

## Set up more *Bluetooth* devices

Pair up to 8 *Bluetooth* devices with your speakers.  
(Any three devices can connect simultaneously.)

### On the speakers

Press the *Bluetooth* button. The status light blinks rapidly to indicate the speakers are ready for pairing.

### On a device

Turn on *Bluetooth* wireless. Tap or click Logitech Z600 in the Bluetooth device list.

## About the primary device

Your speaker system maintains a connection with a **primary** device that automatically becomes the current audio source whenever it's in range of the speakers. All other devices require reconnection.

By default, the USB transceiver automatically becomes the primary device when it's in use. Otherwise, the speaker system recognizes the first paired *Bluetooth* device as the primary device. You can also reset the primary device to a *Bluetooth* audio source of your choice.

## Reset the primary device

### On the device

Connect to the speakers and start playing audio.

### On the speakers

Hold down the *Bluetooth* button until you hear a beep (about 5 seconds).

## Reconnecting a *Bluetooth* device

If a device has been paired with the speakers, you can reconnect to it whenever it's within range. (If the *Bluetooth* device is the primary device, it reconnects automatically.)

### Smartphone/tablet

Turn on *Bluetooth* wireless.  
Tap Logitech Z600 in the Bluetooth device list.

### Mac OS X

Click the *Bluetooth* icon\* in the menu bar, highlight Speaker System Z600 in the pull-down menu and choose Use as Audio Device.

\* If icon is not in the menu bar, go to Systems Preferences > Bluetooth and set to display

### Windows 7

In the Control Panel window, double-click Hardware and Sound. Switch to the Playback tab and select Speaker System Z600 from the list of output devices.

### Windows 8

Expose the charms and choose Settings. Choose Change PC Settings, then choose Devices. Select Speaker System Z600 in the device list.

## Setting sound output on a laptop

If connecting from a laptop, you may also need to reselect the speakers as the sound output device.

### Mac OS X

Option-click the volume icon in the menu bar to display audio input/output settings.

Choose Speaker System Z600 from the Output Device list.

### Windows 7

In the task bar, right-click the volume icon and choose Playback devices from the pop-up menu. Select Speaker System Z600 in the Playback tab of the Sound window.

### Windows 8

Expose the charms and choose Settings. Choose Change PC Settings, then choose Devices. Select Speaker System Z600 in the device list.

## Touch disc

Use the touch disc on top of the right speaker to adjust volume and play or pause audio.

### Volume

Swipe in a clockwise direction to raise the volume. Swipe counter clockwise to lower volume.
