

Package-Includes:

Interface:

Operation instructions:

Button operation and prompt instructions

Booting:
Hold down the left and right headset keys for approximately 2.5 seconds to boot.

Pairing:
A. Right and left headset pairing: headsets will connect in stereo automatically when switched on.
B. Mobile Phone connection: When switched on, the headset automatically enters into pairing state, indicated by a flashing green/white light. Connect from your phone by searching "MJYun M1" in Bluetooth settings and selecting 'Pair'. When the connection is successful you can use the headsets and phone normally.

Shutdown:
Hold down the headset function key for approximately 2.5 seconds to shut down.

Headset Indicator Light Description:
A. Green light flashing slowly means there is no connection.
B. Green light flashing every five seconds indicates successful connection.
C. White light flashing indicates low power.
D. White and green light flashing alternately indicates pairing mode.

Music Control:
Click the headset function key to pause/play the current song. Double-click the headset function key to switch to the next song.

Incoming Call Answer:
Click the right ear function key to answer incoming calls or to end calls.

Charging Box Operation Instructions:
A yellow light indicates that the box is still charging. A green light indicates the charging is complete.
When the charging box cover is open, a green light indicates that power is at greater than 40%, while yellow light indicates that power is at less than 50%.

Charging instructions

Recharge stand charging:
1. Use charger with an output voltage of DC5V/1A to charge the recharge stand. Any charger with a computer USB interface or other USB interface can charge the headset (You must choose a charger certified by a regulated manufacturer).
2. When the recharge stand is charging, the indicator light is yellow.
3. When the recharge stand is fully charged, the indicator light is green. At this point the headset recharge stand should be disconnected from the charging device.

Headset Charging
1. Align the MJYun M1 left and right headset charging contact point to the elastic pin contact point of the recharge stand and connect.
2. The headset indicator light is bright yellow when charging.
3. The headset indicator is bright green when finished charging.

Note: please use a DC5V/1A charger or PC computer USB. Recharging and discharging the headset repeatedly will lead to a decrease in battery performance over time, which is normal for all rechargeable batteries. (Do not press the elastic pin contact point, so as not to cause them to be used properly.

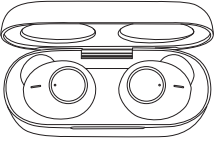

Announcements

1. Please do not remove or refit the headset for any reason. Doing so could cause the headset to malfunction and burn. This is not covered by warranty.
2. Do not allow the equipment to come into contact with liquid. Doing so can cause serious damage to the equipment. The manufacturer does not accept responsibility for damage caused by liquid.
3. Do not place the equipment in an environment where the temperature is too high (above 45 degrees Celsius) or too low (below 0 degrees Celsius).
4. Please avoid using the device lights near the eyes of children or animals.
5. Do not use the equipment in thunderstorms.

Thunderstorms may cause the equipment to work aborally and increase the risk of electric shock.

Warning!

This product contains a built-in lithium battery. Do not expose the product to strong sunlight, fire, or dispose of it in fire, as doing so could result in explosion. Deal with disposal of batteries in accordance with local regulations and do not treat them as household waste.
The user may not remove or replace the battery of the product unless otherwise specified in the manual or quick start guide. Doing so risks damage to the product.
When charging, tilt the headset and place it in the charging box as shown.

Questions and answers Exception handling:

1. If headset pairing becomes disrupted, restart headphones to automatically return to normal functioning.
2. If a single headset is replaced or if left and right headphones stop pairing, a new pair is required. Turn on Bluetooth, then turn the left and right headphones on as outlined above. Double-click each to enter sibling pairing. After two seconds, the headphones will be automatically and permanently paired.

Q: Why can't our product be switched on?
A: When you first try to boot, if the headsets do not boot properly, it could be due to low power. Please recharge the headset before use.

Q: Why does the headset have no sound when playing back music?
A: Check whether the playback device has successfully connected via Bluetooth to the headset. Reconnect if the audio device is not connected properly. You can also try adjusting the volume of your phone or headset to the appropriate volume level.

Q: Why can't my cellphone find the headsets to pair with?
A: Please make sure your phone Bluetooth is in 'device visible' mode. If they have not been paired for a long time, the Bluetooth pairing function will be automatically switched o . Please restart Bluetooth the 'device visible' mode. If the phone has an application error, restart.

the phone and try connecting again. If the headset program fails, try restarting the headset.

To get a better music experience, it is recommended that you use an operating system above iOS 8.0 or Android 4.3

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may

not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
