OUR EXCLUSIVE

SPEED DIAL™

MAKES PROGRAMMING A SNAP!

The Lux PSP511 was designed exclusively for professional HVAC contractors and is the best value in programmable thermostats today. It installs quickly and easily, and is packed with useful features including armchair programming and a separate baseplate for easy mounting. The PSP511 is incredibly versatile - it is compatible with low voltage, millivolt and single-stage heat pump and zoned systems, and offers optional battery

power or system power with battery back-up, so you have less models to carry. When it comes to programming, the 511 offers unrivaled simplicity and ease. The Speed Dial™, a patented feature available only on Lux thermostats, makes programming practically self-explanatory and will help prevent costly callbacks and frustrated consumers. And best of all, the PSP511 is at a great price-point allowing you to enjoy increased profits.

LUXPRO® PSP511 PROGRAMMABLE THERMOSTAT

For use with:

- All Low Voltage (24 VAC) Systems
- Millivolt Systems (Wall Furnace)
- High Efficiency Systems
- Single-Stage Heat Pump

Features

- 1 heat/1 cool for electric, gas, oil and heat pump systems
- System or battery powered
- 5 - 2 day programming
- 4 periods per day
- Adjustable temperature differential
- Speed Dial™ programming
- Large digital display
- ENERGY STAR™ compliant
- °F / °C selectable
- Gas/electric fan option
- Hold temperature feature
- Low battery indicator
- Low temperature protection
- Manual temperature override
- "O" & "B" terminals
- 12/24 Hr. time selectable
- Pre-programmed
- Quick wiring terminal block
- Relay outputs
- Short cycle protection (5 min or 2 min)
- Batteries included
