

Draft Operation Manual

Opening and closing – from the outside

Using the remote control

The remote control makes unlocking and locking of the doors of your vehicle very convenient. In addition, it provides two additional functions that you can only execute via the remote control:

- Switching on the interior lamps and illuminating the exterior door handles. With this function you can also “search” for your vehicle, when parked in an underground garage, for example.
- Panic Mode
In case of danger, you can trigger an alarm.

The antitheft system is also deactivated/activated simultaneously with the unlocking or locking of the vehicle, and the alarm system is disarmed/armed.

For US owners only

The transmitter and receiver units comply with part 15 of the FCC rules. operation is governed by the following:

FCC ID P3OM400
