

AD-SERIES ELECTRONIC LOCKS

The AD-Series electronic locks from Schlage are designed to provide more options to choose from, more functionality in the lock and more compatibility with existing systems. Its patent-pending modular design allows the solution to be customized to fit your application now, and can change to meet future needs without removing it from the door.

The AD-Series features a variety of options including card readers, network configurations, locking functions, lever styles and finishes. It also offers a wide selection of features that can be configured in the field to customize your openings.

The AD-Series is built on an open architecture platform that means that it can be easily integrated into virtually any access control system. And its flexible panel interface options such as RS485, Wiegand and Clock & Data ensure seamless communication with your system.

OFFLINE SOLUTIONS

AD-200 Rights on Locks

Operates like a traditional electronic lock. The locks are programmed with access rights and schedules using software and a handheld device, or manually programmed directly at the keypad.

Keypad standard.

SCAD-200-CY-70	Classroom/Storeroom	1604.00
SCAD-200-CY-50	Office	1614.00
SCAD-200-CY-40	Privacy	1614.00
SCAD-200-CY-60	Apartment	1614.00

AD-250 Rights on Card

This is a smart and economical solution for campus-like environments with a large number of users. The access rights and schedules are stored on a magnetic stripe credential rather than the lock. This gives the manager the ability to change rights for certain credentials without having to tour the locks. The lock still maintains an audit trail of events.

Magnetic Stripe Standard

SCAD-250-CY-70	Classroom/Storeroom	1699.00
SCAD-250-CY-50	Office	1709.00
SCAD-250-CY-40	Privacy	1709.00
SCAD-250-CY-60	Apartment	1709.00

NETWORKED SOLUTIONS

The AD-Series combines all the hardware components required for a complete access control system into one integrated design that includes the electrified lock, credential reader, request-to-enter and -exit sensors, door position switch and more. This integrated design saves you both time and money when installing your system.

Call for exact configurations and options.

AD-300 Networked Hardwired

A hardwired networked solution gives you instant control of your system. Whether you're trying to lock down or unlock one door or every door in your facility, add or remove a user, or simply see the status of the opening – you can be confident that you're doing so in real-time right from your computer.

Keypad Standard

SCAD-300-CY-40	Privacy	1614.00
SCAD-300-CY-60	Apartment	1614.00

AD-400 Networked Wireless

The AD-400 networked wireless lock gives you all the benefits of a hardwired access control system – without the wires. This allows you to secure doors that were traditionally difficult to run wires to in the past – and increase the security throughout your facility. A wireless solution also allows for a quicker and more cost-efficient installation that causes minimal disruption to your environment – saving you both time and money.

B

Accredited Lock Supply

www.acclock.com

The CO-Series from Schlage makes it easy to upgrade from traditional mechanical solutions to electronic access control. Electronic access control provides added security, convenience and efficiency.

Security

- Grant user rights to designated doors at specific times
- Audit trails give you visibility to who went where and when
- Electronic credentials can be easily added or deleted

Convenience

- Automatic lock and unlock can be scheduled for specific time zones
- Holiday Schedules
- Multiple ways to utilize credentials including normal, toggle, freeze & pass through

Efficiency

- Utilize existing master key system
- Low lifetime cost of ownership
- Easy to install and service in the field

Choosing Which Model is Best For Your:

Credential Type

Electronic credentials such as PIN codes and cards allow to you issue fewer mechanical keys which protects the integrity of your key system. They also allow you to easily add and delete users right at the lock for added security.

- PIN: If for simplicity you wish to only manage PIN codes we recommend the CO-100; an offline manually programmable lock with a keypad reader.
- Card or Card + PIN: If you would like the added security of card or card plus PIN we recommend the CO-200 or CO-250; both are computer programmable locks.

Number of Users

Each opening within a facility is unique. To determine the right solution you must consider how many users need access to the opening.

- Small: For opening with a small number of users the CO-100 is an option. It can store up to 500 users on the lock.
- Medium: The CO-200 can store up to 2000 users on the lock, so it can be used for openings with a small or medium number of users.
- Large: The CO-250 allows for dynamic rights management via the magnetic stripe credential; making it an ideal solution for large campus like environments with a large number of users.

Sensitivity of the Opening

Certain openings within your facility may pose more of a security concern than others. We offer a variety of solutions for each that can all work together within your facility.

- Low: The CO-100 is manually programmable and therefore does not offer audit trails, making it a preferable solution for openings where risk mitigation is not the primary concern.
- Medium: The CO-200 & CO-250 offer audit trails which provide added security by giving you visibility to when a valid or invalid credential is presented; making them an ideal solution for sensitive openings.
- High: For openings that are very sensitive a AD-Series networked solutions should be considered because they allow you to monitor and make updates in real-time.

Efficiency

Some openings only require the basics. For other openings you want additional features that increase efficiency.

- Basic: CO-100 locks provide address the basic needs of electronic access control.
- Advanced: CO-200 and CO-250 locks provide additional features such as the ability to schedule time zones, holidays, and auto-unlocks for added convenience.

CO-100

The CO-Series is the ideal solution for customers seeking the added security and convenience of electronic access control without the cost or complexity of a fully networked system.

The CO-100 is an offline lock that is manually programmable. User rights for the CO-100 are stored on the lock. Unique PIN codes can be assigned to each user. This minimizes the number of mechanical keys issued which protects the integrity of your key system. PIN codes can be easily added or deleted at anytime right at the door.

The CO-100 from Schlage offers you many choices. Cylindrical, mortise, and exit trim chassis options are available as well as a wide variety of finishes and levers to suite with your existing hardware.

Mechanical key override is standard and compatible with multiple cylinder types. The CO-Series is also compatible with many popular brands of exit devices.

Features

- Manually Programmable
- Up to 500 unique 3-6 digit PIN codes stored on the lock
- ANSI/BHMA Grade 1 certified and UL 294 listed*
- Classroom/Storeroom function and Office function available
- Chassis options include cylindrical, mortise, and exit trim
- Compatible with most major brands of key systems and exit devices
- Normal, toggle, pass through, and freeze credential attributes available.

SCCO-100-CY-70-KP	Classroom/Storeroom w/keypad	774.00
SCCO-100-CY-50-KP	Office w/keypad	784.00

Also available as exit trim.

CO-200

The CO-200 is computer programmable with users rights stored on the lock. The Handheld Device (HHD) used in conjunction with your access control software, allows you to easily add or delete users and retrieve audits.

By issuing electronic credentials you can minimize the number of mechanical keys issued which protects the integrity of your key system. A variety of credential readers are also available including: keypad only, magnetic stripe, and proximity. The magnetic stripe and proximity readers are also available with keypad for the added security of dual authentication.

Cylindrical, mortise, mortise deadbolt, and exit trim chassis options are available as well as a wide variety of finishes and levers to suite with your existing hardware.

Mechanical key override is standard and compatible with multiple cylinder types. The CO-Series is also compatible with many popular brands and types of exit devices.

Features

- Computer programmable with audit trail
- Up to 2000 users & up to 2000 audits*
- Up to 32 holidays & 16 time zones*
- ANSI/BHMA Grade 1 certified and UL 294 listed
- User rights stored on the lock
- The ability to add and delete users at the lock
- Available in cylindrical, mortise, mortise deadbolt, and exit trim
- Compatible with major brands of key systems and exit devices
- Classroom/Storeroom, Office, and Privacy functions available

CO-250

The CO-250 is a computer programmable offline lock that stores user rights on the magnetic stripe credential, and captures an audit trail in the lock. The CO-250 provides dynamic rights management, meaning you do not have to visit the door to change user access rights. This makes it a cost effective solution for offline environments with a large number of users. The CO-250 also allows you to retrieve audits by using the Handheld Device (HHD) in conjunction with your access control software.

The CO-250 from Schlage offers you many choices. Cylindrical, mortise, mortise deadbolt, and exit trim chassis options are available as well as a wide variety of finishes and levers to suite with your existing hardware.

Mechanical key override is standard and compatible with multiple cylinder types. The CO-Series is also compatible with many popular brands of exit devices.

Features

- Computer programmable with audit trail
- Unlimited number of users and up to 4000 audits*
- Available with Magnetic Stripe and Magnetic Stripe plus Keypad
- Up to 32 holidays & 16 time zones*
- ANSI/BHMA Grade 1 certified and UL 294 listed**
- User rights stored on the magnetic stripe credential
- The ability to easily add and delete users
- Available in cylindrical, mortise, mortise deadbolt, and exit trim
- Compatible with major brands of key systems and exit devices

[Go To Table of Contents](#)**Accredited Lock Supply**www.acclock.com**M420/M422 High Security Series - Electromagnetic Lock**

The M420 electromagnetic lock comes in two configurations to meet your specific security needs. The M420 provides basic security, while the M420P provides intelligent sensing and reporting features needed to integrate with access control systems. Additional options are available for the M420P. Kits are available for top jamb, double door, and glass door applications. **500 lbs. hold force.**

M420/M422

- **Automatic Voltage Selection (AVS)** senses the voltage applied to the lock and responds accordingly

M420P/M422P

- **Magnetic Bond Sensor (MBS)** monitors the strength of the bond between the lock and armature so you know the door is secure

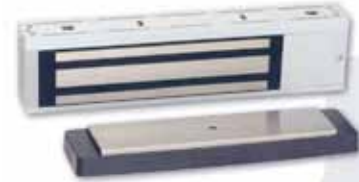

- **Door Position Switch (DPS)** monitors whether the door is open or closed
- **Relock Time Delay (RTD)** provides a relock delay that is adjustable from 0.5 to 30 seconds

Optional

- **Anti-Tamper Switch (ATS)** provides an indication that the cover of the magnet is securely fastened to the lock and that the on board circuitry is secure
- **MBS Indicator (LED)** provides visual indication of magnetic bond at the lock

- Touch any point on the pushpad to release locking device
- Audible alarm
- Heavy duty aluminum extrusion and powder coated zinc end caps
- Directionally opposed infrared detection circuits

SC692-628 Aluminum **561.00**
SC692-313 Dark Satin Bronze **590.30**

M490G ELECTROMAGNETIC GATE LOCK

The Schlage M490G Electromagnetic Gate Lock is a weather resistant electromagnetic lock with 1500 lbs. of holding force, designed for use on all types of sliding and swinging gates.

As a high security magnetic lock it can accommodate misalignment problems while supplying superior holding force.

A 1/2" compression connector is provided for installation of 1/2" EMT conduit, insuring protection of hook-up wiring from weather and vandalism. Heavy duty plating resists corrosion of mating surfaces providing a low maintenance locking device.

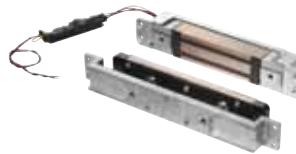

A modified Top Jamb mounting bracket allows a single M490G to be mounted in a variety of positions. The M490G Gate Lock may be mounted to any gate frame or post. Special brackets may be required to adapt the lock to a particular frame or post.

It is important that the lock is mounted so that the armature pulls straight back from the magnet face. The M490G can be field configured for either 12 or 24 VDC operation. Magnetic Bond Sensor (MBS) and Gate Status Monitor (DPS) are standard.

1500 lbs. hold force

SCM490G**612.00**

GF3000 SHEAR LOCK MORTISE SERIES

Features and Benefits

- Automatic voltage selection 12/24 VDC (Filtered)
- **3000 lbs. of hold force**
- Requires filtered, regulated power supply
- Built-in Automatic Relock Switch
- Adjustable time delay on relock, 0-30 seconds
- Low temperature operation
- Microprocessor controlled
- Optional Magnetic Bond Sensor (MBS) to monitor the secure/not secure condition of the lock
- Optional Door Status Monitor (DSM) to sense the open/closed position of the door
- UL 10C Positive Pressure Fire Tests of Door Assemblies, cUL, CSFM and MEA listed to use on fire labeled openings
- Meet ANSI/BHMA A156.23 standards

GF3000 Adjustable from top edge of door **971.00**

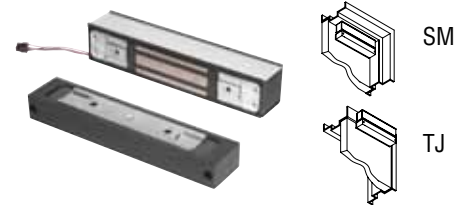

GF3000TRD Mounting assembly which provides armature adjustable from the latch edge of the door. Recommended with zero clearance condition between top of door and ceiling. **1335.00**

GF3000BRD Mounting assembly to mortise armature into bottom rail of door. Magnet is installed in floor/threshold. Provides solution when no top rail is available. **1432.00**

7-Pin Combined 80-037
7-Pin Uncombined 80-036

Introducing Everest, the new patented cylinder family from Schlage. Whether you need convenient key duplication or restricted key control, Everest has a product to address your security issues. What sets Everest apart from the rest? Everest is a patent protected keying system that provides you as much key control as you need.

Everest™ key control for your existing Best® 7 pin interchangeable core systems. All the benefits of easy rekeying, with Schlage Everest key control.

For those not wanting to change their keying systems, you can purchase Schlage products that accommodate the standard Best® style interchangeable cores, in 6 or 7 pin.

Direct replacement for original Schlage cylinders in all locksets

Everest 29 Primus XP Controlled Access and High Security (Patented until 2029)

• A SERIES HEAVY DUTY LOCKSETS

A SERIES HEAVY DUTY LOCKSETS

Lock mechanisms are precision made of high strength steel, plated and dichromated for superior corrosion resistance and maintenance-free performance.

Available in a wide variety of function and finishes; in many knob and lever designs.

Ideal for quality residential and light commercial buildings.

Applications:

Heavy duty residential, light and medium commercial

Certifications:

ANSI A156.2-2003, Series 4000 Grade 2. (Formerly FF-H-10B Series 160) UL listed for 3 hour fire door (1/2" Throw latch functions).

Exposed Trim:

Wrought brass, bronze or stainless steel. Levers are pressure cast zinc, plated to match finish symbols.

Keying

6 Pin tumbler with two nickel silver keys per lock. Stock locks are keyed 5-pin.

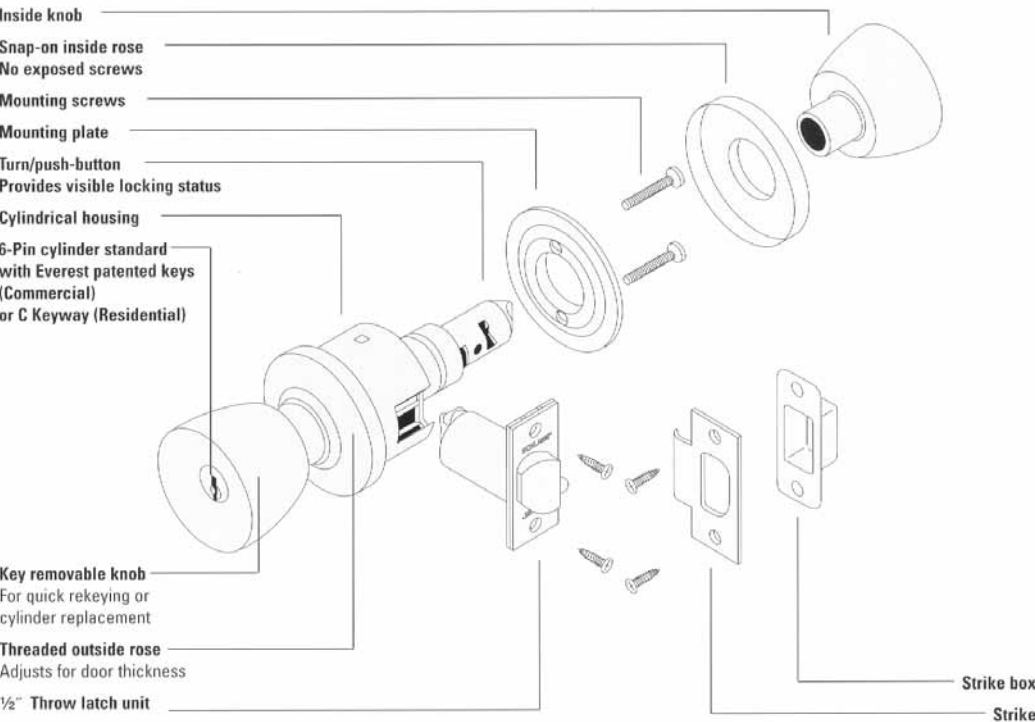

Door Range:

1-3/8" to 1-7/8" Standard 2" to 2-1/2" regular part assembled to order.

Backset:

2-3/8" Standard. 2-3/4" and 3-3/4" backset latch; available 5", 7", 10", 18" or over, backset links available

Exploded View

On our cover, the A-Series PLYMOUTH in Bright Brass.

MULTIPLE TAILPIECE REPLACEMENT CYLINDER

Reduce Cylinder Inventory

Multiple tailpiece cylinders allow high inventory flexibility with low investment. Included with each cylinder are tailpieces to suit these locks:

- A-Series (all designs)
- AL -Series
- O-Series Knobs
- O-Series Levers
- H-Series Knobs (all designs)
- NO-Series Levers

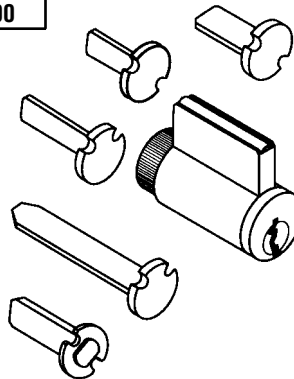

Cylinders are furnished 0-bitted. Conventional cylinders are furnished with two (2) blank keys.

AL SERIES STANDARD DUTY COMMERCIAL LOCKSETS

For standard duty, commercial exterior and interior doors for medical, office, hotel/motel, public buildings, religious, multi-family, retail/storefront and government facilities. Also for heavy duty residential.

The AL-Series keyed lever lock utilizes the Schlage original A-Series cylindrical chassis with stylish lever designs supported by heavy duty spring cages. This design provides strength and performance in the more abusive commercial Grade 2 applications. The AL-Series is available in a wide variety of keyed and non-keyed functions and in the most popular finishes. The AL-Series also features lever designs that are compatible with the complete family of Schlage ADA compliant commercial grade levers.

Certifications: ANSI A156.2-2003, Series 4000 Grade 2.
UL listed for all functions up to 3-hour doors.

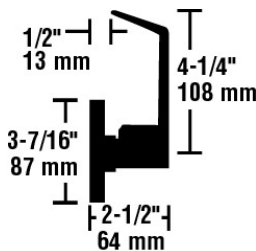

Exposed Trim: Wrought brass and bronze. Levers are pressure cast zinc, plated to match finish symbols.

Keying: 6 pin tumbler with two nickel silver keys per lock. Stock locks are keyed 5 pin. Other keying options available from factory include masterkeying, grandmasterkeying, construction keying and interchangeable core.

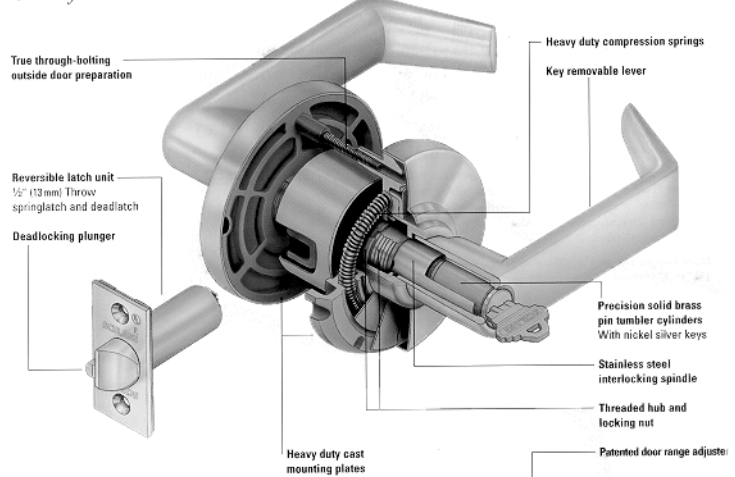

Door Range: 1-3/8" to 1-7/8" standard.

Backset: 2-3/4" standard. 2-3/8" and 3-3/4" backset latches available. 5" backset links are also available.

SATURN

Cutaway View

Performance Features

Exceeds all ANSI A156.2, 1996, Series 4000 Grade 2 strength and operational requirements including 400,000 cycle testing. U.L. Listed for 3-hour doors.

True through-bolting of door prevents lock chassis rotation and disengagement from latch.

Stainless steel interlocking spindle design for added strength against excess force when lever is in locked position or latch has been fully retracted.

Cold rolled steel, machined, threaded hubs and locking nuts prevent loosening of the lockset by bolting chassis to the door.

Heavy duty cast mounting plate with specially tapped holes reduces loosening of through-bolting and lockset on the door. Large diameter of mounting plate and rose provides coverage for new ANSI hollow metal door cutout.

Heavy duty compression springs extend life of spring cage and provide smooth, fast return action of levers and minimize droop.

Patented door range adjuster allows quick and easy adjustment of the AL-Series for 1 3/8" to 1 7/8" (35 mm to 48 mm) thick doors.

Precision solid brass pin tumbler cylinder with nickel silver keys for less wear and longer cycle life. Available in all Schlage® keyways.

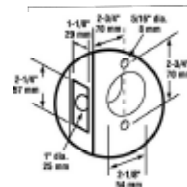

Saturn, Jupiter and Neptune levers comply with ADA requirements and are non-handed.

Key removable outside lever for quick rekeying and easy cylinder replacement.

Interchangeable core, Primus® and Primus interchangeable core cylinders available.

D SERIES KNOBS/ND SERIES LEVERS EXTRA HEAVY DUTY COMMERCIAL LOCKSETS

Top-of-the-line in heavy duty commercial locking applications. Specified when the highest quality lock mechanisms are required. Precision manufactured to high tolerances and exacting specifications.

D Series is best suited for commercial, institutional and industrial installations.

D Series D53PD

Exploded View

Use Pro-Lok **IN20-PRO/INCL-PRO** Templates
Use Pro-Lok **EWP-IN20-FP-S-9**
or **EWP-IN20-FP-S-14** Flat Plate

Applications:

Extra heavy duty commercial, residential, institutional and government buildings. (Knobs are not ADA approved)

Certifications:

ANSI A156.2-2003, Series 4000, Grade 1.
(FF-H-106C Series 161.) UL Listed for 3-hour fire door.

Cylindrical Housing:

Heavy gauge cold rolled steel mechanisms are corrosion treated for normal atmosphere conditions.

Keying:

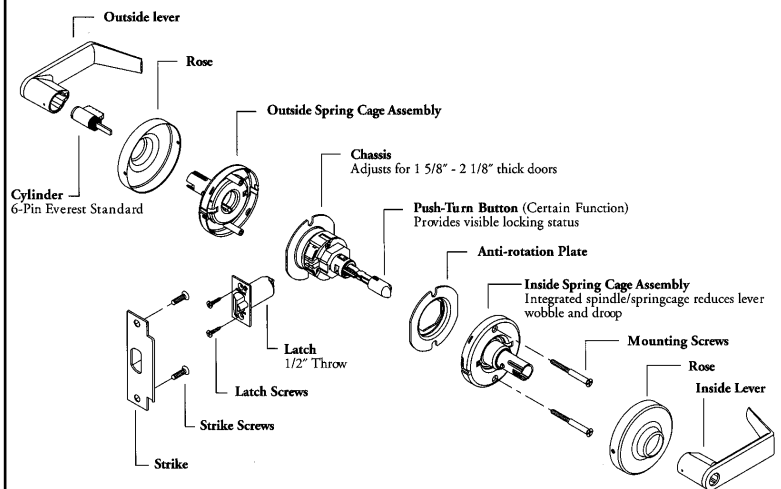

6 Pin tumbler with two nickel silver keys per lock. Stock locks are keyed 5 pin.

Door Range:

1-3/8" to 2" standard. 2" to 2-1/2" regular parts assembled to order.

Backset:

2-3/4" standard. 2-3/8" and 3-3/4" backset latches available. 5" links available.

Handing:

All ND-Series lever locksets are non-handed.

Door Thickness:

1-5/8" to 2-1/8" (41mm-54mm) standard including Vandlgard® functions.

Backset:

2-3/4" (70mm) standard. 2-3/8", 3-3/4" and 5" (60mm, 95mm, 127 mm) optional.

Faceplate:

Brass, bronze or stainless steel. 1-1/8" x 2-1/4" (29 mm x 57mm) square corner, beveled.

Lock Chassis:

Zinc plated for corrosion resistance.

Latch Bolt:

Steel, 1/2" (12mm) throw, deadlocking on keyed and exterior functions. 3/4" (19mm) throw anti-friction latch available for pairs of fire doors.

Exposed Trim:

Levers: Pressure cast zinc, plated to match finish symbols. Roses: Solid brass.

Strike:

ANSI curved lip strike 1-1/4" x 4-7/8" X 1-3/16" lip to center standard. Optional strikes, lip lengths and ANSI strike box available.

Cylinder & Keys:

6-pin Everest C123 keyway standard with two patented nickel silver keys per lock.

Keying Options:

Interchangeable core and Primus® high security cylinders. Master keying, grand master keying and construction keying.

Warranty:

Seven-year limited for all functions including Vandlgard®.

ANSI

Meets or exceeds A156.2-2003, Series 4000, Grade 1 strength and operational requirements. Meets A117.1 Accessibility Code.

Federal

Meets FF-H-106C Series 161.

California State Reference Code

(Formerly Tide 19, California State Fire Marshal Standard)

All levers with returns comply; levers return to within 1/2" of door face.

ENGAGE™ Technology Solutions - NDE SERIES

Quick facts about NDE Series and ENGAGE:

- ENGAGE™ is a connectivity platform that simplifies the ability to connect people and openings to deliver cost effective intelligence and efficiency to any facility.
- Conveniently retrofits into standard ND door prep without drilling additional holes
- Installs in about 15 minutes with just a Phillips screwdriver
- Compatible with proximity as well as aptiQ™ and aptiQmobile™ smart credentials
- ENGAGE™ cloud-based web and mobile apps make it simple to configure lock settings, add users, and view audits and alerts from anywhere
- For added features and benefits, the NDE Series wireless lock can be managed with software from one of our access control alliance partners.

Flexible solutions that fit your business needs

ENGAGE technology streamlines the ability to manage access using electronic credentials.

Cloud-based mobile and web apps make it easy to manage locks and users from wherever you are, quickly changing and tracking who has access to each door.

Use the ENGAGE apps for the following:

- Configure and manage locks • Enroll and manage credentials
 - View history (audits) and alerts by lock • Perform diagnostics (mobile app only)
- Updates to the locks can be sent in two different ways, depending on your business needs. NDE wireless locks are Wi-Fi-enabled and can be connected to the IT network for daily updates. These updates are scheduled by the ENGAGE cloud to occur automatically within 24 hours of the requested change. In addition, the ENGAGE mobile app can send updates to the lock while the user is at the door—which is beneficial when the lock is in a space where Wi-Fi connectivity is not practical or when changes to the lock need to be made immediately.

The new Schlage® NDE Series wireless lock with ENGAGE™ technology is designed to be easy to install, connect, manage and use. Developed specifically for facilities that want to upgrade to electronic credentials for improved security and efficiency, it is ideal for interior office doors, common area doors and sensitive storage spaces with a cylindrical door prep.

Other cylinder configurations available, call for your exact needs.

NDE Storeroom Function (cores not included)

Designed to accept Schlage FSIC interchangeable core cylinders.

SCHLAGE KEYPAD LOCKS

No more hiding keys under the doormat. No more losing, forgetting, or making extras keys time and time again. Step up to a more secure and flexible solution with Schlage electronic security products. Install a new keyless door lock or deadbolt yourself—with nothing more than a screwdriver. You're free to add, change, or delete user codes in just seconds—and to come and go as you please.

- Automatically relocks after 5 seconds; no need to remember to relock the door
- Backset: 2 3/8" or 2 3/4"
- No programming required; preset with two user codes so it's ready to use right out of the box
- ANSI/BHMA Grade 2 Certified
- Fits standard door prep
- Battery operated with over 3 year battery life

FE575CAM x ACCENT

FE595PLY x FLAIR

FE575 Automatically relocks after 5 seconds.

FE595 Flexibility: Choose from automatic relocking or lock as desired.

COMMERCIAL MORTISE LOCKS

The Schlage L-Series mortise lock line is a heavy duty commercial mortise lock containing a wide array of knob and lever designs. It is available in a variety of keyed and non-keyed functions, and in most popular decorative finishes. It is UL Listed and can be specified for applications in offices, schools, hospitals, hotels, commercial/ industrial buildings as well as residences.

Equipped with conventional cylinders and sectional trim, the L-Series extra heavy duty mortise lock provides ANSI 156.13, Grade 2 security to enhance its existing Grade 1 operational requirements for mortise locks with sectional and escutcheon trim. The series continues to exceed Grade 1 security requirements with concealed cylinders.

- Levers: Levers are available in forged brass or bronze and cast stainless steel. Designs available to match D-Series levers.
- Escutcheons: L escutcheons are cold forged brass or bronze and stainless steel. N escutcheons are heavy wrought reinforced brass, bronze and stainless steel. L = 8" x 1 3/4" x 7/16" (203 mm x 44 mm x 11 mm). N = 8" x 2 9/16" x 7/16" (203 mm x 65 mm x 11 mm).
- Roses: A = 2 1/8" (54 mm) diameter wrought brass, bronze or stainless steel. B = 2 9/16" (65 mm) diameter wrought brass, bronze or stainless steel.
- Trim Combinations: Available with knob both sides, lever both sides, or knob by lever with rose or escutcheon both sides.
- Keying: 6-pin cylinder with two nickel silver Everest® patented keys standard. Keying options available from factory are master keying, construction keying, interchangeable core, SFIC and Primus® high security cylinders.
- Door Range: 1 3/4" (44mm) Standard. 1 3/8" (35mm) to 2 1/2" (64mm) Regular parts assembled to order. Over 2 1/2" (64mm) door ranges vary by function. N escutcheon available for 1 3/4" (44mm) doors standard. 2" (51mm) to 2 3/8" (60mm) Regular parts assembled to order. Specify door thickness if other than 1 3/4" (44 mm).
- Case Size: 4 7/16" x 6 1/16" x 1" (113mm x 154mm x 25mm).
- Armored Front: 1 1/4" x 8" x 7/32" (32mm x 203mm x 6mm). Standard. 1 1/16" x 8" x 7/32" (27mm x 203mm x 6mm) Optional.
- Spacing: Knob or lever to cylinder, 3 7/8" (98mm); knob or lever to thumbturn hub, 2 11/16" (68mm).
- Deadbolt: 1" (25mm) Throw stainless steel.
- Latchbolt: 3/4" (19mm) Throw stainless steel with anti-friction tongue
- Backset: 2 3/4" (70mm) Only.
