MITEL

Business Feature Phones

A range of Handsfree Business Phones to suit every business need

Mitel® Feature Phones provide a range of enhanced functions enabling the individual user to optimise their use of the powerful Mitel 3000/1000 communications systems.

Is it for you?

With a range of sets including the Mitel 4110 Telephone (8 key button phone), Mitel 4120 Telephone (16 key button phone) and the Mitel 4100 DSS Console , Mitel has a phone to suit all user needs.

Specifically designed to meet the needs of small business's, the Mitel range of Feature Phones are designed with an intuitive user interface. The menu driven interface guides the user through all system features, reducing training and ensuring all users make use of the powerful system features.

How it works

The Mitel range of Feature Phones are line powered by the phone system and do not require external power for normal operation.

Additional Options

The Mitel 4120 Telephone (16 key button phone) may be backlit display when used with the power supply provided.

A 32 button DSS Console may be added to the Mitel 4120 Telephone (16 key button phone) to provide an additional 32 programmable keys, ideal for operator positions.

MITEL

Features and Benefits

Handsfree Speakerphone
Offering high clarity audio in both handset and handsfree mode and allows you to carry on conversation without having to pick up the phone

Menu Driven Interface
The context sensitive menu's guide the user every step of the way and ensure that even infrequent users can get more done in a day

Programmable Keys
Which may be programmed as lines, extensions or frequently used features, so that everything can be accessed with just one key

One Touch Keys
Provide shortcut access to key system areas, including:
- Phone Programming – to customize to individual requirements
- Messaging – providing quick access to Voicemail and Display Messaging
- Directory Key – linking to the 500 system directories and individual phone directories
- ISDN Service Key – providing access to powerful ISDN Network Services

Dual Coloured Line Appearance Keys
Backlit keys for each line connected to the system, providing clear indication of which calls are active at each extension

Call Record
Allows the user to record important calls to the system voicemail – requires optional voicemail module

Headset Port
Provides automatic detection of headset if connected ideal for reception and users who handle high volumes of calls

Modem Port
Enables the connection of additional analog devices including modems or DECT extensions

Call Indicator
Provides visual indication of incoming calls, ideal for high noise areas or the hearing-impaired

Calling Line Identification
Feature Phones display the telephone number of the incoming external caller or calling extension. In addition if the callers name is stored in a system directory, the name can be displayed instead

Auto-Answer Mode
Allowing the phone answer without having to touch a thing, ideal for busy desks or when your hands are busy doing other things

Other frequently used features:
- Saved Number Redial
- Hold
- Transfer
- Conference
- Page All/Selected Feature Phone
- Do Not Disturb
- Divert Calls
- Call Pickup
- Examine Call
- Reminder Call
- Missed Calls Log
