

Logitech® Cordless Optical Mouse

Getting Started Guide

1 Important Safety Information

Before using your mouse, please read the Comfort Guidelines that come with your product.

2 Install the Battery and Connect the Mouse Receiver

1. Remove the battery compartment cover, then insert the battery. Follow the diagram inside the battery compartment, then replace the cover.
2. For a PS/2 connection, turn off the computer. Connect the receiver cable to the PS/2 mouse port on the computer, then turn on your system.
3. For a USB-port connection, remove the PS/2 adapter (Windows® 98 or higher or Macintosh® OS 8.6 or higher required). Connect the receiver cable to the USB port. (For Windows, you may be prompted to insert the Windows software CD into the computer's CD-ROM drive.) Follow the on-screen instructions.

USB Port

PS/2 Port

PS/2 Port Adapter

3 Install the Mouse Software: Important!

1. For PCs, start Windows®, insert the Logitech® software CD into the computer's CD-ROM drive, then follow the on-screen instructions. (If Autoplay is not enabled, select Run from the Start Menu on the Taskbar. Next, type D:\Setup.exe, where D: is the designation of the CD-ROM drive.)
2. For the Macintosh®, start the Macintosh operating system, insert the Logitech software CD into the computer's CD-ROM drive, find the Installer icon in the appropriate language folder, double-click the icon, then follow the on-screen instructions.

4 Establish Communication between Mouse and Receiver

Press the connect button on the receiver, then press the connect button on the bottom of the mouse.

5 Battery Life

The surface on which you use the mouse can significantly affect battery life. Lighter surfaces extend battery life, darker ones shorten it. Bright, matte surfaces (not glossy ones) are recommended.

6 Get More Information!

A User's Guide, which has valuable information about your product (e.g., customer support numbers) is on the Logitech® software CD and was copied to your hard drive. To find the User's Guide, do the following:

For PCs: Go to the Taskbar, then select Start, Programs, Logitech®, MouseWare®, then User's Guide.

For the Macintosh®: On the desktop, find the MouseWare® folder, then open the folder by double-clicking it. Find the icon for the User's Guide, then double-click the icon to open the document.

7 Troubleshooting

The Mouse Does Not Work after Installation or Is Not Detected

- Y Make sure you have connected the receiver correctly. The receiver cable goes into the computer's USB port or PS/2 mouse port. For optimal performance, place the receiver at least 8 inches or 20 centimeters away from other electrical devices, such as the computer, the computer monitor, or external storage drives.
- Y For PCs, make sure the PS/2 mouse port has the proper configuration. Refer to your computer documentation for the correct port configuration. You may also have other system devices that conflict with the mouse. Check the IRQ/address settings of these devices for conflicts, and change the settings as required.
- Y Establish communication between the receiver and the mouse. Press the Connect button on the receiver, then press the Connect button under the mouse.
- Y Make sure you have installed the batteries correctly. If you are working on a metallic surface, try turning the receiver on its side for better reception.
- Y Try unplugging then reconnecting the receiver cable to the computer.

8 International Standards and Safety

This mouse has no serviceable parts included. User-observable light is 15 microwatts in normal operation. This mouse is rated as a commercial product for operation at 32°F (0°C) to 104°F (40°C).

This product has been tested to comply with International Standard IEC 825-1:1993. The standard requires the following statement:

CAUTION: Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

Class 1 LED Product

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Information to User – The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
