

Carioke™ Operating Instructions:

- 1) Attach the Carioke headset cable to the top of your Carioke player and place the headset snugly above the ears. The “wrap-around” headset is designed to be safe, tangle free, and legal to wear while driving in all states and countries.
- 2) Insert one end of the (included) Carioke cable into the “**Music-In**” Jack on the bottom of your Carioke player.
- 3) Insert the other end of the (included) Carioke cable into the headphone jack of your iPod, MP3 Player, Cell Phone or other music device that contains your favorite Karaoke music. Then pick a song and press PLAY.
- 4) Next, choose if you want to connect to your car’s stereo wirelessly or with a direct cable.
- 5) To connect wirelessly, simply tune your radio to one of the 4 following **FM stations: 107.1, 107.3, 107.5, or 107.7 FM**. Then, move the switch on the bottom of your Carioke player to the corresponding FM frequency with the best reception in you area.

Note: In different areas of the city and country, different FM stations will have better reception than others. Try all four (4) of the frequencies to discover which station has the best reception in your area.

- 6) To connect with a direct cable, we have included a tape adapter that plugs into the “**Music-Out**” jack on the bottom of each Carioke player. This jack can also be used with the (included) Carioke cable to plug directly into any satellite radio or AUX “line-in” jack on any stereo. For even higher quality sound, or for vehicles with low FM reception we recommend a direct connection.

Volume Balancing:

There are essentially 4 volume controls:

- 1) Your Car’s Stereo
- 2) Carioke’s Microphone Volume (top)
- 3) Carioke’s Music Volume (top)
- 4) Your External Music device’s Volume, such as an iPod, MP3, CD or Tape Player.

Adjust all 4 volume levels to find each vehicle’s optimal balance.

Static or background noise can be resolved by balancing the 4 levels differently.

Tip: Slightly fade your car’s speakers to the rear and slightly lower the treble.

Warning:

Changes or modifications to this unit not expressly approved by the party responsible for compliance will void the user's authority to operate the equipment. Any change to the equipment will void FCC grant.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
