V5AP Setup Guide

Box Contents

Before You Begin Setup

Please check the following:

- You have the latest version of iTunes® installed on your computer.
- You know your wireless network (WiFi) name and the password required to access it.
- Your wireless network is on and functioning properly.
- Your iOS device (iPod[®], iPhone[®], iPad[®]) is Apple AirPlay[®] compatible.
 For a full list of compatible devices, visit wrensound.com/compatibility.
- Your iOS device has received the latest software updates.
- Your Wren speaker is located in an area with ample WiFi signal strength.

PLEASE NOTE: A comprehensive user manual is available for download from www.wrensound.com/manuals. It is not included with your Wren V5AP.

English

Powering On Your Wren V5AP

Connect the AC power cord to the power supply.

3 Connect power supply to power input on rear of speaker.

The power indicator in the center of the power button will flash white for about 10 seconds, then turn off.

2 Connect power supply to AC outlet.

4 Press the power button.

The power indicator will then blink white until the system is ready. When the system is ready, the power indicator will remain white.

Connections

Setup Button Used to enter various setup modes

> **3.5mm Aux Input** Connects any audio source to your Wren V5AP via a 3.5mm audio cable

Power Supply Input

Connects to the power supply

USB/iPod Docking Port

Charges iOS devices, transfers WiFi settings, and plays digital audio from select iOS devices

Connect to your network – Option A

Using an iOS Device (iPhone, iPad, iPod)

 Select WiFi as your source; press Source button until WiFi indicator is lit.

2 Make sure your iOS device is on, unlocked and connected to your WiFi network.

3 Connect your iOS device to the Wren V5 using the included USB dock connector cable.

SETUP AUX IN DC 244 (ProdiPhone/Pad

Press and release the Setup button located on the back of the speaker.

5 A window will open on your iOS device asking you to allow sharing of your WiFi settings. Select "Allow" in the popup.

The WiFi indicator on the speaker will blink amber as your settings are transferred to the product. The indicator will then turn solid amber as the system logs on to your network.

Connect to your network – Option B

Using a Mac[®] or Windows[®] Computer

If you do not have an iOS device but you want to use AirPlay with iTunes on a Mac or PC, you will need to use the Web Server method to set up a network connection for your Wren V5AP. Make sure you have saved open work on your computer and closed all programs.

Select WiFi as your source; press Source button until WiFi indicator is lit.

How does AirPlay work?

When used for audio, AirPlay allows you to stream music from your computer, iPhone, iPad or iPod touch to an AirPlay-enabled speaker through your home WiFi network. Music is streamed from your iDevice to your wireless router, which delivers it to your Wren V5AP for crystal clear playback. The technology behind AirPlay is complex, but it's simple to use: Once your Wren V5AP is connected to your network, your device will display an AirPlay icon whenever you're listening to music. Just click the icon, select your Wren V5AP and enjoy the sound.

Using AirPlay on Your iOS device (iPhone, iPad, iPod)

Once you have successfully set up your Wren speaker, you are ready to enjoy your music wirelessly. Locate and press the AirPlay icon on your music app to begin playing music. Note that the location of the AirPlay icon will differ depending on the music player you are using. Below are some examples.

Using AirPlay on Your Mac or Windows Computer

Once you have successfully set up your Wren speaker, you are ready to enjoy your music wirelessly. Locate and press the AirPlay icon in iTunes to begin playing music.

Speaker Controls

Remote Control

Source Selector Selects the desired audio input source

Play/Pause Plays and pauses audio

Goes to the next audio track

Mute/Unmute Mutes and unmutes the audio

• **Repeat*** Replays the current audio track

* PLEASE NOTE: The "Shuffle" and "Repeat" functions on the Remote Control work only when using a Mac or PC connected via AirPlay, or when using an iOS device connected to the USB input. Otherwise, these functions are accessible from the iOS device that is being used as the audio source via AirPlay or Aux In.

* See the full user manual at www.wrensound.com/manuals for details.

Troubleshooting Tips

Problem	Possible Solutions
I am unable to connect the Wren V5AP to my network.	 Verify that your WiFi network is functioning. The WiFi signal may be weak or the Wren V5AP may be out of range of your WiFi network. Move the Wren V5AP closer to your network access point. Reset the Wren V5AP Hardware: Unplug the power supply from the rear of the V5AP. Wait 15 seconds, then plug in power supply and turn on the V5AP. Verify that you have selected the WiFi source on the V5AP before trying to set up your network connection.
I have successfully connected the Wren V5AP to my network, but I cannot select the Wren V5AP speaker from iTunes or my iOS device.	 Verify that the Wren V5AP is on. If no indicators are lit, then press "Power" to turn on the system. Verify that you are running the latest version of iTunes and that your iOS device is running version 5.0 or greater. Try restarting iTunes or your iOS device. Reset the Wren V5AP hardware: Unplug the power supply from the rear of the V5AP. Wait 15 seconds, then plug in power supply and turn on the V5AP. Note: Please check compatibility at wrensound/compatibility.com to confirm that your iOS device meets the criteria for the Wren V5AP.
I have selected the Wren V5AP speaker as my AirPlay device, but I do not hear any music.	 Press Play on your iOS device or iTunes; music may be paused. Verify that the volume is not muted. (If the volume is muted, the power button will be solid amber.) Verify that the Wren V5AP is not connected to another iOS device, iTunes library or Apple TV. Try restarting iTunes or your iOS device.
