Keyboard at a glance

Keyboard at a glance

Keyboard features: Using F-keys

Enhanced F-keys start applications, control volume, and play media. To perform an enhanced function, hold down the **FN** key while pressing an F-key.

Tip In the software settings, you can invert the FN mode if you prefer to access the enhanced functions directly without having to press the **FN** key.*

Quick-start F-keys

Instantly start applications and utilities

- FN** + **F1**  Web browser
- FN** + **F2**  Mail application
- FN** + **F3**  Windows® search
- FN** + **F4**  Windows calculator

Volume control F-keys

Adjust or mute computer audio

- FN** + **F9**  Mute
- FN** + **F10**  Volume down
- FN** + **F11**  Volume up

Media control F-keys

Start media application and control playback

- FN** + **F5**  Media application
- FN** + **F6**  Previous track
- FN** + **F7**  Play/Pause
- FN** + **F8**  Next Track

Sleep mode

Put computer to sleep

- FN** + **F12**  Sleep mode

* Requires SetPoint™ Software (available for download at www.logitech.com/downloads).

Battery management

Your keyboard has up to three years of battery life.*

Battery sleep mode

Did you know that your keyboard goes into sleep mode after you stop using it for a few minutes? This feature helps limit battery usage and eliminates the need to keep switching your devices on and off. Your keyboard is up and running immediately once you begin using it again.

How to check the battery level

Turn the keyboard off, and then on using the On/Off slider switch on the top edge of the keyboard. Look at the battery LED on the top case. If the LED glows green for 10 seconds, the batteries are good. If the LED blinks red, the battery level has dropped to 10%. (You still have a few weeks of battery usage left.)

* Battery life varies with usage and computing conditions. Heavy usage usually results in shorter battery life.

The diagram illustrates the Logitech Unifying ecosystem. On the left, a laptop is shown with a USB Unifying receiver plugged into its port. Below the laptop is a Logitech wireless keyboard. An orange line connects the receiver to a large, light-blue circular graphic on the right. Inside this circle are three icons of different Logitech wireless mouse models, representing compatibility with various mouse types. Above the receiver is the 'unifying™' logo, which consists of an orange square with a white starburst icon and the word 'unifying™' in orange lowercase letters.

Plug it. Forget it. Add to it.

You've got a Logitech® Unifying receiver. Now add a compatible wireless mouse that uses the same receiver as your keyboard. It's easy. Just start the Logitech® Unifying software* and follow the onscreen instructions. For more information and to download the software, visit www.logitech.com/unifying.

*Go to Start / All Programs / Logitech / Unifying

Troubleshooting Keyboard is not working

- **Is the Power on?** The power switch for the keyboard must be in the **ON** position. Battery LED should light green.
- **How are the batteries?** Check the keyboard battery installation or replace the batteries. The keyboard uses two AA alkaline batteries.
- **Check the Unifying receiver.** Plug the Unifying receiver into a different USB port. Remove any metal object between the Unifying receiver and the keyboard that may interfere with reception.
- **Re-establish the connection.** Use the Unifying software to reset the connection between the keyboard and Unifying receiver. Refer to the Unifying section in this guide for more information (p. 12).
- **Move closer?** Try moving the keyboard closer to the Unifying receiver, or plug the Unifying receiver into the receiver extender cable to bring it closer to the keyboard.
- **Restart the computer.**

Picture of receiver being installed into receiver extender cable.

Visit www.logitech.com/comfort for more information about using your product, and for ergonomics.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Industry Canada Statement

This device complies with RSS-210 of the Industry Canada Rules. Operation is subject to the following two conditions:

- 1) this device may not cause interference and
- 2) this device must accept any interference, including interference that may cause undesired operation of the device

申請台灣應使用注意事項之資訊:

經型式認證合格之低功率射頻電機，非經許可，公司、商號或使用者均不得擅自變更頻率、加大功率或變更原設計之特性及功能。

低功率射頻電機之使用不得影響飛航安全及干擾合法通信；經發現有干擾現象時，應立即停用，並改善至無干擾時方得繼續使用。前項合法通信，指依電信法規定作業之無線電通信。低功率射頻電機須忍受合法通信或工業、科學及醫療用電波輻射性電機設備之干擾。
