Your speaker system

L   R

Touchdisk and Bluetooth status light

Control speaker

Bluetooth button

Power switch

MIcroUSB port*

AUX jack

Power adaptor

USB transceiver

Audio cable

*For authorized service only

Attach cables

Connect the speaker wires to the Y-connector and plug the power supply into an outlet.

Wireless choices

To better fit your personal style and audio devices, the speaker system offers a choice of wireless connection options.

USB transceiver
Use the transceiver to play audio from your laptop.

***Bluetooth* devices**
Use *Bluetooth* wireless technology to play audio from multiple devices or a device lacking USB.
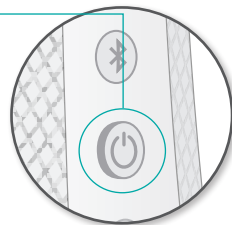

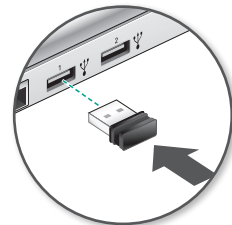

First-time setup (laptop)

On the control speaker
Press the power button.
A tone tells you the speakers are powered on and ready for use.

On your laptop
Plug the USB transceiver into a USB port. Any audio played on the laptop is output on the speakers.

Your laptop automatically becomes the **primary device** with a permanent connection to the speaker system. For more information, see "About the Primary Device."
