IV. QUICK TIPS

- 1 When your vehicle starts to lose power, it may lose functions or performance. It's time for fresh batteries. Your vehicle's running time may change depending on your driving style.
- 2 Radio interference can effect your vehicle's performance. Interference can be caused by other R/C vehicles running on the same frequency, electrical wires, large buildings or CB radios. Try to stay away from these!
- 3 Point your transmitter up - not down toward your vehicle. If your vehicle gets too far away, it won't work properly.
- 4 Don't drive your vehicle in sand or through water or snow. If your vehicle does get wet, wipe with a towel and allow to dry completely overnight.
- 5 Don't store your vehicle near heat or in direct sunlight. Always turn switches OFF and remove all batteries for storage.
