ONE X Wireless Car Charger Mount User Manual  Thank you for purchasing our products. This manual addresses the safety guidelines, warranty, and operating instructions. Please review this manual thoroughly before operating your device.	Getting Started Compatibility Before using this product, make sure your device supports wireless charging. This product is suitable for phones from 2.5 inches to 3.3 inches wide. Qi Fast Charging This product supports fast wireless charging. To begin fast wireless charging, place a mobile device that supports fast wireless charging on the phone cradle. Quick charge 2.0 / 3.0 car charger (not included) is required for fast wireless charging. Package Contents ① Phone Cradle x 1 ② Air Vent Clamp x 1 ③ Fixed Nut x 1 ④ USB Type-C Cable x 1  - 1 -	At a Glance Phone Cradle  - 2 -	Mounting on the Air Vent 1) Insert the fixed nut into the ball-joint of the air vent clamp (the smaller end points to the ball-joint of the air vent clamp). Then insert the ball-joint of the air vent clamp into the back hole of the phone cradle.  2) Screw the fixed nut clockwise to fix the air vent clamp on the back of the phone cradle.  - 3 -	3) Adjust the charger mount to the optimal viewing angle as you need. Please note: We suggest you adjust the viewing angle before inserting the clamp into the air vent, or the air vent blade may be damaged. 4) Press and hold the button on the air vent clamp to firmly insert the clamp into your car's air vent. Make sure the clamp is inserted securely in position.  - 4 -	Charging Your Phone 1) Plug the small end of the USB Type-C cable (included) into the Type-C port on the phone cradle. Plug the other end into the car charger that supports fast charging, and the power indicator stays white.  2) Place your phone in the phone cradle and the locking arms will clamp your phone tightly. Your phone will begin to charge wirelessly.  - 5 -

Specifications

Model	ONE X
Input	5V / 2A; 9V / 2A; 12V / 2A
Output	5V / 1A; 9V / 1.1A; 12V / 1.25A
Supported Power	5W / 7.5W / 10W / 15W
Charging Efficiency	5-15W>80%; 5W>75%
Over-voltage Protection	5W / 5.8V; 10W / 9.6V; 15W / 13V
Over-current Protection	5W / 2A; 10W / 2A; 15W / 2A
Charging Sensing distance	Up to 6mm
Compatible Phone Size	2.5-3.3inches / 65-85mm (width)
Working Temperature	-10°C to 45°C
Storage Temperature	-20°C to 70°C

FAQs

Q1: Can this product work normally after disconnecting the power source?

A:

- After disconnecting the device from the power source, this product cannot charge your phone. But the supercapacitor in this product can still activate the telescopic arms to work about 10 times.
- When the power in the supercapacitor has been exhausted, this product will stop working. Please reconnect the device to the power to take out your phone.

Q2: Why can't my phone be charged?

A: Please check the following points:

- Check if your phone supports wireless charging.
- Confirm that the device is connected to a power source.
- Remove any materials that may obstruct the charging process such as key ring, metal phone case, metal plate, magnetic card, etc. from the back of your phone.
- Ensure that the thickness of your phone case is within 6mm. Using an ultra-thick phone case may affect the wireless charging function.
- Check if the wireless charging area of your phone is aligned with the charging area of this device.

- 8 -

Q3: Why is my phone being charged so slowly?

A: Please check the following points:

- Check if your phone supports fast wireless charging and the car charger you use supports the QC2.0 / 3.0 protocol.
- Confirm that your phone is attached tightly to the charging area on the device (within 6mm charging sensing distance).
- When the device is overheated, the charging power will decrease, which can affect the charging speed. After the device temperature returns to normal, fast charging will be resumed.

SAFETY AND WARRANTY

Safety Instructions

- Please install this device on a suitable place before starting driving. DO NOT operate or adjust the mount during driving.
- DO NOT place foreign materials, such as metal objects, magnets, and magnetic stripe cards, between the mobile device and the phone cradle. The mobile device may not charge properly or may be damaged due to overheating.
- If the product overheats, if the product has been dropped or damaged, if the product has a damaged cord or plug, or if the product has been dropped in a liquid, discontinue use and contact us.

FCC ID: 2AR5E-ONEX

NOTE: This equipment has been tested and found to comply with the limits for Class B digital devices, in accordance with section 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- this device may not cause harmful interference, and
- this device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
