**DOOR COORDINATORS FOR LABELED FIRE DOORS**

Reversible, low friction, automatic coordinating devices for use on pairs of doors with or without astragal to prevent the active door from closing ahead of the inactive door. Used on labeled fire doors with Ives automatic flush bolts. Exclusive design incorporates unique cam tour and nylon coated strike, in conjunction with a nylon roller which reduces friction as well the critical requirements of installation.

Nylon coated strike plate enables single-screw, centerpoint mounting for simplified installation. The drop of the arm is muffled by shock absorbing polyurethane foam tape.

Solid Brass. One per box, with installation instruction, sheet metal and machine screws for door bracket, wood and machine screws for strike plate, and coordinator base.

**•AUTOMATIC FLUSH BOLTS  
•HINGES**

**AUTOMATIC FLUSH BOLTS FOR LABELED METAL AND WOOD FIRE DOORS**

Designed for hollow-metal, steel-covered or wood-covered composite fire door applications only. Recommended for doors that are normally held open or subject to low frequency use. Installed, top and bottom, on inactive leaf of a pair of doors. Fits 1 3/8" - 2 1/4" thick doors.

With positive latching and automatic unlatching features. Top and bottom bolts with full 15/16" throw; backset: 3/4". Bolt heads are equipped with bi-metal thermal lock safety device. Carry bar not required for astragal protection.

Brass. Nickel-plated, corrosion resistant shaft assembly. Packed one pair per box, with template and instructions for installation.

**AUTOMATIC LOCKING FEATURE**

When both fire doors are closed the ROD HEADS (top and bottom) will extend approximately 15/16" (23.8") beyond guides. During normal operation when active door is opened, bolts will retract and inactive door will be free to open. However, during a fire, when the temperature reaches about 170-180 degrees F. (76.7-82.2C.) the bi-metal locking arms on the rod heads begin to spread. These arms prevent the rod heads from retracting and keep the inactive door permanently locked.

**FB41P**

Listed for use on the inactive leaf of a pair of classified wood-covered composite fire doors, swinging in pairs, not exceeding 1 1/2 hour fire rating or 8 feet in height. Simplified router mortise installation at the top and bottom corners of the door.

Furnished with sheet metal screws for bolts and strikes, and lead shields for the optional installation of standard bottom strike in a concrete floor. Sheet metal screws and shims furnished for wear plates. Machine screws for 1 3/4" standard door and bearing washers also supplied to reinforce door cutout.

**183<sup>10</sup>** per pair  
One pair in a box.

**ILFB41P-32D**

**•SELF LATCHING FLUSH BOLTS  
•HEAVY DUTY SECURITY SURFACE BOLTS**

**SELF-LATCHING FLUSH BOLTS**

U.L. Listed. Brass Components. Specially designed for installation in pairs on the inactive leaf of paired door openings where the inactive leaf is not required for exit purposes. Doors must be equipped with a coordinator. *Sold in pairs.*

**IVFB61P-3** Polished Brass  
**IVFB61P-10** Satin Bronze  
**IVFB61P-32** Polished Stainless Steel  
**IVFB61P-32D** Satin Stainless Steel

**184<sup>80</sup>**

**FB61P FOR WOOD DOORS**

Used with labeled wood-covered composite fire doors not exceeding a 1 1/2 hour fire rating in 8 feet in height.

**IVFB51P-32D** Satin Stainless Steel  
**IVFB51P-3** Polished Brass  
**IVFB51P-10** Satin Bronze

**175<sup>10</sup>**

**FB51P FOR METAL DOORS**

Used for labeled hollow metal fire doors, not exceeding 9 feet in height, and on steel-covered composite fire doors, not exceeding 8 feet in height; both with a maximum rating of three hours.

Fits ANSI A115.4 door preparation for manual bolts. Spring actuated; manually retracted.

*Sold in pairs.*

**HEAVY DUTY SECURITY SURFACE BOLTS**

Listed by Underwriters Laboratories for use on the inactive leaf of a pair of doors.

- Standard Surface Bolt has 1" throw
- Ideal for all types of doors
- Fully concealed mounting prevents vandalism
- Available in locking version. Unit locks in both the up and down position. Locking bolts are furnished with 2 keys in 4 keying variations.
- Units packed with wood and machine screws to meet most field conditions.
- Constructed of heavy duty steel
- UL listed up to 3 hours when used on the inactive door of a pair up to 8' in height.
- Meets ANSI/BHMA A156.16, L84161

Strike: 13/16" x 5/8"

#### CUPBOARD TURN

A latch for cabinets and small doors. Case: 1 3/4" x 1 1/8". Strike: 1 3/4" x 3/8". Conforms to Federal Spec. No. 1082. Hand Polished Cast Brass. Packed with screws.

Code	Material	Price
IV540B26D	Satin Chrome	39.20

#### DUAL ADJUSTMENT BALL CATCHES

Ideal for louvered, bi-folding, accordion, wardrobe and service doors. The perfect catch to use with dummy trim. Dual adjustment provides door holding and clearance strength.

Faceplate: 2 1/8" x 1". Bore: 7/8" x 1 1/4".

Hand Polished Wrought Brass. Individually polybagged with screws.

Solid Brass

Face Plate:

No. 345 - 1 1/2" x 3/4"

No. 346 - 2 1/8" x 1"

No. 347 - 2 1/8" x 1"

No. 346--narrow strike--designed for use when action catch is mounted in the jamb.

#### DUAL ADJUSTMENTS

##### FEATURE

For clearance and tension. Makes it easy to compensate for swelling, shrinking, drafts and weight of doors.

- A. Free rolling ball insures smooth, positive and trouble-free action.
- B. Adjustable threaded barrel to compensate for various clearances of doors.
- C. Adjustable spring tension for any desired action.

**SECURITY SASH LOCK**

Spring lever pulls rails together to provide jimmy resistance and rattle-free fit. Hand Polished Wrought Brass. Individually polybagged with screws.

**IV4B26** Polished Chrome **15.70**

**SASH FASTENERS**

World-renowned Crescent sash fastener pioneered by Ives. Designed low to the sash for superior strength and greater resistance to breakage. Vertical-horizontal camming action lifts sash up and pulls them together for a snug, non-rattling fit. The heavy gauge, top quality springs provide snappy wearing action.

### MAGNETRACT™ MAGAZINE SIZE LETTER BOX PLATES

Ideal for exterior doors; the projection lip assures easy grasp even when wearing gloves. Magnetic inlays on the plate and flap augment gravity for a weather-tite fit and rattle-free installation.

Rugged construction; with massive extrusions for strength and weather resistance, coupled with an exclusive interlocked hinge design that holds the flap securely in place. Concealed pin permanently locks flap in plate; tamper proof when used with sex bolts.

Heavy-gauge Wrought Brass. Individually polybagged with screws and template

### STANDARD BACK PLATE

Set consists of magnetic front plate assembly and standard back plate.

Overall Size: 12 1/2" x 3 1/4". Plate Opening: 11" x 1 7/8".
