Avoid / AG-WM20 Technical Support: support@maono.com www.maono.com	7.2 Mount the microphone to the Transmitter Mount the microphone to the transmitter with the "M" on the transmitter. To ensure a secure connection, use a screwdriver to tighten the ring.  Note After turning on the transmitter, be sure to insert or remove the microphone to prevent damage to the plug using force.	7.3 Line-In The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 	7.4 Connect to monitor headphones 1. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 2. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 3. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 4. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit.  Note After turning on the transmitter, be sure to insert or remove the microphone to prevent damage to the plug using force.	7.5 Camera Cold Shoe Mount Installation 1. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 2. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 3. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 4. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 	7.6 Self Clip Installation 1. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 2. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 3. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 4. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 	8. Transmitter & Receiver Set-up 8.1 Turn on the Device 1. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 2. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 3. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 4. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 	8.3 Transmitter Power Set-up: L/R 1. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 2. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 3. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 4. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit.  Note After turning on the transmitter, be sure to insert or remove the microphone to prevent damage to the plug using force.	8.4 Mute and output volume control 1. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 2. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 3. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 4. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 	8.5 Low cut filter and attenuation function settings 1. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 2. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 3. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit. 4. The transmitter has a 3.5mm audio input interface (L+R), which can accept other audio equipment to input to the transmitter, and use the wireless microphone system to transmit.
