Overview

This manual covers basic configuration and installation of the Media Vision Assistive Listen System which consists of the MV-ALS-STFM (Stationary Base Transmitter), MV-ALS-PRFM (Portable Receiver), MV-ALS-AT01 (Helical Antenna), and MV-ALS-AT02 (Remote Dipole Antenna). Together these devices are classified by the FCC as a professional install device. To be in compliance with FCC guidelines, the radios must be installed with one of the approved antennas listed in this document. The MV-ALS-STFM is currently FCC certified for use with three external antennas.

<u>Antenna Part #</u>	<u>Description</u>	<u>Power Handling</u>
<u>Capability</u>		
MV-ALS-AT01	8.89" Helical Antenna	20 mW, Nominal
MV-ALS-AT02	7.09" Remote Dipole Antenna	20 mW, Nominal

The MV-ALS-STFM Base Unit works in conjunction with the MV-ALS-PRFM. Please see the Media Vision Assistive Listening User Manual for general information on overall system implementation and software configuration.

Federal Communication Commission Interference Statement

This device complies with Part 15 of FCC Rules and Regulations. Operation is subject to the following two conditions: (1) This device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio-frequency energy and, if not installed and used in accordance with these instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in any particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to correct the interference by one of more of the following measures:

- 1) Reorient the antenna;
- 2) Increase the separation between the affected equipment and the unit;
- 3) Connect the affected equipment to a power outlet on a different circuit from that which the receiver is connected to;
- 4) Consult the dealer and/or experienced Assistive Listening Technician.

FCC ID: 2AHER-MVALSSTFM

Warranty Information

The Media Vision Assistive Listening Core products carry a Lifetime Warranty against manufactory defects. Please visit www.media-vision.com for more information.

Installation only by Professional Installers:

The Media Vision Stationary Base Transmitter requires professional installation. A professional installer is required to install the MV-ALS-STFM. You must follow Part 15 of the FCC rules, and specifically Part 15.203 pertaining to antenna requirements of an intentional radiator.

The antenna installation may only be modified by a Mediavision authorized person, who must be aware of the FCC regulations for such devices

1Introduction

The Media Vision Assistive Listening system is a powerful stationary transmitter that delivers a high quality personalized audio signal that allows everyone to understand.

2System Highlights

- Operates on the FCC protected 72-76 Mhz FM bandwidth
- 57 programmable channels with settings lock
- Simultaneous operation of up to 6 channels Easy Integration:
- Balanced and unbalanced Inputs, Dante Interface

3Product Package

The following items are included in the MV-ALS-STFM package:

- Stationary Base Transmitter (MV-ALS-STFM)
- Rack Kit (MV-ALS-RK01)
- Power Adapter Cord
- Programming Cable

4. General Information

4.1 Contents

The MV-ALS-STFM Stationary Base Transmitter comes with the Stationary Base Transmitter, Rack Kit, Power Adapter Cord, and programming Cable. Required to make the MV-ALS-STFM function properly are one of the two FCC approved Antenna:

- A. MV-ALS-AT01 (Helical Antenna).
- B. MV-ALS-AT02 (Remote Dipole Antenna)

4.2 Connections

See Media Vision Assistive Listening User Manual for detailed diagram for connecting the system to a verified outlet.

MV-ALS-STFM

Input 1	XLR - TRS Combo Jack - Line, Mic, Mic+PH
Input 2	Stereo RCA
Audio Out	Stereo RCA. Mix of Aux and Mic Signal
Headphone Out	1/8" TRS Connector
Programming	Channel Enable / Disable & Custom Labels Via Software
RF Power	Lo, Mid, Hi
Antenna Connector	BNC
Power Supply	DC adaptor 12 ~ 15V, 1A
Operating temperature range	-10 °C - 60°C

NOTE: DO NOT APPLY DC POWER TO THE MV-ALS-STFM UNTIL THE ANTENNA IS ATTACHED OTHERWISE DAMAGE TO THE RADIO MAY OCCUR.

5. Setting the Maximum RF Power

When installing MV-ALS-STFM we offer two FCC certified antennas options.

Only the antennas listed below are allowed to be used with the MV-ALS-STFM.

Antenna Model setting	Antenna Gain	Radio Max power
MV-ALS-AT01	???	???
MV-ALS-AT02	???	???

NOTE: IT IS THE RESPONSIBILITY OF THE INSTALLER TO ENSURE THAT THE FCC REQUIREMENTS DESCRIBED ABOVE ARE MET.

7. Installing single MV-ALS-STFM - Rack Kit

Rack Kit (Pictured below)

Includes (In Order):

1. (2) – Rack ears
2. (1) – Linking bars
3. (2) – Rack ear screws
4. (8) – Linking bar screws
5. (8) – Long rack ear

Note: For installation of (2) MV-ALS-STFM into Rack System please skip to section 8.

Step 1.

The feet on the MV-ALS-STFM are secured and locked in by a pressure fit plug. Utilizing a flathead screwdriver or comparable tool, remove the (4) feet from the MV-ALS-STFM by inserting it into the foot and gently lift the plug until you are able to remove it.

Once you have removed the plug, grab the foot and gently pull it out of the MV-ALS-STFM.

(Removing Foot from MV-ALS-STFM)

(Screw Removed from the MV-ALS-STFM Foot.)

(MV-ALS-STFM with feet removed.)

Step 2: Rack Ears

A. Attach the short rack ear to the left or right side of the MV-ALS-STFM with the four rack ear screws.

B. Attach the long rack ear to the right or left side of the MV-ALS-STFM with four rack ear screws.

(Rack Kit Installed on the MV-ALS-STFM)

Step 3.

A. Select the position within the Rack System for your MV-ALS-STFM.

B. Place the MV-ALS-STFM in the Rack System and utilize rack screws (not included) to secure both ends.

(Short rack ear screwed into rack system.)

(Long rack ear screwed into rack system.)

(MV-ALS-STFM with Rack Kit installed in Rack System)

8. Installation of two MV-ALS-STFM - Rack Kit

Step 1. The feet on the MV-ALS-STFM are secured and locked in by a pressure fit plug. Utilizing a flathead screwdriver or comparable tool, remove the (8) feet from the (2) MV-ALS-STFM by inserting it into the foot and gently lift the pressure fit plug until you are able to remove it.

Once you have removed the pressure fit plug, grab the foot and gently pull it out of the (2) MV-ALS-STFM.

(Removing Foot from MV-ALS-STFM)

(Pressure fit plug removed from the MV-ALS-STFM foot.)

(MV-ALS-STFM with feet removed.)

Step 2: Linking bars

A. Place the MV-ALS-STFM side by side. The indent on the top of the MV-ALS-STFM should meet to form a complete linking bar indent.

B. Line the linking bar up with the indent between the two MV-ALS-STFM. Then screw in the linking bar screws.

C. Flip the two MV-ALS-STFM upside down and align the linking bar with the 4 screw holes in the middle.

D. Screw 4 linking bar screws into the linking bar.

E. Flip the two MV-ALS-STFM over gently and attach the short rack ear to the left side of the MV-ALS-STFM with four linking bar screws.

F. Attach the short rack ear to the right side of the MV-ALS-STFM with four rack ear screws.

(Rack Kit Installed on two MV-ALS-STFM)

F. Place the two MV-ALS-STFM into the Rack System and utilize rack ear screws to secure both ends

9. Helical Antenna Installation

Included:

(1) Helical Antenna

Step 1. Align the Helical Antenna with the BNC Antenna connector.

Step 2. Connect the Antenna and the BNC antenna connector. Secure and lock it into place.

9. Remote Dipole Antenna Installation

Includes:

- (1) Bracket with Mounted Antenna
- (1) 25" Coaxial Cable
- (6) Stoppers
- (6) Screws.

Step 1. Choose the location where you'd like to install the Antenna Bracket.

When selecting the location of your Antenna avoid any metal obstructions or steel beams between the Antenna and the receiver.

Once you have chosen the position where you'd like to mount the antenna. Utilizing #2 pencil, mark the position.

Step 2: Utilizing a screw driver, screw in the two bracket screws into the spots that were marked. Do not screw them in all the way.

Step 3. Position the two openings on each end of the bracket onto the screws and slide the bracket down until it can move no further.

Step 4. Using the cable clips, secure the coaxial cable onto a flat surface. Make sure that cable clips are at least 4 inches apart.

Step 5. Attach the coaxial cable to the BNC antenna connector on the back of the transmitter. Secure and lock it into place.

8. Installation - Technical Information

8a. MV-ALS-STFM

Channels	57 (6 Simultaneous)
Transmission Range	Up to 1,500 ft.
SNR	80 dB
Frequency Response	70Hz-12Khz
Distortion	<2%
Display	OLED
Input 1	XLR - TRS Combo Jack - Line, Mic, Mic+PH
Input 2	Stereo RCA
Audio Out	Stereo RCA. Mix of Aux and Mic Signal
Headphone Out	1/8" TRS Connector
Programming	Channel Enable / Disable & Custom Lables Via Software

RF Power	Lo, Mid, Hi
Antenna Connector	BNC
Power Supply	DC adaptor 12 ~ 15V, 1A
Operating temperature range	-10 °C - 60°C
Size	8.46" X 8.26" X 1.96"
Weight	3.7 lbs.
Warranty	Lifetime
Approvals / Certifications	FCC, RoHS

8b. MV-ALS-AT01

Dimensions	8.89" Height; 1.14" Distance from MV-ALS-STFM
Weight	2 oz.
Frequency Range	72-76 MHz
Nominal Impedance	50 Ω
VSWR	2:1 or Better
Power Handling Capability	20 mW, Nominal
Warranty	90 Days

8b. MV-ALS-AT02

Dimensions	(41 mm) High, Collapsed; (970 mm) Extended; (180 mm)
Distance from Wall	
Weight	245g
Frequency Range	72-76 MHz

Nominal Impedance	50 Ω
VSWR	3:1 or Better
Power Handling Capability	20mW, Nominal
Warranty	90 Days
