BACK COVER

MULTISYNC EN

The headset can automatically manage the audio interaction between up to two paired devices. For example, if you receive a call on your phone whilst watching a film on your tablet the headset would take care if it. In this instance the film would pause, allowing you to take the call on your phone with the buttons on the headset. Once the call is ended, headset focus would be returned to the tablet to carry on watching your film.
To set up multisync on another device, simply initiate the pairing process with that extra device.

Mad Catz A.P.P. for Mobile Devices
Available on iOS and Android (search respective stores for 'Mad Catz')
When the headset is connected to your device, open the Mad Catz A.P.P. and tap the F.R.E.Q.9 entry to alter settings

- Change EQ
- Enable Binaural Filtering (listen-through feature for ANC)
- Enable Surround Sound
- Enable Microphone
- Check battery level

TROUBLESHOOTING
RESETTING THE HEADSET
- Please ensure the headset is powered on
- Press and hold the mic mute button for 5 seconds to remove all pairing information
- The status LED will shine purple to confirm the reset has been successful

MULTISYNC DE
