

**ACB:**

Please explain why the maximum SAR value in the user manual does not match the SAR value in the test report.

**Nokia:**

Answer: the SAR value in the User Manual is the highest SAR value we have tested. As the SAR value tested in the initial certification is higher (1.19 W/kg), we use this higher value in the User Manual.

This model (RH-126) is certified under two FCC IDs; QTLRH-126 and QTLRH-126X.
