Congratulations on your purchase of a Nokia mobile phone, a new tool for the mobile information society.

Before you begin, you need to prepare your phone by charging the battery and learning how
 to maintain it. This chapter tells you how to set up your phone. You will also find useful information about:

- How to use this guide
- How to understand network services
- How to contact Nokia

## - GET THE MOST OUT OF THIS GUIDE

The tips that follow can help you get the most from this guide as you learn to use your phone.

## Understand the terms

This guide provides instructions for certain actions.

- Press means to briefly press and release a key. For example, press $\bigcirc$ means press the zero key for 1 second and release.
- Press and hold means to press and hold a key for 1 to 3 seconds (depending on the feature being used), then release the key.
- Press M enu means to press $\approx$ (the selection key), located below the word Menu on the phone's screen.
- Highlighted means that an option on the screen is enclosed in a black box. When an option is highlighted, it can be activated by pressing $\beta$.

This guide uses the following icons to alert you to important information.
之洶, Tip: Provides information about a quick way or an alternate =- method for performing an action.
$\square$ Note: Explains a feature or points out an important concept.
Important: Alerts you to information critical to using a feature correctly.
$\triangle$ Caution: Warns you when you may lose information.
W arning: Helps you avoid personal injury, damage to the phone, or property damage.

## Learn text conventions

This user guide provides text clues to help make instructions clear and easy to follow. These clues are called conventions.

| Convention | What it means <br> bold <br> Indicates one of the following items: <br> The word or phrase appears on the phone's <br> screen. <br> Special text such as Notes and Warnings |
| :--- | :--- |
| bold and blue | Indicates one of the following items: <br> - The word is an address on the World Wide <br> Web. |
| A definition for the word or phrase appears |  |
| in the glossary. |  |

$$
\text { [ } 4 \text { ] }
$$

## Access alternate formats

To request a user guide in one of the following alternate formats, call the Nokia Customer Care Center:

- Braille
- Large print
- Audiocassette
- E-text (3.5-inch disk in Microsoft Word or WordPerfect)

## Nokia Customer Care Center, USA TTY/TDD Users Only

| Tel: 1-888-NOKIA-2U |
| ---: | ---: |
| $(1-888-665-4228)$ |
| Fax: $1-813-249-9619$ |$\quad$| Tel: 1 1-800-24-NOKIA |
| ---: |
| $(1-888-246-6542)$ |

Note: Alternate format user guides are available in English.

## Look for updates

From time to time, Nokia may update this user guide to reflect changes or corrections. The latest version may be available at the Nokia site on the internet at
www.nokia.com
An interactive user guide that provides step-by-step instructions for any of your phone features is available at
www.nokiahowto.com

A number of features included in this guide are called Network Services. These are special services you arrange through your wireless service provider. Before you can take advantage of any of these Netw ork Services, you must subscribe to them through your service provider and obtain instructions for their use from your service provider.

Note: Some networks may not support all language-dependent characters and/or services.

Network services for your Nokia phone include:

- Voice mail and voice privacy
- Call waiting, call forwarding and caller ID
- Text and picture messages
- Ability to send your own number

## Sign up with a service provider

Before you can use any network services, you must sign up with a wireless service provider. Your service provider will supply descriptions of special features and instructions for using their services.

## - REGISTER YOUR PHONE

Make sure to register your phone at www.warranty.nokiausa.com or 1-888-NOKIA-2U (1-888-665-4228) so that we can serve your needs better if you should need to call the center or have your phone repaired.

## - E-NEWSLETTERS

When you register your phone, you can sign up for Nokia's e-newsletter Nokia Connections if you would like. You will receive tips and tricks on using your phone, accessory information, and special offers.

$$
\text { [ } 6 \text { ] }
$$

## - UNDERSTAND YOUR PHONE

This section offers an illustrated view of your phone to help familiarize you with its keypad, connection port and power key.

5 Once the battery is released from the latch, it will lift slightly so that it can be removed from the phone.
Warning: Use only your hands to remove the battery. Do not use any objects that may damage the phone or the battery.

## Charge the battery

Before you begin, you need to prepare your phone by charging the battery.
1 Plug the charger into a standard wall outlet, then connect the lead from the charger to the bottom of the phone.

2 The battery power indicator (or battery bar) appears on the screen and starts scrolling. If the phone is on, Charging appears also.
3 When the battery bar stops scrolling, the battery charge is complete. Battery full appears also, if the phone is on.
4 Disconnect the charger from the phone.

## IM PORTANT BATTERY INFORM ATION

Use the following guidelines to obtain the best performance from your battery:

- With your phone turned off, charge your new battery for three hours before its first use. Use the battery until it is fully discharged. Repeat this procedure twice for a total of three charging cycles.
- Battery operation time may be less than the estimated times during the first charges. This condition is normal.
- If the battery is fully discharged, the scrolling bars may not appear immediately when charging.
- After the first charge, you can make and receive calls during the charging cycle, but the calls interrupt the charge. When the phone call ends, the charge will resume.
- The bars on the screen stop scrolling and remain constant when the phone is charged. If you leave the phone connected to the charger, the battery receives an additional charge.

Note: The battery will accept a "trickle charge" for an additional two hours. See "Reference information" on page96 for more information on batteries.

- Charging time depends on the charger and battery used. See "Batteries" on page106 for charging, talk, and standby times.

## PROLONG BATTERY LIFE

For good operation times with NiM H batteries, discharge the battery from time to time by leaving your phone switched on until it turns itself off. Ignore any messages to recharge your battery and let the battery completely discharge.

Important: Do not attempt to discharge the battery by any other
$\Leftrightarrow$ means.

## Find your phone's label

When you call Nokia Customer Care Center or your service provider, you will need to provide specific information about your phone. This information is recorded on the phone's type label. The type label is located under the battery inside the phone's back cover. It contains the model and serial numbers as well as other important information about your phone. Please do not remove or deface the label.

## Contact Nokia

If you have a question and have already checked the Troubleshooting section (see page121), we recommend that you have the following information available before contacting the Nokia Customer Care Center or the service provider:

- Your phone's model number
- ESN (Electronic serial number - located on the label under the battery)
- Your billing address ZIP code
- The phone or accessory in question

| Nokia Customer Care Center, USA | Customer Interaction Centre, Canada |
| :---: | :---: |
| Nokia M obile Phones 7725 Woodland Center Blvd. Suite \#150 <br> Tampa, Florida 33614 | Nokia Products Ltd. 601 Westney Road South Ajax, Ontario L1S 4N7 |
| Tel:1-888-NOKIA-2U <br> (1-888-665-4228) <br> Fax: 1-813-249-9619 | Tel: 1-888-22-NOKIA <br> (1-888-226-6542) <br> Fax: 1-905-427-1070 |
| For TTY users: $\begin{array}{r}1-800-24-\text { NOKIA } \\ (1-800-246-6542)\end{array}$ | Web site: www.nokia.ca |

## Contact your service provider

You may want to save your service provider's customer support telephone number into your phone. This will let you easily contact your provider if you have questions or issues with your phone service.

## Receive accessibility information

Nokia is committed to making mobile phones easy to use for all individuals, including those with disabilities. Nokia maintains an internet site that is dedicated to accessibility solutions. For more information about phone features, accessories and other Nokia products designed with your needs in mind, visit the web site at

## www.nokiaaccessibility.com

## ACCESSIBLE FEATURES

This Nokia phone has many accessible features, including:

- Nibs under the five $5_{\mathrm{j} k \mathrm{k}}$ key for quick reference to the keypad
- Tactile feedback when you press a key
- Ability to send and receive short text and e-mail messages
- Convenience of 1 -touch dialing
- Customizable ring tones

## LPS- 3 M OBILE INDUCTIVE LOOPSET

The LPS- 3 Loopset is a Nokia accessory designed to make the phone more accessible to hearing- aid users. The loopset gives hearing-impaired users clear access to digital telephony for the first time. It allows people with T - coil equipped hearing aids to make and receive calls without noise interference.

To activate the Loopset, see "Accessory settings" on page63.
Note: The Loopset is sold as an accessory to the phone.

3 Press Menu 4-4-4-1 (Settings > Accessory settings > TTY/TDD > Use TTY).
4 Scroll to Yes, then press Select.
NOTES ABOUT TTY/TDD CALLS

- The Nokia TTY/TDD Adapter (HDA-9) is for use with compatible TTY/TDD devices only. Check with the manufacturer of the TTY/TDD device to ensure that the connection is compatible.
- Check with the manufacturer of the TY/TDD device for the connecting cable.
- TTY/TDD communications depend on network availability. Check with your service provider for availability and description of services.

## MAKE A TTY/TDD CALL

Th: Before making a TY/TDD call with your Nokia phone, check the signal strength. See "Understand indicators and icons" on page21 for details.
1 From the Start screen, enter the number and press
2 When the receiving party answers, begin typing your conversation on the TTY/TDD.

RECEIVE A TTY/TDD CALL
1 Make sure the TTY/TDD device is connected to your phone.
2 Press to answer the call, then type your responses on the TTYTTD.

END A TTY/TDD CALL
Press ${ }^{6}$

This section gives a brief introduction to the phone and shows quick steps for:

- Making and answering calls
- Adjusting the earpiece volume
- Navigating through menus
- Using menu shortcuts

You will also find information about the phone's icons and how to use inphone help. The rest of this guide provides complete details on phone use.

## - SWITCH YOUR PHONE ON OR OFF

Warning: Do not switch on the phone when wireless phone use is prohibited or when it may cause interference or danger.

## Switch ON your phone

Press and hold the power key for 2 seconds.

## Switch OFF your phone

Press and hold the power key.
Or, press the power key quickly. When Switch off! is highlighted on the screen, press Select.

## - MAKE AND ANSWER CALLS

There are several ways to make and answer calls on your phone. Once learning about the basic methods, you will discover other tips throughout this guide when reading about the phone's features.

## Understand the Scroll Bar

When you press Menu, a vertical scroll bar appears on the right side of the screen. This scroll bar has a tab which moves up or down to indicate your location in the menu.

## Understand indicators and icons

You have two types of identifiers on your phone: icons and indicators.
Indicators show the status of something. The phone uses three types of indicators: signal strength, battery power and handset volume.
Icons are graphical representations of a specific item or situation. For example, an icon appears when you have a voice message in your mailbox.

Indicators

1 Signal strength - shows the signal strength of the wireless network at your current location. The higher the bar, the stronger the signal.
2 Battery power - shows the battery charge level. The higher the bar, the more power in the battery.

[ 21 ]

Icons

| Icons |  |
| :---: | :---: |
| Screen Icon | What it means |
| $\cdots$ | Active call in progress. |
| - | Silent has been selected as the current profile. |
| -0 | The phone's keypad is locked to prevent any accidental key presses. |
| 00 | One (or more) new voice messages waiting. |
| [-F | One or more new text messages waiting. (If blinking, the text message memory is full.) |
| D | Digital service is available. |
| चABC <br> wabc | Standard text input mode for entering alpha characters. Press ©. to switch between uppercase and lowercase input. |
|  | Predictive text mode for quickly entering text messages. Press © to switch between uppercase and lowercase input. |
| ¥123 | 123 mode. This icon appears when you press and hold © while entering text. You can now enter only numbers (not alpha characters). Press and hold ©:/ again to return to text entry mode. |
| *? | Special character mode. This appears when you press *+ while entering text. Once the characters appear, you can select a special character by selecting Insert. |
| (1) | Alarm clock is set. |

Note: The Accessory settings menu will not appear until after an accessory has been connected to the phone.

## - CHECK IN-PHONE HELP

M any menu items have brief help text. To view the help text, scroll to the menu item and wait for about 15 seconds. Press More or $\approx$ to continue reading the text. Press Back to exit, or wait a few seconds to return to the current menu.

A menu is a list of choices you can make to change settings on your phone or use various phone features. Each menu can contain several levels of submenus. You can use menus and submenus two ways: by scrolling or by using a shortcut. This guide uses the shortcut method when describing how to use the phone's features.

## Scroll through menus

1 At the Start screen, press Menu, then scroll through the menus using the $\triangle$ and $\triangle$ keys.
2 Use the scroll and selection keys to navigate the submenus; press $\sigma$ to return to the Start screen.
For example, when you see (Menu > Profiles > Silent) the scrolling method is: press Menu, scroll to Profiles and press Select, scroll toSilent and press Options.

## Return to the previous menu level

You can return to the previous menu level by pressing the selection key labeled Exit or Back. You can return to the Start screen from any menu level by

## Use shortcuts

M enus and options are numbered so that you can quickly find your way to an option. The numbers appear in the top right corner of the screen and show your location in the menu.
1 Press Menu.
2 Within 3 seconds, enter the first number of the menu function you want to access. Repeat until you have entered all the numbers.
For example, to select the Silent profile, press Menu 3-2-1

- You can scroll upward to quickly access the last option in a menu list
- You can return to the previous menu level by pressing Back.
- To exit a menu and return to the Start screen, press $\boldsymbol{\sigma}$. If you leave a menu by pressing $\boldsymbol{\sigma}$, you cancel any changes you made.
- Some menus may not appear. Ask your service provider for details.

## M enu shortcuts

2 CALL LOG $\sqrt{4}$

## - STANDARD TEXT INPUT

Standard text input is used when entering text into information prompts. You can use this method for all text entry, but predictive text input is the faster method for writing messages.

## Enter letters (ABC mode)

When you add new names to the phone book, your phone automatically switches to the ABC mode and displays the wAEC icon.
1 Find the key that has the letter you want to
 enter.
2 Press the key as many times as needed for the letter to appear on the screen. For example, to enter the name STEVE:

| Press | (7amer | ${ }^{7}$ | (70ars | (70aci |
| :---: | :---: | :---: | :---: | :---: |
| Press | 8two |  |  |  |
| Press | (206) | (206) |  |  |
| Press | 8 \%wv | 8 tuv | 8 twv |  |
| Press | (606) | (604) |  |  |

[ 30 ]

## - ENTER SPACES, PUNCTUATION AND SPECIAL CHARACTERS

Depending on the selected display language, the following characters may be available when entering characters from the keypad:

| Key | Characters |
| :---: | :---: |
| 1 | .,'?!@ ~/". 1 |
| 2 | A B C 2 |
| 3 | DEF3 |
| 4 | G H I 4 |
| 5 | J K L 5 |
| 6 | M N 06 |
| 7 | P Q R S 7 |

| Key Characters |  |
| :---: | :--- |
| $\mathbf{8}$ | T U V 8 |
| $\mathbf{9}$ | W X Y Z 9 |
| $\mathbf{0}$ | Enters an empty space or 0. |
| $\boldsymbol{*}$ | Special characters |
| \# | Changes letter case; long <br> press toggles between text <br> input mode and number <br> input mode |
| ล | Moves cursor to the left of <br> character. |
| ت | M oves cursor to the right of <br> character. |

## Use special characters

While entering text, press (or press and hold, if predictive text is on) ${ }_{+}^{*}$ to display special characters. Press ${ }^{*}+$ again to cycle through all characters:

| . | ? | ! | @ | ' | - | - | 1 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| ) | , | : | ; | \& | 1 | $\sim$ | 1 |
| \% | * | \# | + | < | = | > | " |
| f | \$ | $\nexists$ | \% | § | i | i |  |

Use scroll keys to select the character you want, then press Insert.

$\square$
Note: The order and availability of special characters may vary depending on your service provider.

## Use four- way scrolling

Navigate special characters using the 2, 4,6 , and 8 keys much as you would a joystick. Once a character is highlighted press $5_{51 \mathrm{klt}}$ to insert the character into your message.

## Use symbols in names and numbers

- To enter a symbol while adding a name to the phone book, press $*_{+}$.
- To add a special character for creating a number string in the number box, press ${ }^{*}+$. See "Set touch tone strings" on page78.

## - W RITE WITH PREDICTIVE TEXT

Predictive text input allows you to write messages much faster than the standard text method. With predictive text input, you only need to press each number key once for each letter. Your phone uses a built-in dictionary to predict or guess what you are writing. You can also add new words to the dictionary.

## Understand predictive text input

To write Steve with the English dictionary selected, press:

|  | $\begin{array}{\|l\|} \hline \text { Sis abc } \\ \hline \text { St } \end{array}$ | $\begin{aligned} & \text { 黄 abc } \\ & \text { Sue } \end{aligned}$ | $\begin{aligned} & \text { S abc } \\ & \text { Steu } \end{aligned}$ | $\begin{aligned} & \text { S abc } \\ & \text { Steve } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
| The display shows the above words for each key pressed. |  |  |  |  |

Since the displayed word changes after each key stroke, disregard the word until you have keyed in all the characters. If the finished word is not the one you wanted, press the ${ }_{*}^{*}$ key until your word appears. If it does not appear you will have an option to spell your word using standard text input.

$\square$ Note: Predictive text input may not be available for all languages.
Turn on predictive text input
1 Press Menu, then press Select.
2 Scroll to Write message, then press Select.
3 Press Options, scroll to Predictive text, then press Select.
4 Scroll to the language you want, then press Select.
T9 prediction on appears.

[ 34 ]

1 While writing a text message, press Options.
2 Scroll to Predictive text, then press Select.
3 Scroll to Prediction off, then press Select.
T9 prediction off appears.
三皆, Tip: Press to turn predictive text on and off.

## Save a word in the dictionary

If the word Options changes to Spell, the word you intended to write is not in the dictionary. You can add the word to predictive text.

1 Press Spell and enter the word(s) using standard text entry.
2 Press OK to save the word(s).

## Enter numbers

1 To add a number to the message, press and hold $\omega^{\# \#}$ until w123 appears on the screen.

2 Enter the numbers you want, then press and hold $\omega^{\#}$ to return to the wREIC method.

Note: You can also enter numbers from the Options menu (Insert number), or by a long press of the number key.

## Enter punctuation and special characters

There are two ways to enter punctuation when using predictive text.
Press and hold ${ }^{*}+$ to access the special characters list. See "Use special characters" on page33 for more information.

You can also enter symbols from the Options menu:
1 From the message screen, press Options.
2 Scroll to Insert symbol and press Select.
3 Scroll to the symbol you want and press Insert.

## 5 Phone book

Your phone includes a phone book that can store a maximum of 200 entries (names and associated phone numbers). In addition, the phone book can store an e-mail address for a name.

- An entry in the phone book can
 consist of a number only or a name and a number.
- You cannot enter the same name twice. If you try to save a name that is already in the phone book, the phone asks if you want to replace the existing name.

## - USE PHONE BOOK MENUS

The phone book has several menus from which you can choose. These menus appear when you press Names. Use the scroll keys to move to the menu you want to use.

| Find | Allows you to search for a specific entry. |
| :--- | :--- |
| Add new | Allows you to add a new contact to your phone <br> book. |
| Erase all | Allows you to erase names and numbers one by one <br> or all at once. |
| Options | Takes you to a new menu list which includes the <br> phone book's memory status and scrolling view. |
| 1-touch dialing | Allows you to assign up to eight keys for speed <br> dialing. |

## - SAVE NAM ES, NUM BERS AND E- MAIL ADDRESSES

For information on entering text, see "Standard text input" on page30.

## Quickly save a name and number

This method is called quick save.
1 Enter the phone number using the keypad.
2 Press Save.
3 Enter a name and press OK.

## Save an entry using the phone book menu

1 Press Names to enter the phone book.
2 Scroll to Add new and press Select.
3 Enter a name and press OK.
4 Enter a number and press OK.

| Wabe |  |
| :--- | :--- |
| Mame: |  |
| Matt |  |
| OK | Clear |

## Save an e-mail address

Once you have added a contact to your phone book, you can add an email address to that contact.

$\square$ Note: E-mail addresses can only be added to existing contacts. For instance, you cannot enter an e-mail address until you have selected a name or number.
1 Find the name to which you want to add an e-mail address.
2 Press Details, then press Options.
3 Scroll to E-mail address then press Select.
4 Enter the e-mail address, and press $\mathbf{O K}$.
$\bigcirc$ Important:If you have selected the Name+number phone book view, you will not need to press Details.

1 At the Start screen, press Names
2 Select Find and enter one or two letters of name you want to recall.
3 Press $\mathbf{O K}$, then press $\boldsymbol{\lambda}$ to dial the number.
You may have to scroll to the appropriate entry in a list if you have stored names that are similar to each other.

## Recall information with shortcuts

You may want to use some of these shortcuts, or alternate methods for recalling a number.

- Press Names, enter the first letter of the name, scroll to the name, and press $\boldsymbol{>}$ to dial the number.
- At the Start screen, press the scroll keys to enter your list of names, scroll to the name you want to dial, and press $\boldsymbol{\lambda}$.
- Press to access a list of your last ten dialed calls, scroll to the one you want to dial, then press $\neg$ again.

## - EDIT A NAME OR NUM BER

You can edit a name, a number, or both.
1 Recall the name or number you wish to edit.
2 Press Details, then press Options.
3 Scroll to Edit and press Select.
4 Edit the name or number and press OK.
Important: If you have selected the Name+number phone book view, you will not need to press Details.

[ 39 ]

Erasing stored names and numbers removes them from your phone. Once you erase an item, you can restore it only by re- entering it.

Individual entries
1 Recall the phone book entry you want to erase.
2 Press Details, then press Options.
3 Scroll to Erase, and press Select.
The message Erase? appears.
4 Press OK
Important: If you have selected the Name+number phone book view, you will not need to press Details.

## Entire contents

1 Press Names, scroll to Erase all, and press Select.
2 Scroll to Erase all and press Select.
3 When you see the message Are you sure?, press OK.
4 Enter your security code and press OK.
$\square$ For information on your security code, see "Understand the security code" on page82.

## - CUSTOMIZE YOUR PHONE BOOK VIEW

You can change how the information in your phone book looks on your screen. There are three different ways to view your phone book. In all views, you can use the scroll keys to move up and down through the list of names.

$$
\text { [ } 40 \text { ] }
$$

| Choice | What it does |
| :--- | :--- |
| Name list | Displays three names on the screen at a time. |
| Name+number | Only one name and its corresponding number appears <br> on the screen at a time. |
| Name only | Displays individual names only. You can view the <br> corresponding phone number by pressing Details and <br> then scrolling up or down. |

## Select your scrolling view

To change the way you view names and numbers in your phone book:

1 Press Names
2 Scroll to Options and press Select.
3 At Phone book view, press Select.
4 Scroll to the view you want and press Select.

$\rightarrow$
Important: If you have selected the Name+number phone book view, you will not need to press Details when working with phone book options.

## - CHECK MEMORY STATUS

You can check how much of your phone book's memory is free and how much has been used.
1 Press Names and scroll to Options
2 Press Select.
3 Scroll to Memory status and press Select.

## 6 Call log

Your phone provides a call log that registers information about calls you make and receive. The call log keeps track of the following:

- Missed calls

- Received calls
- Dialed calls
$\square$
Note: This function only works in digital networks and only when caller ID is enabled.

## - CALL LOG OPTIONS

When you view the missed calls, received calls, or dialed calls list and press Options, the following choices may appear.

Note: Not all options will appear each time. Also, the order of options may vary.

| Choice | What it does |
| :--- | :--- |
| Call time | Shows the time when the call was connected. (You <br> must first set the phone's clock) |
| Send message | Allows you to write a short text message to the <br> person who called you or to whom you called. |
| Edit number | Allows you to edit the displayed number and save it <br> with a name to your phone book. |
| Save | Allows you to enter a name for the number and save <br> both to your phone book. |
| Erase | Allows you to delete the number from the call list. |

## - CHECK MISSED CALLS

If you do not answer a call, the message Missed calls appears on your phone's screen, along with the number of calls missed. Your phone stores the last ten numbers associated with calls you have missed.
To check missed calls:
1 Press Menu 2-1 (Menu > Call $\log >$ Missed calls).
2 The phone displays a list of the numbers of the calls you missed.
3 Press $\propto$ or $\triangle$ to scroll through the list.
4 Press $\curvearrowright$ if you want to dial the number.

## - CHECK RECEIVED CALLS

Your phone stores the last ten numbers associated with calls that you have answered. To check this list of numbers:
1 Press Menu 2-2 (Menu > Call log > Received calls).
2 Scroll through the list of received numbers and highlight your selection.

3 Press if you want to dial the number.

[43]

Your phone stores the last ten numbers associated with calls that you have dialed. To check this list of numbers:

1 Press Menu 2-3 (Menu > Call log > Dialed calls).
2 Scroll through the list of dialed numbers and highlight your selection.
3 Press $\geqslant$ if you want to dial the number.

## Clear call lists

Your phone uses call lists to track numbers for incoming, outgoing, and missed calls. You can erase some or all of the numbers that appear in the call log.
A. Caution: You cannot undo this operation.

1 Press Menu 2-4 (Menu > Call log > Clear call lists).
2 Use © or $\triangle$ to scroll through the options list. The list includes: All, Missed, Received, and Dialed.

3 Stop at the appropriate option and press Select.
The All option clears every number in every list, whereas the other options clear only the numbers associated with that option. For example, the Dialed option clears only the numbers associated with calls you previously dialed.

## - USE CALL TIMERS

Your phone tracks the amount of time you spend on each call. To obtain information about time spent on phone calls:
1 Press Menu 2-5 (Menu > Call log $>$ Call timers).

2 Scroll through the options described below:

| Option |  |
| :--- | :--- |
| Duration of <br> last call | Shows the call duration of the last call. |
| Duration of <br> all calls | Shows the call duration of all calls that have been <br> made and received since you reset the timers. |
| Clear timers | Clears all call timers for the currently selected phone <br> number. Your phone includes separate timers for each <br> number used. |

Note: The actual time invoiced for calls by your service provider may vary, depending upon network features, rounding- off for billing, and so forth.
A Caution: If you select the Clear timers option, the action cannot be undone. If you use the call timers to log the amount of time spent on calls, you may want to record the information in the call timers before you clear them.

[ 45 ]

1 Press Menu 2-5-3 (Menu > Call log > Call timers > Clear timers). The Security code box appears.

2 Enter your security code and press OK.
For information on your security code, see "Understand the security code" on page82.

## Turn on a current call timer

You can set your phone to show the running elapsed time while a call is active.
1 Press Menu 4-2-2 (Menu > Settings > Call settings > Current call timer).
2 Scroll to On and press Select.
From this point on, the timer is active during each call you make or receive. The time appears on the phone's screen.

3 After a call has ended, press any key on the phone's keypad to clear the current call time from the screen

$$
\text { [ } 46 \text { ] }
$$

You can use mobile messages to keep in touch with friends, family and business associates.
Your phone allows you to do the following:

- Voice mail
- Send and receive text messages

- Send and receive picture messages
- Communicate with e-mail

Not all messaging features are available in all wireless networks. Contact your service provider for availability and subscription information.

## - VOICE MAIL

Voice mail provides a way for callers who miss you to leave a message that you can retrieve later. To use voice mail, you must sign up for the feature with your wireless service provider.

## Check for messages

Your phone beeps when you receive a voice message. Also, the message New voice message appears on your phone's screen, along with the icon.
If you receive more than one voice mail message, your phone may show the number of messages that you have received. The wireless network provider determines the type of indication you will receive.

Note: To use voice mail, you need to learn the voice mail system's various greetings, passw ords, and prompts. Your service provider can provide instructions.
[47]

[ 48 ]

## - TEXT, E-MAIL AND PICTURE M ESSAGES

Your phone is capable of a variety of messaging services including text messages (SMS or Short M essage Service), picture messages, and e-mail messages. Messaging services are netw ork dependent features. Consult your service provider for information.

## Understand messaging

M essage recipients: The phone to which you send a text message must support text messages. The recipient may not receive the SMS text message you send if the recipient's account is with a different service provider or of a different protocol.
M essage length: The maximum length of a sent or received message is 160 characters. Your phone has space for several messages, depending on the length of each message. The maximum length of a message also may depend on the capabilities of the network from which the message originated.

## Options when working with messages

There are several options available when working with text, picture and e-mail messages. The order and availability of options may vary depending on the messaging function and your service provider.

$\square$
Note: For information on your security code, see "Understand the security code" on page82.

## - TEXT MESSAGES

You can use your phone to send and receive short text messages if your service provider offers the message feature and if you subscribe to the service.

When writing text messages, use the predictive text method for faster text entry. For details, see "Write with predictive text" on page34.
1 Press Menu, select Messages, then select Write message.
The message screen appears.
2 Enter a message of up to 160 characters.
A counter in the upper right corner of the screen shows the number of characters remaining.

3 When you've finished writing the message, press Options, scroll to Send, then press Select.
4 Enter or recall the recipient's phone number, then press Send.
Sending message appears.
Note: When sending messages via the SMS network service, your phone may display the words "M essage Sent". This is an indication that the message has been sent by your phone to the message center number programmed into your phone. This is not an indication that the message has been received at the intended destination. For more details about SM S services, check with your service provider.

## Read a text message

When you receive a text message, the phone beeps and displays M essage received and the indicator in the upper left corner of the screen.
1 Press Read to view the message.
2 Use the scroll keys to view the whole message, if necessary.
3 Once you've finished, press to return to the Start screen, or press Options for other choices, such as Reply or Forward.
When the phone displays Message received pressing Exit moves the new message to the inbox, and returns you to the Start screen. To read the message later, press Menu 1-3 (M enu > Messages > Inbox). If you have

1 When reading the message, press Options.
2 Scroll to Save, then press Select.
The message will be moved to the archive folder.

ERASE A MESSAGE
1 When reading the message, press Options.
2 Scroll to Erase, the press Select.
3 Erase message? appears, press OK.

## WHEN YOUR MEMORY IS FULL

When your phone's message memory is full, one or more messages of the lowest priority are automatically deleted. When you receive an emergency message, messages may be deleted from any of your message folders.
If you have more messages waiting at the network, blinks on the Start screen. You can erase old messages to create space for new messages.

## - PICTURE MESSAGES

Your phone offers five picture messages that you can use to send pictures and text to your friends and family. You can also save a new picture by replacing an existing picture. For possible message options, see "Options when working with messages" on page49.

Each picture message is made up of several text messages. Therefore, sending one picture message may cost more than sending one text message. Contact your service provider for pricing information.

Note: This function can be used only if it is supported by your network operator or service provider. Only phones that offer picture message features can receive and display picture messages.
$\square$ Note: The actual invoice for calls and services from your service provider may vary, depending upon network features, rounding-off for billing, taxes, and so forth.

1 Press Show to view the message.
2 Press Save.
You will have the option to replace a current message.
3 Scroll to the picture you want to erase, then press Replace.

## - E-M AIL MESSAGES

You can send e-mail up to 160 characters in length to anyone with an e-mail address.

- Messages sent to you by e-mail arrive as regular text messages. You can use all the
 options described earlier to save, reply to, or forward a message.
- Contact your service provider to get the e-mail address and gateway number for your phone, and for more information on using e-mail.

## Send an e-mail message

1 Press Menu 1-2 (Menu > Messages > Write e-mail).
$\square$ Note: If you get a prompt asking you to enter your e-mail gateway number, you must obtain this number from your service provider.
2 At the prompt, enter your recipient's e-mail address or press Find to look through and select a saved e-mail address from your phone list. Press OK
3 At the prompt, enter a subject for your e-mail message. (You are not required to enter a subject.) Press OK when you are finished.
$\square$ Note: Predictive text is not available when entering an e-mail address or a subject line for your e-mail.

The Nokia 1200 series can be easily customized to fit your lifestyle. The display language, ringing tones, audio, and accessory settings (among others) can all be modified to suit your needs.

Your phone has variousprofileswhich allow you to customize ringing and alert tones for different environments. Once you modify the profiles, you can activate the profile that is appropriate for your surroundings. For example, you can select the Silent profile while at the movies or select the Outdoor profile when at a sporting event

## - PROFILES

Profiles let you set your phone's sound settings to match your environment, whether it's a meeting or a soccer game. Just pick the profile that suits your current environment: Normal, Silent, Meeting, Outdoor or Pager.

You can customize any of the profiles and set your own preferences for the following settings:

- Ringing options
- Ringing tone
- Ringing volume
- Message alert tone
- Keypad tones
- Warning tones
- Profile name (not available in the Normal profile)

Important: You can select a default profile for each of these accessories: Headset, Handsfree and Loopset. To learn more about accessories, see "Accessory settings" on page63.

## Select a profile

1 Quickly press and release the Power key.
2 Use $\triangle$ and $\mp$ to move to the profile you want to use.
Profile names are highlighted as you scroll through them.
3 Press Select to activate a profile.

## Customize a profile

1 Press Menu 3 (Profiles).
2 Scroll to the profile you want to customize, then press Options.
3 Scroll to Customize, then press Select.
4 Use the scroll keys to display each of the profile options. Once you find the option you'd like to customize, press Select.

## SET THE RINGING OPTIONS

You can choose the type of ring your phone uses to notify you of an incoming call. This setting does not affect any incoming text message alert tones.
1 Press Menu 3 (Menu > Profiles).
Your phone lists each profile.
2 Use ( or $\triangle$ to scroll to the desired profile in the list for which you want to set the ringing options, and press Options.
3 Scroll to Customize and press Select.
4 Scroll to Ringing options and press Select.
5 Scroll to one of the ringing options, as described below, and press Select.

| Ring | The phone rings normally. |
| :--- | :--- |
| Ascending | Ringing volume increases (gets louder) if the phone <br> is not answered. |
| Ring once | The phone rings once to indicate an incoming call. |

W arning tones include the sounds your phone makes during error conditions, during confirmations, when the battery is low, and when you need to recharge the battery.
1 Press Menu 3 (Menu > Profiles).
2 Use $\propto$ or $\checkmark$ to scroll to the profile for which you want to set the warning tones, and press Options.
3 Select Customize and press Select.
4 Scroll to Warning tones, then press Select.
5 Scroll to On or Off and press Select.

## Rename a profile

1 Press Menu 3 (Menu > Profiles).
2 Use © or $\mp$ to scroll to the desired profile and press Options.
3 Scroll to Customize, then press Select.
4 Scroll to Profile name, then press Select.
5 Enter the new name and press OK.

Note: You cannot rename the Normal profile.

## Accessory settings

You can use your phone with these Nokia accessories:

- Headset (HDC-5, HDE-2, HDB-5)
- Handsfree Car kit (CARK125 and PPH-1)
- Loopset (LPS-3)
- TTY/TDD Adapter (HDA-9)

Note: You can select a default profile that will be associated with each accessory, such as Normal. However, the Accessory settings menu will not appear until after an accessory has been connected to the phone at least once.

## Set the display language

You can choose your phone's display language.
1 Press Menu 4-3-1 (Settings > Phone settings > Language).
2 Scroll to the language you want, then press Select.

## Set the clock

Your phone contains a real- time clock that can be set two different ways: the clock can use the time information provided by the wireless system, or it can be set manually. Once the time is set, you can display the clock on the Start screen.

For added convenience, the clock is connected to an alarm clock. See "Use the alarm clock" on page85 for additional information.

## SELECT THE TIME FORMAT

You can choose whether your clock shows time in an am/pm format or a 24-hour format.
1 Press Menu 4-1-2-3 (Menu $>$ Settings $>$ Time settings $>$ Clock $>$ Time format).
2 Scroll to 24-hour or am/pm and press Select.

[65]

1 Press Menu 4-1-2-2 (Menu > Settings > Time settings > Clock > Set the time).

2 Enter the time using an hh:mm format and press OK. For example, to set your clock to 8:40, enter 08:40.

3 Scroll to amor pm and press OK

## SET THE CLOCK USING 24-HOUR FORMAT

1 Press Menu 4-1-2-2 (Menu > Settings > Tlme settings > Clock > Set the time).

2 Enter the time using an hh:mm format and press OK.
For example, to set your clock to 8:40, enter 08:40 (for am) or 20:40 (for pm).
3 Press OK

## Automatic update of time

You can set your phone to update the time from the network when you turn the phone on. If the clock in your phone is 30 seconds or more off the network time, the phone will automatically update to reflect the network time.

Note: Auto update time is a netw ork dependent feature. Contact your service provider for details and availability.
1 Press Menu 4-1-3 (Settings > Phone settings > Auto update of time).
2 Scroll to one of the following options, then press Select.

- On: Updates the time automatically.
- Confirm first: Requires you to confirm that you want the update. You can accept or decline the update.
- Off: Prevents the time from being automatically updated.

## 9 Advanced calling features

This chapter covers advanced calling features, including:

- Options available while in an call.
- Managing two calls at the same time.
- Network services such as call forwarding

Not all features that are described are available in all wireless networks. Contact your service provider for availability of netw ork services.

## - UNDERSTAND ACTIVE-CALL OPTIONS

Your phone allows you to use a number of features during a call; however, you may not be able to use all options at all times. Also, the order of in- call options may vary.

$\square$
Note: Many in-call options are network
dependent features. To use these options, you may need to contact your service provider.

During a call, press Options to see the in-call menu choices:

| Menu <br> Options | What it does |
| :--- | :--- |
| Lock keys | Allows you to lock the phone's keypad during a call. |
| Mute | Mutes the phone's microphone. This option can affect <br> the microphones of accessories connected to the <br> phone. |
| End all calls | Ends all active calls. |
| Touch tones | Sends touch tones. |

## Access menus

You can access your phone's menus while in a call.
1 Press Options.
2 Scroll to Menu, then press Select. To exit the menus, press Exit.
Note: Do not press the $\boldsymbol{\sigma}$ key to exit the menus or you will end your call.
Make a new call
To make a new call while already in a call, dial the number, then press

## End all calls

Press the $\boldsymbol{\sigma}$ key.

## Access the phone book

You can access information in the phone book during a call.
1 Press Options.
2 Scroll to Names, then press Select.

## Save a name and/or number

You can save a name and number during a call.
1 Enter the number you want to save.
2 Press Options, scroll to Names, then press Select.
3 Scroll to Add new, then press Select. Add the name and number as you normally would.

[69]

RECALL A NUM BER FROM THE PHONE BOOK DURING A CALL
If you don't remember the number of the second party you want to include in the conference and the number is in your phone book, you can recall the number.

1 When prompted to enter the phone number, press Find.
2 Locate the number in your phone book, then pressSelect. The number will appear in the number prompt.
3 Press $\mathbf{O K}$ to call the number.
END A CONFERENCE CALL
To end all calls, press $\boldsymbol{\sigma}$.

## - USE VOICE PRIVACY

The voice privacy feature encrypts the voice channel so that people cannot eavesdrop on your phone conversations.
D. Note: Voice privacy is a netw ork dependent feature. Contact your service provider for more information on this feature.

TURN VOICE PRIVACY ON/OFF

1 Press Menu 4-6-1 (Menu > Settings > Network services > Voice privacy).

2 Scroll to On or Off and press Select.
During a call, voice privacy becomes active and notifies you with a beep. A notification message also appears on the screen.
If you turn this feature on and voice privacy becomes inactive, your phone beeps and displays the message Voice privacy not active.

Note: Use caution when sending confidential information if voice privacy is not active.

## - USE CALL FORW ARDING

With call forwarding, you can forward incoming calls to another phone number. Before you can use call forwarding, you must first store the feature codes. Once call forwarding has been activated, Call forwarding appears as a menu option.

Note: Call forwarding is a netw ork dependent feature. Some netw orks require that call forwarding activation is done manually. Contact your service provider for availability and full details.

## Learn about call forwarding feature codes

Your network requires separate codes for activating and cancelling the various types of call forwarding. Your carrier can provide you with the necessary feature codes for these network services.

Once you store these feature codes in your phone, they are sent automatically to the network when you select one of the call forwarding options from your phone's menu.
Your phone can store the following types of feature codes:

| Option | What it does |
| :--- | :--- |
| Forward all calls | Forwards incoming calls to the number you <br> specify. |
| Forward if busy | Forwards incoming calls when you're in a call. |
| Forward if not <br> answered | Forwards incoming calls to another number when <br> you are unable to answer. |
| Forward if out <br> of reach | Forwards incoming calls to another number when <br> the phone is out of the network or switched off. |
| Cancel all call <br> forwarding | Cancels all active call forwarding options. |

## [72]

## Store the call forwarding feature code

Before you can activate call forwarding, you must contact your service provider to obtain the feature codes.
1 Press Menu 4-6-5 (Menu > Settings > Network services). The Feature code prompt appears.
2 Enter the feature code your service provider gave you. Press OK
3 Scroll to Call forwarding and pressSelect.
4 Scroll to the call forwarding option you want and press Select.
5 Scroll to Activate and press Select.

## Activate/cancel call forwarding

After you store the correct feature codes, you can activate (or cancel) call forwarding as follows:

1 Press Menu 4-6-2 (Settings > Network services > Call forwarding).
2 Scroll to the desired call forwarding option, then press Select.
3 Highlight Activate and press Select.
4 Enter the number to which you want your calls forwarded (or press Find to recall a number from the phone book).
5 Press OK.
Note: When canceling call forwarding follow steps 1-2.

- USE CALL W AITING

During a call, call waiting beeps to let you know that someone else is calling you. Depending on your caller ID setup, the phone might also display the number of the incoming call. Once call waiting has been activated, Call waiting appears as a menu option.

Note: Call waiting is a network dependent feature. In some networks the call waiting code must be activated manually. Contact your service provider for availability and full details.

## Activate call waiting

1 Press Menu 4-6-3 (Menu > Settings > Network services > Call waiting).
2 Scroll to Activate and press Select.

## M anage calls

Call waiting works with both local and long distance calls.

- To answer an incoming call, press > .
- To switch from one call to another, press
- To end both calls, press $\boldsymbol{\leftarrow}$.

## - USE SEND OWN CALLER ID

This feature allows you to block caller ID when you call someone (your number will not be displayed on their caller ID). This feature is only effective when calling a number equipped with caller ID.
$\square$
Note: This feature is available only when supported by the wireless network and may not function if you are roaming.Important:This feature works on a call-by-call basis. You must enable this feature each time you want to block the sending of your own number to the recipient's caller ID.

## STORE THE FEATURE CODE

Before you can use the Send own caller ID call feature, you must store the feature codes for activating this feature. Once the code is stored in your phone, it is sent automatically to the network when you select this option from your phone's menu.
1 Press Menu 4-6-5 (Settings > Network services > Network feature setting). The Feature code prompt appears.
2 Enter the feature code issued by your service provider and press OK.
3 Scroll to Send own caller ID, then press Select.
4 Select Yes.

## PLACE A CALL WITHOUT SENDING YOUR NUM BER

1 Press Menu 4-6-4 (Settings $>$ Network services $>$ Send own caller ID).
2 Scroll to No, then press Select.
3 Enter the desired phone number, then press $\mathbf{O K}$ (or pressFindto recall a phone number from the phone book).
The phone automatically inserts the feature code into the dialing string and dials the phone number. The phone you are calling will not display your phone number through caller ID.

## - SELECT A PHONE NUM BER

Your service provider programs your phone number and system information into your phone's memory when your phone is first activated. Your phone can hold up to three numbers. This means that your phone can be activated in three different service areas. For example, your phone could be activated in Dallas, Chicago, and New York. Each service area would assign a different phone number or account to your phone.
You must select a phone number for your home system. Only one phone number can be active at a time. If you travel outside your home system, you can choose another number. One phone number is usually enough if

your service provider has service or roaming agreements for each area in which you wish to use your phone. Contact your service provider for details.

Note: Phone number selection is a network dependent feature. Some networks may not support more than one number. Contact your service provider for availability and full details.

## Select the phone number

1 Press Menu 4-6-6 (Menu > Settings > Network services > Own number selection).
2 Scroll to the phone number you want to use and press Select.Note: The first phone number on this list is selected. You need at least one active number to make calls. You cannot change from one phone number to another during a call.

## - USE AUTOMATIC REDIAL

There are times when you may not be able to place a call (example: due to the high volume of traffic on the wireless netw ork). When the wireless network is busy or unavailable, Automatic redial instructs your phone to retry the call.

## ACTIVATE AUTOM ATIC REDIAL

1 Press Menu 4-2-1 (Settings $>$ Call settings $>$ Automatic redial).
2 Scroll to On and press Select.
If the system is busy, your phone makes three additional call attempts. If you want to stop the automatic redial process before the last attempt, press $\boldsymbol{6}$ or Quit.

Important: This feature does not automatically retry a number when the number you are calling is busy.

You can assign a name from your phone book to a 1-touch dial location, using your phone's keys 2 through 9. (The " 1 " key is used exclusively to dial your voice mailbox.) Once assigned, the phone number you associate with that key is dialed automatically when you press and hold the key.

## Assign a key to 1-touch dialing

1 Press Names, scroll to $\mathbf{1 - t}$ touch dialing and press Select.
2 Scroll to a number that has the message (empty) and press Assign.
3 Scroll to the name and number to which you want to assign this key and press Select. Repeat these steps as many times as necessary.
4 To call a number using 1-touch dialing, press and hold the appropriate key for a few seconds.

## Change 1-touch dialing numbers

You can change the 1 -touch dialing key assignments at any time.
1 Press Names, scroll to $\mathbf{1 - t o u c h}$ dialing and press Select.
2 Scroll to the key you want to change and press Options.
3 Scroll to Change and press Select.
4 Scroll through the phone book until you reach the new number you want to select and press Select.

## Erase 1-touch dialing numbers

You can erase 1-touch dialing key assignments at any time.
1 Press Names, scroll to $\mathbf{1 -}$ touch dialing and press Select.
2 Scroll to the key you want to erase and press Options.
3 Scroll to Erase and press Select.
4 Press OK to confirm.

[ 77 ]

Your phone allows you to create special sets of numbers known as touch tone strings which will dial a series of digits after a "wait" or a "pause." For example, you can program your phone to send your account number while you are banking by phone.
You must be in the w123 mode to enter these characters. Enter the numbers as usual. When you want to insert the special characters, press ${ }^{*}+$ repeatedly to switch among ${ }^{*},+, \mathrm{p}, \mathrm{w}$ characters.
$\square$ Note: Use caution when sending confidential information if voice privacy is not active.
p Creates a pause when a number is dialed. The numbers you enter after this special character are automatically sent as touch tones after a 2.5-second pause.
w Creates a wait when a number is dialed. This means that your phone waits for you to press $\propto$ before it sends the number as touch tones.

* Sends command strings to the netw ork. Contact your service provider for details.
+ Use this character as a prefix for dialing international numbers.

## Set manual touch tones

1 Press Menu 4-3-2-1 (Menu > Settings > Phone settings > Touch tones > Manual touch tones).
2 Select one of the following options, then press Select:

| Continuous | Sounds tone for as long as you press and hold a key. |
| :--- | :--- |
| Fixed | Sets the tone length to 0.1 second, regardless of how <br> long you press a key. |
| Off | Turns off the tones. No tones are sent. |

[78]

You can also set the length of each touch tone.
1 Press Menu 4-3-2-2 (Menu $>$ Settings $>$ Phone settings $>$ Touch tones > Touch tone length).
2 Use $\sim$ or $\triangle$ to scroll to Short or Long. Short sets the tone length to 0.1 second. Long sets the tone length to 0.5 second.
3 Press Select.

## Store touch tone strings

You can store touch tone strings the same way that you store names and numbers in your phone book. You can store an entire sequence of digits and send it as touch tones for frequently used strings of numbers.

## STORE TOUCH TONE STRINGS WITH PHONE NUM BERS

1 Enter the phone number that you want associated with a touch tone.
2 Enter the touch tone character where needed ( $p, w$, or *).
3 Enter the touch tone string.
4 Store the number as you normally would.

## SEND A TOUCH TONE STRING

1 Press Menu 4-3-2-1 (M enu $>$ Settings $>$ Phone settings $>$ Touch tones > Manual touch tones).
2 Make sure that the setting is not set to Off. If it is, scroll to one of the other options and press Select.
3 Then, during your call, press Options, scroll to Touch tonesand press Select.
4 Enter the touch tone string or recall the string from the phone book, and press Tones.

If you send touch tones while in the analog mode, be careful not to send confidential information.

## - SELECT A SYSTEM

Your phone can operate in residential, private, and public systems (such as your home system). You can choose how your phone selects a network to use. Your phone may not show the options described here. For information, contact your service provider.

## Search for a network

Press Menu 5 (Menu > System).
You have the following three options.

| Automatic | Your phone automatically searchesfor available networks <br> and chooses the appropriate one. Every time you turn on <br> your phone, it resets to Automatic. |
| :--- | :--- |
| Manual | The phone searches for networks and then shows a list <br> of the ones that are available. If an available network is <br> found, theword Available: appearson the screenfollowed <br> by the name of the network. To choose the network listed, <br> press OK. |
| New search | Your phone begins a new search for both private and <br> residential systems. When it finds the best system <br> available, the phone shows the system name. <br> If the phone doesn't find another system, the question <br> Perform an extended search? will appear. Press OK if <br> you wish to continue searching. |

Your phone is equipped with different security features that allow you to do the following:

- avoid making accidental calls
- prevent unauthorized users from changing certain feature settings on your phone
- restrict outgoing or incoming calls
- USE KEYGUARD

Keyguard disables your keypad to prevent accidental key presses.

LOCK THE KEYPAD
To lock the keys, press Menuthen ${ }^{*}+$.
UNLOCK THE KEYPAD
To unlock the keys, press Unlock then ${ }_{*}^{*}$.

Note: When Keyguard is on, calls may be possible to emergency numbers (for example, 911 or other official emergency number). Key in the emergency number and press $\boldsymbol{\lambda}$. The number is displayed only after you have keyed in its last digit.

[ 81 ]

## Answer a call while Keyguard is active

You can answer calls when Keyguard is activated by pressing Answeror T. If you are connected to a headset or loopset, press and hold $\boldsymbol{\sigma}$ to end the call.

## NOTES ABOUT KEYGUARD

- After you end the call, Keyguard automatically becomes active again.
- If you need the phone's lights while Keyguard is on, press the Power key to quickly switch the lights on for 15 seconds.
- Connecting your phone to a car kit automatically disables Keyguard.

## - UNDERSTAND THE SECURITY CODE

The Security code prevents unauthorized users from changing certain important feature settings on your phone. When the phone requires this code, it displays a prompt asking you to enter a Security code. The five-digit default Security code that comes with your phone is 12345. Nokia recommends that you change the default code immediately.

Note: If you enter an incorrect security codefive times in a row, the phone will not accept the correct code for 5 minutes.

## Change your security code

1 Press Menu 4-5-2 (Menu > Settings $>$ Security settings $>$ Change security code).
2 At the Security code prompt, enter your five- digit default security
code (12345) or your current security code and press OK.
3 At the Enter new security code prompt, enter your new five-digit security code and press OK.
4 At the Verify new security code prompt, enter your new security code again and press OK. The confirmation Security code changed appears.

Keep your security code secret and stored in a safe place away from your phone. If you have changed your security code and don't remember the new code, contact your service provider.

## - RESTRICT CALLS

You can create your own list of restrictions to restrict incoming and outgoing calls. To restrict the calls, you apply the appropriate restriction as desired. The maximum number of call restrictions you can define is ten. Before you define restrictions for outgoing calls, Add restriction is the only available option. After you use the Add restriction option to add at least one restriction, the following options become available:

- Select: Allows you to select call restrictions from the outgoing calls list.
- Add restriction: Allows you to add a new restriction.
- Edit: Allows you to edit an existing call restriction.
- Erase: Allows you to erase an existing call restriction.
$\square$ Note: When calls are restricted, calls may be possible to the emergency number programmed into your phone (for example, 911 or other official emergency number). For example, you could dial 911 and press

## Add a number to the call restriction list

1 Press Menu 4-5-1-1 (Menu > Settings $>$ Security settings $>$ Call restrictions $>$ Restrict outgoing calls).
2 Enter your security code, then press OK.
3 Scroll to Restrict outgoing calls, then press Select.
4 Scroll to Add restriction and press Select.

4 Scroll to Add restriction and press Select.

[ 84 ]

This section describes several special features, including transmission of business cards, downloading ringing tones, and setting the alarm clock.

## - USE THE ALARM CLOCK

The alarm clock feature is based on your phone's internal clock and sounds an alert at a time you specify. The alarm clock works even if you turn your phone off.

## Set the alarm clock

1 Press Menu 4-1-1 (Settings > Time settings > Alarm clock).
2 Enter the alarm time in hh:mm format, then press OK.
3 Select either am or pm, then press Select.
Step 3 is necessary only if you have selected $\mathbf{a m} / \mathbf{p m}$ format.

## Respond to the alarm

At the time of the alarm, the phone sounds an alert tone. Pressing Stop or the $\boldsymbol{\sigma}$ key stops the alarm from sounding, and returns you to the Start screen.

## SNOOZING

There are several ways you can enable the Snooze feature:
1 Press the Snooze selection key.
2 Press any key except $\boldsymbol{\sigma}$.
3 Allow the alarm to sound for one minute.
Once snooze is enabled, the alarm will sound again in ten minutes. If you press Stop or the key while snoozing, the alarm will be turned off.

■
Note: Do not press Yes when wireless phone use is prohibited or when it may cause interference or danger.

## Turn off the alarm clock

1 Press Menu 4-1-1 (Settings > Time settings > Alarm clock).
2 Scroll to Off and pressSelect.

## - SEND AND RECEIVE BUSINESS CARDS

Your phone can send or receive electronic business cards consisting of a name, phone number and e-mail. You can save received business cards in your phone book.

## Send a business card

1 Find the name in your phone book.
2 Press Options and scroll to Send bus. card.
3 Press Select.
4 Enter or recall the phone number to which you want to send the business card and press Send.

[ 87 ]

With prepaid service, you buy wireless network services in advance. Your phone works the same way it did before, with some additional features. Prepaid service may not be available from your wireless service provider. Contact your service
 provider for details.

## - MANAGE PREPAID SERVICE

After you sign up with your service provider for prepaid service, you can activate the Prepaid menu in your phone. This menu appears on your screen only if you've activated the service.

## ACTIVATE PREPAID

To activate prepaid services, enter the following sequence:

DEACTIVATE PREPAID
To deactivate prepaid services, enter the following sequence:

USE THE MENU

- To use the prepaid menu, press Menu and then press to go immediately to Prepaid.
- Once you select the prepaid menu, press $\triangle$ or $\triangle$ to scroll through prepaid options.

[ 89 ]

You can check the balance remaining in your prepaid account. Contact your service provider for the access number used to check the balance.

Note: When no more charging units or currency units are left, calls may only be possible to the emergency number programmed into your phone (for example, 911 or other official emergency number).
1 Press Menu 7-1 (Menu > Prepaid > Check account balance).
2 At Balance number, enter the balance number and press OK.
If you have already saved the balance number under Save access phone numbers, the phone will initiate a call to the saved number.
3 The phone calls the balance number. Follow the prompts you hear from the operator.

## - ADD MONEY TO YOUR ACCOUNT

Call the access number your service provider gave you to add money to your account. For convenience, see For convenience, see "Save your access numbers" on page91.
1 Press Menu 7-2 (Menu > Prepaid > Add money to account).
2 At Replenish no., enter the replenish number and press OK.
If you have already saved the replenish number under Save access phone numbers, the phone will initiate a call to the saved number.
3 Follow the prompts you hear from the operator.

[ 90 ]

You can call the customer service number for your prepaid account. Contact your service provider for the access numbers.
1 Press Menu 7-3 (Menu > Prepaid > Call customer service).
2 Enter the customer service number your service provider gave you, then press OK.
If you have already saved the customer service number under Save access phone numbers, the phone will initiate a call to the saved number.
The phone calls the customer service number. Follow the prompts you hear from the operator.

## - SAVE YOUR ACCESS NUMBERS

You can check your prepaid balance, add money to your account, and call customer service. To do that, you first need to save the correct access numbers in your phone. Contact your service provider for the access numbers.

1 Press Menu 7-4 (Menu > Prepaid > Save access phone numbers).
2 At Save access phone numbers, press Select.
3 Scroll to Replenish phone number, press Select, enter the replenish number your service provider gave you, then press OK.
4 Scroll to Balance phone number, press Select.
5 Enter the balance number your service provider gave you, then press OK.
6 Scroll to Customer service phone number, then press Select.
7 Enter the customer service number your service provider gave you, then press $\mathbf{O K}$.

You can use your phone for communication and some serious fun. Your phone offers three games: Snake II, Space impact, and Pairs II.

Note: Your phone must be switched on to use this function. Do not switch on the phone when wireless phone use is prohibited or when it may cause interference or danger.

## - START A NEW GAME

1 Press Menu 6 (Menu > Games) and press Select.
2 Scroll to the desired game and press Select.
3 Select New game, and press Select.
Additional options under each game include:

| Option | What it does |
| :--- | :--- |
| Continue | Start a new game. |
| New Game | Choose the game's difficulty level. |
| Level <br> (Snake II and Pairs II only) | Choose among different maze <br> designs. |
| Mazes <br> (Snake II only) | Display the top score. |
| Top score | Learn how to play the game. |
| Instructions |  |

[93]

| Option | What it does |
| :--- | :--- |
| Time trial (Pairs II only) | To advance to the next level, you <br> must pair up all tiles before the <br> dynamite fuse runs out. |
| Puzzle (Pairs II only) | Reveal pictures to find pairs with as <br> few tries as possible. |

Please visit Nokia games services on the Internet for more hints and tips at www.nokia.com.

## GAME SETTINGS

Game sounds and lights can be turned on or off. To access the settings menu press Menu > Games > Settings.

## - SNAKE II

Feed the snake with as many goodies as possible and watch it grow. Press Menu 6-1.
To turn the snake toward the food, press 2abc , (4ami, mab and 8 tuv. The longer the snake's tail grows, the higher your score. You can choose to have a clear field, or select from five different mazes. If the snake runs into its own tail or the surrounding wall, found in one of the maze levels, the game is over.

## - SPACE IM PACT

Use your weapons to survive alien attacks. When you defeat all the enemies, you progress to the next level. Press Menu 6-2.

To move up and down, press 8 tw and $0 \rightarrow$.
To move to the left and right, press ${ }_{+}{ }^{+}$and .
To fire the main weapons, press ${ }^{1} \mathrm{a}$ or or $\mathrm{det}^{3}$.
To fire the bonus weapons, press (40nf or mab .

## [ 94 ]

This section provides information about your phone's batteries, accessories, chargers, safety guidelines and technical information. Be aware that the information in this section is subject to change as batteries, chargers, and accessories change.

## - BATTERY STATEM ENTS

## Charging and Discharging

Your phone is powered by a rechargeable battery.
Note that a new battery's full performance may be achieved only after two or three complete charge and discharge cycles!
The battery can be charged and discharged hundreds of times but it will eventually wear out. When the operating time (talk time and standby time) is noticeably shorter than normal, it is time to buy a new battery.

Use only batteries approved by the phone manufacturer and recharge your battery only with the chargers approved by the manufacturer. Unplug the charger when not in use. Do not leave the battery connected to a charger for longer than a week, since overcharging may shorten its lifetime. If left unused, a fully charged battery will discharge itself over time.
Temperature extremes can affect the ability of your battery to charge; allow it to cool down or warm up first.
For good operation times with NiM h batteries, discharge the battery from time to time by leaving your phone switched on until it turns itself off (or by using the battery discharge facility of any approved accessory available for your phone). Do not attempt to discharge the battery by any other means.
Use the battery only for its intended purpose.
Never use any charger or battery which is damaged or worn out.

$$
\text { [ } 96 \text { ] }
$$

EN1260.2_Sept_02.book Page 97 Friday, September 6, 2002 4:39 PM

## Reference information

Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object (coin, clip, or pen) causes direct connection of the + and - terminals of the battery (metal strips on the battery), for example, when you carry a spare battery in your pocket or purse. Short-circuiting the terminals may damage the battery or the connecting object.
Leaving the battery in hot or cold places, such as in a closed car in summer or winter conditions, will reduce the capacity and lifetime of the battery. Always try to keep the battery between $59^{\circ} \mathrm{F}$ and $77^{\circ} \mathrm{F}\left(15^{\circ} \mathrm{C}\right.$ and $\left.25^{\circ} \mathrm{C}\right)$. A phone with a hot or cold battery may temporarily not work, even when the battery is fully charged. Batteries' performance is particularly limited in temperatures well below freezing.

Do not dispose of batteries in a fire!
Dispose of batteries according to applicable local regulations (for example, recycling). Do not dispose of as household waste.

Note: For information on how to charge and recharge your battery, refer to "Important battery information" on pagel1.

## - PROPER CARE AND M AINTENANCE

Your phone is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you to fulfill any warranty obligations and to enjoy this product for many years:

- Keep the phone and all its parts and accessories out of the reach of small children.
- Keep the phone dry. Precipitation, humidity and all types of liquids or moisture can contain minerals that will corrode electronic circuits.
- Do not use or store the phone in dusty, dirty areas. Its moving parts can be damaged.
- Do not store the phone in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.

 temperature), moisture can form inside and may damage electronic circuit boards.
- Do not attempt to open the phone. Nonexpert handling may damage it.
- Do not drop, knock, or shake the phone. Rough handling can break internal circuit boards.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the phone.
- Do not paint the phone. Paint can clog the moving parts and prevent proper operation.
- Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate regulations governing radio devices.
All of the above suggestions apply equally to your phone, battery, charger or any accessory. If any of them are not working properly, take them to your nearest qualified service facility. The personnel there will assist you, and if necessary, arrange for service.

## - IM PORTANT SAFETY INFORM ATION

This section provides additional safety information. A brief overview of safety can be found in "Safety first" on pagel.

## Traffic safety

Do not use a hand-held telephone while driving a vehicle. Always secure the phone in its holder; do not place the phone on the passenger seat or where it can break loose in a collision or sudden stop.

Remember road safety always comes first!

## [ 98 ]

Important:This phone, like any wireless phone, operates using radio signals, wireless, and landline networks as well as userprogrammed functions. Because of this, connections in all conditions cannot be guaranteed. Therefore you should never rely solely upon any wireless phone for essential communications (for example, medical emergencies).
Emergency calls may not be possible on all wireless phone networks or when certain network services and/or phone features are in use. Check with local service providers.

## To make an emergency call:

1 If the phone is not on, switch it on. Check for adequate signal strength.
2 Press $\boldsymbol{\sigma}$ as many times as needed (for example, to exit a call, to exit a menu, etc.) to clear the display and ready the phone for calls.
3 Key in the emergency number for your present location (for example, 911 or other official emergency number). Emergency numbers vary by location.
4 Press the $\lambda$ key.
If certain features are in use, (keyguard, etc.) you may first need to turn those features off before you can make an emergency call. Consult this user guide and your local wireless service provider.
When making an emergency call, remember to give all the necessary information as accurately as possible. Remember that your wireless phone may be the only means of communication at the scene of an accident do not end the call until given permission to do so

## [ 104 ]

This section provides information about the phone's batteries, chargers, and accessories. Be aware that the information in this section is subject to change as the batteries, chargers, and accessories change.
Check the model number of any charger before use with this phone. This device is intended for use when supplied with power from an ACP-7U, ACP-8U, ACP-12U, LCH- 9 charger.

Warning: Use only Nokia original accessories, or batteries, chargers, and accessories approved by Nokia, for use with this Nokia phone model. The use of any other types may invalidate any approval or warranty applying to the phone, and may be dangerous.
For availability of approved accessories, please check with your dealer.
When you disconnect the power cord of any accessory, grasp and pull the plug, not the cord.
When you are not using a charger, disconnect it from the power source.
When the battery is running out of power and your phone only has a few minutes of talk time remaining, a warning tone sounds and the Battery low message appears briefly. When no more talk time is left, a warning tone is sounded and the phone switches itself off.

## Practical rules for accessory operation

- Keep all accessories out of reach of small children.
- When you disconnect the power cord of any accessory, grasp and pull the plug, not the cord.
- Check regularly that any vehicle-installed accessories are mounted and are operating properly.

## Batteries

This section provides information about the phone's battery. Be aware that the information in this section is subject to change.

Note: Dispose of used batteries in accordance with any local regulations.
The tables shown in this section provide information about the batteries that are available for your phone, charging times with the Rapid Travel Charger (ACP-8U and ACP-12U), the Standard Travel Charger (ACP-7U), talk times, and standby times. Consult your service provider for more information.

## Charging Times

The charging times listed below are approximate.

| Battery option | ACP- 7U <br> Charger | ACP- 8U <br> Charger | ACP- 12U <br> Charger |
| :--- | :---: | :---: | :---: |
| BMC-3 NiMH Battery <br> 900 mAh | up to <br> 4 h | up to <br> 2 h | up to |
| 1 h 40 m |  |  |  |

If you want to enhance your phone's functionality, a range of accessories is available for you. You can select any of these items to help accommodate your specific communication needs. For availability of these and other accessories, contact your service provider.

Warning: Use only Nokia original
accessories, or batteries, chargers and accessories approved by Nokia, for use with this Nokia phone model. The use of any other types may invalidate any approval or warranty applying to the phone, and may be dangerous.

## 900 mAh NiMH Battery (BMC-3)

Provides up to 2 - 5 hours of digital talk time and up to 6.5-15 days of digital standby time. Provides up to $1-2$ hours of analog talk time and up to $1-2$ days of analog standby time.

Note: Operation times are estimates and may vary depending on network conditions, charging and phone use.

## 950 mAh Li- ion Battery (BLC- 2)

Provides up to 2.5-5 hours of digital talk time and up to $7-16$ days of digital standby time. Provides up to 1-2 hours of analog talk time and up to 1 - 2 days of analog standby time.

Note: Operation times are estimates and may
 vary depending on network conditions, charging and phone use.

## Rapid Travel Charger (ACP-8U)

The Rapid Travel Charger is a lightweight ( 100 g ) and durable AC charger. Calls can be made during charging, even with a fully discharged battery.
To use the Rapid Travel Charger (ACP-8), plug it into a standard 120 V or 220 V AC wall outlet, and connect the lead from the charger to the base of your phone.

Approximate charging times for discharged batteries are shown in "Charging Times" on page106.

Rapid Travel Charger (ACP-12U) The Rapid Travel Charger is a lightweight and durable AC charger. Calls can be made during charging, even with a fully discharged battery. To use the Rapid Travel Charger (ACP-12U), plug it into a standard 120 V or 220 V AC wall outlet, and connect the lead from the charger to the base of your phone.
[ 109 ]

## TTY/TDD Adapter (HDA-9)

The TY/TDD Adapter is a Nokia accessory that allows you to connect your mobile phone to a
Telecommunications Device for the Deaf (TTY/TDD) to make a call in digital mode.

## WHAT YOU'LL NEED

In addition to the Nokia phone, you'll need the following for TTY/TDD
 communication.

- A TTY/TDD device that is "cellular ready" or "cellular compatible"
- A cable for connecting the TY/TDD to your phone, usually supplied by the manufacturer of the TTY/TDD device.
- The TTY/TDD Adapter (HDA-9), which can be purchased separately as an accessory at www.nokia.com

## Express Car Kit (CARK 125)

This car kit provides charging and handsfree functionality. With excellent audio quality, the car kit is easy to use and is compatible with 12 V systems.
The Express Car Kit Includes a holder, plug-in handsfree, external microphone.

## - FREQUENTLY ASKED QUESTIONS

This section lists and answers the questions phone users most frequently ask. Some of the answers tell you to use menu shortcuts. For a complete listing of these shortcuts, refer to "M enu shortcuts" on page25.
Q. What is my security code?
A. The default security code is 12345 . However, Nokia recommends that you change this code immediately. Certain features can be used only after the correct security code has been successfully entered.
Q. How do l lock and unlock the keypad?
A. You can lock the keypad by pressing Menu > ${ }^{*}+$. To unlock the keypad press Unlock and then press * $_{+}$.
The term Keyguard is also used in connection with this feature.
Q. How do I make the ringing louder?
A. Press Menu 3 (Profiles), and scroll through the list of profiles until you find the one for which you want to set the ringing volume. Then press Options.

- Highlight Customize and press Select.
- Scroll to Ringing volume, and then press Select.
- Scroll through the options to find the volume level you want and press Select.
Q. How do I change the ringing tone?
A. Press Menu 3 (Profiles) and scroll through the list of profiles until you find the one for which you want to set the ringing tone. Then press Options.
- Highlight Customize and press Select.
- Scroll to Ringing tone, and then press Select.
- Scroll through the options. After you hear the tone you want to use, press Select.

$$
\text { [ } 115 \text { ] }
$$

Q. How do I store my voice mailbox number?
A. Press Menu 1-8-2 (Messages > Voice messages > Voice mailbox number). Enter your voice mailbox phone number, and press OK. The screen tells you that the number is saved.
This voice mailbox number is valid unless your phone number changes. If your phone number changes, you will have to save a new voice mailbox number.
Q. How do I call my voice mailbox number (retrieve voice messages)?
A. When your phone alerts you to new voice messages, press Listen and follow the instructions on the phone. If you'd rather listen to your messages later, press Exit.
To listen to your voice messages at a later time, perform one of the following actions:

- Press and hold ${ }^{1}$. .
- Press M enu 1-8-1 (Messages > Voice messages > Listen to voice messages. Follow the voice prompts to review your messages.
Q. How do I redial the last-dialed number?

A. Press $\boldsymbol{\lambda}$ twice
Q. How do I assign a key to 1 -touch dialing?
A. Press Names and scroll to 1 -touch dialing.

Press Select.
Use $\triangle$ or $\triangle$ to scroll to the first number that includes the message (empty) and press Assign.
Retrieve the name/number you want to assign this key and press Select.
Repeat these steps as many times as necessary.
Q. How do I find out the amount of memory I have used in my phone?
A. Press Names and scroll to Options.

| Business card | A business card is the same as an entry in the phone |

# Nokia One-Year Limited Warranty 

Nokia Inc. ("Nokia") warrants that this cellular phone ("Product") is free from defects in material and workmanship that result in Product failure during normal usage, according to the following terms and conditions:
1 The limited warranty for the Product extends for ONE (1) year beginning on the date of the purchase of the Product. This one year period is extended by each whole day that the Product is out of your possession for repair under this warranty.
2 The limited warranty extends only to the original purchaser ("Consumer") of the Product and is not assignable or transferable to any subsequent purchaser/end-user.
3 The limited warranty extends only to Consumers who purchase the Product in the United States of America.
4 During the limited warranty period, Nokia will repair, or replace, at Nokia's sole option, any defective parts, or any parts that will not properly operate for their intended use with new or refurbished replacement items if such repair or replacement is needed because of product malfunction or failure during normal usage. No charge will be made to the Consumer for any such parts. Nokia will also pay for the labor charges incurred by Nokia in repairing or replacing the defective parts. The limited warranty does not cover defects in appearance, cosmetic, decorative or structural items, including framing, and any non-operative parts. Nokia's limit of liability under the limited warranty shall be the actual cash value of the Product at the time the Consumer returns the Product for repair, determined by the price paid by the Consumer for the Product less a reasonable amount for usage. Nokia shall not be liable for any other losses or damages. These remedies are the Consumer's exclusive remedies for breach of warranty.

## A Guide to Safe and Responsible Wireless Phone Use

Tens of millions of people in the U.S. today take advantage of the unique combination of convenience, safety and value delivered by the wireless telephone. Q uite simply, the wireless phone gives people the powerful ability to communicate by voice--almost anywhere, anytime--with the boss, with a client, with the kids, with emergency personnel or even with the police. Each year, A mericans make billions of calls from their wireless phones, and the numbers are rapidly growing. But an important responsibility accompanies those benefits, one that every wireless phone user must uphold. When driving a car, driving is your first responsibility. A wireless phone can be an invaluable tool, but good judgment must be exercised at all times while driving a motor vehicle--whether on the phone or not.
The basic lessons are ones we all learned as teenagers. Driving requires alertness, caution and courtesy. It requires a heavy dose of basic common sense---keep your head up, keep your eyes on the road, check your mirrors frequently and watch out for other drivers. It requires obeying all traffic signs and signals and staying within the speed limit. It means using seatbelts and requiring other passengers to do the same.
But with wireless phone use, driving safely means a little more. This brochure is a call to wireless phone users everywhere to make safety their first priority when behind the wheel of a car. Wireless telecommunications is keeping us in touch, simplifying our lives, protecting us in emergencies and providing opportunities to help others in need.
When it comes to the use of wireless phones, safety is your most important call.

## Wireless Phone "Safety Tips"

Below are safety tips to follow while driving and using a wireless phone which should be easy to remember.
1 Get to know your wireless phone and its features such as speed dial and redial. C arefully read your instruction manual and learn to take advantage of valuable features most phones offer, including automatic redial and memory. Also, work to memorize the phone keypad so you can use the speed dial function without taking your attention off the road.
2 When available, use a hands free device. A number of hands free wireless phone accessories are readily available today. Whether you choose an installed mounted device for your wireless phone or a speaker phone accessory, take advantage of these devices if available to you.
3 Position your wireless phone within easy reach. M ake sure you place your wireless phone within easy reach and where you can grab it without removing your eyes from the road. If you get an incoming call at an inconvenient time, if possible, let your voice mail answer it for you.
4 Suspend conversations during hazardous driving conditions or situations. Let the person you are speaking with know you are driving; if necessary, suspend

the call in heavy traffic or hazardous weather conditions. R ain, sleet, snow and ice can be hazardous, but so is heavy traffic. A s a driver, your first responsibility is to pay attention to the road.
5 Do not take notes or look up phone numbers while driving. If you are reading an address book or business card, or writing a "to do" list while driving a car, you are not watching where you are going. It's common sense. D on't get caught in a dangerous situation because you are reading or writing and not paying attention to the road or nearby vehicles.
6 Dial sensibly and assess the traffic; if possible, place calls when you are not moving or before pulling into traffic. Try to plan your calls before you begin your trip or attempt to coincide your calls with times you may be stopped at a stop sign, red light or otherwise stationary. But if you need to dial while driving, follow this simpletip--dial only a few numbers, check the road and your mirrors, then continue.
7 Do not engage in stressful or emotional conversations that may be distracting. Stressful or emotional conversations and driving do not mix--they are distracting and even dangerous when you are behind the wheel of a car. M ake people you are talking with aw are you are driving and if necessary, suspend conversations which have the potential to divert your attention from the road.
8 Use your wireless phone to call for help. Your wireless phone is one of the greatest tools you can own to protect yourself and your family in dangerous situations--with your phone at your side, help is only three numbers away. Dial 9-1-1 or other local emergency number in the case of fire, traffic accident, road hazard or medical emergency. Remember, it is a free call on your wireless phone!
9 Use your wireless phone to help others in emergencies. Y our wireless phone provides you a perfect opportunity to be a "Good Samaritan" in your community. If you see an auto accident, crime in progress or other serious emergency where lives are in danger, call 9-1-1 or other local emergency number, as you would want others to do for you.
10 Call roadside assistance or a special wireless non-emergency assistance number when necessary. Certain situations you encounter while driving may require attention, but are not urgent enough to merit a call for emergency services. But you still can use your wireless phone to lend a hand. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number.

C areless, distracted individuals and people driving irresponsibly represent a hazard to everyone on the road. Since 1984, the Cellular T elecommunications Industry A ssociation and the wireless industry have conducted educational outreach to inform wireless phone users of their responsibilities as safe drivers and good citizens. As we approach a new century, more and more of us will take advantage of the benefits of wireless telephones. And, as we take to the roads, we all have a responsibility to drive safely.

The wireless industry reminds you to use your phone safely when driving.

## Consumer Update on Wireless Phones

U.S. Food and Drug Administration

## 1. Do wireless phones pose a health hazard?

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, how ever, that wireless phones are absolutely safe. Wireless phones emit low levels of radiofrequency energy (RF) in the microw ave range while being used. They also emit very low levels of RF when in the stand-by mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. M any studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

## 2. What is FDA's role concerning the safety of wireless phones?

Under the law, FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. H owever, the agency has authority to take action if wireless phones are shown to emit radiofrequency energy (RF) at a level that is hazardous to the user. In such a case, FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace or recall the phones so that the hazard no longer exists.
Although the existing scientific data do not justify FDA regulatory actions, FDA has urged the wireless phone industry to take a number of steps, including the following:

- Support needed research into possible biological effects of RF of the type emitted by wireless phones;
- Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and
- Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.
FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group:
- N ational Institute for O ccupational Safety and H ealth
- Environmental Protection A gency
- Federal Communications Commission
- O ccupational Safety and H ealth Administration
- $N$ ational T elecommunications and Information Administration

The N ational Institutes of H ealth participates in some interagency working group activities, as well.
FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. FCC relies on FDA and other health agencies for safety questions about wireless phones. FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones. Base stations are thus not the subject of the safety questions discussed in this document.

## 3. What kinds of phones are the subject of this update?

The term wireless phone refers here to hand-held wireless phones with built-in antennas, often called cell mobile or PCS phones. These types of wireless phones can expose the user to measurable radiofrequency energy (RF) because of the short distance between the phone and the user's head. These RF exposures are limited by Federal Communications Commission safety guidelines that were developed with the advice of FDA and other federal health and safety agencies. When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person's RF exposure decreases rapidly with increasing distance from the source. The so-called cordless phones; which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures far below the FCC safety limits.

## 4. What are the results of the research done already?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. A nimal experiments investigating the effects of radiofrequency energy ( RF ) exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, how ever, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. H ow ever, many of thestudies that show ed increased tumor development used animals that had been genetically engineered or treated with cancer-causing chemicals so as to be predisposed to develop cancer in the absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we don't know with certainty what the results of such studies mean for human health.
Three large epidemiology studies have been published since D ecember 2000. Betw een them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuroma, tumors of the brain or salivary gland, leukemia, or other cancers. N one of the studies demonstrated the existence of any harmful health effects from wireless phone RF exposures. However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.

## 5.What research is needed to decide whether RF exposure from wireless

 phones poses a health risk?A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. H owever, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but 10 or more years follow-up may be needed to provide answers about some health effects, such as cancer. This is because the interval betw een the time of exposure to a cancer-causing agent and the time tumors develop - if they do - may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual R F exposure during day-to-day use of wireless phones. $M$ any factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.

## 6. What is FDA doing to find out more about the possible health effects

 of wireless phone RF?FDA is working with the U.S. N ational T oxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of exposure to radiofrequency energy (RF).

FDA has been a leading participant in the W orld H ealth O rganization International Electromagnetic Fields (EM F) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The Project has also helped develop a series of public information documents on EM F issues.
FDA and the Cellular T elecommunications \& Internet A ssociation (CTIA) have a formal Cooperative R esearch and D evelopment A greement (CRADA) to do research on wireless phone safety. FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through contracts to independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.
7. How can I find out how much radiofrequency energy exposure I can get by using my wireless phone?
All phones sold in the United States must comply with Federal Communications Commission (FCC) guidelines that limit radiofrequency energy (RF) exposures. FCC established these guidelines in consultation with FDA and the other federal health and safety agencies. The FCC limit for R F exposure from wireless telephones is set at a Specific A bsorption R ate (SAR ) of 1.6 watts per kilogram ( $1.6 \mathrm{~W} / \mathrm{kg}$ ). The FCC limit is consistent with the safety standards developed by the Institute of Electrical and Electronic Engineering (IEEE) and the $N$ ational Council on $R$ adiation Protection and $M$ easurement. The exposurelimit takes into consideration the body's ability to remove heat from the tissues that absorb energy from the wireless phone and is set well below levels known to have effects.
$M$ anufacturers of wireless phones must report the RF exposure level for each model of phone to the FCC. TheFCC w ebsite (http://www.fcc.gov/oet/rfsafety) gives directions for locating the FCC identification number on your phone so you can find your phone's RF exposure level in the online listing.

## 8. What has FDA done to measure the radiofrequency energy coming from wireless phones?

The Institute of Electrical and Electronic Engineers (IEEE) is developing a technical standard for measuring the radiofrequency energy ( $R F$ ) exposure from wireless phones and other wireless handsets with the participation and leadership of FDA scientists and engineers. The standard, Recommended Practice for Determining the Spatial-Peak Specific Absorption R ate (SAR ) in the H uman Body Due to W ireless Communications Devices: Experimental T echniques, sets forth the first consistent test methodology for measuring the rate at which R F is deposited in the heads of wireless phone users. The test method uses a tissue-simulating model of the human head. Standardized SAR test methodology is expected to greatly improve the consistency of measurements made at different laboratories on the same phone. SAR is the measurement of the amount of energy absorbed in tissue, either by the whole body or a small part of the body. It is measured in watts/kg (or milliwatts/g) of matter. This measurement is used to determine whether a wireless phone complies with safety guidelines.

## 9. What steps can I take to reduce my exposure to radiofrequency energy from my wireless phone?

If there is a risk from these products--and at this point we do not know that there is--it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to radiofrequency energy (RF). Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure.

If you must conduct extended conversations by wireless phone every day, you could place more distance betw een your body and the source of the RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna.
A gain, the scientific data do not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

## 10. What about children using wireless phones?

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to radiofrequency energy (RF), the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and increasing the distance betw een the user and the RF source will reduce R F exposure. Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United K ingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.
11. What about wireless phone interference with medical equipment? R adiofrequency energy (RF) from wireless phones can interact with some electronic devices. For this reason, FDA helped develop a detailed test method to measure electromagnetic interference (EM I) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the A ssociation for the Advancement of M edical instrumentation (AAM I). The final draft, a joint effort by FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EM I. FDA has tested hearing aids for interference from handheld wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless phones so that no interference occurs when a person uses a compatible phone and a accompanied hearing aid at the same time. This standard was approved by the IEEE in 2000
FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, FDA will conduct testing to assess the interference and work to resolve the problem.

## 12. Where can I find additional information?

For additional information, please refer to the following resources:

- FDA web page on wireless phones
