

Nokia 6086 User Guide Update

Additional information about the Nokia 6086 phone is described in this update. For complete information about other phone features and important safety and maintenance information, refer to your Nokia 6086 User Guide.

■ Hearing aid compatibility

Your mobile device model complies with FCC rules governing hearing aid compatibility. These rules require an M3 microphone or higher value. The M value, shown on the device box, refers to lower radio frequency (RF) emissions. A higher M value generally indicates that a device model has a lower RF emissions level, which may improve the likelihood that the device will operate with certain hearing aids. Some hearing aids are more immune than others to interference. Please consult your hearing health professional to determine the M rating of your hearing aid and whether your hearing aid will work with this device. More information on accessibility can be found at www.nokiaaccessibility.com.
