

REMOTE (WIRELESS) INSTALL KIT Manual

I. The working voltage is 12V-24V, and the maximum power is 160W.

II. Remote control button battery CR2032X1

III. Button function description

1. ON button - There are three modes to choose: Press the first time A (position light) light on, press the second time B (main light) light on, press the third time the A light and B light are on at the same time.

2.  Button - Flashing mode, there are 6 flashing modes (click to switch one mode), no matter which mode the ON button is in, you can press the button to select the flashing mode. In any flashing mode, the A light and the B light are always on once press the ON button.

3. OFF button - turn off the light

IV . Remote control and host code matching method

Press and hold the ON button of the remote control, power on the controller, the light flashes four times and then stays on, indicating that the code matching is successful.

When the light flashes four times and then stays on, press the ON button of the second remote control and the light flashes four times to indicate that the second remote control is successfully matched. By analogy, up to 10 remote controllers can be equipped, and 10 remote controllers can be covered in a loop. After the code matching is successful, wait for 10 seconds to automatically end the code matching, or you can press other buttons on the remote control to quickly end the code matching.

V . The remote control host has a mode memory function, no matter which mode the ON key is and  key is in, when the OFF key is pressed or the mouse style switch is turned off and turn on again, it will automatically enter the mode before it was turned off.

VI . When the mouse style switch is on and off (the indicator light is red), the remote control cannot control the lights, and the remote control can only control the lights when the mouse style switch is on.

VII . The battery should be replaced when the indicator light on the remote control dims when pressing the remote control (or when the remote control is too close).

§ 15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.21 Information to user.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
