FAQs and Solutions

You can check the phone simply before contacting with the post sales server in order for you to avoid the excessive maintenance time and expense waste.

Cannot power the phone on:

● Check whether the Powering-on key is pressed and hold for 2 second or above.

● Check whether the battery is contacted badly or not.Please remove the battery firstly and then try to power the phone on.

● Check whether the battery capacity is used UP or not;please charge the battery.

Upon power-on,there is information displayed:

● Input PIN:select the function of inputting PIN when the phone is powered on .The PIN shall be input.

● Input PUK:after the PIN is input wrongly for successively 3times,the phone will be locked.

● PUK provided by the network operator should be input.

SIM card error

● There is some dirt on the metal surface of the SIM card,please wipe the metal contacts of the SIM card with a clean cloth.

● SIM card is not installed. You should install the SIM card based on the User's Manual.

● SIM card is damaged.Please contact with your network supplier.

Cannot access to network

● The signal is weak , please move to the place where the signal is strong and retry.

● Beyond the coverage of the network of the network sever.

● SIM card is invalid, please contact with your network supplier.

Cannot dial out

● Please confirm whether the dial key send is pressed after the number is dialed.

● Please confirm whether the call is barred due to owned toll.

● Please confirm whether the SIM card is valid or not.

● Please confirm whether the call restriction function is set UP.

● Please confirm whether the fixed dial function is set UP.

Bad call quality

● Check whether the volume is adjusted appropriately.

● Use the phone at the place where the receiving quality is not good, such as near to the building or in the basement where the radio wave cannot reach.

● Use the phone at the peak time,such as at the time of going on/off the duty, the channel is congested.

Contact cannot call you

● Please confirm that the phone is powered on and is unlinked with network.

- Please confirm that the call is barred because of owned toll.

- Please confirm whether the SIM card is valid.

- Please confirm whether the fixed dial function is set UP.

Contact cannot hear you

- Please confirm that the microphone is opened

- Please keep the microphone at the bottom of the phone close to your

  mouth.

Short standby time

- The stand-by time is relevant to the system setup. The phone is possibly at

  the place where the signal state is bad. When the phone cannot receive

  the signal, the phone will transmit to search the base station

  continuously;consuming a great deal of battery capacity and shortening

  the stand-by time of the battery. Please move to the place where the

  signal is strong to use the phone or temporarily power the phone off.

- The battery requires to be displaced with a new battery.

Cannot charge

- Bad contact! Please check that the plug is connected well;

- Wipe the interfaces of the phone and battery with soft and dry clothing.

- Charge at the environment below -20℃or beyond 55℃.Please change the

  charging environment;

    The battery or adapter is damaged and requires to be replaced;

- Please record the phone model and SN, authorized or insurance

information and detailed statement and then contact with the local after sales service if the aforementioned instruction cannot facilitate you to conquer these problems.

SAR VALUE

- Max SAR for Head:0.539W/Kg(1g)

- Max SAR for Body: 0.730W/Kg(1g)

FCC Caution:
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's   authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including   interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to   part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in   a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed   and used in accordance with the instructions, may cause harmful interference to radio communications. However,   there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful   interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information
SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.
Before a new model phone is a available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body)as required by the FCC.
For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that Contains no metal and that positions the handset a minimum of 1.0cm from the body.
Non-compliance with the above restrictions may result in violation of RF exposure guidelines.
