel than the stainless steel and make it easier to locate the type of tool you need.

FLAT AND ROUND SPRING STEEL ASSORTMENT

HPFRS-4

119¹⁸

This spring steel assortment contains more than 50 pieces of the most popular flat and round spring steel. The assortment is cut into convenient 9" lengths and is packaged in a see-through round plastic container.

DOOR PULLER & NOSE PULLER FOR SAFE DEPOSIT BOXES

If the lock core has been pulled and use of the guard key has not opened the door, then it is time to apply the Door Puller Set.

Place stepped Spacer Block onto the hook unit. The 3 different diametered steps make it adaptable to 3 different sizes of plug bores. Place the correct diameter step into the corresponding bore. Have the hook end set against the inside back wall of the door, then tighten the knurled nut to hold the hook in place. The flat surface on the outside of the hook unit should be in a level position.

The long flat blade is then fitted onto the holding slot, along with the remainder of the Puller unit, as shown above. Position feet away from the centers of adjacent doors, to minimize the possibility of distortion. The knurled knob is then turned until the door is pulled out.

HPDP-7B

613⁸⁸

NOSE PULLER FOR SAFE DEPOSIT BOXES

This heavy wrought and bar steel set is expertly machined and finished to effectively pull out a lock core. Simply turn screw into the center of core's keyway to act as an anchor. Then slip the spacer block into place and tighten by turning knurled knob. Continue turning clockwise, slowly and gradually, until the entire core is drawn out. Then use the guard key and disengage bolt.

•SAFE TOOLS • TAGS

SAFE OPENING TOOL KIT

HPNST-6
243⁰⁸

These tools have been designed for use on safe locks **after** burglary has been attempted. Entering through the existing hole, they not only align the wheel pack, but also hold the relocker aside so that the safe can be opened quickly and easily. Set includes 6 tools for most popular locks; MOSLER 302 and 402, LaGard 1800 & 2100 series and many S & G locks. The kit comes in a convenient roll-up case, with instructions.

SAFE DRILL BITS

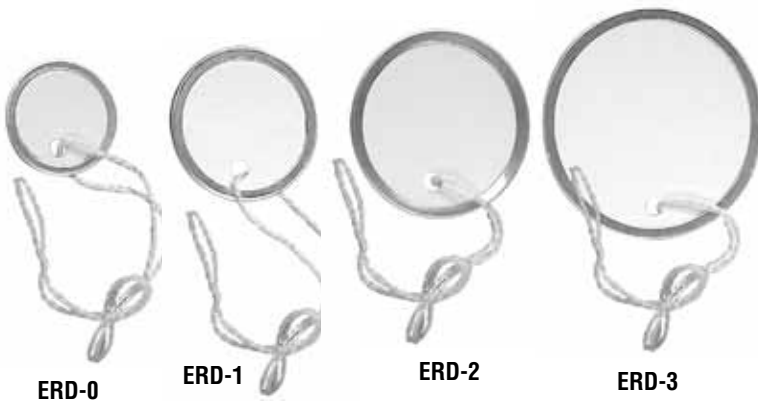

HPSHPD-12 173.56

HPSHPD-14 186.94

These **Premium Quality Multi-Use Safe Drill Bits** have a **tungsten carbide tip**. They are designed for multiple uses on steel hardened to Rockwell C-60, and they can be re-sharpened if they get dull. The point of the bits has a negative rake angle that prevents chipping and helps to disperse the heat from the cutting edge.

UTILITY TAGS

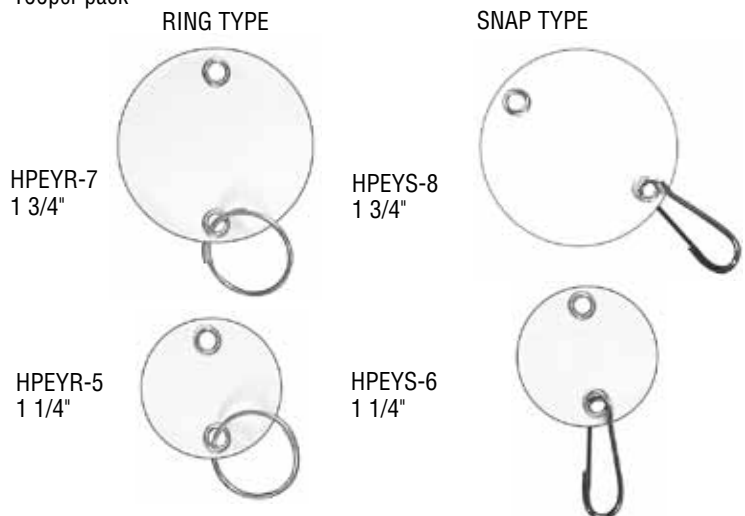

Extra strong metal rim tags for frequently handled merchandise. Heavy paper stock, smooth white writing surface. Used as personal property, price and size tags. Each tag has an attached, looped and knotted, string. Packed 100 per pack.

Set of 4 above plug followers

Contains:
SUT-14-A - .550"

SUT-14-B - .495"

SUT-14-C - .395"

This set contains three popular sizes of hollow brass followers. Each fits into the other and into their case for convenient compactness and protection.

This follower kit will also work on the Corbin and Russwin heavy duty knob lock cylinder unit. The small diameter follower is useful for cabinet locks, peanut size cylinders and pin tumbler letterbox locks.

Complete set fits into a tube with a blue cap on each end. Handy, compact, efficient and lightweight.

HPSUT-14 Hollow Brass Follower Set 41.10

IC TAIL TURNER

This dual-end tool is designed to fit standard (.500") and large format (.550") interchangeable core housings. It grabs onto the two fingers of the tail piece and allows you to position them for easier core insertion. This tool will speed up re-keying and eliminate a great deal of frustration.

HPICT-2
40²⁸

**CYLINDER CAP REMOVAL TOOL
For Schlage "A" Line Locksets**

Use with the cylinder in or out of the knob. With the cylinder out, merely depress the cap pin and turn. With the cylinder in the knob, slide tool over tailpiece and depress knob. Then, turn the tool slightly to depress the knob retainer.

CAR OPENING TOOLS

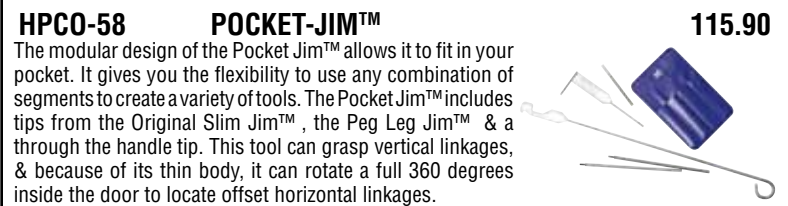

HPCO-6
The Collapsible Opener is an adjustable tool that can be configured to multiple lengths for various applications. The maximum length is 74". **93.90**

HPCO-24 BIG JIM™
Its extended length will open additional vehicles that have linkages and bell cranks deeper in the door. Total length 28.5". **23.70**

HPCO-10 SLIM JIM™
This original "SLIM JIM™" was introduced in 1967, and is still effective on many current models. **17.90**

HPCO-58 POCKET-JIM™ **115.90**
The modular design of the Pocket Jim™ allows it to fit in your pocket. It gives you the flexibility to use any combination of segments to create a variety of tools. The Pocket Jim™ includes tips from the Original Slim Jim™, the Peg Leg Jim™ & a through the handle tip. This tool can grasp vertical linkages, & because of its thin body, it can rotate a full 360 degrees inside the door to locate offset horizontal linkages.

HPCO-11 SUPER JIM™
"SUPER JIM™" is a wider version of the Slim Jim™, providing greater strength. **18.50**

HPCO-60 CADDY KILLER™ **38.30**
The Caddy Killer™ was one of the first Under & Over tools. It is a hybrid approach of In-the-Door and Through-Car opening. Inserted into the door cavity, these tools go under the window and over the door panel on the inside of the car to pull handles and slide lock buttons to open the door.

HPCO-18 Sir James™ **37.90**
The Sir James™ is the same size as the Super Jim™, and adds nickel plating, depth marks and adds a convenient note pad.

CLEAN GRIP IMPRESSIONING TOOL
HPC's Clean Grip Impressioning Tool holds onto the center of the key blank, not the face. This eliminates the possibility of scratching the key blank, while providing a firm hold. It has a unique locking mechanism with a retaining pin that ensures a tight grip on the key blank. **HPCGIT-10 164⁷⁰**

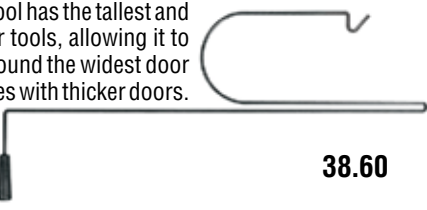

•AUTOMOTIVE TOOLS

HPCO-61 STRETCH KILLER
 The Stretch Killer™ has the most universal dimensions of all of the Under & Over car opening tools. The height of the arc is greater than the Caddy Killer™, but the working end hangs lower, allowing you to reach locks that sit deeper in the door panel.

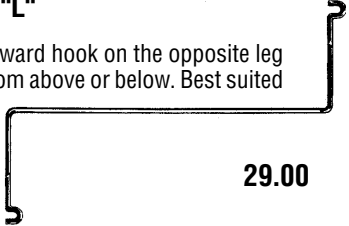

36.90

HPCO-70 SUPER KILLER™
 With its extra length and great strength, it can be used to open a wide variety of vehicles. This tool has the tallest and widest arc of all of the Under & Over tools, allowing it to get under the deepest window and around the widest door panels. This tool works best on vehicles with thicker doors.

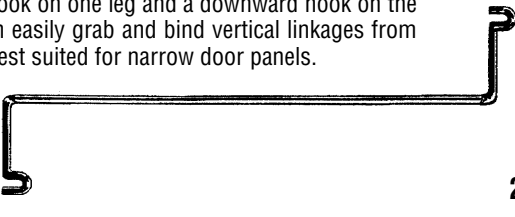

38.60

HPCO-71 STRETCH DOUBLE "L"
 With an upward hook on one leg and a downward hook on the opposite leg it can easily grab and bind vertical linkages from above or below. Best suited for thick door panels.

29.00

HPCO-72 SHORT DOUBLE "L"
 With an upward hook on one leg and a downward hook on the opposite leg it can easily grab and bind vertical linkages from above or below. Best suited for narrow door panels.

28.00

HPCO-73 LASSO™
 For vehicle entry when the lock button is visible. It is made of high quality "poly-flexo" material with a durable string. The tool allows you to wrap the string around the lock button and lift up to unlock the door.

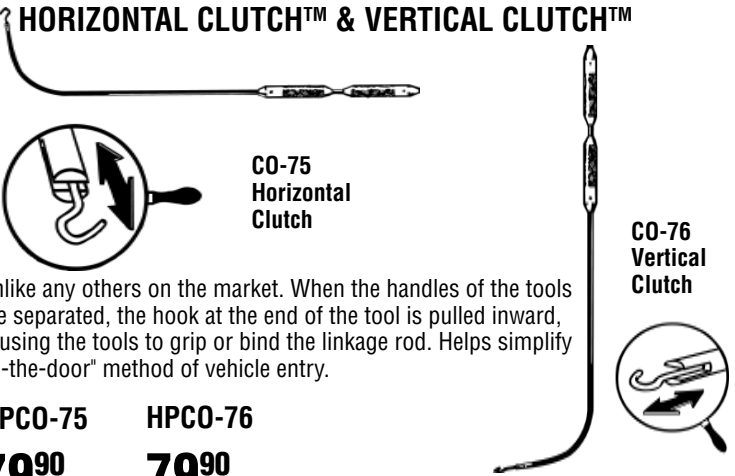

18.38

HPCO-78 5 FOOT SUPER SNARE
 HPC's 5 Foot Super Snare allows you to enter a vehicle and pull up buttons, grab keys, pull open levers and much more! The CO-78 is a 5 foot long metal tube with a wire inside that forms a loop on the end. To open the loop, just slide the handles apart. To close the loop, just slide the handles together. Easily bendable and has a rubber tip to help protect the interior of the vehicle.

HPCO-78 93⁹²

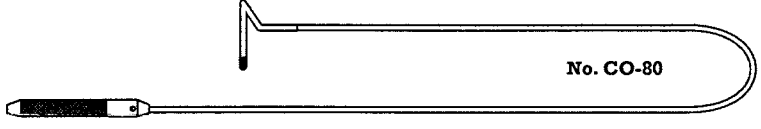

CO-75™, CO-76™ HPC'S PATENTED HORIZONTAL CLUTCH™ & VERTICAL CLUTCH™

Unlike any others on the market. When the handles of the tools are separated, the hook at the end of the tool is pulled inward, causing the tools to grip or bind the linkage rod. Helps simplify "in-the-door" method of vehicle entry.

HPCO-75 79⁹⁰ **HPCO-76 79⁹⁰**

HPCO-80 SWITCH STICK

No. CO-80

The Switch Stick is a five foot long bendable tool with a unique hook end designed to open cars from the inside. This tool slips into a vehicle between the window and the door frame. Once inside, the Switch Stick acts as a third hand allowing you to flip switches, lift buttons and hook handles. The hook has a protective coating and rubber cap, so the vehicle owner won't have to worry about a damaged interior. The Switch Stick is ideal for vehicles with side impact airbags where customers may be hesitant to having tools enter the door cavity. A must for vehicles with flush finger-tip lock switches such as Lexus and Volvo.

HPCO-80 83⁰⁰

Magna Scope No. MGS-1

The Magna Scope is an economically priced otoscope, ideal for magnifying and illuminating hard to see areas. This compact functional instrument reflects the same level of craftsmanship and precision as many of the most expensive medical instruments on today's market. Packaged complete with 8 specula, including 2 long and 2 short, each with the pin depressor assembly. Requires 2 AA batteries.

•AUTOMOTIVE TOOLS

CO-83 FISHING POLE

The Fishing Pole (CO-83) is literally our most flexible tool ever. At 7 Ft. long the Fishing Pole easily reaches across almost any car. Its bendable body can be configured to any shape. When the handles of this tool are separated the working end curves & flexes in up to a 90° angle that you can twist in any direction. The Fishing Pole comes with 3 screw on tips including a bendable posiform wire loop, a super-pull catch, & a large sure-grip hook.

HPCO-83
135⁹⁰

CO-85 TWIN HOOKS

The HPC Twin Hooks has a double-hook that opens and closes with a simple push and pull of the tool handle. Reaching across vehicles and grabbing door handles has never been easier. The double hook ends overlap each other as they close, giving twice the strength, making it a very solid hold. The Twin Hooks securely grabs onto door handles as far as 7 feet away.

HPCO-85
143⁹⁰

CO-86 FISH HOOK

The Fish Hook tool is for vehicle entry when the lock button is visible. Used with an HPC Wedge, the tool enters the auto interior, engages the button and with a simple twist, raises the button. This unique design features a long reach memory-flex rod for bending to the required shape.

HPCO-86
74⁰⁰

CO-87 BUTTON CLUTCH™

Similar to HPC's patented Vertical Clutch™ and Horizontal Clutch™ Tools and Super Snare, this compact action tool will grab lock buttons and not let go! This hybrid tool will make your next auto opening quick and effortless!

HPCO-87
63⁵⁰

CO-88 SKINNY TWISTER™

The thinnest through-car tool available, the Skinny Twister™ will slide between window and weather-stripping where rod tools just can't fit. The Skinny Twister™ has two different working ends and can be bent into almost any configuration. It can twist and turn as it squeezes inside the vehicle. A quick pull of the included cord helps you locate the latch and open more cars

HPCO-88
33⁵⁰

CO-89 SKINNY FLIPPER™

The Skinny Flipper™ is made of superbouncy spring steel and the laminated body allows you to manipulate the working end from outside of the car. You'll flip when you use this HPC solution to tight door seams!

HPCO-89
70⁰⁰

CO-90 GOLD FINGER

This 5-foot long bendable car opening tool has two special working ends. The hook end is designed to mimic your finger action pulling levers and flipping rockers. The opposing end is perfect for grabbing switches that must be pushed. The bright yellow ends make them easy to see in dark interiors and the super strong steel body will outlast similar tools.

HPCO-90 **41.10**

AKK-BC BUTTON CLUTCH™ AUTO KILLER KIT

Similar to HPC's patented Vertical and Horizontal Clutch™ Tools and Super Snare, this compact action tool will grab lock buttons and not let go! By separating the handles the loop retracts providing a secure grip on the lock button. Combined with a 3/8 inch Ultimate Auto Wedge and Auto-Sleeve™, this hybrid tool will make your next auto opening quick and effortless!

Kit includes:
No. **CO-87** Button Clutch™

5' FLEXI-MAGNET STICK

PROBLEM:

Clips, clasps, links and lock parts drop into the dark depths of door cavities where they can't be reached.

SOLUTION:

This 5-foot (1.5m) flexible tool will wiggle and worm its way into the smallest of areas and attract your misplaced parts with its mighty double-sided magnetic force! One side has a small magnet to fit into 8mm openings and the other side has a slightly larger magnet that easily lifts 2 lbs (1kg) and can pull up to 10 lbs (4.5kg).

HPMAG-200 59.64

AUTO LOCK PLIERS

GRIPS LIKE THE JAWS OF A BULLDOG!

HPALCP-10 73²⁴

REMOVE AUTO LOCK FACE CAPS IN SECONDS -- EASILY!

Heavy duty forged pliers with specially machined tips that provide a superb grip. Quickly removes either the factory look caps, using the rolled crimp; or the "Tab Syle" replacement caps. Side cutters and cut fingers are now things of the past.

STEERING COLUMN LOCK PLATE COMPRESSION KIT

The Steering Column Lock Plate Compression Kit is a complete kit for new style air bag columns, as well as older models. It includes both standard and metric threaded shafts and set screws, along with a longer, narrower U-bracket for air bag and telescoping columns.

The kit includes the metric internally threaded shaft and set screws that are required for 1978 to present on General Motors vehicles. It also comes with a handy 9" x 12" (23 x 31 cm) vinyl pouch.

Once the steering wheel is removed, simply screw the center post onto the steering shaft and place the yoke over it. Turning inward on the center post nut compresses the plate. This leaves both hands free to pry the wire snapping out of the shaft's groove. Re-installation of the ring after servicing is accomplished by just sliding the ring down the tapered shank of the center post screw and back into the groove.

LOCK PLATE COMPRESSOR FOR TILT AND TELESCOPIC STEERING COLUMNS

A specially designed lockplate compressor for tilt and telescopic columns used on General Motors. Assures an easier access to ignition lock retainer, after steering wheel is removed.

HPSWLPC-2 42¹²

CLIP REMOVAL TOOL FOR DOOR HANDLES AND WINDOW CRANKS

HPAST-3 20³⁰

Easily removes the hard to reach retaining clips found on Chrysler, Ford, GM and many imports - without damage.

CLIP REMOVAL TOOL FOR DOOR TRIMS

Removing the trim pads without tearing out the nylon retainer clips has always been difficult. The tapered end of this heavy duty lever type tool enters between the door and trim pad and persuades the pad off. This greatly reduces the possibility of tearing or damaging the pad and clips.

HPAST-4 43⁷⁸

GATEWAY™ TOOLS

HPGTO 16⁴⁸

HPC's revolutionary Gateway™ Tools act as a third hand to hold open the dust cover on auto door locks. This allows you to have both hands free to pick the lock or extract a broken key. Just insert into the door lock, turn in the direction the shutter opens, and the lock is ready for service (with the gateway securely held out of the way).

The universal slot size covers all of the major U.S. manufacturers (GM, Ford, and Chrysler), as well as many imports (BMW, Volkswagen, Toyota, etc.).

•AUTO OPENING/AUTOMOTIVE TOOLS

AIR WEDGE®

The Air Wedge® slides between the vehicle door and the weather stripping on the door frame. Then the pump is squeezed, inflating the Air Wedge®, and separating the vehicle door from the frame. Made of sturdy vinyl and equipped with a release valve. Works exceptionally well with the HPC AutoSleeve™.

HPAW-99
59⁹⁰

CAR OPENING AUTHORITY®

The interactive Car Opening Authority® contains the opening techniques for the latest 17 years of vehicles, including all of the current models. The all-new single screen interface makes it quick to find the opening method, airbag locations and transponder information with only a few clicks of your mouse. In addition, it now includes full-action videos showing how to perform each opening method. There is also in-depth information for dozens of the latest vehicles. Detailed photographs show specific opening techniques and lock removal procedures. It is the most complete and comprehensive car opening reference software available.

The printed version of the Car Opening Authority® is a single volume manual that contains the opening techniques for the latest 15 years of virtually every car, truck and SUV on the road. The simple to use Models Index leads to clear concise diagrams of each opening technique. Be prepared for any lockout your are called to open. The Car Opening Authority® is the most complete and comprehensive car opening reference on the market.

UNIVERSAL AIR WEDGE®

Made of sturdy vinyl and equipped with a bulb pump and release valve for quick and easy inflating and deflating.

Has a larger gripping area for easier insertion in tighter fitting doors.

HPAW-100
71⁹⁸

AUTOSLEEVE™

Prevents damage to weather stripping and automobile finish. This hardened plastic interlocking envelope is ideal for separating weather stripping from door frames or windows without damage. Once in place, the AutoSleeve™ gives you a protective tunnel to insert your car opening tool without worry of scratching or damaging your customer's car. Works exceptionally well with the HPC Air Wedge®.

HPAS-1
10⁶⁰

POWER WEDGE™

Advanced opening tool designed for vehicles with wrap over doors.

A revolutionary auto entry device designed to aid in opening even the most difficult vehicles. Slides into the opening between the vehicle's door and frame at the top of the door.

HPPW-100
102⁵⁰

LEVER WEDGE™

The HPC Lever Wedge™ is unlike any other tool in the industry! The Lever Wedge™ has been designed and engineered from the ground up. It features a double pivot point that allows you to spread a vehicle door from its frame and then with a simple push, hold it open. Once in place, the door can be separated farther with the HPC Lever Wedge's secondary lever action. This tool will hold its position with no need for a second wedge to hold the door open.

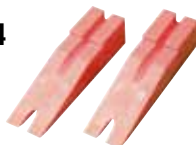

HPLW-100

KEY DECODER

HPHKD-75
417¹⁶

This handy, pocket size decoder kit determines the original factory depths of most popular commercial, residential & automotive keys.

Ideally suited for giving the correct bottom pin size when re-keying new or worn cylinders.

Simply insert the correct information card into the top slot of the decoder. Lowering the depth pin into each cut, from bow to tip, will indicate the correct depths, in the window at the top. Each of the **111** 2" x 4" information cards, also lists the correct factory depths & space specifications. The heavy duty construction, with just 2 internal moving parts, will assure years of trouble free service. Comes complete with a handy carrying case, 3 shims and the 111 information cards.

STAMP ALIGNER™

Provides for perfectly aligned, evenly spaced stamps on your keys. It gives your keys a professional look.

For Key Blanks Only

IMPRESSION FILE WITH SAFETY CASE

Precision cut round files tapered to a sharp point, come in a protective plastic case.

HPIFH-2	#2 Cut Medium File + Case	71.58
HPIFH-4	#4 Cut Fine File + Case	78.26

PIN TUMBLER TWEEZERS

HPPTT-4 24.70

The groove in the tip provides a firm, non-twisting grip on cylinder pins for easy loading. The tip is also milled back so that the outside diameter of a standard .115" diameter pin extends past the tip. This permits "butting" the pin against the end of the plug follower when loading the upper chambers, providing added control when holding top or master pins of varying lengths. 6" long.

HPPTT-5 21.22

Similar to HPPTT-4, but 4" long.

HPTPT-5 45.22

THIS IMPROVED PIN TUMBLER TWEEZER has a pin pushing attachment that makes it easier to load top pins into a cylinder.

While top pin is held in place, use forefinger to push attachment down to set pin into chamber.

Pin loading wire is removable, making this ideal also, for loading bottom pins.

LEVER HANDLE REMOVER

HPC's Lever Lock Handle Remover is designed to quickly remove locked lever handles for servicing. It is ideal when picking the lock is not an option. Simply place the tool's specially designed hub over the lever. This allows you to easily manipulate a few bolts and screws to remove the handle, without damaging the lock or handle. Then you can open the door and service the lock. Constructed of industrial-grade plastic, it will not scratch the handle. Simple to use with amazing results!

**HPLHR-100
420⁰⁰**

TRUARC RING ASSORTMENT

**HPTRU-275
211²⁶**

CONTAINS 260 RINGS

This assortment contains twenty-seven different styles and sizes of Truarc rings and retainers. You will find them very helpful for servicing Arrow, Best, Corbin, Dexter, Ilco, Lockwood, National, Schlage and many more. All are made of carbon spring steel and offer long-lasting tension or compression for retaining purposes.

KEY-in-KNOB REMOVER

Occasionally locksmiths need to service a locked door that they cannot pick open. Based on the HPC Lever Handle Remover, the Key-in-Knob Remover removes ball, tulip and standard style knobs for servicing without damaging the lockset! It is designed for use on Grade 1 and Grade 2 knobsets that have a retaining pin that extends into a hole in the knob shank. Perfect when picking is not an option! A must-have tool for all security professionals.

LATCH LOCK GUARD FOR DOORS OPENING OUT

Made to provide added protection for all doors using spring latch type locks. The guard plate is screwed directly onto the edge of the door. The flange will keep any prying tools away from the latch. Made of zinc-plated steel. Countersunk screw hole; packed with screws.

HPODG-6
20⁵⁸

GUARD PLATE FOR KING-SIZE DOORS OPENING OUT

This is our strongest and most popular guard plate. It is 14 inches long and is made of two welded pieces of steel. Offers maximum resistance to prying and forcing. Mounted onto door with 2 carriage bolts, going through the door and anchored with a nut and cap nut on the inside. Four wood screws go into the edge of the door.

Complete with all necessary hardware.

HPVDG-10
28⁶⁶

Baked Metallic Brown Enamel Finish

OFFSET GUARD PLATES FOR DOORS OPENING OUT

Offset guard plates are to be used on vestibule doors with protecting door casings. For doors that are not flush with the frame.

These plates are easily installed by drilling only 2 holes for the pair thru-bolts nuts to solid-mount it. Made of heavy gauge steel and has a satin stainless finish.

The 14 inch overall length, extends three inches beyond the average lock face, presenting plenty of covered area to frustrate unauthorized, forceable entry.
