## Markar Architectural Products

Markar has been a leader in innovative products for the hardware industry since 1969. In 1983, Markar was the first manufacturer to produce an architectural grade, adjustable continuous pin and barrel hinge line, and that innovation continues today with quality continuous hinges and edge guards.

Markar leads the industry in development of fire rated continuous hinges with their flagship 300 Series stainless steel, 3500 Series institutional grade, and 200 Series cold rolled steel hinges. Building on customer feedback, Markar has developed over 75 standard continuous hinge models providing products for a wide variety of applications and challenges.

### Custom Designs

Whether the need is for a custom color to match a specific pallet, hospital tips for patient rooms, hardware cutouts, wide throw models, custom hole patterns, security fasteners, current transfers, monitoring switches, or medical bearings, Markar offers hinge modifications that will enhance the fit and function of an opening (See pages 9-13). Markar hinges are available in a wide range of finishes including powder coat, anodized (for aluminum), and architectural finishes.

### Medical Bearings are Standard

**NEW!**

Markar now provides Medical Bearings as our standard bearing for all Pin and Barrel hinges. You benefit from this new standard offering with permanently lubricated hinges with no metal to metal contact, improving the life and overall function of the hinge.

**Most door and frame stress is put on the top of conventional hinge systems.**

**A continuous hinge spreads the stress along the full length of the door and frame.**

## Why Continuous Hinges?

Most commonly, hinge failure begins when doors are opened past stop device limits. The resulting kickback shock to the hinges can surpass 1000 lbs. of force. Subsequent racking eventually loosens screws, distorts hinge leaves, pulls open knuckles, damages bearings or creates other serious damage to your standard butt hinge as well as the door frame.

Continuous hinges reduce the factors leading to hinge failure by distributing shock forces evenly so wear and tear to the frame and door is reduced significantly. In addition, continuous hinges:

- Increase security and reduce vandalism by preventing insertion of devices between the door and frame
- Ease installation by providing simple alignment of electrical transfers and of monitoring switches
- Reduces air infiltration by creating a complete seal from top to bottom of the door at the hinge jamb

Markar manufactures pin and barrel hinges as well as spring loaded toilet partition pin and barrel models. There are over 75 different models to choose from offering a variety of configurations, options, and materials.

### LEED Certification Contribution

Markar can help to achieve prerequisites and accumulate points in several categories and credit areas for LEED. For further information, please call 1-800-824-3018 or refer to our website to view our prepared LEED statement.

## Optional Features

### The Unique Adjust-A-Screw™ Fastener

An optional Markar fastener available on Hinge Guard models permits up to 3/8" width adjustment. Full door length adjustment means doors can be squared accurately and easily in new installations and existing frames can be used in retrofits. Maintenance staff can make future adjustments of the door by re-positioning the Adjust-A-Screw™ Fasteners.

### Adjust-A-Screw™ Assembly

One full turn of the Adjust-A-Screw™ adjusts the width of the door and hinge assembly 1/16".

## Windstorm Rated Hinges

Windstorm/hurricane testing on Markar continuous hinges was completed with UL, and was subsequently reviewed, passed and approved by the Florida Building Code (FBC) Commission in January of 2008. There were three categories of testing conducted on the hinges: an Impact Test (TAS 201), Static Load/Cyclical Test (TAS 202), and a Water and Leakage Test (TAS 203). Markar excelled in all three categories of testing.

Tornado

Hurricane

Based on this performance, the FBC approved all Markar hinges in the following series:

(Up to openings of 4'0" x 8'0" singles and 8'0" x 8'0" pairs)

- 100 – Aluminum
- 200 – Cold Rolled Carbon Steel
- 300 – Stainless Steel
- 3500 – Stainless Steel (Security Grade)
- 1100 – Aluminum

## Fire Rated Continuous Hinges

Markar stainless steel hinges (300 Series and 3500 Series) and carbon steel hinges (200 Series) are available with two labeling options: Underwriters Laboratories Inc. or Warnock Hersey Int'l.

- 20 minute labeled wood doors
- One and a half hour labeled hollow metal and composite-core wood fire doors
- Three hour labeled hollow metal doors mounted singly.

### Maximum Door Opening:

Single Doors: 4'0" x 10'0"

Pair of Doors: 8'0" x 10'0"

In accordance with UL10C for positive pressure.

## Exclusive Fiber-Reinforced Polymer Bearings

- Uniquely designed to provide clean and quiet hinge operation
- Self Lubricating with high resistance to wear
- Exceeds ANSI/BHMA Grade 1 requirements
- Supports doors weighing up to 600 lbs
- 25 year warranty

## Markar General Warranty

### Limited Warranty

Markar Architectural Products guarantees its products to be free from defects in materials and workmanship for a period as stated for each product line. Our liability, expressed or implied, shall be limited to replacement of goods proven defective. No claims will be allowed for damages incurred or work done thereon.

The limited warranty specifically excludes damage arising from abuse, misuse, modification, incorrect installation or adjustment, deterioration of finish due to improper handling or improper placement or protection of product prior to or after installation in excess of normal weathering or usage, and all other circumstances beyond the control of Markar Architectural Products.

This limited warranty is in lieu of all other warranties expressed or implied, and excludes any warranty of fitness or merchantability. No agent, representative dealer or employee of Markar Architectural Products has the authority to increase or alter the terms and conditions of this limited warranty.

### CONTINUOUS HINGE AND PIVOT LIMITED WARRANTY

Markar Architectural Products guarantees its products to be free from defects in materials and workmanship for a period of 10 years. Hinges with medical bearings are guaranteed for 25 years.

### EDGE GUARD AND ASTRAGAL LIMITED WARRANTY

Markar Architectural Products guarantees its products to be free from defects in materials and workmanship for a period of 1 year.

A freight allowance of \$13/cwt will apply on shipments to Canada, Alaska, or Puerto Rico for NET orders of \$1100.00 or more. All shipments that exceed 108" in packaged length must be shipped LTL. Add 4" to the length of the product for finish package length. Minimum freight on these orders is \$120.00.
<b>Crating Charges/ Special Packaging</b>	\$50.00 NET. This will be added to any order not meeting prepaid freight where the product is over 10 feet in length.
<b>Minimum Order Level</b>	A surcharge of \$7.50 NET will be added to NET orders less than \$50.00.
<b>Claims for Shortage or Damage in Transit</b>	All claims must be made within ten (10) days of receipt of goods. Consignee assumes the risk of loss or damage in transit.
<b>Detail</b>	No order is entered into production until all details including both standard and custom hinges have been received and approved.
<b>Policy on Changes</b>	After shop drawings have been approved and production begins, there will be a charge for any changes to the hinge(s) of a minimum \$60.00 up to the entire cost of the hinge(s).
<b>Proposed Ship Date</b>	These dates are subject to change. Failure to provide all pertinent information within 48 hours of submitting purchase order will cause a delay in processing the order.

## Standard Powder Coat Finishes

### Tough, Durable, Long-Lasting

Designed for general purpose interior and exterior use and applications where maximum chemical and solvent resistance is required.

### Performance Properties

The data below is based on 24 gauge Bonderite 1000 panels with 1.5 mil to 2.0 mil of high gloss formulation.

**Adhesion (ASTM D-3359B):** There is no lifting of 1/8" squares of coating between scribed lines in crosshatch adhesion testing using pressure sensitive adhesive backed tape.

**Pencil Hardness (ASTM D-3363):** 2H – 4H

**Flexibility (ASTM D-522 modified):** The coating withstands a 180° bend over a 1/4" diameter mandrel without cracking or loss of adhesion.

**Impact Resistance (ASTM D 2794 modified):** The coating withstands 160 inch-pound impacts, both direct and reverse, without cracking or loss of adhesion using the standard Gardner impact tester.

**Abrasion Resistance (ASTM D-4060 modified):** The weight loss of coating after 1,000 cycles on a Taber abraser equipped with CS-10 wheels and operating under a 1 kilogram loading per wheel is on the order of 35 to 50 milligrams.

**Salt Spray Resistance (ASTM B-117):** Bonderite 1000 steel panels, in a scribed condition, exhibit no undercutting after 1,000 hours in 5% salt spray testing at 95°F and 95% relative humidity. There was no rusting or blistering on the panel face away from the scribe.

**Humidity Resistance (ASTM D-2247):** Bonderite 1000 steel panels in an unscribed condition exhibit no effect after 1000 hours exposure to 100% relative humidity at 100°F.

**Chemical and Solvent Resistance:** After 60 days immersion in the test fluid, the following data was obtained for epoxy powder coatings:

15% Hydraulic Acid	No Effect
Lacquer Thinner	No Effect
Dilute "HTH" Pool Chemical	No Effect
15% Sulfuric Acid	Pinhole Rust
15% Caustic Soda	#8 Blisters
Ammonia Hydroxide	#8 Blisters
Petrochloroethylene	No Effect
15% Acetic Acid	#4 Blisters
Gasoline	No Effect

Verification of resistance properties should be made for each chemical or solvent proposed for use with the coating.

## Hinge Numbering System

### Hinge Prefixes

EG	Edge Guard
FM	Edge Mount
FS	Full Surface
HG	Hinge/Guard
HM	Half Mortise
HS	Half Surface
SC	Swing Clear

### Hinge Series

This series number indicates the type of hinge and base material used:

100	Aluminum barrel hinges with stainless pin
200	Carbon steel barrel hinges with stainless pin
300	Stainless steel barrel hinges with stainless pin
400	Spring loaded aluminum toilet partition hinges
500	Stainless steel toilet partition hinges
800	Aluminum toilet partition hinges
900	Spring loaded stainless steel toilet partition hinges
1100	Aluminum barrel hinges with stainless steel pin
1900	Reinforcing pivots
3500	12 Gauge stainless steel pin and barrel security hinges

### Hinge Models

The last two digits of the model number indicate the application:

00	Edge mount (formerly full mortise)
01	Full surface, 1/8" offset
02	Full surface, flush
03	Half surface, 1/8" offset
04	Half mortise, 1/8" offset
05	Edge mount hinge/guard
06	Half mortise hinge/guard
07	Double hinge/guard
08	Edge guard
09	Full surface, swing clear
10	Swing clear hinge/guard
11	Edge mount, self aligning
15	Edge mount, self aligning flush edge guard
21	Full surface inset, 3/4" offset
22	Edge mount hinge/guard, deep
23	Edge mount hinge/guard, deep, thru bolt
25	Edge mount swing clear
26	Edge mount hinge/guard, swing clear
27	Edge mount, safety hinge
29	Edge mount, self aligning

Other numbers are used for specific applications

### Optional Suffixes

AMS	Adjustable Monitoring Switch
CTP	Current Transfer Preparation
DDP	Dutch Door Prep
EL	ElectroLynx™ Wires (Specify 4, 8, or 12)
ETAP	Electrical Transfer Access Prep
EPT	Electric Power Transfer
HT	Hospital Tip
LL	Lead Lined
PC	Powder Coated
RB	Raised Barrel
WT	Wide Throw

## Hinge Standard Lengths

### Standard Hinge Length Conversion Chart

A 6'8"	door opening	=	an actual length of	79.25"
A 7'0"	door opening	=	an actual length of	83.125"
A 7'2"	door opening	=	an actual length of	85.00"
A 8'0"	door opening	=	an actual length of	95.00"
A 10'0"	door opening	=	an actual length of	118.75"

Custom hinge length will be evaluated at the time of request to ensure proper pin to knuckle alignment. Some custom length requests may be adjusted to ensure a proper hinge assembly.

Specify handing on all custom hinge lengths.

## Continuous Hinge Modifications

### Special Length

Please specify handing on all custom hinge lengths

Some custom lengths may require two cuts due to location of screw holes

### Hospital Tip

Available on all models except spring-loaded toilet partition hinges, FS321 and FM327

Suffix hinge “-HT”

Helps provide a safe, clean environment

### Dutch Door Prep

Available on all hinge models

Suffix hinge “-DDP”

Continuous frame leaf with two-piece door leaf

Indicate handing, clearances, door and frame heights, and materials when ordering

### Wide Throw

Only available on 300 series hinges

Suffix hinge “-WT”

Specify distance from pin centerline to heel edge of hinge when ordering

Reinforcement may be required on extreme wide throw applications

These conditions will be determined through a drawing approval process

### Blank

Holes omitted for special applications, such as welded installation

Not available on adjustable models

### Welded End Pins

End pins are tack-welded and are non-removeable

Not available on aluminum or powder coated hinges

### Plug Weld

Plug welding hole prep

## Continuous Hinge Modifications (Cont.)

### Automatic Door Bottom Cut

Standard is "U" shape cut

For custom cuts, specify net door height and specific drop seal

Some custom lengths may require two cuts due to location of screw holes

### Raised Barrel (Swaged)

Available on all edge mount and half surface models except on aluminum hinges

Required on models FS201, FS202, FS301 & FS302 in order to open 180°

Suffix hinge "-RB"

For cased open or center pivot doors

### Standard Edge Guard Cut-Outs

4 $\frac{7}{8}$ " ASA strike

161 latch

86 mortise

Manual flush bolt

Automatic flush bolt 161 strike

### Security Studs

Stainless steel security studs mounted to the frame leaf

Door leaf is drilled to accommodate studs

Three studs installed on hinges up to 7'2"

Four studs installed on hinges over 7'2"

Door and frame must be specially prepared to accommodate security studs

### Sheared Leaf

Used for narrow door thicknesses, unevenly rabbeted frames, or other special applications

Specify distance from pin centerline to heel edge of hinge when ordering

### Custom Hole Pattern

Any hole shape or pattern other than Markar's standard templated hole pattern

Indicate desired pattern and include dimensioned diagrams when ordering

### Custom Design

Markar's Engineering Department will assist you in developing custom applications to solve any of your unique door hinging problems.

## Continuous Hinge Modifications (Cont.)

### Lead Lined Cover

Only available on surface mounted hinges.

Suffix hinge "-LL"

Used for x-ray room doors and other locations where radiation leakage could be a problem

Lead lined astragal for EGT

### EL ElectroLynx™ Current Transfer

EL4 For 300, 3500, 200, and 100 series edge mount only. 2 wires at 22 gauge and 2 wires at 26 gauge - with ElectroLynx™ connectors (4 wire).

EL8 For 300, 3500, 200, and 100 series edge mount only. 2 wires at 22 gauge and 6 wires at 26 gauge - with ElectroLynx™ connectors (8 wire).

EL12 For 300, 3500, 200, and 100 series edge mount only. 2 wires at 22 gauge and 10 wires at 26 gauge - with ElectroLynx™ connectors (12 wire).

Note: Not available on raised barrel applications.

*Hardwiring Made Easy™*

### ETAP Electrical Transfer Access Prep

Cutout prep for the AMS, CTP, and EL modifications. This allows for easy, one-person access to wiring between the hinge and door

### Security Fasteners

Specify Torx or Torx-Pin security fasteners in lieu of standard fasteners

Contact factory for compatible models

### Medical Bearings

Self lubricating with high resistance to wear

Uniquely designed to provide clean and quiet hinge operation

Exceeds ANSI/BHMA Grade 1 requirements

Supports doors weighing up to 600 lbs.

25 year warranty

## Continuous Hinge Modifications (Cont.)

### CTP Current Transfer Prep

Centerline of hinge is standard location

Hinge leaf cutout to accommodate Markar's EPT Electric Power Transfer or Von Duprin Power Transfer

Please provide location and handing for all locations, see CTP Form on Page H10

### EPT Electric Power Transfer Units

EL-EPT	Stamped steel
EL-EPTL	Stamped steel, long
EL-EPT-SC	Stamped steel, for swing clear models
EL-CEPTx32D	Cast stainless steel, satin
EL-CEPTx10B	Cast stainless steel, oil rubbed bronze

12-Wire with ElectroLynx™ connectors

CTP prep charge is additional

### AMS Adjustable Monitoring Switch

Rigid welded assembly gives you the ability to adjust your monitoring switch to work with all applications 200, 300 and 3500 Series

Rating: 30v AC/DC .25 amps MAX

## 3500 Series Pin & Barrel Type Continuous Stainless Steel Hinges

### Short Form Architectural Specification:

Continuous hinges shall be full height piano-type hinge providing full height door support.

- Supports weights up to 900 lbs. 4'0" maximum door width
- Material to be 12 gauge (.105) stainless steel
- .187" diameter stainless steel pin (rod)
- Each knuckle 2", including nylon bearing at each separation for a quiet, smooth, self-lubricating operation
- Finish: US32D Satin Stainless Steel (630)  
Optional Finish: US32 Bright Stainless Steel (629), Scratch-Resistant Powder Coated Paint.
- All hinges shall be furnished with manufacturer's recommended hardware pack per specific model application
- Must be able to carry UL label for fire rated doors and frames up to 3 hours
- Hinges shall meet ANSI/BHMA Standard A 156.26 Grade 1
- Symmetrically templated hole pattern

**Note:** 10-Year Warranty on all Continuous Pin & Barrel Hinges  
25-Year Warranty with Medical Bearings

**Note:** Fire label for doors and frames should be placed on the header and top rail of fire rated doors and frames

This edge-mounted pin & barrel hinge is used on many of today's high traffic, high abuse doors. The hinge works well in locations that would normally call out for anchor hinges, pivot reinforcement hinges or thrust pivot unit and hinge sets. This hinge saves on special door and frame preparation charges and makes the installer's job easier. It can be used on both fire labeled and non-labeled openings.

EL4 (4 wire), EL8 (8 wire), EL12 (12 wire)

This door-edge mounted aluminum pin & barrel type hinge is extruded using 30% more aluminum than most geared hinges, giving it exceptional strength and durability. This product is specified in lieu of pivots or butt hinges due to its unique design which distributes the weight of the door down the entire length of the hinge.

## Door Edge Guards And Astragals – For Wood And Plastic-Face Composite Doors

### General Specifications

#### Material:

Edge guards are fabricated from 16 ga. (.063) galvanized steel and attached astragals are fabricated from 10 ga. (.138) galvanized steel.

Flat astragals (set no. 96TB) are fabricated from 1/8" HRPO edge bar stock

#### Finish:

Standard finish for edge guards and astragals are galvanized steel unless otherwise specified.

#### Mounting:

All edge guards and astragals are mounted with #10 x 1 1/4" sheet metal screws. Holes are located 3" from each end, 3" from each cut out and the remaining holes not to exceed more than 12" on center.

#### Sizes:

Standard edge guards and astragals are for 1 3/4" bevel (1/8" on 2") or 1 3/4" square edge 90-degree doors. Standard lengths are for 6'-8", 7'-0" and 8'-0" nominal size doors. Other lengths are available.

#### Hardware Locations:

Determine hand of active and inactive door. Locate hardware cutouts from top of edge guard to top of each cutout or from top of edge guard to center line of each cutout. Specify one or both dimensions when ordering.

Edge guard and astragal sets are UL Listed for use on wood or plastic covered wood composite type fire doors rated up to 1 1/2 hrs. Also hollow metal, steel covered, composite type fire doors rated up to and including 3 hrs.
