Contents

1. Charging the battery:
Unplug the charger from the outlet and the phone when not in use. Do not leave a fully-charged handset connected to a charger because overcharging may shorten the lifetime of the battery.
If unused, a fully-charged battery will lose its charge over time.
If the battery is completely discharged, the charging may not start immediately when you plug in the connector. Wait 10 to 15 minutes for the phone to begin charging.
Use the battery only for its

intended purpose. Never use any charger or battery that is damaged.

Use only Entel Charger & Battery.

Note: The actual operation time of a battery varies based on the operation mode, network strength in different places and talk time.

FCC Caution.

§ 15.19 Labelling requirements.
This device complies with part
15 of the FCC Rules. Operation
is subject to the condition that
this device does not cause
harmful interference.
§ 15.21 Information to user.
Any Changes or modifications
not expressly approved by the
party responsible for compliance
could void the user's authority to
operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee

that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from

that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 1.5 cm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by

this device should not contain
any metallic components.
Body-worn accessories that do
not meet these requirements may
not comply with RF exposure
requirements and should be
avoided. Use only the supplied or
an approved antenna.
