

**Nokia Bluetooth
Mono Headset
BH-310**

555555/1

ENGLISH

Introduction

About your headset

With the Nokia Bluetooth Mono Headset BH-310, you can handle calls hands-free, even when using two phones at the same time.

The surface of this product is nickel-free.

Read this user guide carefully before using the product. Also, read the user guide for the device that you connect to the product.

For more info, go to www.nokia.com/support.

About Bluetooth connectivity

You can use Bluetooth to make a wireless connection to other compatible devices, such as mobile phones.

Devices do not need to be in direct line-of-sight, but they must be within 10 metres (33 feet) of each other. The connection may be affected by obstructions such as walls or other electronic devices.

This device is compliant with Bluetooth Specification 3.0 + EDR supporting the following profiles: headset profile (1.1), handsfree profile (1.5). Check with the manufacturers of other devices to determine their compatibility with this device.

ENGLISH

Get started

Keys and parts

- 1 Charger connector
- 2 Multifunction key 
- 3 NFC area
- 4 Earloop
- 5 Earpiece
- 6 Carrying clip
- 7 Microphone
- 8 Car holder
- 9 Charger connector
- 10 Indicator light

Charge the battery

Warning: Use only chargers approved by Nokia for use with this particular model. The use of any other types may invalidate any approval or warranty, and may be dangerous. Use of unapproved chargers may present a risk of fire, explosion, or other hazard.

1. Plug the charger into a wall outlet.
2. Plug the charger to the charger connector on the headset or on the car holder. The red indicator light turns green when the battery is fully charged.
3. Unplug the charger from the headset or car holder, then from the wall outlet.

ENGLISH

When you unplug a charger, hold and pull the plug, not the cord.

The fully charged battery has power for up to 5 hours of talk time and up to 114 hours of standby time. If you keep the headset in the clip, the standby time is up to 90 days.

When the battery charge is low, the red indicator light flashes, and you hear a voice prompt every 5 minutes. If you've switched voice prompts off, the headset beeps every 5 minutes.

Check the battery charge — When the headset is switched on and you're not in a call, press . A green light means there is enough power. If the light is yellow, you may need to recharge the battery soon. If the light is red, recharge the battery.

Switch the headset on or off

Switch on — Remove the headset from the clip or from the car holder. The headset beeps, and a green indicator light flashes once.

If you've never paired the headset with a phone, or you've cleared the pairings, pairing mode is switched on. Pair and connect the headset with your phone within 3 minutes.

If you've paired the headset before, it connects to the last phone it was used with. If the headset can't find that phone, it tries the next phone on its list of paired devices. If

ENGLISH

not connected to a phone within 30 minutes, the headset switches off.

Switch off — Put the headset in the clip. The headset beeps, and a red indicator light flashes once. All calls are ended.

Tip: Don't have the clip with you? To switch the headset off, press and hold  for 5 seconds. To switch the headset on, press .

Wear the headset

Slide the earloop behind your ear, then gently push the earpiece against your ear. Point the headset towards your mouth.

Change the earpad

1. The headset comes with different-sized earpads. Select the earpad that fits the best, and is the most comfortable for your ear.
2. To change the earpad, pull the current earpad from the earpiece, and push the new earpad into place.

The headset is set up to be used on your right ear.

Use the headset on your left ear — Remove and attach the earloop so that it is to the left of .

When you're not using your headset, keep it in the clip, or car holder.

ENGLISH

Tip: Have your headset always at hand – clip it to your pocket as you would a pen.

Use the car holder

1. Make sure the surface of the car dashboard is dry and clean.
2. Remove the protective film from the bottom of the car holder.
3. Firmly press the car holder into place.

Tip: You can also charge your headset through the car holder. Use a compatible charger that uses the car cigarette lighter socket, and connect it to the holder.

Pair the device

Pair and connect the headset to your phone

Before using the headset, you must pair and connect it to a compatible phone.

You can pair your headset with 8 phones, but you can only connect it to a maximum of 2 phones at the same time.

With some phones, you may need to make the connection separately after pairing.

When the headset is connected to a phone, the Bluetooth indicator light flashes slowly.

ENGLISH

Pair and connect the headset using NFC

If the compatible phone supports NFC, switch its NFC feature on, then switch the headset on, and touch the NFC area of the headset with the NFC area of your phone. The headset connects to the phone automatically.

You can also disconnect the headset using NFC. For details on NFC, see the user guide of the phone.

If the phone does not support NFC, pair the headset manually.

Pair the headset manually

1. Make sure your headset is switched off and your compatible phone is on.
2. If you've never paired the headset with a device, or you've cleared the pairings, switch the headset on.

If you've previously paired your headset with another device, press and hold  for 5 seconds.

Pairing mode is switched on, and a blue indicator light starts to flash quickly.

3. Within 3 minutes, switch Bluetooth on in your phone, then set it to search for Bluetooth devices. For details, see the user guide of the phone.
4. On your phone, select the headset from the list of found devices.

ENGLISH

5. If asked, type in the passcode **0000**.

In some devices, you may need to make the connection separately after pairing.

Pair and connect the headset to two devices

1. Make sure Bluetooth is switched on in both phones.
2. To switch the headset off, press and hold  for 5 seconds.
3. Press and hold  for 5 seconds to switch pairing mode on, then pair the headset with the second phone.
4. Switch the headset off and back on. The headset connects to both phones.

Make calls

Make and receive calls

To make and receive calls using your headset, you need to connect it to your phone.

Make a call — Make a call in the normal way.

Answer a call — Remove the headset from the clip.

 **Tip:** If the headset is not in the clip, press .

End a call — Put the headset in the clip.

 **Tip:** To end a call, you can also press .

ENGLISH

Decline a call — Press  twice.

Switch a call between your headset and phone — Press and hold  for 2 seconds.

When you're not in a call, you can redial the last called number or use voice dialling, if your phone supports these features with the headset.

Redial the last called number — Press  twice.

Use voice dialling — Press and hold  for 2 seconds, then follow the instructions in the user guide of your phone.

Handle calls from two phones

Continue an ongoing call, and decline a call on another phone — Press  twice.

End an ongoing call, and answer a call on another phone — Press .

Put an ongoing call on hold, and answer a call on another phone — Press and hold  for 2 seconds.

Switch between active and held calls — Press and hold  for 2 seconds.

End an ongoing call, and go back to a held call — Press .

If you redial or use voice dialling, the call is made on the phone you last used for a call with the headset.

ENGLISH

Product and safety information

Driving safety

Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety. Only use the car holder if it is safe to do so under all driving conditions.

When you install the car holder in a car, make sure it does not interfere with or hinder the steering or braking systems or other systems used in the operation of the vehicle (for example, airbags) or disturb your field of vision while driving.

Check that the deployment of the airbag is not blocked or impaired in any way. Make sure that the car holder is not installed where you might come in contact with it in the event of an accident or collision.

Battery and charger information

This device has an internal, nonremovable, rechargeable battery. Do not attempt to remove the battery from the device as you may damage the device.

This device is intended for use when supplied with power from the following chargers: DC-6. The exact charger model number may vary depending on the type of plug. The plug variant is identified by one of the following: E, X, AR, U, A, C, K, or B.

ENGLISH

The battery can be charged and discharged hundreds of times, but it will eventually wear out.

Talk and standby times are estimates only. Actual times are affected by, for example, device settings, features being used, battery condition, and temperature.

If the battery has not been used for a long time, to begin charging, you may need to connect the charger, then disconnect and reconnect it.

If the battery is completely discharged, it may take several minutes before the charging indicator is displayed.

When your charger is not in use, unplug it from the electrical plug and the device. Do not leave a fully charged battery connected to a charger, as overcharging may shorten the battery's lifetime. If left unused, a fully charged battery will lose its charge over time.

Always keep the battery between 15°C and 25°C (59°F and 77°F). Extreme temperatures reduce the capacity and lifetime of the battery. A device with a hot or cold battery may not work temporarily.

Do not dispose of batteries in a fire as they may explode. Dispose of batteries according to local regulations. Recycle when possible. Do not dispose as household waste.

Use the charger for its intended purpose only. Improper use or use of unapproved chargers may present a risk of fire, explosion, or other hazard, and may invalidate any approval or warranty. If you believe the charger is damaged, take it to a

ENGLISH

service centre for inspection before continuing to use it. Never use a damaged charger. Only use the charger indoors.

Take care of your device

Handle your device, charger and accessories with care. The following suggestions help you protect your warranty coverage.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that corrode electronic circuits. If your device gets wet, allow the device to dry.
- Do not use or store the device in dusty or dirty areas. Moving parts and electronic components can be damaged.
- Do not store the device in high temperatures. High temperatures can shorten the life of the device, damage the battery, and warp or melt plastics.
- Do not store the device in cold temperatures. When the device warms to its normal temperature, moisture can form inside the device and damage electronic circuits.
- Do not attempt to open the device.
- Unauthorised modifications may damage the device and violate regulations governing radio devices.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and mechanics.

ENGLISH

- Only use a soft, clean, dry cloth to clean the surface of the device.
- Do not paint the device. Paint can clog moving parts and prevent proper operation.

Recycle

Always return your used electronic products, batteries, and packaging materials to dedicated collection points. This way you help prevent uncontrolled waste disposal and promote the recycling of materials. Check how to recycle your Nokia products at www.nokia.com/recycling.

FCC/INDUSTRY CANADA NOTICE

This device complies with Part 15 of the FCC Rules and Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: 1. This device may not cause harmful interference; and 2. This device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help. NOTE: FCC Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-

ENGLISH

located or operating in conjunction with any other antenna or transmitter. NOTE: Changes or modifications not expressly approved by Nokia could void the user's authority to operate the equipment.
