

## USER MANUAL (FCC STATEMENT)

FCCID: 2AAW8-MI9450

This is a copy of the page where the FCC statement is included:

### Safety

These symbols indicate that the electrical and electronic device, and the batteries and rechargeable batteries therein, must not be disposed of at the end of its life as ordinary municipal solid waste. By ensuring that these items are disposed of appropriately, you play an active role in avoiding the harmful consequences that incorrect disposal could have on the environment and human health. The recycling of materials contributes to the preservation of natural resources.

By entrusting your end-of-life electrical devices to a duly authorized disposal company, you ensure that all the items therein will be handled correctly.

In all other cases and in order to safely remove batteries, rechargeable batteries and other materials, see the user manual or contact your Markem-Imaje representative.

#### ■ Waste consumables

The Consumable waste must be managed in compliance with local regulations related to waste management and dangerous goods transport.

Transport, transit, treatment of consumable waste must be operated by entity owning appropriate waste management licences.

Consumable waste must be treated in compliance with local regulations either by recycling solution (e.g distillation), incineration with energy recovery, incineration or specific land filling.

#### ■ FCC Rules

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio

## Safety

communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

For Canada :

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada.

To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: this device may not cause interference and this device must accept any interference, including interference that may cause undesired operation of the device.

### ■ Printer integration

If this equipment is integrated in a machine, please read the instruction manual for the machine before working on the printer.

If the printer is incorporated in a machine or assembled with other machines in a way that forms machinery covered by the Directive 2006/95/CE:

- It may not operate independently
- It must not be commissioned until the end machine in which it is incorporated has been declared to comply with the relevant provisions of the Machinery Directive and other European directives applicable to the end machine.
