Safety

Read these simple guidelines. Not following them may be dangerous or illegal. Read the complete user guide for further information.

SWITCH OFF IN RESTRICTED AREAS

Switch the device off when mobile phone use is not allowed or when it may cause interference or danger, for example, in aircraft, near medical equipment, fuel, chemicals, or blasting areas.

ROAD SAFETY COMES FIRST

Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

INTERFERENCE

All wireless devices may be susceptible to interference, which could affect performance.

OUALIFIED SERVICE

Only qualified personnel may install or repair this product.

CHARGERS AND OTHER ACCESSORIES

Use only chargers and other accessories approved by Nokia for use with this device. Do not connect incompatible products.

KEEP YOUR DEVICE DRY

Your device is not waterresistant. Keep it dry.

GLASS PARTS

The front cover of the device is made of glass. This glass can break if the device is dropped on a hard surface or receives a substantial impact. If the glass breaks, do not touch the glass parts of the device or attempt to remove the broken glass from the device. Stop using the device until the glass is replaced by qualified service personnel.

PROTECT YOUR HEARING

Listen to a headset at a moderate level, and do not hold the device near your ear when the loudspeaker is in use.

Get started

Keys and parts

Top

- 1 Micro-USB connector
- 2 Nokia AV connector (3.5 mm)
- 3 Power/Unlock/Lock key

Front

- 1 Earpiece
- 2 Menu key

Back

- 1 Camera flash
- 2 Microphones
- 3 Camera lens

Sides

- 1 Memory card slot
- 2 SIM card slot
- 3 Volume/Zoom key
- 4 Camera key 👩
- 5 Loudspeaker

Bottom

1 Microphone

Antenna locations

Avoid touching the antenna area unnecessarily while the antenna is transmitting or receiving. Contact with antennas affects the communication quality and may cause a higher power level during operation and may reduce the battery life.

Headset

You can connect a compatible headset or compatible headphones to your device.

Change the volume of a call, song, or video

Use the volume keys.

You can adjust the volume during a call or when an application is active.

The built-in loudspeaker allows you to speak and listen from a short distance without having to hold the device to your ear.

Activate or deactivate the loudspeaker during a call

Select or .

Lock or unlock the keys and screen

To avoid accidentally making a call when your device is in your pocket or bag, lock the keys and screen of your device.

To lock the keys and screen, briefly press the power key.

To unlock the keys and screen, press the menu key or the power key, and select **Unlock**.

Set the keys and screen autolock delay

- 1 Select Menu > Settings and Phone > Display > Screen/keylock time-out.
- Define how long your device waits before the screen and keys lock automatically.

Insert or remove the SIM card

Important: Do not use a mini-UICC SIM card, also known as a micro-SIM card, a micro-SIM card with an adapter, or a SIM card that has a mini-UICC cutout (see figure) in this device. A micro SIM card is smaller than the standard SIM card. This device does not support the use of micro-SIM cards and use of incompatible SIM cards may damage the card or the device, and may corrupt data stored on the card.

Do not attach any stickers to your SIM card.

Insert the SIM card

- 1 Press open the cover of the SIM card slot.
- 2 Pull out the SIM card holder.

- 3 Make sure the contact area is facing up, and place the SIM card in the holder.
- 4 Insert the SIM card holder back into the device.

Remove the SIM card

- Press open the cover of the SIM card slot.
- Pull out the SIM card holder.
- 3 Remove the SIM card.

Insert or remove the memory card

Use only compatible memory cards approved by Nokia for use with this device. Incompatible cards may damage the card and the device and corrupt data stored on the card.

Do not attach any stickers to your memory card.

Insert the memory card

- Press open the cover of the memory card slot.
- 2 Pull out the memory card holder.

- 3 Make sure the contact area is facing up, and insert the memory card into the holder.
- 4 Insert the memory card holder back into the device.

Remove the memory card

- I If your device is switched on, first press and hold the power key, and select Remove memory card.
- 2 Press open the cover of the memory card slot.
- 3 Pull out the memory card holder.
- 4 Remove the memory card.

Charging About the battery

Your device has an internal, nonremovable, CTIA 1725-certified rechargeable battery. Use only Nokia approved chargers designated for this device. You can also use a compatible USB data cable to charge your device.

Do not attempt to remove the battery from the device. Take the device to the nearest authorised service facility for replacement of the battery.

You can use USB charging when a wall outlet is not available. Data can be transferred while charging the device. The efficiency of USB charging power varies significantly, and it may take a long time for charging to start and the device to start functioning.

Only connect your device to products that have a USB-IF logo or have completed the USB-IF compliance program.

Authorised retail points may also offer a battery replacement service.

When your device is low on power, it goes into power save mode. To deactivate

power save mode, press and hold the power key, and select **Deactivate power saving**. When power save mode is activated, you may not be able to modify the settings of certain applications.

Charge the battery

Your battery has been partially charged at the factory, but you may need to recharge it before you can switch on your device for the first time

If the device indicates a low charge, do the following:

- Connect the charger to a wall outlet.
- 2 Connect the charger to the device.
- 3 When the device indicates a full charge, disconnect the charger from the device, then from the wall outlet.

You do not need to charge the battery for a specific length of time, and you can use the device while it is charging.

If the battery is completely discharged, it may take several minutes before the charging indicator appears on the display or before any calls can be made.

If the battery has not been used for a long time, to begin charging, you may need to connect the charger, then disconnect and reconnect it.

Tip: You can also use a compatible USB charger to charge your battery.

Charge the battery over USB

Battery low, but you don't have a charger with you? You can use a compatible USB cable to connect to a compatible device, such as a computer.

To avoid breaking the charger connector, be careful when connecting or disconnecting the charger cable.

If connected to a computer, you can synchronise your device while charging.

Charging over USB can take longer to start, and may not work if you connect through a non-powered USB hub. Your device

charges more quickly when connected to a wall outlet.

Switch the device on or off

Switch on

Press and hold the power key / until the device vibrates.

Switch off

Press the power key \mathcal{D} , and select **Switch off!**.

Use your device for the first time

Your device guides you through the initial setup when you insert your SIM card and switch your device on for the first time. To use all of Nokia's Ovi services, create a Nokia account. You can also copy your contacts and other content from your previous device, and subscribe to receive helpful tips and tricks.

To create a Nokia account, you need an internet connection. For information about data transmission charges, contact your service provider. If you can't connect to the internet, you can create an account later.

Tip: To create and manage your Nokia account on the internet, go to www.ovi.com.

If you already have a Nokia account, sign in.

Tip: Forgotten your password? You can request it to be sent to you in a mail or text message.

Use the Phone switch application to copy your content, such as:

- Contacts
- Messages
- Pictures and videos

Copy contacts or pictures from your old device

Want to copy important information from your previous compatible Nokia device and start using your new device quickly? Use the Phone switch application to copy, for example, contacts, calendar entries, and pictures to your new device, free of charge.

Select Menu > Applications > Tools > Phone setup and Data transfer.

If your old Nokia device does not have the Phone switch application, your new device sends it in a message. Open the message in the old device, and follow the instructions.

- Select the device you want to connect to, and pair the devices. Bluetooth needs to be activated.
- 2 If the other device requires a passcode, enter the passcode. The passcode, which you can define yourself, must be entered in both devices. The passcode in some devices is fixed. For details, see the user guide of the device.
 - The passcode is valid only for the current connection.
- 3 Select the content and OK.

Nokia account and Nokia's Ovi services

When you switch on your device for the first time, you are prompted to create or sign in to a Nokia account, so you can access Nokia's Ovi services.

With Ovi services, you can:

- See your friends' statuses in different social networking services
- Download games, applications, videos, pictures, themes, and ringtones from Ovi Store
- Get to where you want to go with free walk and drive navigation
- Back up and manage your contacts in the Ovi internet service

To learn more about 0vi services, go to www.ovi.com.

Device set-up

To define some basic settings for your device, select Menu > Applications > Tools > Phone setup. With the Phone set-up widget, you can do the following:

 Copy contacts, pictures, and other content from your previous Nokia device

- Personalise your device by changing the ringtone and visual theme
- Set up mail
- Update your device software

Use the in-device user guide

Select Menu > Applications > User quide.

Open the user guide from an application

Select **Options** > **User guide**. This is not available for every application.

Search the user guide

When the user guide is open, select **Options** > **Search**, and enter a letter or a word in the search field.

Switch between the user guide and an application

Press and hold the menu key, swipe left or right, and select the desired application.

indicates a link to a web page. Links to related topics may be at the end of instructions.

Install Nokia Ovi Suite on your PC

With the Nokia Ovi Suite PC application, you can manage content on your device, and keep it in sync with your computer. You can also update your device with the latest software, and download maps.

Download the latest version of Nokia Ovi Suite from www.ovi.com/suite to your computer.

If your computer can't connect to the internet, to install Nokia Ovi Suite from your device memory:

 Use a compatible USB data cable to connect your device to your computer.

If you are using Windows XP or Windows Vista on your computer, set the USB mode of your device to Mass storage. To set the USB mode on your device, select the notification area in the top right corner, and select

> USB > Mass storage.

Your memory card appears as a removable disk on your PC.

2 On your computer, select **Install Nokia Ovi Suite**.

If the installation window does not open automatically, open the installation file manually. Select **Open folder to view files**, and double-click **Install_Nokia_Ovi_Suite.exe**.

- 3 Follow the displayed instructions.
- 4 When the installation is complete, if you are using Windows XP or Windows Vista on your computer, check that the USB mode of your device is set to Nokia Ovi Suite.

To learn more about Nokia Ovi Suite, go to www.ovi.com/suite.

To check which operating systems Nokia Ovi Suite supports, go to www.nokia.com/support.

Basic use

Touch screen actions

To interact with the user interface, tap or tap and hold the touch screen.

Open an application or other screen element

Tap the application or element.

Access functions quickly

Tap and hold the item. A pop-up menu with available options opens. For example, to send an image or delete an alarm, tap and hold the image or alarm, and from the pop-up menu, select the appropriate option.

If you tap and hold the home screen, editing mode is activated.

Drag an item

Tap and hold the item, and slide your finger across the screen. The item follows your finger.

You can drag items in the home screen or the main menu, when you have activated editing mode.

Swipe

Place a finger on the screen, and steadily slide your finger in the desired direction. For example, when you are viewing a picture, to view the next picture, swipe left.

Scroll in a list or menu

Place your finger on the screen, slide it quickly up or down the screen, then lift your finger. The content of the screen scrolls with the speed and direction it had at the moment of release. To select an item from a scrolling list and to stop the movement, tap the item.

700m in

Place two fingers on an item, such as a picture or web page, and slide your fingers apart.

700m out

Place two fingers on the item, and slide your fingers together.

Tip: You can also tap the item twice to zoom in or out.

Interactive home screen elements

The home screen elements are interactive. For example, you can change the date and time, set alarms, write calendar entries, or edit the profiles directly on the home screen.

Set an alarm

Select the clock (1).

Activate or edit profiles

Select the profile (2).

View or edit your schedule Select the date (3).

View missed calls or unread messages Select the notification area (4).

View available WLANs or manage Bluetooth connections

Select the notification area (4).

Modify the connectivity settings

Select the notification area (4) and \rightleftharpoons .

In most other views, you can select the notification area (4), and do the following:

- Modify the connectivity settings
- Open the clock, and set an alarm
- View the battery status, and activate power saving mode
- View notifications of missed calls or unread messages
- Open the WLAN wizard, and connect to a WLAN
- Manage Bluetooth connections

Switch between open applications

You can see which applications and tasks are open in the background, and switch between them.

Press and hold the menu key, swipe left or right, and select the desired application.

Applications running in the background increase the demand on battery power and use memory. To close an application that you are not using, select X.

Tip: To close all open applications, select and hold the task switcher, and from the pop-up menu, select **Close** all.

Write text Enter text with the virtual keyboard Use the virtual keyboard

To activate the virtual keyboard, select a text input field. You can use the virtual keyboard both in landscape and portrait mode.

- 1 Virtual keyboard
- 2 Close key Close the virtual keyboard.
- 3 Shift and caps lock key To enter an upper case character when writing in lower case, or vice versa, select the key before entering the character. To activate caps lock mode, select the key twice. A line under the key indicates that caps lock mode is activated.
- 4 Character range Select the desired character range, such as numbers or special characters.
- 5 Arrows keys Move the cursor left or right.
- **6** Space bar Insert a space.
- 7 Input menu Activate predictive text input, or change the writing language.
- 8 Enter key Move the cursor to the next row or text input field. Additional functions are based on the current context. For example, in the web address field of the web browser, it acts as the Go icon.
- **9** Backspace key Delete a character.

Switch between the virtual keyboard and keypad in portrait mode

Select > Alphanumeric keypad or QWERTY keyboard.

Add an accent to a character

Select and hold the character.

Activate predictive text input with the virtual keyboard

Predictive text input may not be available in all languages.

- 2 Start writing a word. Your device suggests possible words as you write. When the correct word is displayed, select the word.
- 3 If the word is not in the dictionary, the device suggests an alternative word from the dictionary. To add the new word to the dictionary, select the word you have written.

Deactivate predictive text input mode

Select **■** > **Input options** > **Deactivate prediction**.

Modify the text input settings

Select **∃** > **Input options** > **Settings**.

Enter text with the virtual keypad Use the virtual keypad

If you prefer to use the alphanumeric keypad when writing in portrait mode, you can switch from the virtual keyboard to the virtual keypad.

- Select a text input field.
- 2 Select > Alphanumeric keypad.

- 1 Number keys
- 2 * Enter a special character, or when predictive text input mode is activated and the word underlined, cycle through the word candidates.
- 3 Shift key Change the character case. To activate or deactivate predictive text input mode, quickly select the key twice. To switch between the letter and number modes, select and hold the key.
- 4 Close key Close the virtual keypad.
- 5 Arrow keys Move the cursor left or right.
- 6 Input menu Activate predictive text input, change the writing language, or switch to the virtual keyboard.
- **7** Backspace key Delete a character.
- 8 Text input indicator (if available) Indicates the character case, and if letter or number mode or predictive text input mode is activated.

Activate traditional text input with the virtual keypad

Quickly select # twice.

Enter a character

- Select a number key (1-9) repeatedly, until the desired character is displayed. There are more characters available than are visible on the key.
- 2 If the next letter is located on the same key, wait until the cursor is displayed or move the cursor forward, and select the key again.

Insert a space

Select 0.

Move the cursor to the next line Ouickly select **0** three times.

Activate predictive text input with the virtual keypad

Predictive text input is based on a built-in dictionary to which you can add new words. Predictive text input is not available for all languages.

- 1 Select **■** > **Activate predictive** text.
- 2 To write the desired word, use the keys 2-9. Select each key once for each letter. For example, to write Nokia when the English dictionary is selected, select 6 for N, 6 for o, 5 for k, 4 for i, and 2 for a.

The word suggestion changes after each key selection.

3 If the word is not correct, select * repeatedly, until the correct match is displayed. If the word is not in the dictionary, select Spell, and enter the

word using traditional text input mode, and select **OK**.

If ? is displayed after the word, the word is not in the dictionary. To add a word to the dictionary, select *, enter the word using traditional text input mode, and select OK.

- 4 To insert a space, select 0. To insert a common punctuation mark, select 1, and then select * repeatedly, until the correct punctuation mark is displayed.
- 5 Start writing the next word.

Deactivate predictive text inputOuickly select # twice.

Define the writing language

Select Menu > Settings and Phone > Touch input > Writing language.

Change the language when writing

Select > Input options > Writing language or > Writing language.

The available options may vary.

Display indicators General indicators

-0 Th

The touch screen and keys are locked.

The device alerts silently for incoming calls or messages.

An alarm is set.

A timed profile is activated.

You have a missed calendar event.

Call indicators

Someone has tried to call you.

2 You are using your second phone line (network service).

Incoming calls are diverted to another number (network service). If you have two phone lines, a number indicates the active line.

 \mathcal{R}

Your device is ready for an internet call.

Messaging indicators

You have unread messages. If the indicator is blinking, your Inbox folder may be full.

Messages are waiting to be sent ₽. in the Outbox folder.

Network indicators

Ψ Your device is connected to a GSM network (network service).

3G Your device is connected to a 3G network (network service).

A GPRS data connection (network service) is open. Z indicates that the connection is on hold and 🍒 that a connection is opening or closing.

<u>_</u> An EGPRS data connection (network service) is open. $\stackrel{L}{=}$ indicates that the connection is on hold and 5 that a connection is being established.

3Ģ A 3G data connection (network service) is open. 35 indicates that the connection is on hold and 35 that a connection is being established.

3.50 An HSPA data connection (network service) is open. 355 indicates that the connection is on hold and 55 that a connection is being established.

I A WLAN connection is available. "1" indicates that the connection is encrypted and 'that the connection is not encrypted.

Connectivity indicators

* Bluetooth is active. $\$ \rightleftharpoons$ indicates that your device is sending data. If the indicator is blinking, your device is trying to connect to another device.

A USB cable is connected to your device.

GPS is active.

The device is synchronising.

0 0 1 A compatible headset is connected to your device. 台 A compatible TV-out cable is

connected to your device. ↶ A compatible text phone is connected to your device.

Search in your device and on the internet

With the Search application, you can find any item in your device.

1 Select Menu > Applications > Search.

2 Enter a search word in the search field. or browse the content categories.

Tip: You can add a search widget to the home screen. With the search widget, you can also search the internet. Tap and hold the home screen, and select \blacksquare and the search widget from the list.

Use your device offline

In places where you do not want to make or receive calls, you may still access your calendar, contacts list, and offline games

if you activate the offline profile. Switch the device off when mobile phone use is not allowed or when it may cause interference or danger.

On the home screen, select the profile and **Offline**.

When the offline profile is activated, your connection to the cellular network is closed. All radio frequency signals between the device and the cellular network are prevented. If you try to send a message, it is placed in the Outbox folder, and is sent only when another profile is activated.

You can also use your device without a SIM card. Switch the device off, and remove the SIM card. When you switch back on, the offline profile is activated.

Important: In the offline profile you cannot make or receive any calls, or use other features that require cellular network coverage. You may be able to call the official emergency number programmed into your device. To make calls, you must first change to another profile.

When the offline profile is activated, you can still connect to a WLAN to, for example, read your mail or browse the internet. You can also use Bluetooth. Remember to comply with any applicable safety requirements when you establish and use WLAN or Bluetooth connections.

Prolong battery life

If it seems you're always looking for a charger, there are steps you can take to reduce the power consumption of your device.

- Always charge the battery fully.
- When power saving mode is activated, device settings, such as Network mode and the screen saver, are optimised.

Activate power saving mode

Press the power key \(\sum_{\text{,}} \) and select Activate power saving. To deactivate power saving mode, press the power key \(\sum_{\text{,}} \) and select Deactivate power saving.

Close the applications you are not using

Press and hold the menu key, swipe until the desired application is displayed, and select $\overline{\mathbf{X}}$.

Sounds, themes, and effects

- Mute unnecessary tones, such as key tones.
- Use wired headphones, rather than the loudspeaker.
- Change the length of the time-out period after which the device display switches off.

Set the length of the time-out period Select Menu > Settings and Phone >

Select Menu > Settings and Phone > Display > Light time-out.

Activate a dark theme and wallpaper

Select Menu > Settings and Themes > General. To change the wallpaper, on the home screen, select Options > Change wallpaper.

Deactivate background animation effects

Select Menu > Settings and Themes > General > Options > Theme effects > Off.

Decrease the brightness of the display

In the display settings, select **Brightness**.

Deactivate the Big clock screen saver

Select Menu > Settings and Themes > Screen saver > None.

Network use

- If you are listening to music or otherwise using your device, but do not want to make or receive calls, activate the offline profile.
- Set your device to check for new mail less frequently.
- Use a WLAN connection to connect to the internet, rather than a packet data (GPRS or 3G) connection.
- If your device is set to use both GSM and 3G networks (dual mode), the device uses more power when searching for the 3G network.

Set your device to use only the GSM network

Select Menu > Settings and Connectivity > Network > Network mode > GSM.

Deactivate Bluetooth when not needed

Select Menu > Settings and Connectivity > Bluetooth > Bluetooth > Off.

Stop your device scanning for available WLANs

Select Menu > Settings and Connectivity > WLAN > Options > Settings > Show WLAN availability > Never.

Establish a packet data (3G or GPRS) connection only when needed

Select Menu > Settings and
Connectivity > Admin. settings >
Packet data > Packet data
connection > When needed.

Personalisation

Profiles

About profiles

Select Menu > Settings > Profiles.

Waiting for a call but can't let your phone ring? Your device has various settings groups called profiles, which you can personalise for different events and environments. You can also create your own profiles.

You can personalise the profiles in the following ways:

- Change the ringtone and message alert tones.
- Adjust the volume of the ringtone and key tones.
- Mute key tones and notification tones.
- Activate vibration alerts.
- Set the device to say the name of the contact who is calling.

Personalise your tones

You can personalise your device tones for each profile.

Select Menu > Settings > Profiles.

- 1 Select the desired profile.
- 2 Select **Personalise** and the desired option.

Tip: Download ringing tones from Ovi Store. To learn more about Ovi Store, go to www.ovi.com.

Silence your device

When the silent profile is activated, all ringtones and alert tones are muted. Activate this profile when you are at the cinema or in a meeting.

On the home screen, select the profile and **Silent**.

Change your profile for meetings or outdoor use

When the meeting profile is activated, your device discreetly beeps once instead of ringing. When the outdoor profile is activated, the ringing tone is louder, so you won't miss a call in a noisy environment.

In the home screen, select the profile and **Meeting** or **Outdoor**.

Create a new profile

How can you make your device meet your needs at work or college or home? You can create new profiles for different situations, and give them appropriate names.

- 1 Select Menu > Settings > Profiles and Options > Create new.
- 2 Define your profile settings, and select Profile name.
- 3 Enter a name for the profile.

Set a timed profile

You can activate a profile until a set time, after which the previously used profile is activated.

Select Menu > Settings > Profiles.

- 1 Select the desired profile and **Timed**.
- 2 Set the time that you want the timed profile to expire at.

Change your theme

With themes, you can change the colours and look of your display.

Select Menu > Settings > Themes.

Select General and a theme.

Some themes include background animation effects. To save battery power, select General > Options > Theme effects > Off.

Tip: Download themes from Nokia's Ovi Store. To learn more about Ovi Store, go to www.ovi.com.

Home screen About the home screen

On the home screen, you can:

- See notifications of missed calls and received messages
- Open your favourite applications
- Control applications, such as the radio
- Add shortcuts for different features, such as writing a message
- View your favourite contacts, and quickly call, chat, or send messages to them

You can have more than one home screen page, for example, separate home screens for work and private life.

The home screen elements are interactive. For example, if you select the clock, the clock application opens.

Switch between home screens

You can have more than one home screen. For example, create separate home screens for work and private life, and personalise them to have different content.

To switch to another home screen, swipe left or right.

• O • indicates which home screen you are in.

Personalise the home screen

Want to see your favourite landscape or pictures of your family in the home screen background? You can change this wallpaper, and rearrange items in the home screen, to personalise it to your liking.

Tip: If you have more than one home screen, you can switch between them also while editing, and personalise all your home screens at the same time.

Change the wallpaper

- 1 Tap and hold the home screen.
- 2 Select Options > Change wallpaper > Image.
- 3 Select the desired picture.
- 4 Select Done.

Tip: Download more background images from Nokia's Ovi Store. To learn more about Ovi Store, go to www.ovi.com.

Rearrange items in the home screen

- 1 Tap and hold the home screen.
- 2 Drag and drop items to a new location.

3 Select Done.

Add a widget to the home screen

Interested in today's weather or what's currently in the news? You can add miniapplications (widgets) to your home screen, and see your most relevant information at a glance.

- 1 Tap and hold the home screen.
- 2 Select and the desired widget from the list.
- 3 Select Done.

A widget can enhance the related application, and may also change the way the application works. For example, if you add a notification widget, received messages are notified in the widget.

Tip: To download more widgets, select {Missing display text mapping for 'qtn_wm_ovi_store_msk_text.widgetm anagerview' in language 'en'}.

Using the service or downloading content may cause transfer of large amounts of data, which may result in data traffic costs.

Some home screen widgets may connect to the internet automatically. To prevent this, select **Options** > **Widgets to offline** mode.

Remove a widget from the home screen

- 1 Tap and hold the home screen.
- 2 Select the widget, and from the popup menu, select **Remove**.
- 3 Select Done.

Add a shortcut to the home screen

Did you know that you can create shortcuts to your most used applications and features? You can add shortcuts to applications, web bookmarks, or actions, such as writing a message.

- 1 Tap and hold the home screen.
- 2 Select the shortcut widget and **Settings**.
- 3 Select the shortcut you want to define, and select Bookmark or Application and the desired item.
- 4 Select Back > Done.

Tip: To remove a shortcut, replace it with another one.

Tip: If you add empty shortcut widgets when editing a home screen, you can later define the shortcuts directly on the home screen.

Add your important contacts to the home screen

Add your most important contacts to the home screen, so you can quickly call or send messages to them.

The contacts need to be stored in your device memory.

- 1 In the Favourite contacts widget, select ...
- 2 To mark the contacts to add to the home screen, select the desired contacts. You can add up to 20 contacts to the widget.

Call or send a message to a contactIn the widget, select the contact.

Remove a contact from the home screen

In the widget, select \mathcal{L} and the contact to remove. The contact is deleted from the widget, but remains in your contacts list.

Organise your applications

Want to open your most used applications more quickly? In the main menu, you can organise your applications and hide less used applications in folders.

Press the menu key, and select **Options** > **Edit**.

Create a new folder

Select Options > New folder.

Move an application to a folder

Select and hold the application, and from the pop-up menu, select **Move to folder** and the new folder.

Tip: You can also drag and drop applications and folders.

Download a game, application, or other item

You can buy games, applications, videos, and other content from Ovi Store. There are also free items that you can download.

Select **Menu** > **Store**, and sign in to your Nokia account.

- 1 Select the item.
- 2 If the item has a price, select **Buy**. If the item is free, select Download.
- 3 You can pay with a credit or debit card, or, if available, on your phone bill. To save your card information to your

Nokia account, select Save this card to my Nokia account.

If your card information is already saved, to use a different payment method, select Change billing details.

- To get a receipt of your purchase, select or enter a mail address.
- Select Confirm. 5
- When the download is complete, you can open or view the item, or continue browsing for more content. The content type determines where the item is stored in your mobile device.

Tip: Use a WLAN connection to download larger files, such as games, applications, or videos

For more information on an item, contact the publisher of the item.

Tip: To avoid entering your payment card details over and over when buying items from Ovi Store, save your details to your

Nokia account. You can add more than one payment card, and choose which one to use when buying.

Telephone

Call a phone number

In the home screen, select Call to open the dialler, and enter the phone number.

To enter the + character, used for international calls, select * twice. The + character as a replacement for the international access code may not work in all regions. In this case, enter the international access code directly.

- 2 To make the call, press the call key.
- To end the call, press the end key.

Search for a contact

You can search for a contact you have saved in the contacts list.

On the home screen, select Call, and start entering the contact's first or second name. You can also search by company name. When entering the characters, select each number key once for each letter. For example, to search for Nokia, enter 6, 6, 5, 4, and 2.

Call the found contact

Select and hold the contact, and in the contact card, select **Voice call**.

Send a message to the contact

Select and hold the contact, and in the contact card, select **Message**.

Deactivate contact search

Select Options > Contact search > Off.

Call a contact

Select Menu > Contacts.

- To search for a contact, enter the first letters or characters of the first or second name in the search field.
- 2 Select the contact.
- 3 In the contact card, select Voice call.
- 4 If the contact has more than one phone number, select and hold **Voice** call, and select the desired number.

Make a conference call

Your device supports conference calls (network service) between a maximum of six participants, including yourself. Video conference calls are not supported.

- 1 Make a call to the first participant.
- To make a call to another participant, select **Options** > **New call**. The first call is put on hold.
- When the new call is answered, to add the first participant to the conference call, select .

Add a new participant to a conference call

Make a call to another participant, and add the new call to the conference call.

Have a private conversation with a conference call participant

Select 2.

Go to the participant, and select . The conference call is put on hold on your device. The other participants continue the conference call.

To return to the conference call, select .

Drop a participant from a conference call

Select , go to the participant, and select

Fnd an active conference call

Press the end kev.

Call the numbers you use the most

You can guickly call your friends and family when you assign your most-used phone numbers to the number keys of vour device.

Select Menu > Settings and Calling > Speed dialling.

Assign a phone number to a number kev

- Select the number key to which you want to assign the phone number. 1 is reserved for the voice mailbox.
- 2 Select the phone number from your contacts list.

Remove or change a phone number assigned to a number key

Select and hold the assigned key, and from the pop-up menu, select Remove or Change.

Make a call

On the home screen, select Call to open the dialler, and select and hold the assigned number key.

Use your voice to call a contact

With the Voice commands application you can use your voice to make calls or control vour device.

Voice commands are not dependent on the speaker's voice. Commands are automatically created by your device.

Note: Using voice tags may be difficult in a noisy environment or during an emergency, so you should not rely solely upon voice dialling in all circumstances.

When you use voice dialling, the loudspeaker is in use. Hold the device at a short distance away when you say the voice command.

- In the home screen, select and hold Call. If a compatible headset with the headset key is attached, press and hold the headset key.
- 2 A short tone sounds, and Speak now is displayed. Say clearly the name that is saved for the contact.
- 3 The device plays a synthesised voice command for the recognised contact in the selected device language, and displays the name and number. To cancel the voice dialling, select **Quit**.

Listen to a voice command for a contact

- Select a contact and Options > Voice 1 tag details.
- 2 Select a contact detail.

If several numbers are saved for a name. you can say also the name and the number type, such as mobile or telephone.

Make calls over the internet About internet calls

With the internet call network service, you can make and receive calls over the internet. Internet call services may support calls between computers,

between mobile phones, and between a VoIP device and a traditional telephone.

Some internet call service providers allow free internet calls. For availability and connectivity costs, contact your internet call service provider.

To make or receive an internet call, you must be in the service area of a WLAN or have a packet data (GPRS) connection in a 3G network, and be signed in to an internet call service.

Install an internet call service

You can search for internet call services from Ovi Store. For details, go to www.ovi.com.

- 1 Download an installation widget for the internet call service.
- 2 To start the installation, select the installation widget.
- 3 Follow the displayed instructions.

When an internet call service has been installed, a tab for the service is displayed in the contacts list.

Make an internet call

When you are signed into a internet call service, you can make a call from the friends list or the contacts list.

Select Menu > Contacts.

Call a contact in the friends list

- 1 Open the internet call service tab, and sign in to a internet call service.
- 2 Select a contact from the friends list, and select **Internet call**.

Make an internet call to a phone number or SIP address

- On the home screen, select Call to open the dialler, and enter the number.
- 2 Select Options > Call > Internet call.

Call the last dialled number

Trying to call someone, but they are not answering? It is easy to call them again. In the call log, you can see information about the calls you have made and received.

In the home screen, select Call to open the dialler, and select . To call the last dialled number, select the number from the list.

Tip: To view the last dialled numbers quickly, in the home screen, select **6**.

Record a phone conversation

With the Recorder application, you can record phone conversations.

- During an active voice call, select Menu > Applications > Office > Recorder.
- 2 To start recording, select •.
- 3 To stop recording, select . The sound clip is automatically saved to the Sound files folder in the File manager application.

Both parties hear a tone at regular intervals during the recording.

Turn to silence

If your device rings in a situation where you do not want to be disturbed, you can turn the device to silence the ringing tone.

Activate the turn to silence feature

- Select Menu > Settings and Phone > Sensor settings > Sensors > On.
- 2 Select Turning control > Silence calls.

When your device rings, turn your device display down.

View your missed calls

In the home screen, you can see when you have missed calls. To view the phone number, select **Show**. The caller's name is displayed if stored in the contacts list.

Missed and received calls are logged only if supported by the network, and the device is switched on and within the network service area.

Call back the contact or number

Select the contact or number.

To view the missed calls list later, in the home screen, select Call to open the dialler, select A, and open the missed calls tab &.

Tip: To view missed calls quickly, in the home screen, select Λ_1 , and open the missed calls tab \mathcal{L}_2 .

Call vour voice mailbox

You can divert your incoming calls to your voice mailbox (network service). People can leave you a message, for example, when you have not answered the call.

In the home screen, select **Call** to open the dialler, and select and hold **1**.

Change the phone number of your voice mailbox

- 1 Select Menu > Settings and Calling > Call mailbox.
- Select and hold a mailbox, and from the pop-up menu, select Change number.
- 3 Enter the number (obtained from your network service provider), and select **OK**.

Divert calls to your voice mailbox or another phone number

If you cannot answer your calls, you can divert incoming calls to your voice mailbox or another phone number.

Select Menu > Settings and Calling > Call divert > Voice calls.

Call divert is a network service. For details, contact your service provider.

Divert all voice calls to your voice mailbox

Select All voice calls > Activate > To voice mailbox.

Divert all voice calls to another phone number

Select All voice calls > Activate > To other number.

2 Enter the number, or select Find to use a number saved in your contacts list.

Several diverting options, such as **If busy** and **If not answered** can be active at the same time.

On the home screen, _____ indicates that all calls are diverted.

Call barring and call diverting cannot be active at the same time.

Prevent making or receiving calls

Sometimes you may want to restrict the calls that can be made or received with your device. With call barring (network service), you can, for example, restrict all outgoing international calls or incoming calls when you are abroad.

Select Menu > Settings and Calling > Call barring.

To modify the settings, you need the barring password from your service provider.

Prevent making calls

- 1 If an internet call service is installed, select **Cellular call barring**.
- 2 To prevent making any calls or international calls, select Outgoing calls or International calls. To prevent making international calls, but allow calls to your home country, select International calls except to home country.
- 3 Select Activate. Call barring affects all calls, including data calls.

Prevent receiving calls

 If an internet call service is installed, select Cellular call barring.

- 2 To prevent receiving any calls or international calls when you are abroad, select Incoming calls or Incoming calls when roaming.
- Select Activate.

Prevent anonymous internet calls Select Internet call barring >

Anonymous call barring > 0n.

Allow calls only to certain numbers

With the fixed dialling service, you can restrict calls, and only allow calls to certain phone numbers. For example, you can allow your children to call only family members or other key numbers.

Select Menu > Contacts and Options > SIM numbers > Fixed dial contacts.

Not all SIM cards support the fixed dialling service. You need your PIN2 code from your service provider.

Activate fixed dialling

Select **Options** > **Activate fixed dialling**. Enter the PIN2 code.

Select the people to whom calls are allowed

- 1 Select Options > New SIM contact.
- 2 Enter the PIN2 code.
- 3 Enter the contact name and phone number to which calls are allowed, and select Done. To add a contact from the contacts list to the fixed dialling list, select Add from Contacts and a contact.

To send a text message to a SIM contact while the fixed dialling service is active, you need to add the text message centre number to the fixed dialling list.

Video sharing About video sharing

With video sharing (network service), you can share live or recorded video from your device to another compatible device. during a voice call.

When you activate video sharing, the loudspeaker is automatically activated. If you do not want to use the loudspeaker, you can use a compatible headset.

Video sharing requirements

To share video, both you and the recipient must:

- Be in a 3G network. If either of you move outside the 3G network, the voice call continues.
- Have the video sharing feature activated.
- Have person-to-person connections set up.

For more information on the service, 3G network availability, and fees associated with using this service, contact your service provider.

Set up video sharing

To set up video sharing, you need personto-person and 3G connection settings.

A person-to-person connection is also known as a Session Initiation Protocol (SIP) connection. The SIP profile settings must be configured in your device before you can use video sharing. Contact your service provider for the SIP profile settings, and save them to your device. Your service provider may send you the settings in a configuration message or give you a list of the needed parameters.

Set up a person-to-person connection

- 1 Select Menu > Settings and Connectivity > Admin. settings > SIP settings and a SIP profile.
- 2 Enter the needed SIP profile settings.

Modify video sharing settings

Select Menu > Settings and **Connectivity** > **Video** sharing.

Use a 3G connection

For details about networks, contact your service provider.

Add a SIP address to a contact

- 1 Select Menu > Contacts.
- 2 Select a contact or create a new contact.
- 3 Select **Options** > **Edit**.
- 4 Select Options > Add detail > Share video.
- 5 Enter the SIP address in the format username@domainname (vou can use an IP address instead of a domain name).

If you do not know the SIP address for the contact, you can use the phone number of the recipient, including the country code, to share video (if supported by the network service provider).

Share live or recorded video

During an active voice call, select Options > Share video.

1 To share live video, select Live video

> To share a video, select **Video clip** and the desired video. Your device checks if the video must be converted. If

needed, the video is automatically converted.

2 Select the desired SIP address or phone number that is stored in the contact card for the recipient. If the SIP address or phone number is not available, manually enter the details, and select OK. If entering a phone number, you need to enter the country code. The invitation is sent to the SIP address.

If you access another application while sharing a video, the sharing is paused.

Continue sharing

On the home screen, select **Options** > **Resume video sharing**.

Stop sharing video

Select Stop. To end the voice call, press the end key. When you end the call, video sharing also ends.

Save the live video you shared Select Yes when prompted.

Accept a video sharing invitation

Select **Yes**. Video sharing begins automatically.

Contacts

About Contacts

Select Menu > Contacts.

You can save and organise your friends' phone numbers, addresses, and other contact information. If you want to keep in touch with your most important contacts easily, you can add them to the home screen.

Save phone numbers and mail addresses

You can save your friends' phone numbers, mail addresses, and other information to your contacts list.

Select Menu > Contacts.

Add a contact to the contacts list

- 1 Select Options > New contact.
- 2 Select a field, and enter the details.

Edit contact information

- 1 Select a contact.
- 2 Open the contact card tab 1.
- 3 Select a contact detail.

Add details about a contact

Select a contact and **Options** > **Edit** > **Options** > **Add detail**.

Save a number from a received call or message

Have you received a call or a message from a person whose phone number is not yet saved in the contacts list? You can easily save the number in a new or existing contact list entry.

Save a number from a received call

- 1 Select Menu > Applications > Tools > Log.
- 2 Select Recent calls > Received calls.
- 3 Select and hold a phone number, and from the pop-up menu, select Save to Contacts.
- 4 Select whether you want to create a new contact list entry or update an existing one.

Save a number from a received message

- 1 Select Menu > Messaging.
- 2 Select **Inbox** and a message.
- 3 Select the phone number and Save to Contacts.
- 4 Select whether you want to create a new contact list entry or update an existing one.

Contact your most important people quickly

You can set your most important contacts as favourites. Your favourites are at the top of the contacts list, so you can contact them quickly.

Select Menu > Contacts.

Set a contact as a favourite

Select and hold a contact, and from the pop-up menu, select **Add to favourites**.

Remove a contact from favourites

Select and hold a contact, and from the pop-up menu, select **Remove from favourites**. The contact is not deleted from your standard contacts list.

Add a picture for a contact

Want to see quickly who is calling you? Add a picture for a specific contact.

Select Menu > Contacts and a contact.

- Select the icon next to the contact's name and Add image.
- 2 Select a picture from Photos.

Change or remove a picture

Select and hold the picture, and from the pop-up menu, select Change image or Remove image.

The contacts must be stored in your device memory. To check which memory is in use, select **Options** > **Settings** > **Contacts to display**.

Set a ringing tone for a specific contact

Want to be able to hear that a particular person is calling you? You can set a ringing tone specifically for that person.

Select Menu > Contacts.

Set a ringing tone for a contact

- 1 Select a contact and Options > Edit.
- 2 Select the Ringtone field and a ringing tone.

Set a ringing tone for a contact group

- 1 Open the Groups tab.
- Select and hold the title of a group, and from the pop-up menu, select Ringtone.
- 3 Select a ringing tone from the list.

The ringing tone only applies to the members of the group at the time that the ringing tone is set.

Send your contact information using My Card

My card is your electronic business card. With My card, you can send your contact information to others.

Select Menu > Contacts.

Send your contact information as a business card

Select and hold My card, and from the pop-up menu, select Send as business card.

Edit your contact information in My Card

Select My card, and the detail to edit.

Create a contact group

When you have created contact groups, you can send a message to several people at the same time. For example, you can assign the members of your family to one group.

Select Menu > Contacts.

- 1 Open the Groups tab.
- 2 Select Options > New group.
- 3 Enter a name for the group, and select **OK**.
- 4 Select the group and Options > Add members.
- 5 To mark the contacts you want to add to the group, select them.

Send a message to a group of people

Would you like to send a message to all your family members quickly? If you have assigned them to a group, you can send a message to all of them at the same time.

Select Menu > Contacts.

- 1 Open the Groups tab.
- Select and hold a group title, and from the pop-up menu, select Create message.

Copy contacts from the SIM card to your device

If you have contacts stored on your SIM card, you can copy them to your device. You can add more details to contacts that are stored on your device, such as alternative phone numbers, addresses, or a picture.

Select Menu > Contacts.

Select Options > SIM numbers > Copy all to phone.

Tip: If you now have a contact twice in your contacts list, select **Options** > **Settings** > **Contacts to display**, and clear the **SIM memory** check box.

Back up your contacts to Ovi by Nokia

If you back up your contacts to Ovi by Nokia, you can easily copy your contacts to a new device. If your device is stolen or damaged, you can still access your contacts list online.

Select Menu > Contacts and Options > Ovi Sync.

If you allow automatic synchronisation, all the changes you make in the contacts list are automatically backed up to Ovi by Nokia.

You need a Nokia account to use Ovi. If you do not have an account, create one at www.ovi.com. You are also prompted to create an account, if you access any Ovi service using your device.

If you use Ovi Sync to automatically synchronise your contacts with Ovi, do not allow contact synchronisation with any other service as there may be conflicts. Ovi Sync for contacts is not available if you

have activated contacts synchronisation in Mail for Exchange.

Messaging

About Messaging

Select Menu > Messaging.

You can send and receive various kinds of messages:

- Text messages
- Audio messages
- Multimedia messages that contain pictures and videos
- **Group messages**

Messaging requires network support.

Send a message

With text and multimedia messages, you can quickly contact your friends and family. In a multimedia message, you can attach pictures, videos, and sound clips that you want to share.

Select Menu > Messaging.

- 1 Select New message.
- To select recipients from the contacts list, select the **To** title. To enter the recipient's phone number manually. enter the number in the To field.
- 3 To add an attachment, select .
- Select . 4

Sending a message with an attachment may be more expensive than sending a normal text message. For more information, contact your service provider.

You can send text messages that are longer than the character limit for a single message. Longer messages are sent as two or more messages. Your service provider may charge accordingly.

Characters with accents, other marks, or some language options, take more space, and limit the number of characters that can be sent in a single message.

If the item you inserted in a multimedia message is too large for the network, the device may automatically reduce the size.

Only compatible devices can receive and display multimedia messages. Messages may look different in different devices.

Send an audio message

You can record a sound clip, such as a birthday song, and send it to your friend as an audio message.

Select Menu > Messaging.

- Select Options > Create message > 1 Audio message.
- 2 To record the message, select .
- To select the recipient from the contacts list, select the To title. To enter the recipient's phone number manually, enter the number in the To field.
- Select .

Receive messages

When you receive a message, you can open it directly from the home screen. Later, you can find the message in the Conversations folder or in the Inbox folder in Messaging.

Select Menu > Messaging.

When you receive a message, a notification is displayed on the home screen. The number of all missed events. including missed calls and received messages is displayed.

To open the message, select the notification widget. By default, the message is opened in the Conversations view.

Reply to a received message in the Conversations view

Select the text input field at the bottom of the display, write a message, and select ∇ .

Open a message in the Inbox folder Select Inbox and a message.

Reply to a received message in the Inhox view

Open a message, and select .

Forward a message in the Inbox view Open a message, and select.

Save a received multimedia item

Select and hold the item, and from the pop-up menu, select Save. The item can be viewed in the corresponding application. For example, to view saved pictures, open Photos.

View a conversation

You can see the messages you have sent to and received from a particular contact from a single view, and continue the conversation from that view.

Select Menu > Messaging.

Select Conversations and a contact. All messages sent to and received from that contact are displayed.

Reply to a message in a conversation

- Open the conversation.
- Select the text input field at the bottom of the display, and write a message.
- To add attachments or more recipients, select Options > Add.
- To send the message, select .

When you send a new message, it is added to the current conversation. If no conversation exists, a new conversation is started.

When you open a received message from the home screen, by default, the message opens in the Conversations view. If you want messages to open in the Inbox view. select Options > Message view > Inhox

Listen to a text message

You can set your device to read your text messages aloud.

- Select Menu > Messaging. 1
- 2 Select Inbox.
- Select and hold a message, and from the pop-up menu, select Listen.

Select Menu > Settings > Phone > Speech.

Change the language

Select Language and a language.

Download an additional language

Select Options > Download languages.

Change the voice

Select @ . To preview a voice, select and hold the voice, and select **Play voice**.

Change language

You can change the device language and the language in which you write your messages and mails. You can also activate predictive text input.

Select Menu > Settings and Phone > Language.

Change the device languageSelect **Phone language**.

Change the writing language
Select Writing language.

Activate predictive text input Select Predictive text.

Mail

Mail About Mail

You can add several mailboxes and access them directly from your home screen. In the main mail view, you can switch from one mailbox to another.

- Write a mail.
- 2 Switch between your mailboxes.
- 3 Sort your mail by, for example, date.
- 4 Mail in current mailbox.

Mail contains interactive elements. Select and hold, for example, a mail to view a pop-up menu.

Using the service or downloading content may cause transfer of large amounts of data, which may result in data traffic costs.

Get a free mail account from Ovi by Nokia

With Nokia's Ovi Mail, you can use your device or PC to access your mail. The anti-spam protection helps keep your mailbox in order, and the virus protection increases security.

1 Select Menu > Applications > Mail.

Use your PC to access your mail accountGo to www.ovi.com, and sign in.

Add a mailbox

You can add several mailboxes to your device.

Select Menu > Applications > Mail.

Add a mailbox

Select **New mailbox**, and follow the instructions.

To get a free Ovi Mail account from Nokia, select **Ovi Mail** and **Sign up now**.

Add a mail widget to the home screen

- 1 In the home screen, tap and hold an empty area.
- 2 Select and the desired widget from the list.

Delete a mailbox

- 1 Select Menu > Applications > Mail.
- 2 Select Options > Delete mailbox and the mailbox.

Read mail

You can use your device to read and reply to mail.

Select Menu > Applications > Mail.

Read a mail

Select a mail. To zoom in or out, pinch the screen.

Open or save an attachment

Select the attachment, and from the popup menu, select the appropriate option. If there is more than one attachment, you can save them all at once.

Reply to a mail

Select Options > Reply.

Forward a mail

Select Options > Forward.

Tip: If there is a web address in a mail and you would like to open the address in the device browser, or add it to your bookmarks, select the address, and from the pop-up menu, select the desired option.

Tip: To open the next or previous mail, use the arrow icons.

Send a mail

You can use your device to write and send mail, and attach files to your mail.

Select Menu > Applications > Mail.

- Select .
- 2 To add a recipient from your contacts list, select the To, Cc, or Bcc icon. To enter a mail address manually, select the To, Cc, or Bcc field.
- 3 To add an attachment to the mail, select **U**.

4 To send the mail, select ▼.

Respond to a meeting request

You can open and accept meeting requests. When you accept a meeting request, it appears in your calendar.

Select **Menu** > **Applications** > **Mail**, and open the meeting request.

Select ✓ (Accept), ⊘ (Decline), or ? (Tentative).

Check your availability

Select Options > View calendar.

To edit, send, or forward an accepted meeting request, open the request in your calendar.

The available options may vary.

Open mail from the home screen

You can have several mail widgets in the home screen, depending on your device. Each mail widget contains one mailbox. In the widget, you can see if you have received new mail and the number of unread mails.

Add a mail widget to the home screen In the home screen, select New mailbox.

In the home screen, select **New mailbox**, and follow the instructions.

Add another mail widget to the home screen

Tap and hold the home screen, and select ____, and the desired widget from the list.

Open a mail

In the mail widget, select a mail.

Open mail from the home screen

You can have several mail widgets in the home screen, depending on your device. Each mail widget contains one mailbox. In the widget, you can see if you have received new mail and the number of unread mails

Add a mail widget to the home screen

In the home screen, select **New mailbox**, and follow the instructions.

Add another mail widget to the home screen

Tap and hold the home screen, and select ____, and the desired widget from the list.

Open a mail

In the mail widget, select a mail.

Internet

About the web browser

Select Menu > Web.

Catch up on the news and visit your favourite websites. You can use your device web browser to view web pages on the internet.

To browse the web, you must have an internet access point configured on your device and be connected to a network.

Browse the web

Select Menu > Web.

Tip: If you do not have a flat-rate data plan from your service provider, to save data costs in your phone bill, you can use a wireless local area network (WLAN) to connect to the internet.

Go to a web page

From the toolbar, select www., and enter a web address.

Zoom in or out

Place two fingers on the screen, and slide your fingers together or apart.

A cache is a memory location that is used to store data temporarily. If you have, or have tried to, access confidential information or a secure service, requiring passwords, clear the cache after each use.

Empty the cache

Select Options > Clear privacy data > Cache.

Add a bookmark

If you visit the same websites all the time, add them to your Bookmarks view, so you can easily access them.

Select Menu > Web.

While browsing, select **∃** > .

Go to a bookmarked website while browsing

Select ≡ > and a bookmark.

Subscribe to a web feed

You don't have to visit your favourite websites regularly to keep up with what's new on them. You can subscribe to web feeds and get links to latest content automatically.

Select Menu > Web.

Web feeds on web pages are usually indicated with . They are used to

share, for example, the latest news headlines or blog entries.

Subscribe to a feed

Go to a blog or web page that contains a web feed, and select **Options** > **Add feed**.

Manually update a feed

In the Web feeds view, select the feed and .

Set feeds to automatically update

In the Web feeds view, select the feed and Options > Edit > Edit > Automatic updates.

Access your company intranet

You can use your device to connect to your company intranet.

Select Menu > Applications > Office > Intranet.

- Select Options > Settings. For the relevant settings, contact your system administrator. You must also define a VPN access point.
- 2 Select Options > Connect.

Tip: If you have several intranet destinations, for example, partner extranets, defined in Connection settings, to define which intranet to browse, select **Manual connection**.

Social networks

About Social

Select Menu > Applications > Social netw., sign in to Ovi by Nokia, and then sign in to your relevant social networking services.

With the Social application, you can enhance your social networking experience. When signed in to social networking services through Ovi by Nokia, you can do the following:

- See your friends' status updates from multiple services in one view
- Post your own status update to multiple services at the same time
- Instantly share pictures you take with the camera
- Link your online friends' profiles to their contact information in your device
- Add events from the service calendar to your device calendar

Only those features that are supported by the social networking service are available.

Using social networking services requires network support. This may involve the transmission of large amounts of data and related data traffic costs. For information about data transmission charges, contact your service provider.

The social networking services are third party services and not provided by Nokia. Check the privacy settings of the social networking service you are using as you may share information with a large group of people. The terms of use of the social networking service apply to sharing information on that service. Familiarise yourself with the terms of use and the privacy practices of that service.

See your friends' status updates in one view

When you are signed in to social networking services through the Social

netw. application, you can see your friends' status updates from all those services in a single view. You do not have to switch between different applications to see what everyone is up to.

Select Menu > Applications > Social netw..

- 1 Select a service, and sign in.
- 2 Select Add social network.

included in the view.

- 3 Select another service, and sign in.
- 4 Select All Activity.
 All the feeds from the services you have added are automatically

Post your status to social networking services

With the Social application, you can post your status update to social networking services.

Select Menu > Applications > Social netw..

Write your status update in the text field.

Link your online friends to their contact information

You can link your online friends' profiles from social networking services to their contact information in your device. After linking, you can view their contact information directly from the Social application, and see their latest status updates in your contacts list.

Select Menu > Applications > Social netw..

1 Select an online friend's profile picture.

- 2 From the pop-up menu, select Link Profile to Contact.
- 3 From your contacts list, select the contact to which to link the profile.

See your friends' status updates on the home screen

When you sign in to social networking services through Ovi by Nokia, you can see your online friends' status updates directly on the home screen.

Browse updates on the home screen

When you are signed into a service, you can see updates in the Social widget.

Open the Social application from the home screen

Select the Social widget. If you are signed in, the status updates view opens. If you are not signed in, the sign-in view opens.

Upload a picture to a service

With the Social application, you can upload pictures to social networking services.

Select Menu > Applications > Social netw..

- 1 Select at .
- 2 Select to upload a picture.
- 3 To mark the items to upload, select the items.
- 4 If uploading a single picture, you can add a caption and a tag with a comment to a particular section of the picture.

Take a picture and upload it

Select <a>a

- 2 Select the option for uploading a picture from the camera.
- 3 Take a picture.
- 4 Add a caption and a tag with a comment to a particular section of the picture.

To upload a picture, the feature needs to be supported by the social networking service.

Contact a friend from a social networking service

When commenting your friend's status is not enough, you can call or send a message to the friend.

Select Menu > Applications > Social netw..

- 1 Select a friend's profile picture.
- 2 From the pop-up menu, select View contact info.
- 3 Select a communication method.

This feature is available if you have linked your online friends to their contact information in your device.

The available communication methods vary. To call or send a text message to a friend, the feature needs to be supported by the service.

Add an event to your device calendar

When responding to invitations to events in a social networking service, you can add the events to your device calendar, so you can view upcoming events even if you are not online.

Select Menu > Applications > Social netw. and a service, and sign in.

Select an invitation to an event.

2 Add the event to your device calendar.

This feature is available only if supported by the service.

Camera

About Camera

Select Menu > Applications > Camera.

Why carry a separate camera if your device has all you need for capturing memories? With the Camera application, you can easily take pictures or record videos. You can later use your device to view or edit the pictures and videos, share them on the internet, or send them to compatible devices.

Take a picture

Press and hold (a).

Press (). Do not move the device before the picture is saved and the final picture displayed.

Pictures and videos are saved to the memory card by default.

Save location information to your pictures and videos

If you want to know exactly where you were when you took a particular picture or video while hiking or travelling, you can set your device to automatically record the location. Later, you can view the locations on a map.

Select Menu > Applications > Camera.

Activate the location recording feature Select Options > Settings > Save location info > Yes

It may take several minutes to obtain the coordinates of your location. The availability and quality of GPS signals may be affected by your location, buildings, natural obstacles, and weather conditions. If you share a file that includes location information, also the location information is shared, and your location may be visible to third parties viewing the file. This feature requires network service.

Location information indicators:

— Location information is unavailable. Location information may not be saved to pictures or videos.

— Location information is available. Location information is saved to pictures or videos.

Location information can be attached to an image or a video clip if location coordinates can be determined via network and GPS. If you share an image or a video clip which has location information attached, the location information is visible to others that view the image or the video clip. You can deactivate geotagging in the camera settings.

Take a picture in the dark

If you activate night mode, you can take pictures even when light levels are low.

Select Menu > Applications > Camera.

Activate night mode

1 Select \(\gamma > \) Scene mode.

2 To use the flash, select Night portrait. If you do not want to use the flash, select Night.

Picture tips

Select Menu > Applications > Camera.

When taking a picture, note the following:

- Use both hands to keep the camera steady.
- When you zoom in, the image quality may decrease.
- The camera activates battery saving mode after about a minute of inactivity. To activate the camera again, press o briefly.
- You can set the user defined scene to be used as the default scene every time you open the Camera application. Select > Scene mode > User defined > Edit. Modify the settings, and select Set as default scene mode > Yes.
- Keep a safe distance when using the flash. Do not use the flash on people or animals at close range. Do not cover the flash while taking a picture.

Record a video

Besides taking pictures with your device, you can also capture your special moments as videos.

Press and hold ().

- 2 To start recording, press . A red record icon is displayed.
- 3 To pause recording, select **Pause**. If you pause recording and do not press

- any key within one minute, the recording stops.
- To zoom in or out, use the volume keys.
- 4 To stop recording, press (a). The video is automatically saved in Photos.

You can record high-definition videos with your device. If you are recording a video to a memory card, for the best performance, use fast, high-quality microSD cards from known manufacturers. The recommended microSD card class is 4 (32Mbit/s (4MB/s)) or higher.

Send a picture or video

You can send pictures and videos in a multimedia or mail message, or using Bluetooth.

Send in a multimedia message

- 1 Take a picture or record a video.
- 2 Select Options > Send > Via message.
- 3 To select a recipient from your contacts list, select & To enter the recipient's name or phone number manually, select the To field, and enter the name or phone number.
- 4 Select ✓.

Send in a mail message

- 1 Take a picture or record a video.
- 2 Select Options > Send > Via mail.
- 3 To select a recipient from your contacts list, select the To title. To enter the recipient's address manually, select the To field, and enter the address.
- 4 Select 🔽.

Send using Bluetooth

- 1 Take a picture or record a video.
- 2 Select Options > Send > Via Bluetooth.
- 3 Select the device to connect to, or search for more devices. If the other device requires a passcode, enter the passcode.

Your pictures and videos

About My Videos and My Images

Select Menu > Photos or Videos.

The My Videos and My Images applications are the place from where you can view all pictures and videos on your device. You can easily watch videos, or browse through pictures, and print out the best shots.

To manage your media files more effectively, add tags to the files, or organise them in categories.

View pictures and videos

Select Menu > Photos or Videos.

Browse the pictures and videosSelect a folder, and swipe up or down.

View a picture in full screen mode

Select the picture, and turn your device to landscape mode.

To browse pictures in full screen mode, swipe left or right.

To view the zoom slider, tap the picture. Alternatively, place two fingers on the screen, and to zoom in, slide your fingers apart. To zoom out, slide your fingers together.

View your pictures as a slide show

Select a picture and **Options** > **Slide show** > **Play**. The slide show starts from the selected picture.

Play a video

Select a folder and a video.

Pictures and videos can also be sent to you from a compatible device. To be able to view a received picture or video in Photos, you must first save it.

Edit the pictures you have taken

With Photo editor, you can add effects, text, clip art, or frames to your pictures.

Select Menu > Applications > Photo editor and a picture.

Tip: If the file you want to edit does not appear available, move the file to the Sound files, Images, Video clips, or Music folder.

- 1 To insert effects, select the desired option from the extended toolbar.
- 2 To save the edited picture, select Options > Save. The edited picture does not replace the original picture.

To later view your edited pictures, select **Menu** > **Photos**.

Video editor About Video Editor

Select Menu > Applications > Video Editor.

You can combine pictures and videos with sounds, effects, and text, and easily turn them into short movies or slideshows.

Save the sound files that you want to use in a movie to the Sound files folder on your device.

Create a movie

With **Storyboard**, you can easily create short movies from videos and pictures.

Select Menu > Applications > Video Editor.

Tip: If the files you want to edit do not appear available, move the files to the Sound files, Images, Video clips, or Music folder.

- 1 Select Storyboard.
- 2 To add videos and pictures to your movie, select Select media. To view the files you have selected, swipe right or left.
- 3 To add transitions between videos and pictures, select +.
- 4 To activate editing mode, select a video or picture. In editing mode, you can cut the length of the video or define how long a picture is displayed.
- 5 Select the sounds to play in the background. Copy protected audio files cannot be used.
- 6 To add text or subtitles to your movie, select Add text.
- 7 Save your movie.

Create a slideshow

The **Video Editor** application contains templates for different occasions. You can use them to create slideshows of events, such as anniversaries or parties.

Select Menu > Applications > Video Editor.

Tip: If the files you want to edit do not appear available, move the files to the Sound files, Images, Video clips, or Music folder.

- 1 Select Slide show.
- Select a template to use for the slideshow. When you select a template, a preview is displayed.
- 3 Select the pictures to use.
- 4 Select the sounds to play in the background. Copy protected audio files cannot be used.
- 5 Add a title.
- 6 Preview and save your slideshow.

Print a picture you have taken

You can print your pictures directly using a compatible printer.

- Use a compatible USB data cable to connect your device to a printer in Media transfer mode.
- 2 Select the picture to print.
- 3 Select **Options** > **Print**.
- 4 To use the USB connection to print, select Print > Via USB.
- 5 To print the picture, select **Options** > **Print**.

Tip: You can also use a Bluetooth printer. Select **Print** > **Via Bluetooth**. Change the selected printer to Bluetooth, and follow the instructions on the display.

Tip: When the USB cable is connected, you can change the USB mode. In the top right corner of the browsing view, select → > USB.

Videos

About Videos

With the Videos application, you can watch videos on your device.

Using a packet data access point to download a video may involve the transmission of large amounts of data through your service provider's network. For information about data transmission charges, contact your service provider.

Play a video

Select Menu > Videos & TV.

Select the video.

Use the video player controls

Tap the screen.

Copy your videos between your device and computer

Have you recorded videos with your device that you want to watch on your computer? Or do you want to copy your videos from your device to your computer? Use a compatible USB data cable to copy your videos between your device and a computer.

- Use a compatible USB data cable to connect your device to a computer.
 If copying between a memory card in your device and a computer, make sure the memory card is inserted.
- Open Nokia Ovi Suite on your computer, and follow the displayed instructions.

Music and audio

Music player About Music player

With the Music player application, you can listen to music and podcasts while on the move.

Tip: Get more music from Ovi Music. Select **Menu** > **Applications** > **Ovi Music.** To learn more about Ovi, go to www.ovi.com.

Play music

Select Menu > Music player.

 Select **Options** and the desired view. You can browse by song, album, or genre.

To browse the album covers in the album view, swipe left or right.

2 Select a song or album.

Tip: To listen to the songs in a random order, select .

Pause and resume playback

To pause playback, select [][]; to resume, select [>.

Rewind or fast-forward a song

Select and hold [KK] or [XX].

Tip: When listening to music, you can return to the home screen, leaving the music playing in the background.

Create a playlist

Want to listen to different music for different moods? With playlists, you can create selections of songs to play in a specific order.

Select Menu > Music player.

- 1 Select Options > Playlists.
- 2 Select Options > New playlist.
- 3 Enter a name for the playlist, and select **OK**.
- 4 Select the songs to add to the playlist, in the order you want them to play.

If a compatible memory card is inserted, the playlist is saved to the memory card.

Add a song to a playlist

Select and hold the song, and from the pop-up menu, select **Add to playlist**.

Remove a song from playlist

In the playlist view, select and hold the song, and from the pop-up menu, select **Remove**.

This does not delete the song from the device; it only removes it from the playlist.

Play a playlist

Select **Options** > **Playlists** and the playlist.

Tip: Music player automatically creates a playlist for the most played songs, recently played songs, and recently added songs.

Copy music from your PC

Do you have music on your PC that you want to listen on your device? Nokia Ovi Player is the fastest way to transfer music on your device, and you can use it to manage and synchronise your music collection.

- Use a compatible USB data cable to connect your device to your computer. Make sure a compatible memory card is inserted in your device
- 2 On your device, select the notification area in the top right corner, and select > USB > Media transfer.

3 On your computer, open Nokia Ovi Player. For more information, see the Ovi Player help.

Download the latest version of Ovi player from www.ovi.com.

Some music files can be protected by digital rights management (DRM) and cannot be played on more than one device.

About Ovi Music

Select Menu > Applications > Ovi Music, or go to www.ovi.com.

Ovi Music gives you access to songs that you can sample and download. Browse Ovi Music, and discover new music and old favourites!

Different services and options are available, depending on your country of residence.

To download music, you need to create a Nokia account.

You can create a Nokia account, join Ovi Music, and sign in to your account using any of the following:

- Your mobile device
- A compatible web browser
- Nokia Ovi Player
- Nokia Ovi Suite

If you already have a Nokia account, you can use that account for Ovi Music.

If you have any credit or downloads, or you have subscribed to unlimited downloading with your Nokia account, do

not close the account. If you do, all these will be lost.

Protected content

Digital rights management (DRM) protected content, such as pictures, videos, or music, comes with an associated licence that defines your rights to use the content.

You can view the details and status of the licences, and reactivate and remove licences

Manage digital rights licences

Select Menu > Settings > Phone > Phone management > Security settings > Protected content.

Record sounds

You can use your device recorder to record sounds from nature, such as birds singing, as well as voice memos. You can send the recorded sound clips to your friends.

Select Menu > Applications > Office > Recorder.

Record a sound clip

Select •.

Stop recording

Select . The sound clip is automatically saved to the Sound files folder in the File manager application.

Send a recorded sound clip as an audio message

Select Options > Send.

FM radio About FM radio

Select Menu > Applications > Radio.

You can listen to FM radio stations using your device - just plug in a headset, and select a station!

To listen to the radio, you need to attach a compatible headset to the device. The headset acts as an antenna.

Find and save radio stations

Search for your favourite radio stations, and save them, so you can easily listen to them later.

Select Menu > Applications > Radio.

From the toolbar, select > | ...

To find radio stations, you can use the automatic scanning, or you can set a frequency manually. The first time you open the FM radio, the application automatically searches for radio stations audible at your location.

Scan for all available stations

1 From the toolbar, select

2 To save all found stations, from the toolbar, select . To save a single station, select and hold the station title, and from the pop-up menu, select Save.

Set a frequency manually

- 2 Use the up and down arrow icons to enter a frequency.

Listen to the radio

You can enjoy your favourite FM radio stations on the go.

Select Menu > Applications > Radio.

Listen to a saved station

From the toolbar, select > =, and select a station from the list.

Go to the next or previous saved station

Swipe right or left. Alternatively, select or K.

Scan for another available station

Swipe up or down. Alternatively, select and hold \ or \ .

Listen to the radio using the loudspeaker

Select **Options** > **Activate loudspeaker**. You still need to have a headset attached.

You can make or answer a call while listening to the radio. The radio is automatically muted during an active call.

Tip: To search and buy music from Ovi Music, from the toolbar, select = > \(\bigcirc\).

The quality of the radio broadcast depends on the coverage of the radio station in the area.

Reorder the list of saved stations

You can reorder the list of saved stations, so that your favourites are at the top.

Select Menu > Applications > Radio.

The stations you have saved are listed in the Station list view.

Move a station on the list

- 1 From the toolbar, select **■** > **■**.
- 2 Select and hold the station title, and from the pop-up menu, select Move.
- 3 Select the new place on the list.

Maps

Navigate to a destination

Select Menu > Maps.

Maps shows you what is nearby, helps you plan your route, and guides you where you want to go, free of charge. You can:

- · Find cities, streets, and services
- Find your way with turn-by-turn directions
- Synchronise your favourite locations and routes between your mobile device and the Ovi Maps internet service
- Check weather forecasts and other local information, if available

Tip: You can also plan a route on your computer with the Ovi Maps web service, and copy the route to your device. For more information, go to www.ovi.com.

Some services may not be available in all countries, and may be provided only in selected languages. The services may be network dependent. For more information, contact your network service provider.

Using the service or downloading content may cause transfer of large amounts of data, which may result in data traffic costs.

Almost all digital cartography is inaccurate and incomplete to some extent. Never rely solely on the cartography that you download for use in this device.

Some content is generated by third parties and not Nokia. The content may be inaccurate and is subject to availability.

My position View your location and the map

See your current location on the map, and browse maps of different cities and countries.

Select Menu > Maps and My position.

indicates your current position, if available. When searching for your position, blinks. If your position is not available, indicates your last known position.

If accurate positioning is not available, a red halo around the positioning icon indicates the general area you might be in. In densely populated areas, the accuracy of the estimate increases, and the red halo is smaller than in lightly populated areas.

Browse the map

Drag the map with your finger. By default, the map is oriented north.

View your current or last known location

Select .

Zoom in or out

Select + or -.

Tip: To zoom, you can also place two fingers on the map, and slide your fingers apart to zoom in or together to zoom out. Not all devices support this feature.

If you browse to an area not covered by the street maps that are stored on your device, and you have an active data connection, new street maps are automatically downloaded.

To prevent downloading new street maps automatically, in the main menu, select > Internet > Connection > Offline.

Map coverage varies by country and region.

Map view

- 1 Selected location
- 2 Indicator area
- 3 Point of interest (for example, a railway station or a museum)
- 4 Information area
- 5 Compass

Change the look of the map

View the map in different modes, to easily identify where you are.

Select Menu > Maps and My position.

Select of and from the following:

Map view — In the standard map view, details such as location names or motorway numbers, are easy to read.

Satellite view — For a detailed view, use satellite images.

Terrain view — View at a glance the ground type, for example, when you are travelling off-road.

3D view — For a more realistic view, change the perspective of the map.

Landmarks — Display prominent buildings and attractions on the map.

Night mode — Dim the colours of the map. When travelling at night, the map is easier to read in this mode.

Transit lines — View selected public transport services, such as metro and tram routes.

The available options and features may vary by region. The unavailable options are dimmed.

Download and update maps

To avoid mobile data transfer costs, download the latest street maps and voice guidance files to your computer, and then transfer and save them to your device.

Use the Nokia Ovi Suite application to download the latest street maps and voice guidance files to your compatible computer. To download and install Nokia Ovi Suite, go to www.ovi.com.

Tip: Save new street maps to your device before a journey, so you can browse the maps without an internet connection when travelling abroad.

If you have an older version of the Maps application installed on your device, when you update to the latest version, the country or region maps are deleted. Before using Nokia Ovi Suite to download new country or region maps, open and close the Maps application.

Make sure you have the latest version of Nokia Ovi Suite installed on your computer.

Use the compass

When the compass is activated, both the arrow of the compass and the map rotate

automatically in the direction to which the top of your device is pointing.

Select Menu > Maps and My position.

Activate the compass

Select (1).

Deactivate the compass

Select **(A)** again. The map is oriented north.

The compass is active when it is green. If the compass needs calibration, the compass is red.

Calibrate the compass

Rotate the device around all axes in a continuous movement until the compass turns green.

The compass has limited accuracy. Electromagnetic fields, metal objects, or other external circumstances may also affect the accuracy of the compass. The compass should always be properly calibrated.

About positioning methods

Maps displays your location on the map using GPS, A-GPS, WLAN, or network (cell ID) based positioning.

The global positioning system (GPS) is a satellite-based navigation system used for calculating your location. Assisted GPS (A-GPS) is a network service that sends you GPS data, improving the speed and accuracy of the positioning.

WLAN positioning improves position accuracy when GPS signals are not available, especially when you are indoors or between tall buildings.

With network (cell ID) based positioning, the position is determined through the antenna system your mobile device is currently connected to.

When you use Maps for the first time, you are prompted to define the internet access point to use to download map information, use A-GPS, or connect to a WLAN.

To avoid network service costs, you can disable A-GPS, WLAN, and network (cell ID) based positioning in your device positioning settings, but calculating your location may take much longer. For more information about positioning settings, see the user guide of your device.

The availability and quality of GPS signals may be affected by your location, satellite positions, buildings, natural obstacles, weather conditions and adjustments to GPS satellites made by the United States government. GPS signals may not be available inside buildings or underground.

Do not use GPS for precise location measurement, and never rely solely on the location information provided by GPS and cellular networks.

The trip meter may not be accurate, depending on the availability and quality of your GPS connection.

Note: Using WLAN may be restricted in some countries. For example, in France, you are only allowed to use WLAN indoors. For more information, contact your local authorities.

Depending on the available positioning methods, the accuracy of positioning may vary from a few metres to several kilometres.

Search Find a location

Maps helps you find specific locations and businesses.

Select Menu > Maps and Search.

- 1 Enter search words, such as a street address or place name.
- 2 Select 🗸.
- 3 Select an item from the list of proposed matches.
 The location is displayed on the map.

Return to the list of proposed matches Select **Search**.

Tip: In the search view, you can also select from the list of your previous search words.

Search for different types of nearby places

Select **Categories** and a category, such as shopping, accommodation, or transport.

If no search results are found, make sure the spelling of your search words is correct. Problems with your internet connection may also affect results when searching online.

If you have maps of the searched area stored on your device, you can also get search results without an active internet connection, to avoid data transfer costs, but the search results may be limited.

View location details

Find more information about a specific location or place, such as a hotel or restaurant, if available.

The available options may vary by region. To view all the available place details, you need an active internet connection.

Select Menu > Maps and Search.

View the details of a place

Search for a place. Select the place and its information area.

Rate a place

Search for a place. Select the place, its information area, **Rate**, and the star rating. For example, to rate a place as being 3 out of 5 stars, select the third star.

When you find a place that does not exist or contains inappropriate information or incorrect details, such as the wrong contact information or location, it is recommended that you report it to Nokia.

Report incorrect place information

Select the place, its information area, **Report**, and the appropriate option.

Favourites

Save or view a place or route

Save an address, place of interest, or route, so it can be quickly used later.

Select Menu > Maps.

Save a place

- 1 Select My position.
- 2 Tap the location. To search for an address or place, select **Search**.
- 3 Tap the location's information area.
- 4 Select Save.

Save a route

- 1 Select My position.
- 2 Tap the location. To search for an address or place, select **Search**.
- 3 Tap the location's information area.
- 4 To add another route point, select Navigate > Add to route.
- 5 Select Add new route point and the appropriate option.
- 6 Select Show route > Options > Save route.

View a saved place

In the main view, select Favourites > Places, the place, and Show on map.

View a saved route

In the main view, select **Favourites** > **Routes** and the route.

View and organise places or routes

Use your Favourites to quickly access the places and routes you have saved.

Group the places and routes into a collection, for example, when planning a trip.

Select Menu > Maps and Favourites.

View a saved place on the map

- 1 Select Places.
- 2 Go to the place.
- 3 Select Show on map.

To return to the list of saved places, select **List**.

Create a collection

Select **Create new collection**, and enter a collection name.

Add a saved place to a collection

- 1 Select **Places** and the place.
- 2 Select Organise collections.
- 3 Select New collection or an existing collection.

If you need to delete routes, go to the Ovi Maps internet service at www.ovi.com.

Send a place to a friend

When you want to show your friends where a place is on the map, you can send the place to them.

Select Menu > Maps and My position.

To view the place on the map, your friends don't need to have a Nokia mobile device, but an active internet connection is required.

- 1 Select a place and its information area.
- 2 Select Share > Share via SMS or Share via Email.

A mail or text message containing a link to the location on the map is sent to your friend.

Synchronise your Favourites

Plan a trip on your computer at the Ovi Maps website, synchronise the saved places and routes with your mobile device, and access the plan on the go.

To synchronise places or routes between your mobile device and the Ovi Maps internet service, you need to be signed in to your Nokia account.

Synchronise saved places and routes

Select Favourites > Synchronise with Ovi. If you do not have a Nokia account, you are prompted to create one.

You can set your device to synchronise your Favourites automatically when you open or close the Maps application.

Synchronise Favourites automatically

Select > Synchronisation > Synchronisation > At start-up and shut-d..

Synchronising requires an active internet connection, and may involve the transmission of large amounts of data through your service provider's network. For information about data transmission charges, contact your service provider.

To use the Ovi Maps internet service, go to www.ovi.com.

Drive and Walk Get voice guidance

Voice guidance, if available for your language, helps you find your way to a destination, leaving you free to enjoy the journey.

Select Menu > Maps and Drive or Walk.

When you use drive or walk navigation for the first time, you are asked to select the language of the voice guidance, and download the appropriate files.

If you select a language that includes street names, also the street names are said aloud. Voice guidance may not be available for your language.

Change the voice guidance language

In the main view, select \(\square\) and Navigation > Drive guidance or Walk quidance and the appropriate option.

Deactivate voice guidance

In the main view, select Navigation > Drive guidance or Walk quidance and None.

Repeat the voice guidance for car navigation

In the navigation view, select **Options** > **Repeat**.

Adjust the volume of the voice guidance for car navigation

In the navigation view, select **Options** > **Volume**.

Drive to your destination

When you need turn-by-turn directions while driving, Maps helps you get to your destination.

Select Menu > Maps and Drive.

Drive to a destination

Select **Set destination** and the appropriate option.

Drive to your home

Select Drive home.

You can start driving without a set destination. The map follows your location, and traffic information is automatically displayed, if available. To set the destination later, select **Destination**.

By default, the map rotates to your driving direction.

Orient the map to north

Select **(A)**. To rotate the map back to your driving direction, select **(A)**.

When you select **Drive home** or **Walk home** for the first time, you are prompted to define your home location.

Change your home location

- 1 In the main view, select \(\int \).
- 2 Select Navigation > Home Location > Redefine.
- 3 Select the appropriate option.

Change views during navigation

Swipe left to select 2D view, 3D view, Arrow view, or Route overview.

Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

Navigation view

- 1 Route
- 2 Your location and direction
- 3 Information bar (speed, distance, time)

Get traffic and safety information

Enhance your driving experience with real-time information about traffic events, lane assistance, and speed limit warnings, if available for your country or region.

Select Menu > Maps and Drive.

View traffic events on the map

During drive navigation, select **Options** > **Traffic info**. The events are displayed as triangles and lines.

Update traffic information

Select Options > Traffic info > Update traffic info.

When planning a route, you can set the device to avoid traffic events, such as traffic jams or roadworks.

Avoid traffic events

In the main view, select > Navigation > Reroute due to traffic.

The location of speed cameras may be shown on your route during navigation, if this feature is enabled. Some jurisdictions prohibit or regulate the use of speed camera location data. Nokia is not responsible for the accuracy, or the consequences of using speed camera location data.

Walk to your destination

When you need directions to follow a route on foot, Maps guides you over squares, and through parks, pedestrian zones, and even shopping centres.

Select Menu > Maps and Walk.

Walk to a destination

Select **Set destination** and the appropriate option.

Walk to your home

Select Walk home.

You can start walking without a set destination.

By default, the map is oriented to north.

Rotate the map to your walking direction

Select (8). To rotate the map back to north, select (8).

When you select **Drive home** or **Walk home** for the first time, you are prompted to define your home location.

Change your home location

- 1 In the main view, select \(\mathbb{N} \).
- 2 Select Navigation > Home Location > Redefine.
- 3 Select the appropriate option.

Plan a route

Plan your journey, and create your route and view it on the map before setting off.

Select Menu > Maps and My position.

Create a route

- Tap the location of your starting point. To search for an address or place, select Search.
- 2 Tap the location's information area.
- 3 Select Navigate > Add to route.
- 4 To add another route point, select Add new route point and the appropriate option.

Change the order of the route points

- 1 Select a route point.
- 2 Select Move.
- 3 Tap the place where you want to move the route point to.

Edit the location of a route point

Tap the route point, and select **Edit** and the appropriate option.

View the route on the map

Select Show route.

Navigate to the destination

Select Show route > Options > Start driving or Start walking.

Change the settings for a route

The route settings affect the navigation guidance and the way the route is displayed on the map.

- In the route planner view, open the Settings tab. To get to the route planner view from the navigation view, select Options > Route points or Route points list.
- 2 Set the transportation mode to Drive or Walk. If you select Walk, one-way streets are regarded as normal streets, and walkways and routes through, for example, parks and shopping centres, can be used.
- 3 Select the desired option.

Select the walking mode

Open the Settings tab, set the transportation mode to Walk, and select Preferred route > Streets or Straight line. Straight line is useful on off-road terrain as it indicates the walking direction.

Use the faster or shorter driving route

Open the Settings tab, set the transportation mode to **Drive**, and select **Route selection** > **Faster route** or **Shorter route**.

Use the optimised driving route

Open the Settings tab, set the transportation mode to **Drive**, and select **Route selection > Optimised**. The optimised driving route combines the advantages of both the shorter and the faster routes.

You can also choose to allow or avoid using, for example, motorways, toll roads, or ferries.

Give feedback on Maps

60

Participate in improving the Maps application, and send your feedback.

Select Menu > Maps.

- 1 Select? > Feedback.
- 2 Select how likely you are to recommend Maps to other people. You can also give your reasons. The feedback is anonymous.
- 3 Select Submit.

To give feedback, you need to have an active internet connection.

After you have sent your feedback for the current version of Maps, the option is no longer available.

Report incorrect map information

If you notice that information on the map is incorrect or missing, report it to Nokia.

Select Menu > Maps and More > Map Reporter.

The service may not be available for your country or region. Reporting incorrect or missing information requires an internet connection.

You can report issues, such as:

- Missing or incorrect street names
- Streets that are blocked or unsuitable for walking on
- Incorrect restrictions or speed limits

You can add further details when reporting.

Time management

Clock

About the clock

Select Menu > Applications > Clock.

Set and manage alarms, and check local times in different countries and cities.

Set the time and date

On the home screen, select the clock and **Options** > **Settings** > **Time** or **Date**.

Tip: To view the time and date when the screen and keys are locked, press and hold the menu key.

Set an alarm

You can use your device as an alarm clock.

On the home screen, select the clock.

- 1 Select New alarm.
- 2 Set the alarm time, and enter a description.
- 3 To set the alarm to sound, for example, at the same time every day, select Repeat.

Remove an alarm

Select and hold the alarm, and from the pop-up menu, select **Delete alarm**.

Snooze an alarm

When an alarm sounds, you can snooze the alarm. This pauses the alarm for a defined length of time.

When the alarm sounds, select **Snooze**.

Set the length of the snooze time

On the home screen, select the clock and Options > Settings > Alarm snooze time, and set the length of time.

You can snooze alarms also by turning your device display down. To use this feature, you must first activate the sensors.

Activate the sensors

Select Menu > Settings and Phone > Sensor settings > Sensors > On.

Activate turning control for snoozing

Select Menu > Settings and Phone > Sensor settings > Turning control > Snoozing alarms.

Update the time and date automatically

You can set your device to update the time, date, and time zone automatically.

On the home screen, select the clock and Options > Settings > Automatic time update > On.

Automatic update is a network service.

Change the time zone when travelling

You can set the clock to the local time when travelling abroad.

On the home screen, select the clock, and open the world clock tab.

Add a location

Select **Options** > **Add location** and a location.

Set your current location

Select and hold a location, and from the pop-up menu, select Set as current location.

The time in your device is changed according to the selected location. Make sure the time is correct.

Check the time in different cities

To view the time in different locations, add them to your world clock tab. You can also add pictures for the locations, for example, a picture of your friend who lives in the city in question, or a view from your favourite tourist attraction.

On the home screen, select the clock, and open the world clock tab.

Add a location

Select **Options** > **Add location** and a location. You can add up to 15 locations.

Add a picture for a location

Select and hold a location, and from the pop-up menu, select Change image and a picture.

Calendar About the calendar

Select Menu > Calendar.

With your device calendar, you can keep your schedules organised.

Add a calendar entry

Save your important appointments to your calendar as calendar entries.

- Select (Tap to create entry), or if there are existing entries, tap the area below an entry. The calendar entry type is meeting by default.
- 2 Fill in the fields.
- 3 To repeat the calendar entry at regular intervals, select and the time interval. Select Repeat until, and enter the end date.
- 4 Select Done.

Tip: You can also add a calendar entry in the day view. Select and hold the starting time, and drag the arrows to set the duration.

View your schedule for the week

You can browse your calendar entries in different views. To easily check all the

entries for a particular week, use the week view.

Select the number of the desired week.

Tip: To increase or decrease the size of the viewable area, place two fingers on the screen, and slide them apart or together.

Browse your calendar in different views

Want to see all your calendar entries for a particular day? You can browse your calendar entries in different views.

Select **Options** > **Change view** and the desired view.

Tip: To go to the previous or next day, week, or month, in the appropriate view, swipe left or right.

Add a task to your to-do list

Do you have important tasks to handle at work, library books to return, or maybe an event you want to attend? You can add tasks (to-do notes) to your calendar. If you have a particular deadline, set a reminder.

- Select (Tap to create entry), or if there are existing entries, tap the area below an entry.
- 2 Select the entry type field **A.**, and select **To-do note** as the entry type.
- 3 Fill in the fields.
- 4 To add a reminder for the task, select ...
- 5 Select Done.

Send a meeting request

You can create meeting requests, and send them to the participants.

Before you can create and send a new meeting request, you need to set up a mailbox.

- 1 In a calendar view, select and hold a calendar entry, and from the pop-up menu, select Send > Via mail.
- 2 Add the meeting participants as recipients of the request mail.
- 3 To send the request, select .

Remember a birthday

You can add a reminder for birthdays and other special dates. The reminders are repeated annually.

On the home screen, select the date.

- Go to the desired date, and select Options > New entry > Calendar entry type > Anniversary.
- 2 Fill in all the fields. To close the text input dialog, select ✓.

Use separate calendars for work and free time

You can have more than one calendar. Create one for work and another for your free time.

Create a new calendar

- Select Options > Manage calendars.
- 2 Select Options > Create new calendar.
- 3 Enter a name, and set a colour code for the calendar.
- 4 Define the visibility for the calendar. When a calendar is hidden, the calendar entries and reminders are not displayed in different calendar views or on the home screen.
- 5 Select Done.

Modify the settings for a calendar

- 1 In the Manage calendars view, select the desired calendar.
- 2 Change the name, colour, and visibility.
 - 3 Select **Done**.

Add an entry to a particular calendar

- 1 When adding a calendar entry, select and the calendar.
- Select Done.

Colour codes indicate which calendar an entry belongs to.

Add the location to a calendar entry

Do you have an appointment in a place you have never visited? You can add the location information to your calendar entry.

- Select (Tap to create entry), or if there are existing entries, tap the area below an entry.
- Select \(\backsquare Add location, \) and select the location in the Maps application. You can also manually enter the location in the text field.
- 3 Select Done.

Office

Quickoffice About Quickoffice

Select Menu > Applications > Office > Quickoffice.

Quickoffice consists of the following:

 Quickword for viewing Microsoft Word documents Quickword for viewing and editing Microsoft Word documents

 Quicksheet for viewing Microsoft Excel worksheets

Quicksheet for viewing and editing Microsoft Excel worksheets

 Quickpoint for viewing Microsoft PowerPoint presentations

Quickpoint for viewing and editing Microsoft PowerPoint presentations

Not all file formats or features are supported.

To buy the editor version of Quickoffice, select **Updates and upgrades**.

Read Microsoft Word, Excel, and PowerPoint documents

You can view Microsoft Office documents, such as Word documents, Excel worksheets, or PowerPoint presentations.

Select Menu > Applications > Office > Ouickoffice.

Open a file

Select **Browse files** and the memory where the file is stored, browse to the correct folder, and select the file.

Sort files

Select **Options** > **Sort by**.

Not all formats or features are supported.

Edit a document

With Quickoffice, you can edit Microsoft Word documents.

Select Menu > Applications > Office > Quickoffice.

Create a new document

Select New document.

Insert text

Select an empty area, and enter text.

Edit text

Select a paragraph.

Format text

To edit the font and paragraph properties, select **Options** > **Format**.

Edit a workbook

With Quickoffice, you can edit Microsoft Excel workbooks.

Select Menu > Applications > Office > Ouickoffice.

Create a new document

Select New document.

Fdit a cell

Select the cell and **Options** > **Edit cell**. To insert a function, in the editing view, select **Options** > **Insert function**.

Edit a presentation

With Quickoffice, you can edit Microsoft PowerPoint presentations.

Select Menu > Applications > Office > Ouickoffice.

Create a new document

Select New document.

Add a slide

Select Options > Slide options > Insert new slide.

Insert an image, textbox, shape, or other element

Select Options > Insert.

Fdit text

Select a textbox and **Options** > **Edit textbox**.

Read PDF documents

With Adobe Reader, you can read PDF documents.

Select Menu > Applications > Office > Adobe PDF.

Open a file

Select the memory where the file is stored, browse to the correct folder, and select the file.

Make a calculation

Select Menu > Applications > Office > Calculator.

- 1 Enter the first number of the calculation.
- 2 Select a function, such as add or subtract.
- 3 Enter the second number of the calculation.
- 4 Select =.

Save or retrieve the result of a calculation

Select Options > Memory > Save or Recall.

Write notes About Notes

You can write notes, such as meeting memos, and save received plain text files (TXT files) to the Notes application.

Make a shopping list

Shopping lists on paper are easy to lose. Instead of writing them on paper, you can make your shopping lists with Notes. This way, you always have the list with you! You can also send the list to, for example, a family member.

Select Menu > Applications > Notes.

- 1 Select Options > New note.
- 2 Enter text in the note field.

Send the list

Open the note, and select **Options** > **Send** and the sending method.

Translate words from one language to another

You can translate words from one language to another. Not all languages may be supported.

Select Menu > Applications > Office > Dictionary.

- Enter text in the search field.
 Suggestions of words to translate are displayed.
- 2 Select the word from the list.

Change the source or target language

Select Options > Languages > Source or Target.

Download more languages from the internet

Select Options > Languages > Download languages.

English is preinstalled, and you can add two additional languages.

Open or create zip files

You can open and extract files from zip files. You can also create new zip files, to store and compress files.

Select Menu > Applications > Office > Zip.

You can save the zip files in the device memory or on a memory card.

Access your company intranet

You can use your device to connect to your company intranet.

Select Menu > Applications > Office > Intranet.

- Select Options > Settings. For the relevant settings, contact your system administrator. You must also define a VPN access point.
- 2 Select Options > Connect.

Tip: If you have several intranet destinations, for example, partner extranets, defined in Connection settings, to define which intranet to browse, select **Manual connection**.

Connectivity

Internet connections Define how your device connects to the

internet
Your device automatically checks for and connects to an available known network

connects to an available known network when a network connection is needed. Selection is based on the connection settings, unless there are application-specific settings applied.

Select Menu > Settings and Connectivity > Settings.

Automatically switch to a known WLAN connection when available

Select Switch to WLAN > Known WLANs only.

You can also connect to WLANs manually using the WLAN wizard application.

Only use a WLAN connection

For WLAN connections when in your home network, select Data use in home country > WLAN only. For WLAN connections when outside your home network, select Data use when abroad > WLAN only.

Automatically use a packet data connection when in your home network

Select Data use in home country > Automatic.

To set the device to request confirmation before connecting, select Data use in home country > Always ask.

Request confirmation before using a packet data connection when outside your home network

Select Data use when abroad > Always ask.

To set the device to automatically connect, select **Data use when** abroad > Automatic. Opening connections when abroad can raise data transfer costs substantially.

Change access point priority for the internet connection

- 1 Select Destinations > Internet.
- Select and hold an access point, and from the pop-up menu, select Change priority.
- 3 Tap the position in the list to move the access point to.

Example: If a WLAN access point is ranked above a packet data access point in the list, the device will always try to first connect to the WLAN access point, only connecting to the packet data access point if the WLAN is not available.

Create a new access point

Select Options > New access point.

Wireless LAN About WLAN connections

Select Menu > Settings and Connectivity > WLAN.

The WLAN wizard application helps you connect to a wireless local area network (WLAN) and manage your WLAN connections.

Important: Use encryption to increase the security of your WLAN connection. Using encryption reduces the risk of others accessing your data.

Note: Using WLAN may be restricted in some countries. For example, in France, you are only allowed to use WLAN indoors. For more information, contact your local authorities.

Connect to a WLAN at home

To help save data costs, connect to your home WLAN when you are at home and want to browse the web on your device.

- 1 Select Menu > Settings and Connectivity > WLAN.
- 2 Select and hold your home WLAN, and from the pop-up menu, select Start web browsing.

If your home WLAN is secured, enter the passcode. If your home WLAN is hidden, select **Other (hidden netw.)**, and enter the network name (service set identifier, SSID).

Close the WLAN connection

Select and hold the connection, and from the pop-up menu, select **Disconnect WLAN**.

Connect to a WLAN on the move

Connecting to a WLAN is a handy way of accessing the internet when not at home.

Connect to public WLANs in public places, such as a library or internet café.

- 1 Select Menu > Settings and Connectivity > WLAN.
- 2 Select and hold the desired WLAN connection, and from the pop-up menu, select Start web browsing.

Bluetooth About Bluetooth connectivity

Select Menu > Settings and Connectivity > Bluetooth.

With Bluetooth connectivity, you can make a wireless connection to other compatible devices, such as mobile devices, computers, headsets, and car kits.

You can use the connection to send items from your device, transfer files from your compatible PC, and print files with a compatible printer.

Since devices with Bluetooth wireless technology communicate using radio waves, they do not need to be in direct line-of-sight. However, they must be within 10 metres (33 feet) of each other, although the connection may be subject to interference from obstructions such as walls or from other electronic devices.

When the device is locked, only connections to authorised devices are possible.

Connect to a wireless headset

With a wireless headset you can answer a call even if your device is not directly at hand, and you can have your hands free, for example, to continue working at your computer during a call. Wireless headsets are available separately.

- 1 Select Menu > Settings and Connectivity > Bluetooth > On.
- 2 Switch the headset on.
- 3 To pair your device and the headset, open the Paired devices tab.
- 4 Select the headset.
 If the headset is not displayed in the list, to search for it, select **Options** > **New paired device**.
- 5 You may need to enter a passcode. For details, see the user guide of the headset.

Send a picture or other content to another device using Bluetooth

You can use Bluetooth to send pictures, videos, business cards, calendar entries, and other content to your friend's compatible devices and to your computer.

You can have several Bluetooth connections active at a time. For example, if you are connected to a compatible headset, you can also send files to another compatible device at the same time.

- Select and hold the item, for example, a picture. From the pop-up menu, select Send > Via Bluetooth.
- 2 Select the device to connect to. If the desired device is not displayed, to search for it, select More devices. When searching, Bluetooth devices within range are displayed.
- 3 If the other device requires a passcode, enter the passcode. The passcode, which you can define yourself, must be entered in both devices. The passcode in some devices is fixed. For details, see the user guide of the device.
 - The passcode is valid only for the current connection.
- 4 If you connect to a device frequently, to set it as authorised, accept the authorisation query Authorise device to make connections automatically? when pairing. When a device is authorised, you do not have to enter the passcode every time.

Connect to a car kit using remote SIM mode

With remote SIM mode, a compatible car kit can use the SIM card of your device.

Select Menu > Settings and Connectivity > Bluetooth.

Before remote SIM mode can be activated, your device and accessory must be paired. Initiate the pairing from the car kit accessory.

- 1 To activate Bluetooth, select Bluetooth > On.
- 2 To activate remote SIM mode in your device, select Remote SIM mode > On.
- 3 Activate Bluetooth in the car kit accessory.

When remote SIM mode is activated, **Remote SIM mode** is displayed in the home screen. The connection to the wireless network is closed, and you cannot use SIM card services or features that require cellular network coverage.

To make or receive calls when in remote SIM mode, you need to have a compatible accessory, such as a car kit, connected to your device.

Your device will only allow emergency calls in this mode.

Deactivate remote SIM mode

Press the power key, and select Exit remote SIM mode.

Block a device

You can prevent devices from creating a Bluetooth connection to your device.

Select Menu > Settings and Connectivity > Bluetooth.

Open the Paired devices tab, select and hold the device you want to block, and from the pop-up menu, select **Block**.

Remove a device from the blocked devices list

Open the Blocked devices tab, select and hold the device you want to remove from the list, and from the pop-up menu, select Delete.

If you reject a pairing request from another device, you are asked if you want to add the device to the list of blocked devices.

Protect your device

When Bluetooth is activated in your device, you can control who can find and connect to your device.

Select Menu > Settings and Connectivity > Bluetooth.

Prevent others from detecting your device

Select My phone's visibility > Hidden. When your device is hidden, others cannot detect it. However, paired devices can still connect to your device.

Deactivate Bluetooth

Select Bluetooth > Off.

Do not pair with or accept connection requests from an unknown device. This helps to protect your device from harmful content.

USB data cable

Copy a picture or other content between your device and a computer

You can use a USB data cable to copy pictures and other content between your device and a computer.

- 1 To make sure that Media transfer is set as the USB mode, select Menu > Settings and Connectivity > USB > Media transfer.
- Use a compatible USB data cable to connect your device to a computer. The device is displayed as a portable device on your computer. If Media transfer mode does not work on your computer, use Mass storage mode instead.
- 3 Use the file manager of the computer to copy the content.

Change the USB mode

For best results when copying content or synchronising your device with your computer, activate the appropriate USB mode when using a USB data cable to connect to various devices.

Select Menu > Settings and Connectivity > USB and from the following:

○ Nokia Ovi Suite — Connect your device to a compatible computer that has Nokia Ovi Suite installed. In this mode, you can synchronise your device with Ovi Suite and use other Ovi Suite features.

This mode is activated automatically when you open the Ovi Suite application.

Mass storage — Connect your device to a compatible computer that does not have Ovi Suite installed. Your device is recognised as a USB flash memory. You can also connect your device to other devices, such as a home or car stereo, to which you can connect a USB drive.

While connected to a computer in this mode, you may not be able to use some of the device applications.

The memory card in your device cannot be accessed by the other device.

Media transfer — Connect your device to a compatible computer that does not have Ovi Suite installed. Music protected by digital rights management (DRM) must be transferred in this mode. Some home entertainment systems and printers can also be used in this mode.

Conn. PC to net — Connect your device to a compatible computer, and use the device as a wireless modem. The computer connects to the internet automatically.

Tip: When the USB cable is connected, you can change the USB mode in most views. In the top right corner, select •— > USB.

Connect a USB mass storage device

You can use a USB On-The-Go (OTG) adapter to connect your device to a compatible USB memory stick or hard drive.

Connect a memory stick

- Connect the micro USB end of the USB OTG adapter (sold separately) to the USB port in your device.
- 2 Connect a memory stick to the USB OTG adapter.

The File manager application opens, and the memory stick is displayed as a mass memory.

Copy or move a file

In File mgr., select and hold the file you want to copy or move, and from the popup menu, select the desired option and the target folder.

If you connect a hard drive that requires more than 200 mA of power, use an external power source for the hard drive.

VPN connections

Select Menu > Settings and Connectivity > Settings > VPN.

You need a virtual private network (VPN) connection to, for example, browse your company intranet or access your work mails remotely.

VPN policies define how data is encrypted and how your company authenticates your device. To configure the VPN client, certificates, and policies, contact your company's IT department. After installing a policy, a VPN connection method is automatically added to an intranet destination

For more information, search for mobile VPN at www.nokia.com.

Close a network connection

If several applications are using an internet connection, you can use the Connection manager application to close some or all network connections.

Select Menu > Settings and Connectivity > Connection manager.

Select and hold the connection, and from the pop-up menu, select **Disconnect**.

In the active data connections view, you can see your current network connections. indicates a packet data connection, and indicates a wireless local area network (WLAN) connection.

View details for a connection

Select and hold the connection, and from the pop-up menu, select **Details**.

Details, such as the amount of transferred data and connection duration, are displayed.

Tip: In most views, to open the Connection manager application, select the notification area in the top right corner and \implies > Connection manager.

Store your files on a remote drive

If you want to back up your data or save space on your device, you can use a remote drive for storing and managing your files.

Select Menu > Settings and Connectivity > Remote drives.

You may receive the remote drive settings as a configuration message from your service provider. Open the message, and save the settings.

The service may be chargeable. For information on availability and possible costs, contact your service provider.

Connect to a remote drive

Select and hold the remote drive, and from the pop-up menu, select **Connect**.

Add a new remote drive

- 1 Select Options > New drive.
- 2 Enter the name of the remote drive.
- 3 Enter the web address of the remote drive, including the port number.
- 4 To select the access point to use to connect to the remote drive, select Access point > User defined. If you select Ask when needed, you are prompted for the destination or access point every time the application connects to the network.
- 5 Enter your user name and password, if required by the remote drive service.

Modify the settings of an existing remote drive

Select **Remote drives** and the desired drive.

Use the **File manager** application to access your remote drives and manage stored files.

Device management

Keep your device software and applications up to date About device software and application updates

With device software updates and application updates, you can get new features and enhanced functions for your

device. Updating the software may also improve your device performance.

It is recommended that you back up your personal data before updating your device software.

Using the service or downloading content may cause transfer of large amounts of data, which may result in data traffic costs.

Make sure that the device battery has enough power, or connect the charger before starting the update.

After the update, the instructions in the user guide may no longer be up to date.

Update device software and applications using your device

You can check if there are updates available for your device software or for individual applications, and then download and install them to your device (network service). You can also set your device to automatically check for updates

and notify you when important or recommended updates are available.

Select Menu > Applications > SW update.

If there are available updates, select which updates to download and install, and select .

Set your device to automatically check for updates

Select Options > Settings > Auto-check for updates.

Update device software using your PC

You can use the Nokia Ovi Suite PC application to update your device software. You need a compatible PC, a high-speed internet connection, and a compatible USB data cable to connect your device to the PC.

To get more information and to download the Nokia Ovi Suite application, go to www.ovi.com/suite.

Manage files About File manager

Select Menu > Applications > Office > File mgr..

With File manager, you can browse, manage, and open files on your device. You can also view and manage files on a compatible inserted memory card.

View the files stored on your device

Select Menu > Applications > Office > File mgr. and the desired memory.

The folders on the root of the memory are displayed.

Organise files

You can delete, move, copy, or create new files and folders. If you need to backup or upload files, organising them into their own folders eases the transfer.

Select Menu > Applications > Office > File mgr..

Create a new folder

In the folder where you want to create a sub-folder, select **Options** > **New folder**.

Copy or move a file to a folder

Select and hold the file, and from the popup menu, select the appropriate option.

Tip: You can also copy or move several files at the same time. Select **Options** > **Mark multiple items**.

Back up files

Select Menu > Applications > Office > File mgr. and Backup and restore.

It is recommended that you back up the device memory regularly to a compatible computer or memory card.

Tip: If you have DRM-protected content, use Nokia Ovi Suite to back up both the licences and the content to your computer.

Password protect your memory card

Want to protect the memory card against unauthorised use? You can set a password to protect the data.

- 1 Select Menu > Applications > Office > File mgr..
- 2 Select and hold the memory card.

From the pop-up menu, select Set password, and enter a password.
Keep the password secret and in a safe place, separate from the memory card.

Format a memory card

Want to delete all content from your memory card? When you format a memory card, all the data on it is deleted.

- 1 Select Menu > Applications > Office > File mgr..
- 2 Select and hold the memory card, and from the pop-up menu, select Format.

Increase available memory for more content

Do you need to increase the available device memory, so you can install more applications, and add more content?

Transfer data to a compatible memory card (if available) or to a compatible computer.

You can also remove the following if no longer needed:

- · Text, multimedia, and mail messages
- · Contact entries and details
- Applications
- Installation files (.sis or .sisx) for installed applications. Back up the files to a compatible computer.
- Pictures and videos in Photos. Back up the files to a compatible computer.

Tip: If expired trial or demo applications are installed, remove them.

Manage applications About Application manager

Select Menu > Settings and Application manager.

With Application manager you can view details of installed applications, remove applications, and define installation settings.

You can install the following types of applications:

- Java™ ME applications that have the .jad or .jar file extension
- Applications, compatible with the Symbian operating system, that have the .sis or .sisx file extension
- Widgets that have the .wgz file extension

Only install applications that are compatible with your device.

Remove an application from your device

You can remove installed applications that you no longer want to keep or use, to increase the amount of available memory.

Select Menu > Settings and Application manager.

- 1 Select **Installed apps.**.
- Select and hold the application to remove, and from the pop-up menu, select Uninstall.

If you remove an application, you can only reinstall it, if you have the original installation file or a full backup of the removed application. You may not be able to open files created with a removed application.

If an installed application depends on a removed application, the installed application may stop working. For details, see the user documentation of the installed application.

The installation files may use large amounts of memory and prevent you from storing other files. Use Nokia Ovi Suite to back up installation files to a compatible PC, then file manager to remove the installation files from the device memory.

Synchronise content About Sync

Select Menu > Settings and Connectivity > Data transfer > Sync.

With the Sync application, you can synchronise your contacts, notes, and other content between your device and a remote server. After the synchronisation, you have a back-up of your important data on the server.

Synchronise content between your device and a remote server

Would you like to have your calendar, notes, and other content backed up and at hand, whether you are sitting by your computer or on the go with your mobile device? With the Sync application, you can

synchronise the important content between your device and a remote server.

Select Menu > Settings and Connectivity > Data transfer > Sync.

You may receive synchronisation settings as a configuration message from your service provider. The synchronisation settings are saved as a synchronisation profile. When you open the application, the default or previously used synchronisation profile is displayed.

Include or exclude content types Select a content type.

Synchronise data

Select Options > Synchronise.

Tip: To synchronise content between your device and Ovi, you can use the Ovi Sync application.

About Ovi Sync

Select Menu > Applications > Tools > Ovi Sync.

With Ovi Sync, you can synchronise contacts, calendar entries, and notes between your device and Ovi by Nokia. This way you always have a backup of your important content. To use Ovi Sync, you need a Nokia account. If you do not have a Nokia account, create one at www.ovi.com.

If you use Ovi Sync to automatically synchronise your contacts with Ovi, do not allow synchronisation with any other service, such as Mail for Exchange, as there may be conflicts.

Back up content to Ovi

Would you like to have your calendar entries, notes, and other content on your device backed up on 0vi? With the 0vi Sync application, you can synchronise the content between your device and 0vi manually or automatically.

Select Menu > Applications > Tools > Ovi Sync.

When you open the application for the first time, the synchronisation wizard helps you define the settings and select the content to synchronise.

Define the content to synchronise

Select Options > Sync settings > Items to synchronise.

Synchronise manually

Select Synchronise.

Synchronise automatically

- 1 To activate automatic synchronisation, select **Options** > **Sync settings** > **Auto-sync**.
- 2 To define how often to synchronise, select Options > Sync settings > Scheduled sync interval.

Copy contacts or pictures between devices

With the Phone switch application, you can use Bluetooth to synchronise and copy content between two compatible Nokia devices, free of charge.

Select Menu > Settings >
Connectivity > Data transfer > Phone
switch.

1 Select from the following:

- Synchronise content between two devices.
- Copy content from another device.
- Copy content to another device.
- 2 Select the device you want to connect to, and pair the devices. Bluetooth needs to be activated.
- 3 If the other device requires a passcode, enter the passcode. The passcode, which you can define yourself, must be entered in both devices. The passcode in some devices is fixed. For details, see the user guide of the device.
 - The passcode is valid only for the current connection.
- 4 Select the content and OK.

Tip: If you save the details, it is easier to later exchange the same content with the same device.

Protect your device Set your device to lock automatically

Want to protect your device against unauthorised use? Define a lock code, and set your device to lock itself automatically when you're not using it.

- Select Menu > Settings and Phone > Phone management > Security settings > Phone and SIM card.
- 2 Select Lock code, and enter a lock code. A minimum of 5 characters is required, and numbers, symbols, and upper and lower case letters can be used.

Keep the lock code secret and in a safe place separate from your device. If

- you forget the lock code and your device is locked, your device will require service. Additional charges may apply, and all the personal data on your device may be deleted. For more information, contact a Nokia Care point or your device dealer.
- 3 Select Phone autolock period, and define the length of time after which the device is locked automatically.

Lock your device manually

On the home screen, press the power key, select Lock phone, and enter the lock code.

Unlock your device

Press the menu key, and select Unlock.

Tip: To switch between the numeric and alphanumeric keypad, press and hold #.

Lock your device remotely

Forgot your device at work and want to lock it to prevent unauthorised use? You can lock your device remotely using a predefined text message. You can also lock the memory card remotely.

Enable remote locking

- 1 Select Menu > Settings and Phone > Phone management > Security settings > Phone and SIM card > Remote phone locking > Enabled.
- Enter the text message content. It can be 5-20 characters, and both upper and lower case letters can be used.
- 3 Enter the same text again to verify it.
- 4 Enter the lock code.

Send the lock message

To lock the device remotely, write the predefined text, and send it to your device as a text message.

To unlock your device, you need the lock code.

Find more help

Support

When you want to learn more about how to use your product or you are unsure how your device should function, go to www.nokia.com/support, or using a mobile device, nokia.mobi/support. You can also read the in-device guide. Select Menu > Applications > User guide.

If this does not resolve your issue, do one of the following:

- Reboot your device. Press and hold the power key // for about 8 seconds. The device vibrates three times and switches off. To switch your device on again, press the power key
- Restore the original factory settings
- · Update your device software

If your issue remains unsolved, contact Nokia for repair options. Go to www.nokia.com/repair, or in Latin America, www.nokia-latinoamerica.com/ centrosdeservicio. Before sending your device for repair, always back up your device data.

Access codes

PIN or PIN2 code (4-8 digits)	These protect your SIM card against unauthorised use or are required to access some features.
	You can set your device to ask for the PIN code when you switch it on.
	If not supplied with your SIM card or you forget the codes, contact your service provider.
	If you enter the code incorrectly three times in a row, you need to unblock the code with the PUK or PUK2 code.
PUK or PUK2	These are required to unblock a PIN or PIN2 code.
code (8 digits)	If not supplied with your SIM card, contact your service provider.
IMEI number (15 digits)	This is used to identify valid devices in the network. The number can also be used to block, for example, stolen devices.
	To view your IMEI number, dial *#06#.
Lock code (security code)	This protects your device against unauthorised use.
	You can set your device to ask for the lock code that you
(min. 4 digits or characte rs)	define.

Keep the code secret and in a safe place, separate from your device.

If you forget the code and your device is locked, your device will require service. Additional charges may apply, and all the personal data in your device may be deleted.

For more information, contact a Nokia Care Point or your device dealer.

Troubleshooting

If your device stops responding

Restart your device. Press and hold the power key and the menu key for about 8 seconds. The device vibrates three times and switches off. To switch your device on again, press the power key until the device vibrates.

No content, such as contacts or messages, is deleted.

Restore original settings

If your device is not working properly, you can reset some settings to their original values.

- 1 End all active calls and connections.
- 2 Select Menu > Settings and Phone > Phone management > Factory settings > Restore.
- 3 Enter the lock code.

This does not affect documents or files stored on your device.

After restoring the original settings, the device switches off, and then on again. This may take longer than usual.

If the device memory is full

If your device has the following messages, you need to close applications, or move or delete items:

- Not enough memory to perform operation. Delete some data first.
- Memory low. Delete some data from phone memory.
- 1 Make sure all applications are closed. Select **Options** > **Show open** applications. For each application you want to close, select the X icon in the top right corner of the page.
- 2 Move content that you want to keep to a compatible memory card (if available) or to a compatible computer. If possible, install applications to the memory card, rather than the device memory.
- 3 Delete items one by one, beginning with the smallest items.

If the message indicator is blinking

If the message indicator is blinking on the home screen, the maximum number of messages are stored on your device. Delete or move some messages.

The number of messages that can be stored on the SIM card is considerably lower than the number that can be stored in the device memory. You can use Nokia Ovi Suite to save messages to a compatible computer.

If a contact appears twice in the contacts list

If a contact appears twice in your contacts list, you can merge the two contacts into one. Select **Options** > **Merge contacts**.

Unreadable characters while browsing the web

If unreadable characters are displayed, select Menu > Web and (>) > > Page > Default encoding and the correct encoding for the character set of the language.

Prepare your device for recycling

If you buy a new device, or otherwise want to dispose of your device, Nokia recommends that you recycle your device. Beforehand, remove all personal information and content from your device.

Remove all content and restore settings to the default values

- Back up the content you want to keep to a compatible memory card (if available) or to a compatible computer.
- 2 Close all active connections and calls.
- 3 Select Menu > Settings and Phone > Phone management > Factory settings > Delete data and restore.
- 4 Your device switches off and then on again. Check carefully that all your personal content, such as contacts, pictures, music, videos, notes, messages, mails, presentations, games and other installed applications have been removed. Content and information stored on the memory card or SIM card is not removed.

Product and safety information

Network services and costs

Your device is approved for use on the GSM 900, 1800, 1900 and FDD 1,2,4,5,8 MHz networks. To use the device, you need a subscription with a service provider.

Using network services and downloading content to your device requires a network connection and may result in data traffic costs. Some product features require support from the network, and you may need to subscribe to them.

Take care of your device

Handle your device, battery, charger and accessories with care. The following suggestions help you protect your warranty coverage.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that corrode electronic circuits. If your device gets wet, allow the device to dry.
- Do not use or store the device in dusty or dirty areas.
 Moving parts and electronic components can be damaged.
- Do not store the device in high temperatures. High temperatures can shorten the life of the device, damage the battery, and warp or melt plastics.
- Do not store the device in cold temperatures. When the device warms to its normal temperature, moisture can form inside the device and damage electronic circuits.
- Do not attempt to open the device other than as instructed in the user guide.
- Unauthorised modifications may damage the device and violate regulations governing radio devices.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and mechanics.
- Only use a soft, clean, dry cloth to clean the surface of the device.
- Do not paint the device. Paint can clog the moving parts and prevent proper operation.
- Keep your device away from magnets or magnetic fields
- To keep your important data safe, store it in at least two separate places, such as your device, memory card, or computer, or write down important information.

During extended operation, the device may feel warm. In most cases, this condition is normal. If you suspect the device is not working properly, take it to the nearest authorised service facility.

Recycle

Always return your used electronic products, batteries, and packaging materials to dedicated collection points. This way you help prevent uncontrolled waste disposal and promote the recycling of materials. Check product environmental information and how to recycle your Nokia products at www.nokia.com/werecycle, or with a mobile device, nokia.mobi/werecycle.

Batteries and chargers Battery and charger information

This device has an internal, nonremovable, rechargeable battery. Do not attempt to remove the battery from the device as you may damage the device. Take the device to the nearest authorised service facility for replacement of the battery.

This device is intended for use when supplied with power from the following chargers: AC-10. The exact charger model number may vary depending on the type of plug. The plug variant is identified by one of the following: E, X, AR, U, A, C, K, or B.

The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, take the device to the nearest authorised service facility for battery replacement.

Battery safety

Note: The battery in your device is non-removable, so refer to the battery-related statements as applicable to your device.

When you unplug a charger or an accessory, hold and pull the plug, not the cord.

When your charger is not in use, unplug it from the electrical plug and the device. Do not leave a fully charged battery connected to a charger, as overcharging may shorten the battery's lifetime. If left unused, a fully charged battery will lose its charge over time.

Always keep the battery between 15°C and 25°C (59°F and 77°F). Extreme temperatures reduce the capacity and lifetime of the battery. A device with a hot or cold battery may not work temporarily.

Accidental short-circuiting can happen when a metallic object touches the metal strips on the battery. Short-circuiting may damage the battery or the connecting object.

Do not dispose of batteries in a fire as they may explode. Dispose of batteries according to local regulations. Recycle when possible. Do not dispose as household waste.

Do not dismantle, cut, open, crush, bend, puncture, or shred cells or batteries. If a battery leaks, do not let battery liquid touch skin or eyes. If this happens, immediately flush the affected areas with water, or seek medical help.

Do not modify, remanufacture, attempt to insert foreign objects into the battery, or immerse or expose it to water or other liquids. Batteries may explode if damaged.

Use the battery and charger for their intended purposes only. Improper use, or use of unapproved batteries or chargers may present a risk of fire, explosion, or other hazard, and may invalidate any approval or warranty. If you believe the battery or charger is damaged, take it to a service centre for inspection before continuing to use it. Never use a damaged battery or charger. Only use the charger indoors.

Additional safety information Emergency calls

Make an emergency call

- 1 Ensure the device is switched on.
- 2 Check for adequate signal strength. You may also need to do the following:
 - Insert a SIM card.
 - Remove call restrictions you have activated for your device, such as call barring, fixed dialling, or closed user group.
 - Ensure your device is not in an offline or flight profile
 - If the device screen and keys are locked, unlock them
- 3 To clear the display, press the menu key as many times as needed.
- 4 Select Call.
- 5 Enter the official emergency number for your present location.
- 6 Select
 - Give the necessary information as accurately as possible. Do not end the call until given permission to do so.

When you switch your device on for the first time, you may be asked to create a Nokia account. To make an emergency call during the account setup, press the menu key.

Important: Activate both cellular and internet calls, if your device supports internet calls. The device may attempt to make emergency calls both through cellular networks and through your internet call service provider. Connections in all conditions cannot be guaranteed. Never rely solely on any wireless device for essential communications like medical emergencies.

Small children

Your device and its accessories are not toys. They may contain small parts. Keep them out of the reach of small children.

82

Medical devices

Operation of radio transmitting equipment, including wireless phones, may interfere with the function of inadequately protected medical devices. Consult a physician or the manufacturer of the medical device to determine whether they are adequately shielded from external RF energy. Switch off your device when regulations posted instruct you to do so, for example, in hospitals.

Implanted medical devices

Manufacturers of medical devices recommend a minimum separation of 15.3 centimetres (6 inches) between a wireless device and an implanted medical device, such as a pacemaker or implanted cardioverter defibrillator, to avoid potential interference with the medical device. Persons who have such devices should:

- Always keep the wireless device more than 15.3 centimetres (6 inches) from the medical device.
- Not carry the wireless device in a breast pocket.
- Hold the wireless device to the ear opposite the medical device.
- Turn the wireless device off if there is any reason to suspect that interference is taking place.
- Follow the manufacturer directions for the implanted medical device.

If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

Accessibility solutions

Nokia is committed to making mobile phones easy to use for all individuals, including those with disabilities. For more information, visit the Nokia website at www.nokiaaccessibility.com.

Hearing

Warning:

When you use the headset, your ability to hear outside sounds may be affected. Do not use the headset where it can endanger your safety.

Some wireless devices may interfere with some hearing aids.

Nickel

Note: The surface of this device does not contain nickel in the platings. The surface of this device contains stainless steel.

Protect your device from harmful content

Your device may be exposed to viruses and other harmful content. Take the following precautions:

- Be cautious when opening messages. They may contain malicious software or otherwise be harmful to your device or computer.
- Be cautious when accepting connectivity requests, browsing the internet, or downloading content. Do not accept Bluetooth connections from sources you do not frust.
- Only install and use services and software from sources that you trust and that offer adequate security and protection.
- Install antivirus and other security software on your device and any connected computer. Only use one antivirus application at a time. Using more may affect performance and operation of the device and/or computer.
- If you access preinstalled bookmarks and links to third party internet sites, take the appropriate precautions. Nokia does not endorse or assume liability for such sites

Operating environment

This device meets RF exposure guidelines in the normal use position at the ear or at least 1.5 centimetre (3/8 inch) away from the body. Any carry case, belt clip, or holder for bodyworn operation should not contain metal and should position the device the above-stated distance from your body.

To send data files or messages requires a quality connection to the network. Data files or messages may be delayed until such a connection is available. Follow the separation distance instructions until the transmission is completed.

Vehicles

Radio signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles such as electronic fuel injection, electronic antilock braking, electronic speed control, and air bag systems. For more information, check with the manufacturer of your vehicle or its equipment.

Only qualified personnel should install the device in a vehicle. Faulty installation or service may be dangerous and may invalidate your warranty. Check regularly that all wireless device equipment in your vehicle is mounted and operating properly. Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the device, its parts, or accessories. Remember that air bags inflate with great force. Do not place your device or accessories in the air bag deployment area. Switch off your device before boarding an aircraft. The use of wireless devices in an aircraft may be dangerous to the operation of the aircraft and may be illegal.

Potentially explosive environments

Switch off your device in any area with a potentially explosive atmosphere. Obey all posted instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or death. Switch off the device at refuelling points such as near gas pumps at service stations. Observe restrictions in fuel depots, storage, and distribution areas; chemical plants; or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often, but not always. clearly marked. They include areas where you would be advised to turn off your vehicle engine, below deck on boats. chemical transfer or storage facilities and where the air contains chemicals or particles such as grain, dust, or metal powders. You should check with the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) to determine if this device can be safely used in their vicinity.

Certification information (SAR)

This mobile device meets guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organisation ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The exposure guidelines for mobile devices employ a unit of measurement known as the Specific Absorption Rate or SAR. The SAR limit stated in the ICNIRP guidelines is 2.0 watts/kilogram (W/kg) averaged over 10 grams of tissue. Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The actual SAR level of an operating device can be below the maximum value because the device is designed to use only the power required to reach the network. That amount changes depending on a number of factors such as how close you are to a network base station.

The highest SAR value under the ICNIRP guidelines for use of the device at the ear is 0.94 W/kg.

Use of device accessories may result in different SAR values. SAR values may vary depending on national reporting and testing requirements and the network band. Additional SAR information may be provided under product information at www.nokia.com.

Your mobile device is also designed to meet the requirements for exposure to radio waves established by the Federal

Communications Commission (USA) and Industry Canada. These requirements set a SAR limit of 1.6 W/kg averaged over one gram of tissue. The highest SAR value reported under this standard during product certification for use at the ear is 0.91 W/kg and when properly worn on the body is 1.22 W/kg.

DECLARATION OF CONFORMITY

C€0434 **①**

Hereby, NOKIA CORPORATION declares that this RM-707 product is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC. A copy of the Declaration of Conformity can be found at http://www.nokia.com/phones/declaration.of. conformity/.

Nokia does not make any representations, provide a warranty, or take any responsibility for the functionality, content, or end-user support of third-party applications provided with your device.

FCC/INDUSTRY CANADA NOTICE

Your device may cause TV or radio interference (for example, when using a telephone in close proximity to receiving equipment). The FCC or Industry Canada can require you to stop using your telephone if such interference cannot be eliminated. If you require assistance, contact your local service facility. This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by Nokia could void the user's authority to operate this equipment.

Some operations and features are SIM card and/or network dependent, MMS dependent, or dependent on the compatibility of devices and the content formats supported. Some services are subject to a separate charge.
