If you have questions or problems with your vehicle, **DON'T RETURN IT TO THE STORE...** get help from the EXPERTS! Just click or call.

Keep these instructions for future reference: they contain important information.

GET STARTED!

Your vehicle has an amazing Gyro Stabilizer that makes it easy to drive – and lets it perform amazing stunts! The stabilizer safely spins at high speed inside the rear wheel, and it works like a gyroscope to help keep your vehicle upright.

1. GET SET!

Energize the gyro stabilizer! Hold the vehicle off the ground and push the left control control up. Once the stabilizer spins up to full speed, you'll be able to hear it – and if you twist the vehicle from side to side you'll really feel it working!

Be sure to hold the vehicle by the rider figure, keeping your fingers clear of the wheels.

2. LAUNCH IT!

Now gently hand-launch your vehicle. Set it on the ground and give it a gentle push while pushing the left control up. Now you're ready for the coolest stunts!
