When using, need to according to the card slot will set the SD card, correct insertion machines, to push into the card, until you hear a click sound. Take out the SD card, please push the memory card into the slot, and then release. Memory card will automatically pop up, and then remove the memory card.

- a. 请在后壳扣手位把卡盖打开，然后正确把卡插入机器中
disclose the SD cover (cap) on the backcover (battery cover) and. insert the card properly

- b. 在对存储卡操作时（比如读取、拷贝等），请勿拔出存储卡，否则可能出现数据错误。

When the memory card operation (such as read, copy, etc.), do not pull out the memory card, otherwise there might be data errors

c. 避免在高温、高湿度环境下使用和存放存储卡。

using and storage memory card Avoid in high temperature or high humidity environment

d. 将存储卡远离液体和腐蚀性的材料。

The memory card away from liquid and corrosive materials

5.2.4 APK 软件安装和卸载

APK Install and uninstall

本机支持第三方基于Android平台的应用程序，大部分应用程序可以从网络上获取，将其拷入本机flash或T-Flash卡中，然后进行安装使用。

The machine supports third-party applications based on Android platform, most applications can be obtained from the network, its copy into the machine flash or T-Flash card, and then install it using the

• • 安装 : •

Install

Internal Memory 和**SD Card**分别对应flash内存盘和T-Flash卡存储盘;

进入后，选择左边方框里的APK格式安装程序，双击安装软件。

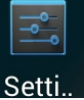

After entering, select the APK installer which inside left box , double-click to install the software

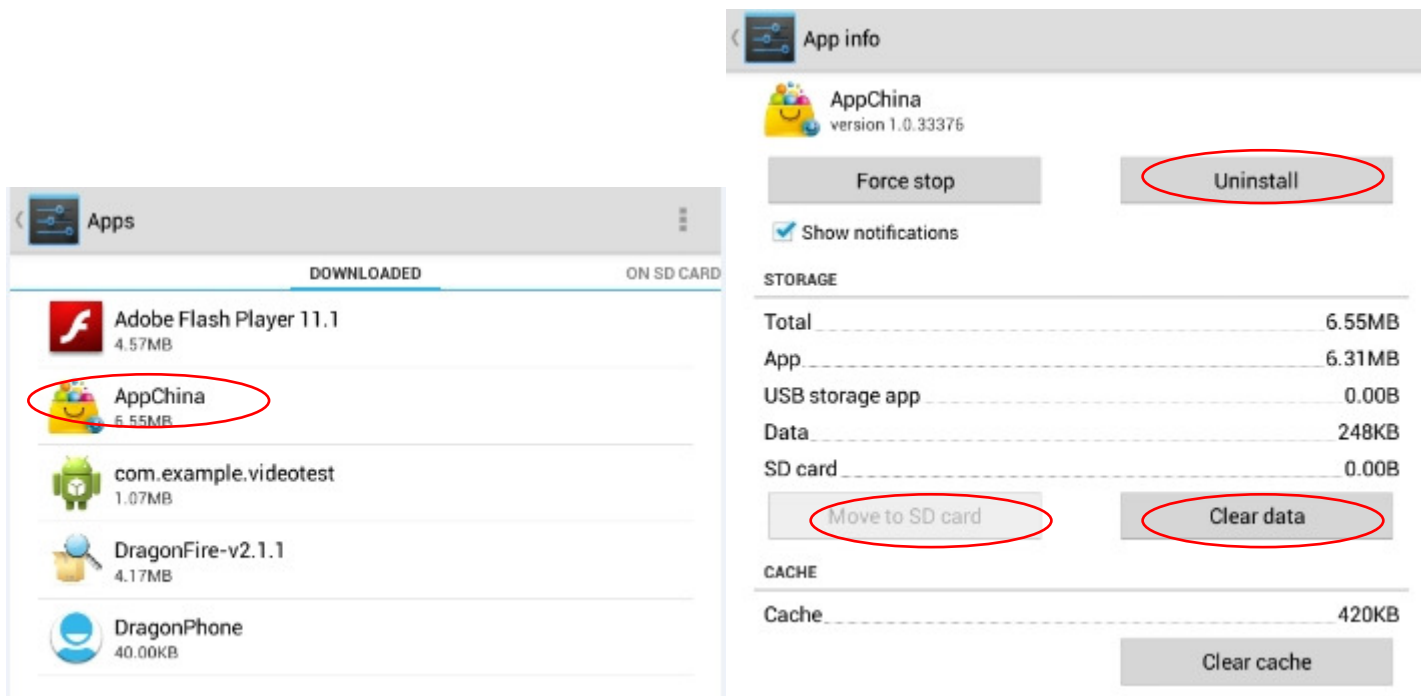

操作完成后返回到主界面，即完成安装，并有相应的软件菜单。

After the operation is complete to return to the main interface, complete the installation, and have corresponding software menu

- **卸载**：点击设置图标，进入应用。选中你想卸载的软件。

Uninstall: Click  , enter the  Apps application. Select the software you want to uninstall

注：此系统只能卸载用户安装的 APK 软件，原出厂自带的软件无法卸载和删除。

Note: only user installed APKs can be uninstalled in this system

- 启动：运行该软件

Start: Run the software

- 导出：导出软件至 T-Flash 卡

Export: Export software to T-Flash Card

- 卸载：卸载该软件

Uninstall: Uninstall the software

- 取消：取消操作

Cancel: cancel the operation

- **退出:** 回到主界面

Exit: return to the main interface

注: 标准键盘有些按键无法使用, 需要按 ANDROIED 系统的定义修改键盘码值, 建议使用出厂配套的 USB 键盘。

Note: some of the standard keyboard keys can not be used, you need to modify the system by definition ANDROIED keyboard code value, we recommend using the factory supplied USB keyboard.

6.1.2 WIFI 设置:

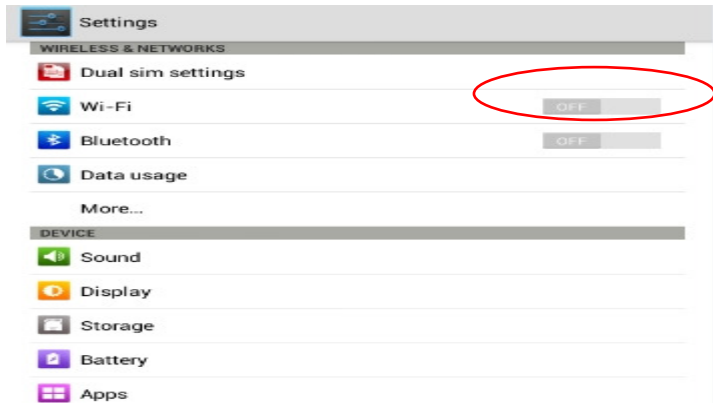

WIFI settings

在桌面点击功能模块“Settings”菜单图标, 进入功能菜单列表, 点击“OFF”图标为 ON

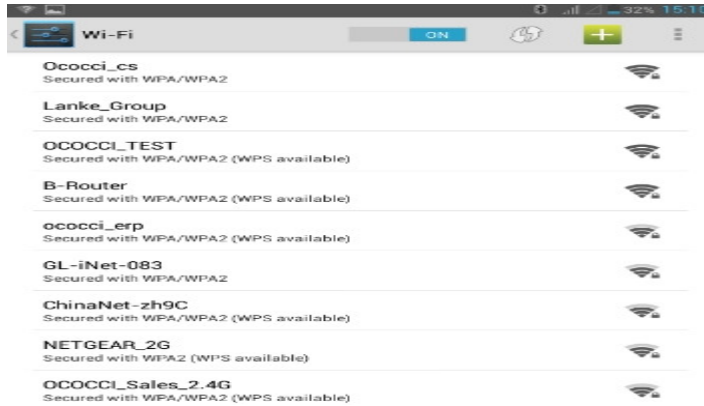

Click “Settings” icon on desktop, enter the function menu list, click “OFF” to

a. 点击 WIFI 设置选择网络通知系统会自动寻找 WIFI 网络名, 如下图已找到几个 WIFI 网络名:

Click WIFI Settings and select network notification, system will automatically find WIFI network name, as shown already find ,s several WIFI network names are found as the following figure

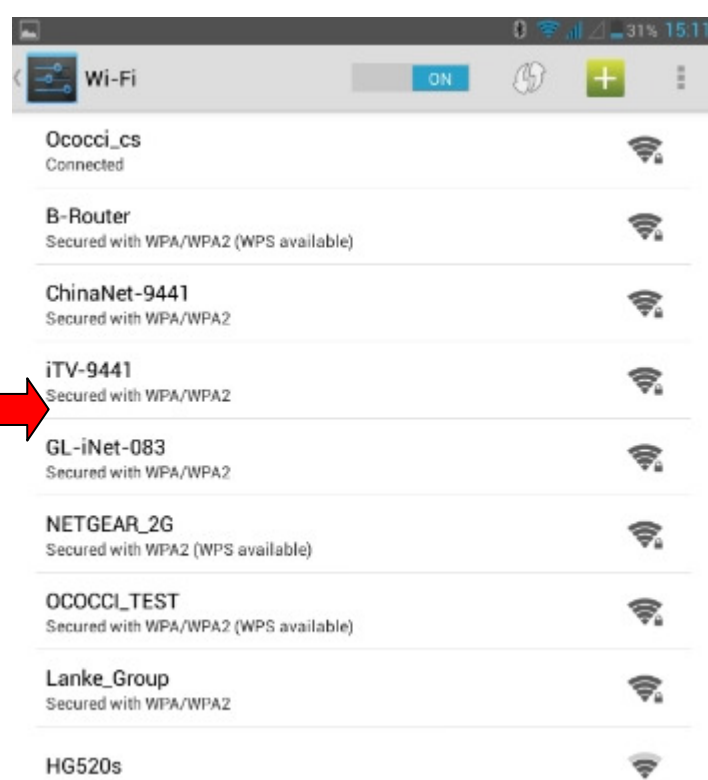

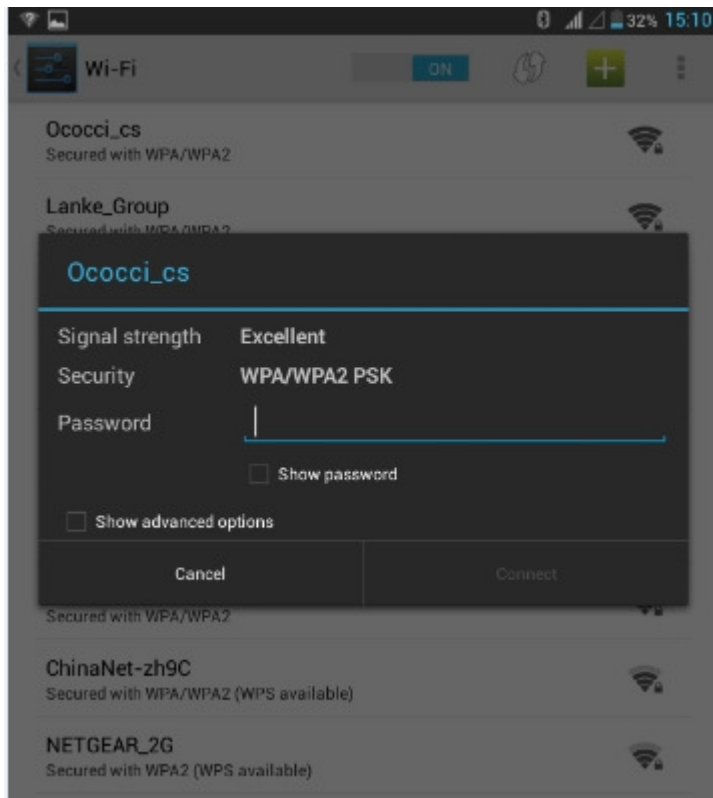

b. **连接:** (此方式为动态获取 IP 地址, 无需设置 IP)

Connection:(The way to get the dynamic IP address, don't need to set up the IP)

是否自动分配 IP 地址首先是由 WIFI 路由器本身设置决定, 如果是自动分配 IP 地址的网络名, 点击机器搜索出来的 WIFI 网络, 例如点击“Test||”出现提示输入无线密码的界面, 输入正确密码后点击“完成”。系统会自动连接并分配 IP 地址, 连接成功会提示“已连接”, 点击网络名也会出现连接状态信息, 如下图:

It's determined by the Router itself whether it needs assigned IP address automatically or not. the wifi network will be displayed once the scanning initialized and click the network name (for example click the “test”), input the password and click “finished”, the system will be connected and assigned IP address automatically, finally shows as “connected” if successfully connection established, meanwhile the connecting status will be shown once clicking the network name.

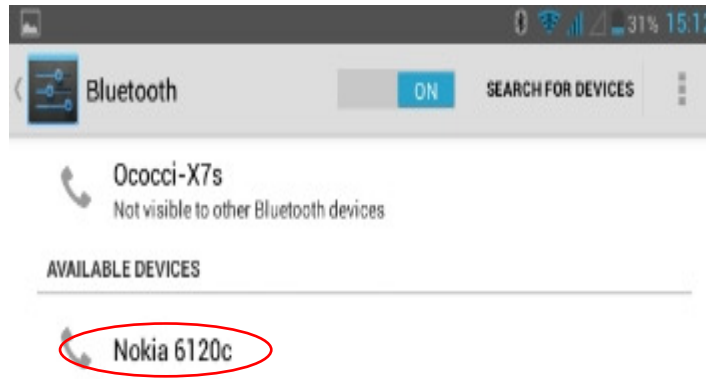

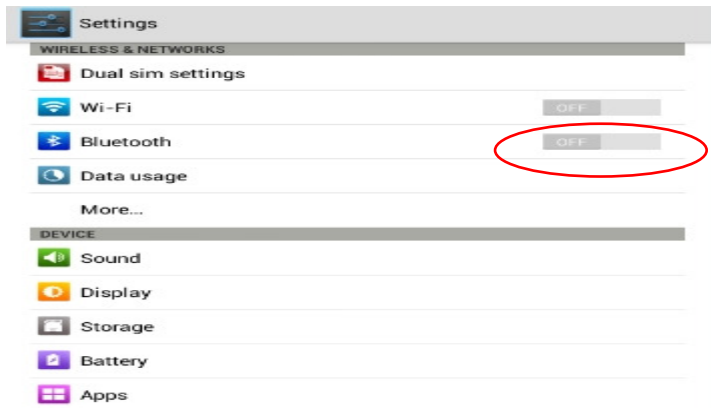

连接成功会提示“已连接”，点击网络名也会出现连接状态信息，桌面会出现WIFI图标“”

Successful connection will be prompted to "connected", click on the network also can appear connection state information, the desktop WIFI icon will appear WIFI icon

6.1.3 蓝牙连接点击“”图标为ON 

Bluetooth connection click " OFF " icon to ON " ON "

点击搜索到的蓝牙设备进行连接。

Click on the search to the bluetooth device to connect.

wifi 热点设置:

wifi hotspot settings

点击更多.....进入无线和网络:选择便携式热点进入便携式热点设置:

Click for more into tethering and portable hotspot: choose a portable hotspot into portable hot Settings

将便携式 Wi-Fi 勾选上,此时机器作为无线路由输出,在其它 WIFI 设备中可以查找到本机器

The portable wi-fi checked, this machine as a wireless router output, can be found in other WIFI devices in this machine

点击进入配置 Wi-Fi 热点设置界面:可根据自己要求更改网络 SSID 及密码:

Click to enter configuration wi-fi hotspots Settings interface: according to your requirements change network SSID and password:

外接 RJ45 网卡 USB Dongle: 自动获取 IP 地址无需任何设置

External RJ45 adapter USB Dongle: automatically obtain IP address without any Settings

插上外接 RJ45 USB 网卡到 USB 转 HOST 线中, 连接正常后当前界面右下角出现已连接图标如图:

此时可以正常使用网络.

Plug in an external RJ45, USB adapter to the USB HOST, Connect to normal after the current interface connected icon appears lower right foot as shown in figure

FCC Compliance Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, this device must accept any interference received, including interference that may cause undesired operation.

2. The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. In cases where the manual is provided only in a form other than paper, such as on a computer disk or over the Internet, the information required by this section may be included in the manual in that alternative form, provided the user can reasonably be expected to have the capability to access information in that form.

3. CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

4. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

5,. This device has been tested and meets the FCC RF exposure guidelines.

The highest reported SAR values for head, body-worn accessory, simultaneous transmission conditions are 0.300W/kg(1g), 0.938W/kg(1g), 1.043W/kg(1g) respectively.

6. WARNING!! Read this information before using your phone

In August 1986 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international

standards. Use only the supplied or an approved antenna. Unauthorized antennas modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

BODY-WORN OPERATION:

This device was tested for typical body-worn operations with the back of the phone kept 1.0cm from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 1.0cm must be maintained between the user's body and the back of the phone, including the antenna, whether extended or retracted. Third-party belt-clips, holsters and similar accessories containing metallic components shall not be used. Body-worn accessories that cannot maintain 1.0cm separation distance between the user's body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.

7. For more information about RF exposure, please visit the FCC website at www.fcc.gov

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for hand-held wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1). Nevertheless, we recommend that you use a hands-free kit with your phone (such as an earpiece or headset) to avoid potential exposure to RF energy. The design of your phone complies with the FCC guidelines (and those standards).

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.
