IV. QUICK TIPS

- ∂ When your vehicle starts to lose power, it may lose functions or performance. It's time for fresh batteries. Your vehicle's running time may change depending on your driving style.
- Σ Radio interference can make your vehicle run badly. Interference can be caused by other R/C vehi-

cles running on the same frequency; electrical wires; large buildings; or CB radios. Try to stay away from these!

- Π Point your transmitter antenna up - not down toward your vehicle. If your vehicle gets too far away, it won't work properly.

- π Don't drive your vehicle in sand or through water or snow. If your vehicle does

get wet, wipe with a towel and allow to dry completely.

- ∫ Don't store your vehicle near heat or in direct sunlight. Always turn switch OFF and remove all batteries for storage.
