Welcome to the world of Mercedes-Benz

Before you drive off, familiarise yourself with your COMAND control panel and read this manual. This will help you to obtain the maximum pleasure from your COMAND control panel and to avoid endangering yourself and others.

Depending on the model and equipment level, the functions and equipment of your COMAND control panel may deviate from some descriptions and illustrations.

Mercedes-Benz is constantly updating its systems to the state of the art and therefore reserves the right to introduce changes in design, equipment and technical features at any time.

You cannot, therefore, base any claims on the data, illustrations or descriptions in this manual.

Please consult a Mercedes-Benz Service Centre if you have any questions.

This manual is an integral part of the vehicle. You should always keep it in the vehicle and pass it on to the new owner if you sell the vehicle.

The technical documentation team at Daimler AG wishes you safe and pleasant motoring.

Operating safety

General notes

Risk of accident

Your attention must always be focused on the traffic conditions.

Only use COMAND or the telephone when the road and traffic conditions permit.

Bear in mind that, at a speed of only 50 km/h, your vehicle covers a distance of nearly 14 m per second. The navigation system will not provide you with information about stop signs, give-way signs, traffic regulations or road safety features. It is up to you to pay attention to these while driving the vehicle. Only enter a new destination when the vehicle is stationary.

COMAND has a radio included as part of the audio functions.

This radio receiver is suitable for operation by all persons in accordance with the valid EC directive.

The device conforms to currently applicable European or harmonised national standards.

Therefore, adherence to the relevant specifications for electromagnetic compatibility is guaranteed for this device.

As a result, interference caused by your equipment with other electrical/electronic equipment and interference with your equipment caused by other electrical/electronic equipment can be largely prevented.

The equipment is approved by the vehicle manufacturer in accordance with European Automotive EMC Directive 95/54/EC. Therefore, operation according to its intended purpose is approved for your vehicle. The equipment does not require certification.

It complies with device-specific EMC requirements according to the following European standards:

- EN 55013
- EN 55020

Correct use

Observe the following information when using COMAND:

- the safety notes in this manual
 - national road traffic regulations
- i** Improper work on electronic components or other systems (such as radio, DVD changer) and their software may result in malfunction or failure. Even systems that have not been modified could be affected because the electronic systems are connected. Electronic malfunctions can seriously jeopardise the operational safety of your vehicle.
- i** Only have work or changes to electronic components carried out at a qualified specialist workshop which has the necessary specialist knowledge and tools to carry out the work required. Daimler recommends that you use a Mercedes-Benz Service Centre for this purpose. In particular, work relevant to safety or on safety-related systems must be carried out at a qualified specialist workshop.
- i** **Protection against theft:** this device is equipped with technical provisions to protect it against theft. Further information on protection against theft can be obtained from a Mercedes-Benz Service Centre.

Vehicle equipment

These operating instructions describe all the standard and optional equipment for your vehicle, as available at the time of going to

press. Country-specific deviations are possible. Please note that your vehicle may not be equipped with all features described. This also applies to safety-relevant systems and functions. Therefore, the equipment on your vehicle may differ from that in the descriptions and illustrations. The original purchase contract documentation for your vehicle contains a list of all of the systems in your vehicle. Contact a Mercedes-Benz Service Centre if you have any questions about equipment or operation.

Function restrictions

For safety reasons, some COMAND functions are restricted or unavailable while the vehicle is in motion. You will notice this, for example, because either you will not be able to select certain menu items or COMAND will display a message to this effect.

Components of COMAND

COMAND consists of:

- the COMAND display
- the COMAND control panel with a single DVD drive or DVD changer
- the COMAND controller
- the back and delete buttons
- up to two favourites buttons (ML), depending on the vehicle equipment

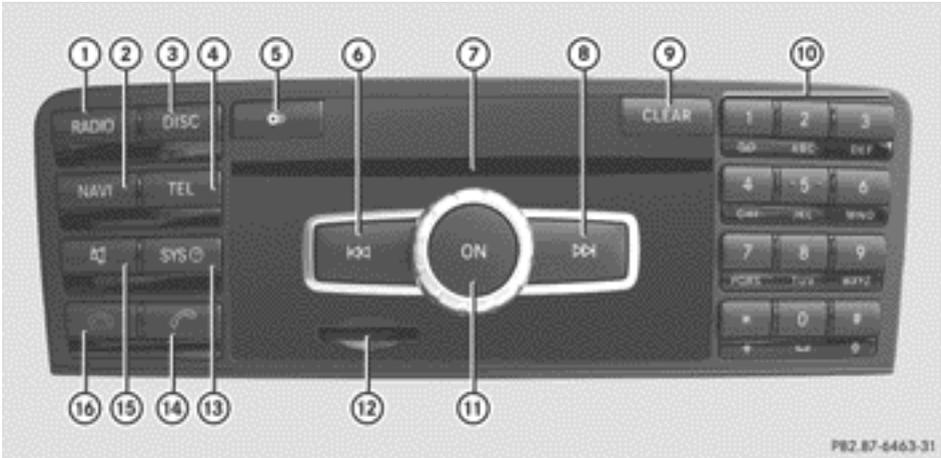

You can use COMAND to operate the following main functions:

- the system settings
- the navigation system
- the telephone with text message function and the address book
- COMAND Online and Internet
- the audio function in the following modes: radio and DAB radio mode, disc (audio CD/DVD and MP3 mode), memory card (MP3 mode), MUSIC REGISTER, USB storage device, Media Interface and Bluetooth® audio
- the video function in TV, video DVD and video AUX modes

You can call up the main functions:

- using the corresponding function buttons
- using the main function bar in the COMAND display

COMAND controller

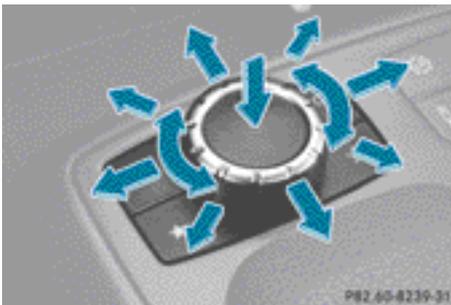

ML example

① COMAND controller

You can use the COMAND controller to select the menu items in the COMAND display.

You can call up menus or lists, scroll through menus or lists and exit menus or lists.

Operating the COMAND controller (example)

The COMAND controller can be:

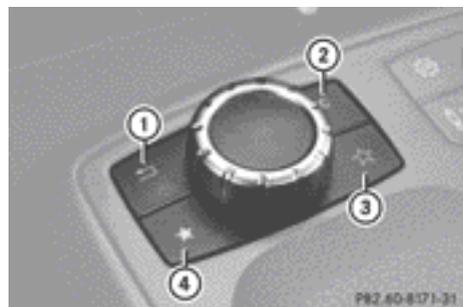

- pressed briefly or pressed and held
- turned clockwise or anti-clockwise
- slid left or right
- slid forwards or back
- slid diagonally

In the instructions, operating sequences are described as follows:

- ▶ Press the **RADIO** button.
Radio mode is activated.
- ▶ Select **Radio** by sliding and turning the COMAND controller and press to confirm.
- ▶ Confirm **Station list** by pressing .
The station list appears.

Buttons on the COMAND controller

Overview

ML example

- ① Back button
- ② Delete button
- ③ Favourites button (if available)
- ④ Favourites button

i Depending on the vehicle equipment, there are up to two favourites buttons available for the ML.

Back button

You can exit a menu or call up the basic display of the current operating mode using this button.

- ▶ **To exit the menu:** press back button ① briefly.
COMAND changes to the next higher menu level in the current operating mode.

i You can also exit a menu by sliding the COMAND controller ←○→ or ↑○↓.

- ▶ **To call up the basic display:** press and hold back button ①. COMAND changes to the basic display of the current operating mode.

Delete button

You can delete individual characters or an entire entry during character entry using this button.

- ▶ **To delete individual characters:** briefly press delete button ②.
- ▶ **To delete an entire entry:** press and hold delete button ②.

Favourites buttons

Depending on the vehicle equipment, there are up to two favourites buttons available for the ML.

You can assign predefined functions in favourites buttons ③ and ④ and call them up by pressing the button (▷ page 47).

COMAND display

General notes

! Do not use the space in front of the display for storage. Items stored there may damage the display or impair its function. Avoid any direct contact with the display surface. Furthermore, pressure on the display surface may result in impairments to the display which could be irreversible.

Wearing polarised sunglasses may impair your ability to read the display.

The display has an automatic temperature-controlled switch-off feature. The screen's brightness dims automatically if the display overheats. The display may temporarily switch off completely.

Display overview

The COMAND display shows the function currently selected and its associated menus. The COMAND display is divided into several areas.

The radio display is shown in the example.

- ① Status bar
- ② To call up the audio menu
- ③ Main function bar
- ④ Display/selection window
- ⑤ Radio menu bar

Status bar ① shows the time and the current settings for telephone operation. If the traffic announcement function is switched on, the **TA** symbol appears and when the sound is switched off, the **⊗** symbol is displayed.

The main functions navigation, audio, telephone and video feature additional menus. This is indicated by triangle ②. The following table lists the available menu items.

Main function bar ③ allows you to call up the desired main function.

In the example, the Audio main function is set to radio mode and display/selection window ④ is active.

Radio menu bar ⑤ allows you to operate the radio functions.

Menu overview

Resetting COMAND			

The favourites button function is available for the ML.

Reversing camera function: if the function is activated and COMAND is switched on, the image of the reversing camera is automatically shown in the COMAND display when reverse gear is engaged.

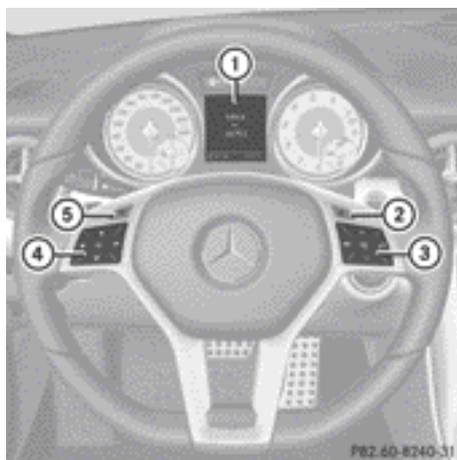

Cleaning instructions

! Do not touch the COMAND display. The display has a very sensitive high-gloss surface; there is a risk of scratching. If you have to clean the screen, however, use a mild cleaning agent and a soft, lint-free cloth.

The display must be switched off and cooled down before you start cleaning. Clean the display screen, when necessary, with a commercially available microfibre cloth and cleaning agent for TFT/LCD displays. Do not apply pressure to the display surface when cleaning it, as this could cause irreversible damage. Then, dry the surface with a dry microfibre cloth.

Avoid using alcoholic thinners, petrol or abrasive cleaning agents. These could damage the display surface.

Multifunction steering wheel

Operating COMAND

Selecting a main function

Initial situation

You would like to switch from navigation mode (address entry menu) to the system settings, for example.

- ▶ **To switch on navigation mode:** press the  function button.
- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Destination** by sliding  and turning  the COMAND controller and press  to confirm.
- ▶ Select **Address entry** and press  to confirm.
The address entry menu appears.

P82.87-4450-31

Address entry menu

① Main function bar

- ▶ Slide the COMAND controller $\uparrow \odot$ and switch to main function bar ①.
- ▶ Select **System** in the main function bar by turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm. The system menu appears.

P82.87-4451-31

Calling up the menu of a main function

If one of the main functions navigation, audio, telephone or video is switched on, triangle ① appears next to the entry. You can now select an associated menu.

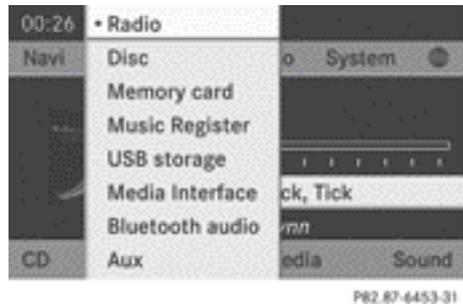

The example describes how to call up the audio menu from audio CD mode. Insert a CD/DVD (\triangleright page 193).

P82.87-4452-31

① To call up the audio menu

- ▶ Select **Audio** in the main function bar by sliding $\uparrow \odot$ the COMAND controller and press \odot to confirm. The Audio menu appears.

P82.87-4453-31

Audio menu

The • dot indicates the current audio mode.

- ▶ Select another audio mode, e.g. **Radio**, by turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm.

Selecting a menu item

The example describes how to select a station from the station presets in radio mode.

- ▶ Press the **RADIO** function button.
- ▶ Select **Presets** by sliding $\odot \uparrow$ and turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm. The station preset memory appears.

P82.87-6025-31

- ▶ Select the station by turning the COMAND controller and press to confirm. The station is set.

Example of operation

Initial situation

You would like to switch from the system function to radio mode and set a station, for example.

The operating example describes how to:

- call up the current audio function
 - switch on radio mode
 - set a station.
- ▶ **To call up the system menu:** press the button.

P82.87-6451-31

System menu

Calling up the current audio function

- ▶ Select **Audio** in the main function bar by sliding and turning the COMAND controller and press to confirm. The basic display of the current audio function, e.g. audio CD mode, appears.

P82.87-6452-31

- ① To call up the audio menu

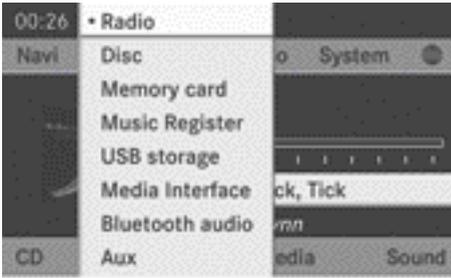

Switching on radio mode

Option 1

- ▶ Press the function button. The radio or DAB radio display appears.
- ▶ Repeatedly pressing this function button switches between the FM, MW, SW and LW wavebands in that order and then calls up DAB radio mode. Pressing the button again takes you back to FM radio mode.

Option 2

- ▶ Select **Audio** again by sliding the COMAND controller and press to confirm. The Audio menu appears. **Radio** is highlighted.

P82.87-6453-31

- ▶ Press the COMAND controller and confirm **Radio**.
The radio basic display appears with the waveband last selected.

P82.87-6454-31

- ▶ **To set a station:** turn or slide the COMAND controller while the display/selection window is active.

Entering characters in navigation mode (entering a town)

General information

The following paragraphs describe how to enter characters using town input for **BER-LIN** as an example.

If you want to use the address entry menu (\triangleright page 53) to enter a town, a street or a house number, for example, COMAND provides either a list with a character bar (option 1) or a selection list (option 2).

You can enter the characters using either the character bar or the number keypad. In the

selection list, you select an entry to copy it to the address entry menu.

Option 1: town list with character bar

- ▶ Call up the town list with character bar (\triangleright page 54).
The alphabetically sorted town list shows the first available entries.

P82.87-6456-31

Entering characters using the character bar

- ▶ Select **B** by turning the COMAND controller and press to confirm.

P82.87-5363-31

- ① Character entered by the user **B**
- ② Characters automatically added by COMAND **AABE**
- ③ List entry that most closely resembles the current entry by the user
- ④ To switch to the selection list
- ⑤ To delete an entry
- ⑥ To change the character set (Latin/Cyrillic)
- ⑦ Characters not currently available

- ⑧ Characters currently available
- ⑨ Character bar
- ⑩ To cancel an entry
- ⑪ Currently selected character
- ⑫ List

List ⑫ shows all available town names beginning with a **B**. List entry most closely resembling the current entry by the user ③ is always highlighted at the top of the list (**BAABE** in the example).

All characters currently entered by the user are shown in black (letter **B** ① in the example). Letters added by COMAND are shown in grey ② (letters **AABE** in the example).

Character bar ⑨ shows the letters still available for selection in black ⑧. These can be selected. In the example, the letter **A** is highlighted ⑪. Which characters remain available depends on the characters already entered by the user and on the data stored in the digital map. Characters that are no longer available are shown in grey ⑦.

- ▶ Select **E, R, L, I, N** in succession, confirming each by pressing .

Entering characters using the number keypad

- ▶ Press number key  twice in quick succession to select the letter **B**.

The character appears at the bottom of the display when the key is pressed. The first available letter is highlighted.

P82.87-6457-31

You see which characters you can enter with that key. Each time the key is pressed, the next character is selected.

Example: key :

- press once = A
- press twice = B
- press three times = C
- ▶ Wait until the character display goes out. The entries matching your input are shown in the list.
- ▶ Enter **E, R, L, I, N** using the corresponding keys.

Further functions in the list with character bar

- ▶ **To delete characters:** select  by sliding  and turning  the COMAND controller and press  to confirm.

or

- ▶ Press the  button next to the COMAND controller.

- ▶ **To delete an entry:** select  and press and hold  the COMAND controller until the entire entry has been deleted.

or

- ▶ Press the  button next to the COMAND controller and hold it until the entire entry is deleted.

- ▶ **To switch the character set:** select  and press  to confirm.

This will switch the character set from Latin to Cyrillic and back.

- ▶ **To cancel an entry:** select the  symbol in the bottom left of the character bar and press  to confirm.

or

- ▶ Press the  back button. The address entry menu appears.

- ▶ **To accept the first list entry:** press and hold  the COMAND controller until the address entry menu appears. The accepted list entry is shown there.

Calling up the list as a selection list

Select the desired town from the selection list.

If there are several entries for a town or if several towns of the same name are stored, then  is highlighted in the character bar.

- ▶ Press  the COMAND controller.

It is also possible to switch the town list to the selection list at any time during character input.

- ▶ Slide  the COMAND controller repeatedly until the town list appears as a selection list.

or

- ▶ Select  in the character bar by turning  the COMAND controller and press  to confirm.

Option 2: town list as selection list

COMAND either shows the selection list automatically or you can call up the selection list from the list with character bar.

The example shows the selection list after the town **BERLIN** has been entered. The entry is highlighted automatically. The  icon indicates that there are several entries.

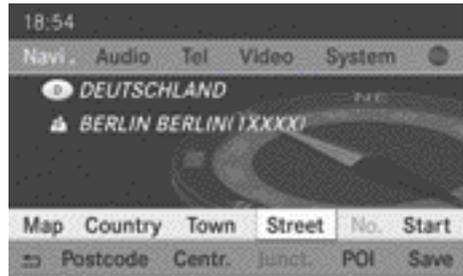

P82.87-5345-31

- ▶ Confirm **BERLIN**  by pressing  the COMAND controller. You see the available entries.

P82.87-5346-31

- ▶ Confirm **BERLIN (1XXXX)** by pressing  the COMAND controller. The address entry menu appears. You can now enter a street, for example.

P82.87-4517-31

-  You will find further information in the "Destination entry" section (▶ page 53).

Entering characters in the address and the phone book

Introduction

The following section describes how to enter characters in the phone book (▶ page 128) and the address book (▶ page 141) when creating a new entry.

Creating a new entry in the phone book

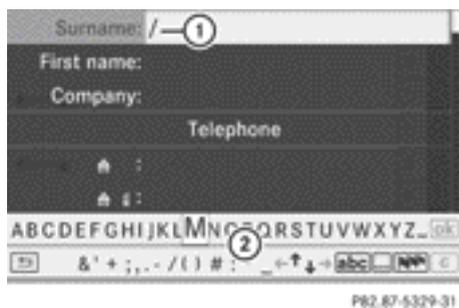

- ▶ Call up the input menu with data fields (▶ page 132).

Phone book: input menu with data fields

Creating a new entry in the address book

- ▶ Call up the input menu with data fields (▷ page 141).

Input menu with data fields

- ① Selected data field with cursor
- ② Character bar

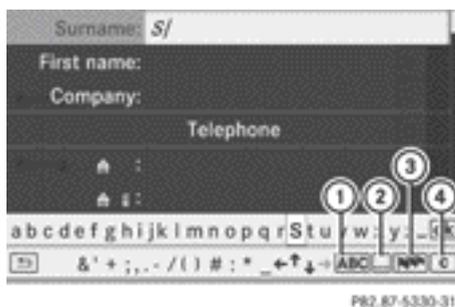

Entering characters

The example describes how to enter the surname **Schulz**.

- ▶ Select **S** by turning $\left\{ \begin{smallmatrix} \uparrow \\ \downarrow \end{smallmatrix} \right\}$ and sliding $\uparrow \odot \downarrow$ the COMAND controller and press \odot to confirm.

S is entered into the data field. All characters are shown in black and can always be selected in the character bar.

The character bar offers characters corresponding to the respective data field (letters or digits).

- ① To switch the character bar to upper-case/lower-case letters
- ② To switch the character bar from upper/lower-case letters to digits
- ③ Changing the language of the character bar
- ④ To delete a character/an entry

- ▶ Select **C** and confirm by pressing \odot the COMAND controller.

The letter **c** is added to **S** in the data field.

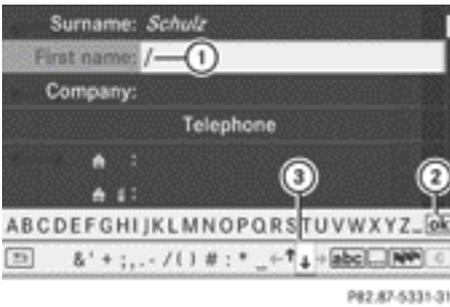

- ▶ Repeat the process until the name has been entered in full.
- ▶ **To enter a phone number:** select the digits one by one in the corresponding data field by turning $\left\{ \begin{smallmatrix} \uparrow \\ \downarrow \end{smallmatrix} \right\}$ and sliding $\uparrow \odot \downarrow$ the COMAND controller and press \odot to confirm.

Switching data fields

If you want to enter a first name after you have entered a surname, for example, proceed as follows to switch between the data fields:

Option 1

- ▶ Select \uparrow or \downarrow in the character bar and press \odot to confirm.
- The input menu shows the data field selected.

- ① Cursor in the next data field
- ② To store an entry
- ③ ↑ and ↓ icons to select a data field

Option 2

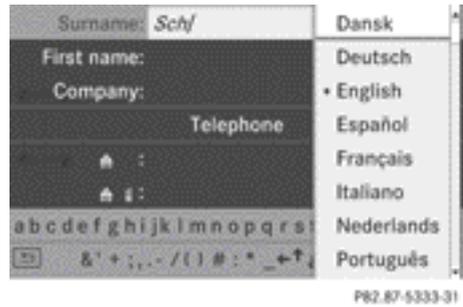

- ▶ Slide ↑ ③ the COMAND controller repeatedly until the character bar disappears.
- ▶ Select the data field by sliding ↑ ③ ↓ and press ② to confirm.

Storing an entry

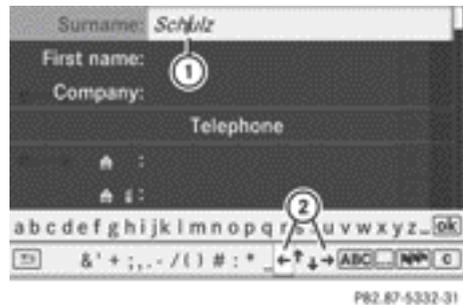

- ▶ Select [ok] in the character bar by turning ③ the COMAND controller and press ② to confirm.
The entry is stored in the address book.

Further functions available in the character bar

- ▶ **To switch the character bar to upper/lower-case characters:** select [ABC] or [abc] and press ② to confirm.
- ▶ **To switch the character set:** select [...] and press ② to confirm.
The character set switches between upper/lower-case letters and digits.
- ▶ **To change the language of the character bar:** select [NNN] and press ② to confirm.
- ▶ Select the language by turning ③ the COMAND controller and press ② to confirm.

- ▶ **To reposition the cursor within the data field:** select ← or → and press ② to confirm.

- ① Cursor (repositioned)
 - ② ← and → icon to reposition the cursor
- ▶ Delete the character/entry (▷ page 26).

Basic functions of COMAND

Switching COMAND on/off

- ▶ Press the [ON] control knob.
A warning message appears. COMAND calls up the previously selected menu.
- ① If you switch off COMAND, playback of the current audio or video source will also be switched off.

Switching the COMAND display on/off

- ▶ Press the  function button.
- or
- ▶ Select **System** in the main function bar by sliding  and turning  the COMAND controller and press  to confirm. In both cases, the system menu appears.
- ▶ **To switch off:** select **Display off** and press  to confirm.
- ▶ **To switch on:** press one of the function buttons, e.g. ,  or the  back button.

Mute

Switching audio and video sources on/off

- ▶ Press the  button on COMAND or on the multifunction steering wheel. The sound from the respective audio or video source is switched on or muted.
- i** When the sound is off, the system displays the  icon in the status line. When you change the audio or video source, or adjust the volume, sound automatically switches on again.
- i** Even if the sound is switched off, you will still hear traffic and navigation system announcements.

Switching off Traffic Programme and navigation announcements completely

- ▶ **Traffic Programme:** press and hold the  button until the **TA** display disappears from the status bar of the display. A confirmation tone sounds.
- ▶ **Navigation announcements:** press the  button during the announcement.

Switching Traffic Programme and navigation announcements on again

- ▶ **Traffic Programme:** press and hold down the  button until the **TA** display in the status bar appears. A confirmation tone sounds.
- ▶ **Navigation announcements:** switch COMAND off and then on again (▷ page 30).
- or
- ▶ Start a new route calculation (▷ page 56).
- or
- ▶ If the navigation menu is shown, select  and press  to confirm (▷ page 81).

Adjusting the volume

Adjusting the volume for the audio or video source

- ▶ Turn the  control knob.
- or
- ▶ Press the  or  button on the multifunction steering wheel. The volume of the currently selected audio or video source changes.

You can also adjust the volume for the following:

- traffic announcements
- navigation announcements
- phone calls
- LINGUATRONIC voice control (see the separate operating instructions)

Adjusting the volume for traffic announcements and navigation announcements

- i** You can set the volume of traffic and navigation announcements relative to the volume of the audio or video source.

During traffic or navigation announcements:

- ▶ Turn the **(ON)** control knob.

or

- ▶ Press the **[+]** or **[-]** button on the multifunction steering wheel.

Adjusting the volume for phone calls

You can adjust the volume for hands-free mode during a telephone call.

- ▶ Turn the **(ON)** control knob.

or

- ▶ Press the **[+]** or **[-]** button on the multifunction steering wheel.

Adjusting the sound settings

Calling up the sound menu

You can make various sound settings for the different audio and video sources. This means that it is possible to set more bass for radio mode than for audio CD mode, for example. You can call up the respective sound menu from the menu of the desired mode.

The example describes how to call up the sound menu in radio mode.

- ▶ Press the **[RADIO]** function button.

The radio display appears. You will hear the last station played on the last waveband.

P82.87-6454-31

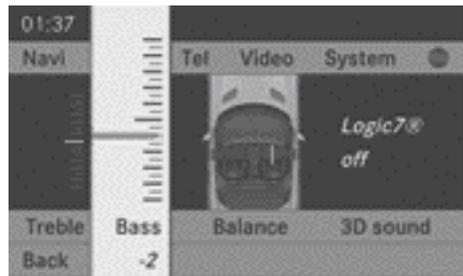

- ▶ Select **Sound** by sliding **(⊙)↓** and turning **(⊙)↻** the COMAND controller and press **(⊙)** to confirm.

You can now set the treble and bass or the balance and fader for radio mode.

Adjusting treble and bass

- ▶ Select **Treble** or **Bass** in the sound menu by turning **(⊙)↻** the COMAND controller and press **(⊙)** to confirm.

An adjustment scale appears.

P82.87-6459-31

Adjusting the bass (example: SLK)

- ▶ Select a setting by turning **(⊙)↻** the COMAND controller and press **(⊙)** to confirm.

The setting is stored and you exit the menu.

Adjusting balance and fader

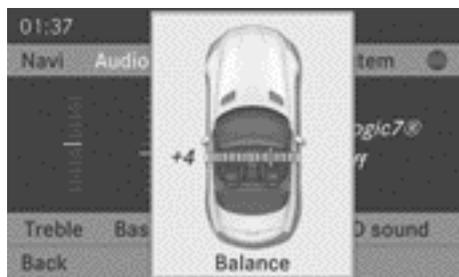

With the Balance function, you can control whether the sound is louder on the driver's or front-passenger side.

With the Fade function, you can control whether the sound is louder in the front or the rear of the vehicle.

Fader	Vehicle
Function available	C-Class, ML
Function not available	SL, SLK

- ▶ Select **Balance** or **Bal./Fad.** (Balance/Fader) in the sound menu by turning **(⊙)↻**

the COMAND controller and press  to confirm.

P82.87-4460-31

Adjusting the balance (example: SLK)

- ▶ Select a balance setting by sliding    the COMAND controller and press  to confirm.
- ▶ Select a fader setting by sliding    the COMAND controller and press  to confirm.
The setting is stored and you exit the menu.

Surround sound

General notes

If your vehicle is equipped with the harman/kardon® Logic 7® surround sound system, you can set the optimum surround sound in the vehicle interior.

The harman/kardon® Logic 7® surround sound system is available for the following operating modes:

- radio (FM only)
- DAB radio
- audio CD
- audio DVD (MLP, dts, PCM and Dolby Digital audio formats)
- MP3 (including SD memory card and USB storage device)
- Media Interface
- Bluetooth® audio mode
- TV

- video DVD (PCM, dts and Dolby Digital audio formats)
- AUX

Because some DVDs contain both stereo and multichannel audio formats, it may be necessary to set the audio format ([▷ page 202](#)).

i The **Logic7® on** function creates a surround sound experience for every passenger when playing, for example, stereo recordings. It enables optimum playback of music and films on CD, audio DVD or video DVD with multichannel audio formats, such as MLP, dts or Dolby Digital. This results in sound characteristics like those intended by the sound engineer when the original was recorded.

i If you select **Logic7® off**, all permissible formats are played as stored on the medium. Due to the design of the passenger compartment, an optimum audio experience cannot be guaranteed for all passengers.

i Discs which support the audio formats mentioned have the following logos:

Dolby Digital

dts

MLP

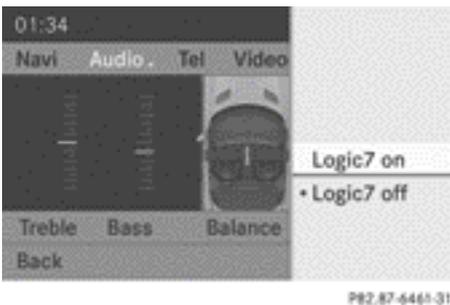

Switching surround sound on/off

The example describes how to set the surround sound for radio mode.

- ▶ Press the **RADIO** function button.
The radio display appears. You will hear the last station played on the last waveband.

- ▶ Select **Sound** by sliding $\odot \downarrow$ and turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.
- ▶ Select **surround** and press \odot to confirm.

Setting surround sound (example: SLK)

- ▶ Select **Logic7® on** or **Logic7® off** by turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.

Depending on your selection, surround sound is switched on or off and the menu is exited.

- ▶ **To exit the menu without saving:** press the $\left[\leftarrow \right]$ back button or slide $\leftarrow \odot \rightarrow$ the COMAND controller.

- i** Please note the following: for the optimum audio experience for all passengers when LOGIC7® is switched on, the balance and fader settings should be set to the centre of the vehicle interior.

You will achieve the best sound results by playing high-quality audio and video DVDs. MP3 tracks should have a bit rate of at least 128 kbit/s.

Surround sound playback does not function for mono signal sources, such as the medium wave range (MW) in radio mode. If radio reception is poor, e.g. in a tunnel, you should switch off Logic 7®, as it may otherwise switch between stereo and mono and cause temporary sound distortions.

On some stereo recordings, the sound characteristics may differ from conventional stereo playback.

Climate control status display

If you change the settings of the climate control system (see the vehicle Owner's Manual), the climate status display appears for three seconds at the bottom of the screen in the COMAND display. It displays the current settings of the various climate control functions.

The climate status display appears when you:

- ▶ Turn one of the two temperature controls and set the temperature for the left or

right^{1,2} or turn the temperature control and set the temperature^{3,4}.

or

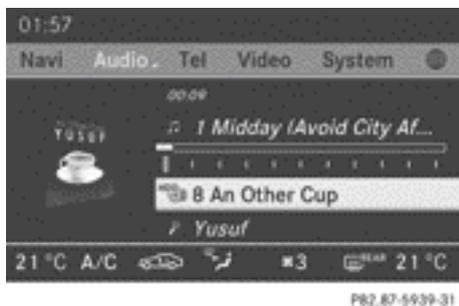

▶ Turn the control to set the airflow^{3,4}.

or

▶ Press one of the following buttons:

- increases air flow^{1,2}
- decreases air flow^{1,2}
- switches climate control on/off^{1,2,3}
- switches the "ZONE" function on/off^{1,2}
- controls the air conditioning automatically^{1,2}
- sets the climate control style in automatic mode (FOCUS/MEDIUM/DIFFUSE)²
- sets the air distribution^{1,2}
- , or sets the air distribution^{3,4}.
- turns on the "Defrost" function^{1,2,3,4}

i The climate status display does not appear when the image from the reversing camera is displayed.

The climate status display in the COMAND display (example)

The illustration shows an example of current settings for the "Defrost" function (above) and the climate control style in automatic mode (below).

▶ **To hide the display:** turn or press the COMAND controller.

or

▶ Press one of the buttons on the COMAND operating system.

i A detailed description of the climate control is available in the Owner's Manual.

Rear Seat Entertainment System

Components

Overview

The Rear Seat Entertainment System comprises:

- two rear-compartment screens behind the front-seat head restraints
- the remote control
- a CD/DVD drive
- AUX jacks on both screens (AUX display) and on the CD/DVD drive (AUX drive)
- two sets of cordless headphones

1 Available for THERMOTRONIC 2-zone automatic climate control.
 2 Available for THERMOTRONIC 3-zone automatic climate control.
 3 Available for the air-conditioning system.
 4 Available for Heatmatic.

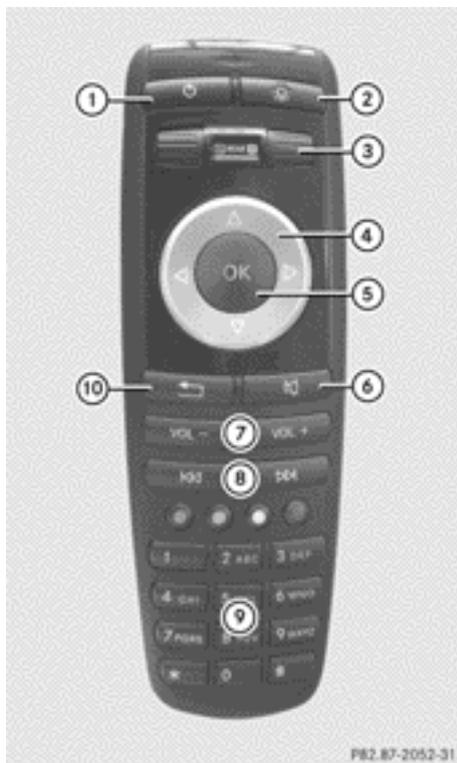

Rear-compartment screens

- ① AUX jacks, detailed view in the "CD/DVD drive and AUX jacks" section (▷ page 37)
- ② Display

Remote control

Overview

- ① Switching the screen on/off
- ② To switch the button lighting on/off
- ③ To select the screen for the remote control
- ④ To select a menu or menu item
- ⑤ To confirm a selection or setting
- ⑥ To switch sound on/off (for corded headphones)
- ⑦ To adjust the volume (for corded headphones)
- ⑧ To skip, fast-forward/fast-rewind
- ⑨ To select a track, to enter directly
- ⑩ To exit a menu (back)

Selecting the screen for the remote control

You can use the remote control to operate one of the two rear screens at a time. To do so, you must switch the remote control to the desired screen.

- ▶ To select the left-hand screen: turn thumbwheel ③ until "L REAR" is highlighted in the window.
- ▶ To select the right-hand screen: turn thumbwheel ③ until "REAR R" is highlighted in the window.

Switching the screen on/off

If the key is in position **0** or **1** in the ignition lock (see the vehicle Owner's Manual), or the key is not inserted, the screens in the rear will switch off after 30 minutes. Before the screens switch off, they show a message to this effect.

You can switch the screens back on. However, this will discharge the starter battery.

- ▶ Point the remote control at the rear-compartment screen which has been selected for remote operation.
- ▶ Press button ① on the remote control. The respective rear screen switches on or off.

i You can only switch the screens on using the remote control if the ignition is switched on.

Switching the button lighting on/off

- ▶ Press button ② on the remote control. Depending on the previous status, the button lighting is switched on or off.

i If you do not use the remote control for about 15 seconds, the button lighting switches off automatically.

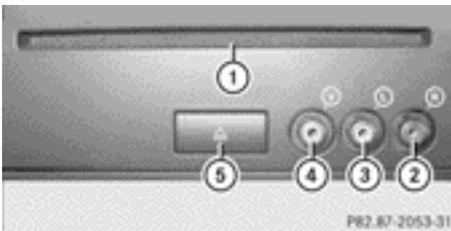

Switching the sound on/off (cabled headphones only)

- ▶ Press button ⑥ on the remote control.
The sound is switched on/off.

Selecting a menu/menu item and confirming your selection

- ▶ Select a menu/menu item using the     buttons on the remote control and press the  button to confirm.

CD/DVD drive and AUX jacks

- ① CD/DVD slot
- ② AUX, right-hand (R) jack for audio signal (red)
- ③ AUX, left-hand (L) jack for audio signal (white)
- ④ AUX, video (V) jack (yellow)
- ⑤ CD/DVD eject button

The AUX jacks shown are for the AUX drive. Identical jacks can be found on the right-hand side of the rear-compartment screens (AUX display), (> page 35).

Cordless headphones

Overview

- ① Volume control
- ② Selecting a screen for the headphones
- ③ Battery compartment cover
- ④ To switch the cordless headphones on/off
- ⑤ Indicator lamp with various displays (> page 38)

► Open both sides of the headphones and adjust the fit of the headphones by pulling the headphone band in the direction of the arrow.

Switching the cordless headphones on/off

- Press button ④.
Depending on the previous status, the headphones are switched on or off. To save the battery, the headphones are switched off automatically if they do not receive an audio signal within three minutes.

Adjusting the volume of the headphones

- Turn volume control ① until the desired volume has been set.

i If you have connected corded headphones to a rear-compartment screen, you can adjust the volume by pressing buttons ⑦ on the remote control (> page 36).

Selecting a screen for the headphones

- Move push slider ② to **L** (left-hand screen) or **R** (right-hand screen).

Indicator lamp displays

The colour of the indicator lamp shows whether the headphones are switched on or off and indicates the charge level of the batteries inserted.

LED display	Status
Green	The headphones are switched on and connected to a screen.
Flashes green	The headphones are establishing the connection to a screen.
Red	The headphones are switched on and the batteries are almost discharged.
No display (dark)	The headphones are switched off or the batteries are discharged.

Connecting additional headphones

You can connect one additional set of corded headphones to each of the two rear screens (▷ page 35). The socket is designed for headphones with a 3.5 mm stereo jack plug and an impedance of 32 ohms.

Changing batteries

Batteries are required for the remote control and for the two sets of cordless headphones. For changing batteries: (▷ page 244)

Reversing camera

Risk of accident

The reversing camera is designed to assist you when reversing.

Please observe the corresponding safety notes in your vehicle's Owner's Manual.

If your vehicle is equipped with a reversing camera, its image is automatically relayed to the COMAND display if the function is activated and you engage reverse gear.

If the function is activated, the COMAND display will automatically switch back to the pre-

viously selected display as soon as you shift out of reverse gear.

i Further information on the reversing camera driving system can be found in the vehicle Owner's Manual.

- ▶ Press the **sys** function button. The system menu appears.
- ▶ Select **Settings** by turning  the COMAND controller and press  to confirm.
- ▶ Select **Rear view camera** and press  to confirm.
- ▶ Select **Activation by R gear** and press  to confirm. The function is switched on or off , depending on the previous status.

Vehicle equipment

- i** These Operating Instructions describe all standard and optional equipment available for your vehicle at the time it was purchased. Please note that your vehicle may not be equipped with all features described.

Display settings

Setting the brightness

The brightness detected by the display light sensor affects the setting options for this function.

- ▶ Press the **sys** button.
- ▶ Select **Settings** by turning **⏪** the COMAND controller and press **⏩** to confirm.
- ▶ Select **Display** and press **⏩** to confirm.
- ▶ Select **Brightness** and press **⏩** to confirm.

P82.87-6012-31

- ▶ Adjust the brightness by turning **⏪** the COMAND controller and press **⏩** to confirm.

Display design

Your COMAND display features optimised designs for operation during daytime and night-time hours. You can customise the

design by manually selecting day or night design or opt for an automatic setting.

- ▶ Press the **sys** button.
- ▶ Select **Settings** by turning **⏪** the COMAND controller and press **⏩** to confirm.
- ▶ Select **Display** and press **⏩** to confirm.
- ▶ Select **Day design**, **Night design** or **Automatic** by turning **⏪** the COMAND controller and press **⏩** to confirm. A dot indicates the current setting.

Design	Explanation
Day design	The display is set permanently to day design.
Night design	The display is set permanently to night design.
Automatic	When the Automatic setting is selected, COMAND evaluates the readings from the automatic vehicle light sensor and switches between the display designs automatically.

Time settings

General information

If COMAND is equipped with a navigation system and has GPS reception, COMAND automatically sets the time and date. You can also adjust the time yourself in 30-minute increments, but the date cannot be changed.

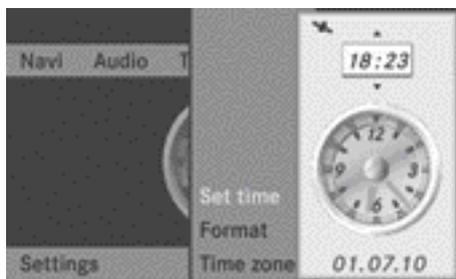

- i** If you set the time in 30-minute increments, any time zone settings and settings for changing between summer and standard time are lost (▷ page 43).

i The following navigation system functions require the time, time zone and summer/standard time to be set correctly in order to work properly:

- route guidance on routes with time-dependent traffic guidance
- calculation of expected time of arrival

Setting the time

- ▶ Press the **sys** button.
- ▶ Select **Time** by turning **⏸** the COMAND controller and press **⏹** to confirm.
- ▶ Select **Set time** and press **⏹** to confirm.

PE2.87-6013-31

- ▶ Set the time by turning **⏸** the COMAND controller and press **⏹** to confirm. The time is accepted.

Setting the time/date format

- ▶ Press the **sys** button.
- ▶ Select **Time** by turning **⏸** the COMAND controller and press **⏹** to confirm.
- ▶ Select **Format** and press **⏹** to confirm. The **•** symbols show the current settings.

Abbreviation	Meaning
DD/MM/YYYY	Day/Month/Year (date format)
HH/MM	Hours/Minutes (time format)

You can set the 24-hour or the AM/PM format.

- ▶ Set the format by turning **⏸** the COMAND controller and press **⏹** to confirm.

Setting the time zone and switching between summer and standard time

- ▶ Press the **sys** button.
- ▶ Select **Time** by turning **⏸** the COMAND controller and press **⏹** to confirm.
- ▶ Select **Time zone** and press **⏹** to confirm. The country list appears. The **•** dot indicates the current setting.
- ▶ Select the country you are currently in by turning **⏸** the COMAND controller and press **⏹** to confirm. A time zone list may also be displayed, depending on the country selected.
- ▶ Select the time zone and press **⏹** to confirm.

Further steps depend on whether the navigation system currently has GPS reception and on which country you have selected.

You have the following two options:

- ▶ **To change manually:** select **Summer time** or **Standard time** and press **⏹** to confirm.
- ▶ **To switch automatic changeover on/off:** select **Autom. Summer / Winter time on** or **Autom. Summer / Winter**

time off by turning **⏸** the COMAND controller and press **⏹** to confirm.

The **•** dot indicates the current setting.

- i** If you have switched off the automatic changeover function, you must change from summer to standard time and vice versa manually using the "Set time" function (▷ page 43).

Fuel consumption display

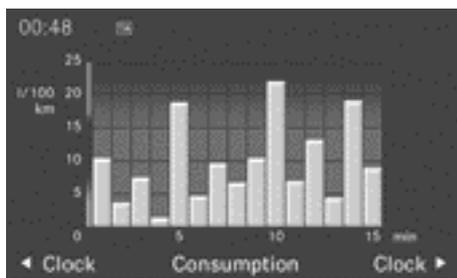

Overview

You can display the fuel consumption in the COMAND display.

If your vehicle is a hybrid vehicle, you can call up other displays (see the separate operating instructions).

Calling up displays

- ▶ Press the **sys** button.
- ▶ In the System menu, slide **↑** the COMAND controller up until the full screen is displayed.
- ▶ Slide **←** the COMAND controller repeatedly until the fuel consumption indicator appears.
The COMAND display shows the fuel consumption for the last 15 minutes of the journey.

P82.87-6019-31

Every bar of the graph displays the average value for one minute.

The fuel consumption display may differ from the display in the **From Start** trip computer in the **Trip** menu, see the vehicle Owner's Manual.

Exiting the display

- ▶ Slide **←** the COMAND controller repeatedly until the clock display appears.
- ▶ Press **⏹** the COMAND controller.
The system menu appears.

Text reader settings

Setting the text reader speed

- ▶ Press the **sys** button.
- ▶ Select **Settings** by turning **⏸** the COMAND controller and press **⏹** to confirm.
- ▶ Select **Text reader speed** and press **⏹** to confirm.
A list appears. The **•** dot indicates the current setting.
- ▶ Select a setting by turning **⏸** the COMAND controller and press **⏹** to confirm.

LINGUATRONIC settings

Opening/closing the help window

The help window provides information in addition to the audible instructions during individualisation as well as later, when you are using voice control.

- ▶ Press the **sys** button.
- ▶ Select **Settings** by turning **⏸** the COMAND controller and press **⏹** to confirm.
- ▶ Select **Linguatronic** and press **⏹** to confirm.

- ▶ Select **Help window** and press  to confirm.
You have switched the help window on or off .

Individualisation

Introduction

Using individualisation, you can fine tune LINGUATRONIC to your own voice and thus improve voice recognition. This means that other users' voices will not be recognised as easily, and therefore this function can be deactivated (▷ page 46).

Individualisation comprises two parts and takes approximately 5 minutes. It consists of training the system to recognise a certain number of digit sequences and voice commands.

Starting new individualisation

Individualisation can only be started when the vehicle is stationary. Before starting, switch off all devices or functions which could interfere, such as the radio or the navigation system. After starting the session, the system guides you through the training with spoken instructions.

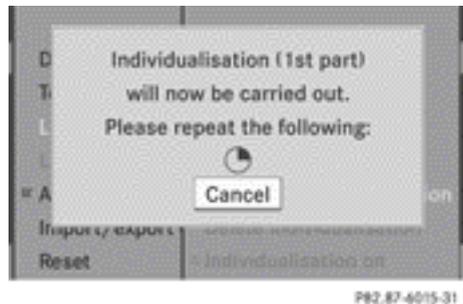

- ▶ Press the **[SYS]** button.
- ▶ Select **Settings** by turning  the COMAND controller and press  to confirm.

- ▶ Select **Linguatronic** and press  to confirm.
- ▶ Select **Start new individualisation** and press  to confirm.
You see and hear a prompt asking whether you would like further information.

- ▶ Select **Yes** or **No** and press  to confirm.
If you select **No**, the first part of individualisation begins. You will be asked whether you would like to train digits or voice commands.

If you select **Yes**, you will see and hear information on the individualisation process. The first part of individualisation then begins automatically.

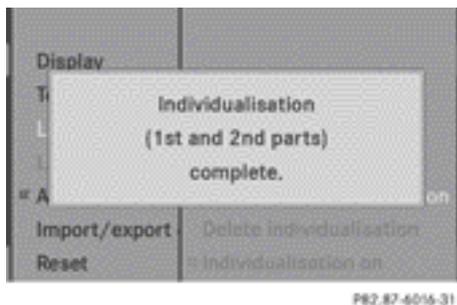

- ▶ **To close the display:** press  the COMAND controller.
You will be asked whether you would like to train digits or voice commands.

At the end of the first part, a prompt will appear asking whether you wish to begin the second part.

- ▶ Select **Yes** or **No** and press  to confirm.
If you select **No**, individualisation will be cancelled. The data from the first part is stored automatically.
If you select **Yes**, the second part will begin.

Individualisation is completed at the end of the second part. You will see a message to this effect. The data from the second part is stored automatically.

Canceling the first or second part of individualisation

- ▶ Confirm **Cancel** by pressing the COMAND controller. A prompt appears asking whether you really wish to cancel.
- ▶ Select **Yes** or **No** and press to confirm. If you select **Yes**, the voice training will be cancelled. The data from the part during which you exited is not stored. If you select **No**, the current part begins again.

Deleting existing individualisation data

- ▶ Press the button.
- ▶ Select **Settings** by turning the COMAND controller and press to confirm.
- ▶ Select **Linguatronic** and press to confirm.
- ▶ Select **Delete individualisation** and press to confirm. A prompt appears asking whether you really wish to delete.
- ▶ Select **Yes** or **No** and press to confirm. If you select **No**, the process will be aborted. If you select **Yes**, the individualisation is deleted. You will see a message to this effect.

Activating/deactivating individualisation

- ▶ Press the button.
- ▶ Select **Settings** by turning the COMAND controller and press to confirm.
- ▶ Select **Linguatronic** and press to confirm.
- ▶ Select **Individualisation on** and press to confirm. Individualisation is activated or deactivated .

Bluetooth® settings

General information about Bluetooth®

Bluetooth® technology is the standard for short-range wireless data transmission of up to approximately 10 metres. Bluetooth® allows, for example, the exchange of vCards. Bluetooth® is a registered trademark of Bluetooth Special Interest Group (SIG) Inc.

Activating/deactivating Bluetooth®

- ▶ Press the button. The system menu appears.
- ▶ Select **Settings** by turning the COMAND controller and press to confirm.
- ▶ Select **Activate Bluetooth** and press to confirm. This switches Bluetooth® on or off .

System language settings

This function allows you to determine the language for the menu displays and the navigation announcements. The selected language affects the characters available for entry.

If you change the system language, the language for LINGUATRONIC will be also be changed. If the selected language is not supported by LINGUATRONIC, English will be selected.

- ▶ Press the **[SYS]** button.
- ▶ Select **Settings** by turning **[⏪]** the COMAND controller and press **[⏩]** to confirm.
- ▶ Select **Language** and press **[⏩]** to confirm. The list of languages appears. The **•** dot indicates the current setting.
- ▶ Select the language by turning **[⏪]** the COMAND controller and press **[⏩]** to confirm. COMAND loads the selected language and sets it.

Assigning the favourites button

This function is available for the ML. Depending on the vehicle equipment, you can assign one or two favourites buttons. They are located on the left (one favourites button fitted) or on the left and right (two favourites buttons fitted) beside the COMAND controller (▷ page 17).

You can select the following predefined functions in a menu:

- **Display off/on:** you can switch the display off or on.
- **Full screen: 'Clock':** you can show the clock in full screen.
- **Full screen: 'Map':** you can show the map in full screen.
- **Spoken driving tip:** you can call up the current driving recommendation.

- **Display traffic messages:** you can call up traffic reports.
- **Navigate to 'Home address':** you can start route guidance to your home address if you have already entered and saved the address (▷ page 57).
- **Detour menu:** you can call up the Detour menu and then avoid a section of the route and recalculate the route (▷ page 82).
- **Compass screen:** you can call up the compass.

- ▶ **To assign a favourites button:** press the **[SYS]** button.
- ▶ Select **Settings** by sliding **[⏪]** and turning **[⏪]** the COMAND controller and press **[⏩]** to confirm.
- ▶ Select **Assign as favourite** and press **[⏩]** to confirm. The list of predefined functions appears. If your vehicle is equipped with a favourites button, the **•** dot indicates the currently selected function. If your vehicle is equipped with two favourites buttons, two asterisks indicate the currently selected function for the respective favourites button.

- ▶ Select the function by turning **[⏪]** the COMAND controller and press **[⏩]** to confirm. If your vehicle is equipped with a favourites button, it is assigned with the function selected. If your vehicle is equipped with two favourites buttons, you will see a submenu.
- ▶ Select the favourites button by turning **[⏪]** and sliding **[⏪]** the COMAND controller and press **[⏩]** to confirm. The favourites button selected is assigned the predefined function.
- ▶ **To call up a favourite (example):** press the **[★]** favourites button. This calls up the predefined function.

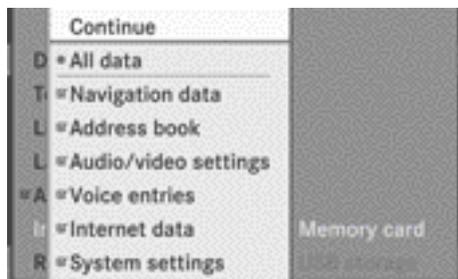

Importing/exporting data

With this function, you can transfer COMAND data from one system (vehicle) to another system (vehicle). You can either use an SD memory card or a USB storage device (e.g. a USB stick) as temporary storage.

- ▶ Press the **sys** button.
The system menu appears.
- ▶ Select **Settings** by turning **⏪** the COMAND controller and press **⏩** to confirm.
- ▶ Select **Import/export data** and press **⏩** to confirm.
- ▶ Select **Import data** or **Export data** and press **⏩** to confirm.

- ▶ **To select a storage location:** insert the memory card (▷ page 196) or USB storage device into the USB port (▷ page 196).
- ▶ Select **Memory card** or **USB storage** and press **⏩** to confirm.

Export data menu (example)

- ▶ **To select all data:** select **All data** and press **⏩** to confirm.

This function exports all the data to the selected disc.

- ▶ Select the data type and press **⏩** to confirm.

Depending on the previous entry, select the data type for the export or not .

Reset function

You can reset COMAND to the factory settings. Amongst other things, this will delete all personal data (e.g. station presets, address book entries, entries in the destination memory and in the list of previous destinations in the navigation system). Resetting is recommended before selling or transferring ownership of your vehicle, for example.

Data on the internal hard drive, e.g. music files in the MUSIC REGISTER, will be deleted. You can also delete music files from the MUSIC REGISTER using the "Delete all music files" (▷ page 210) function.

- ▶ Press the **sys** function button.
- ▶ Select **Settings** by turning **⏪** the COMAND controller and press **⏩** to confirm.
- ▶ Select **Reset** and press **⏩** to confirm.
A prompt appears asking whether you wish to reset.
- ▶ Select **Yes** or **No** and press **⏩** to confirm.
If you select **No**, the process will be aborted.
If you select **Yes**, a prompt will appear again asking whether you really wish to reset.
- ▶ Select **Yes** or **No** and press **⏩** to confirm.
If you select **Yes**, a message will be shown. COMAND is reset and restarted.
If you select **No**, the process will be aborted.

Vehicle equipment

- i** These Operating Instructions describe all standard and optional equipment available for your vehicle at the time it was purchased. Please note that your vehicle may not be equipped with all features described.

Introduction

Safety notes

Risk of accident

For safety reasons, only enter a new destination when the vehicle is stationary. You may otherwise be distracted from the traffic conditions, cause an accident and injure yourself and others.

COMAND calculates the route to the destination without taking account of the following, for example:

- traffic lights
- stop and give way signs
- parking or stopping restrictions
- lane narrowing
- other road and traffic rules and regulations

COMAND may give incorrect driving recommendations if the data on the digital map does not correspond to the actual conditions. For example, a route may have been diverted or the direction of a one-way street may have changed.

For this reason, you must always observe the respective road and traffic rules and regulations during your journey. Road and traffic rules and regulations always have priority over system driving recommendations.

General notes

Operational readiness of the navigation system

In vehicles for certain countries, the navigation system is not operational immediately after delivery because the digital map is not pre-installed.

If this is the case, the following message appears in the display after you switch to navigation mode:

Please insert the map DVD to activate navigation.

- **To install the map software:** proceed as described in the "Updating the digital map" section (▷ page 107).

The navigation system must determine the position of the vehicle before first use or whenever operational status is restored. Therefore, you may have to drive for a while before precise route guidance is possible.

GPS reception

Correct functioning of the navigation system depends, amongst other things, on GPS reception. In certain situations, GPS reception may be impaired, there may be interference or there may be no reception at all, e.g. in tunnels or multi-storey car parks.

Entry restriction

On vehicles for certain countries, there is a restriction on entering data.

The restriction is active above a vehicle speed of about 5 km/h. The restriction is deactivated as soon as the vehicle speed drops below about 3 km/h.

When the restriction is active, certain entries cannot be made. This will be indicated by the fact that certain menu items are greyed out and cannot be selected.

The following entries are not possible, for example:

- entering the destination town and street
- entering a destination via the map
- entering special destinations in the vicinity of a town or via a name search
- editing entries
- direct entry using the number keypad

Other entries are possible, such as entering special destinations in the vicinity of the destination or current position.

Addresses can be entered via LINGUA-TRONIC (see separate Operating Instructions) while the vehicle is in motion.

Switching on navigation mode

Option 1

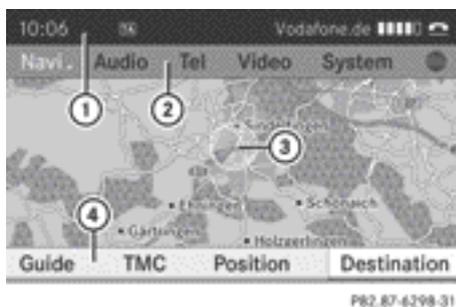

- ▶ Press the **NAVI** function button.

The map is displayed with the menu either shown or hidden.

Option 2

- ▶ Select **Navi** in the main function bar by sliding **↑** and turning **⌂** the COMAND controller and press **⏹** to confirm.

The map is displayed with the menu shown.

Map showing the menu; route guidance inactive

- ① Status bar
- ② Main function bar
- ③ Current vehicle position
- ④ Navigation menu bar

Map without the menu; route guidance inactive

- ① Current vehicle position
- ② Map orientation selected
- ③ Map scale selected

"Route guidance active" means that you have entered a destination and that COMAND has calculated the route. The display shows the route, changes of direction and lane recommendations. Navigation announcements guide you to your destination.

"Route guidance inactive" means that no destination has been entered and that no route has been calculated.

Showing/hiding the menu

- ▶ **To hide the menu:** slide **↑** the COMAND controller and, when the **Full screen** menu item is shown, press **⏹** to confirm.

or

- ▶ Press the **⏪** back button.

The map can be seen in the full-screen display.

- ▶ **To show the menu:** press **⏹** the COMAND controller when the map is shown in full-screen display.

Basic settings

Route settings

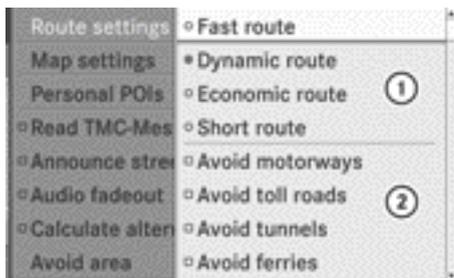

Setting route type and route options

You can select the following route types:

- **Fast route:** COMAND calculates a route with the shortest (minimised) journey time.
- **Dynamic route:** same route type as **Fast route**. COMAND also takes into account any RDS-TMC traffic reports received during route guidance⁵. Thus, the navigation system is able to guide you around a traffic jam, for example. If a faster route is determined due to a received RDS-TMC traffic announcement, the navigation system changes the route. If possible, it will bypass blocked roads.
- **Eco route:** the **Eco route** (economic route) is a variant of the **Fast route** route type. COMAND will attempt to minimise the journey distance at the expense of a slightly increased journey time.
- **Short route:** COMAND calculates a route with the shortest possible (minimised) route distance.

i On very long routes, the "Economic route" more or less corresponds to the "Fast route" route type.

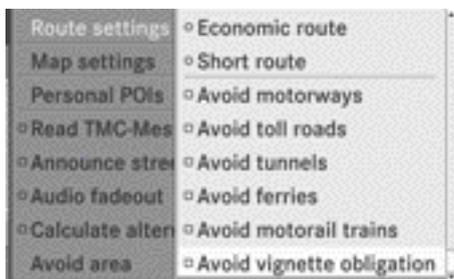

- ▶ **To call up the route settings menu:** press the **NAVI** function button.
- ▶ Select **Navi** in the main function bar by sliding **↑** and turning **⏪** the COMAND controller and press **⏩** to confirm.
- ▶ Select **Route settings** and press **⏩** to confirm.

P82.87-6296-31

Route settings menu (start of menu)

- ① To select the route type
- ② To set route options

P82.87-6297-31

Route settings (end of menu)

- ▶ Select a route type and press **⏩** to confirm. A filled circle indicates the current setting.
- ▶ Select the route option(s) and press **⏩** to confirm. The route options are switched on or off , depending on the previous status.

i If you change the route type and/or the route options while route guidance is active (the route has been calculated), COMAND will calculate a new route.

If you change the route type and/or the route options while route guidance is inactive (no destination has been entered yet), COMAND uses the new setting for the next route guidance.

i The route calculated may, for example, include ferry connections, even if the

⁵ RDS-TMC traffic reports are not available in all countries.

Avoid ferries route option is switched on.

In some cases, e.g. when calculating particularly long routes, COMAND may not be able to take all the selected route options into account.

- **To exit the menu:** slide ←⊙→ the COMAND controller.

Destination entry

Introduction to destination entry

Risk of accident

For safety reasons, only enter a new destination when the vehicle is stationary. You could otherwise be distracted from the traffic conditions, cause an accident and injure yourself and others.

The following destination entry options are available:

- entering a destination by address
- entering a destination from the destination memory
- entering a destination from the list of last destinations
- entering a destination using the map
- entering a destination using geo-coordinates
- entering an intermediate stop
- entering waypoints
- entering a special destination
- entering a personal special destination

Entering a destination by address

Introduction

When entering an address as the destination, you have the following options:

- entering the country, town/postcode, street and house number
- entering the country, town/postcode and street
- entering the country, town/postcode and centre
- entering the country, town/postcode, street and junction
- entering the country and town

Country and town are sufficient to start navigation. You can enter either a town or a postcode. By entering further address data such as the street and house number, you can specify the destination more precisely.

- i** Note that you can only enter a street, house number, junction or centre once you have entered a country and a town or postcode.
- i** You can only enter those towns, streets, postcodes etc. that are stored in the digital map. This means that for some countries, you cannot enter postcodes, for example.

Example of entering an address

The following is a step-by-step example of how to enter an address. The destination address is as follows:

Germany

Berlin

Unstrutstraße 1

You can of course enter any country, town, street and house number desired and enter, for example, your home address (My address).

Calling up the address entry menu

- **To switch on navigation mode:** press the  function button.

- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Destination** by turning  the COMAND controller and pressing  to confirm.
- ▶ Select **Address entry** and press  to confirm.
The address entry menu appears. If you have previously entered a destination, this will be shown in the display.

Address entry menu

Depending on the sequence in which you enter the address and on the data status of the digital map, some menu items may not be available at all or may not yet be available. Example: after country selection, the menu items **Street**, **No.**, **Centr.** (centre), **Junct.** (junction), **POI**, **Save** and **Start** are not yet available. The **Postcode** menu item will not be available unless the digital map contains postcodes.

Selecting the country

- ▶ Select **Country** in the address entry menu by turning  and sliding  the COMAND controller and press  to confirm.
You see the list of countries with the character bar.

Instructions for entering characters using town input as an example can be found in the "Entering characters in navigation mode (entering a town)" section (▶ page 25).

- ▶ **To switch to the country list as a selection list:** select  in the character bar by turning  the COMAND controller and press  to confirm.

or

- ▶ Slide  the COMAND controller once or twice.

- ▶ Select **GERMANY** by turning  the COMAND controller and pressing  to confirm.
The address entry menu appears again. **GERMANY** has now been entered.

Entering the town

- ▶ Select **Town** in the address entry menu by turning  and sliding  the

COMAND controller and press  to confirm.

You will see the town list either with the character bar (option 1) or as a selection list (option 2).

Option 1: town list with character bar

- ▶ Enter **BERLIN**. Instructions for entering characters can be found in the "Entering characters in navigation mode (entering a town)" section (▶ page 25).

Option 2: town list as selection list

- ① Highlighted selection and  icon for additional entries
- ▶ Select **BERLIN** by turning  the COMAND controller and press  to confirm. Entries with the  icon cannot be uniquely assigned. Another selection list is shown.

- ▶ Select **BERLIN(1XXXX)** by turning  the COMAND controller and press  to confirm. The address entry menu appears again. **BERLIN(1XXXX)** has now been entered.

Entering a street name

- ▶ Select **Street** in the address entry menu by turning  and sliding  the COMAND controller and press  to confirm. You will see the street list either with the character bar (option 1) or as a selection list (option 2).

Option 1: street list with character bar

- ▶ Enter **UNSTRUTSTRASSE**. Instructions for entering characters using town input as an example can be found in the "Entering characters in navigation mode (entering a town)" section (▶ page 25).

Option 2: street list as selection list

P82.87-6498-31

Street list

- ▶ Select **UNSTRUTSTRASSE** by turning **⏮** the COMAND controller and press **⏹** to confirm.
- ▶ Irrespective of the option, press **⏹** to confirm your selection. The address entry menu appears again. **UNSTRUTSTRASSE** has now been entered.

Entering the house number

- ▶ Select **No.** in the address entry menu by turning **⏮** and sliding **↑** the COMAND controller and press **⏹** to confirm. You will see the house number list either with the character bar (option 1) or as a selection list (option 2).

Option 1: house number list with character bar

- ▶ Enter **1**. Instructions for entering characters using town input as an example can be found in the "Entering characters in navigation mode (entering a town)" section (> page 25).

P82.87-5311-31

Option 2: house number list as selection list

P82.87-6499-31

House number list

- ▶ Select **1** by turning **⏮** the COMAND controller and press **⏹** to confirm.
- ▶ Irrespective of the option, press **⏹** to confirm your selection. The address entry menu appears again. **1** has now been entered.

Starting route calculation

You can now have COMAND calculate the route to the address entered or save the address first, e.g. as your home address (My address) (> page 57).

Address entry menu with destination address

- ① Destination address
- ② To start route calculation

► In the address entry menu, confirm **Start** by pressing .

If no other route has been calculated, route calculation starts immediately (Option 1). If another route has already been calculated (route guidance is active), a prompt appears (option 2).

Option 1 – no route guidance active: route calculation starts. While route calculation is in progress, an arrow will indicate the direction to your destination. Below this, you will see a message, e.g. **Calculating fast route...**

Once the route has been calculated, route guidance begins. If the vehicle is travelling on a non-digitised road, the system displays the linear distance to the destination, the direction of the destination and the **Off road** message. In this case, the display will be greyed out.

Option 2 – route guidance is already active: if route guidance is already active, a prompt will appear asking whether you wish to terminate the currently active route guidance.

- Select **Yes** or **No** and press  to confirm.
 - If you select **Yes**, COMAND will stop route guidance and start route calculation for the new destination.
 - If you select **No**, COMAND will continue with the active route guidance.

i Route calculation takes a certain amount of time. The time depends on the distance from the destination, for example. COMAND calculates the route using the digital map data.

The calculated route may differ from the ideal route, e.g. due to roadworks or incomplete map data. Please also refer to the notes about the digital map (▷ page 107).

Entering and storing your home address

You can either enter your home address for the first time (option 1) or edit a previously stored home address (option 2).

- **Option 1:** enter the address, e.g. a town, street and house number (▷ page 54).
- Once you have entered the address, select **Save** in the address entry menu by turning  and sliding  the COMAND controller and press  to confirm.
- Select **Save as "My Address"** and press  to confirm. COMAND stores your home address as **My address** in the destination memory.
- **Option 2:** proceed as described under "Option 1".
 - A prompt appears asking whether the current home address should be overwritten.
 - Select **Yes** and press  to confirm. After selecting **Yes**, the **Saving procedure successful** message appears.

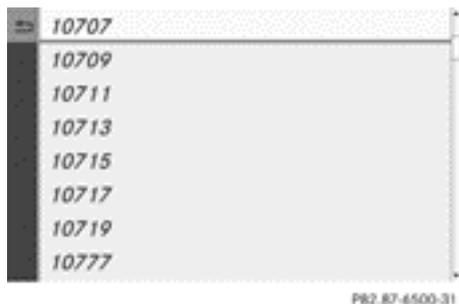

Entering a postcode

Entering a postcode will delete a previously entered town.

- Select **Postcode** in the address entry menu by turning  and sliding  the COMAND controller and press  to confirm.
 - You will see the postcode list either with the character bar (option 1) or as a selection list (option 2).

Option 1: postcode list with character bar

- ▶ Enter a postcode. Instructions for entering characters using town input as an example can be found in the "Entering characters in navigation mode (entering a town)" section (▷ page 25).

**Option 2: postcode list as selection list**

Postcode list

- ▶ Select the desired postcode by turning  the COMAND controller.
- ▶ Irrespective of the option, press  to confirm your selection.
If COMAND can assign the postcode to one town unambiguously (e.g. 74172 for NECK-ARSULM), the address entry menu appears again. You can now complete the address, e.g. by entering a street.
If COMAND cannot assign the postcode unambiguously to a specific address, the address entry menu also appears again. The postcode is automatically entered. You can now enter the street for a more precise

location. Only streets in the area covered by the entered postcode are available.

- ▶ Start route calculation (▷ page 56).

Entering a centre

Entering a centre will, for example, delete a previously entered street.

- ▶ Select **Centr.** (centre) in the address entry menu by turning  and sliding  and press  to confirm.

You will see the centre list either with the character bar (option 1) or as a selection list (option 2).

Option 1: centre list with character bar

- ▶ Enter a centre. Instructions for entering characters using town input as an example can be found in the "Entering characters in navigation mode (entering a town)" section (▷ page 25).

- i** In big cities, you can also enter the centres of districts.

**Option 2: centre list as a selection list**

- ▶ Select a centre by turning the COMAND controller.
- ▶ Irrespective of the option, press to confirm your selection.
The address entry menu appears again. The centre selected has been entered.
- ▶ Start route calculation (▷ page 56).

Entering a junction name

Entering a junction will delete a previously entered house number.

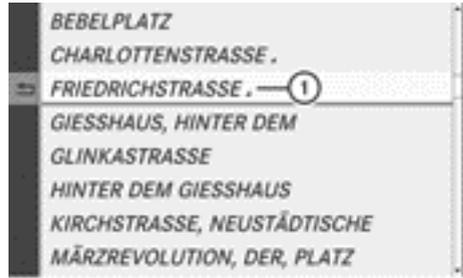

- ▶ Select **Junct.** (junction) in the address entry menu by turning and sliding the COMAND controller and press to confirm.
You will see the junction list either with the character bar (option 1) or as a selection list (option 2).

Option 1: junction list with character bar

- ▶ Enter a junction. Instructions for entering characters using town input as an example can be found in the "Entering characters in navigation mode (entering a town)" section (▷ page 25).

Option 2: junction list as selection list

- ① icon indicating more selection options
- ▶ Select a junction by turning the COMAND controller and press to confirm.
Entries with the icon cannot be uniquely assigned. Another selection list is shown.
- ▶ Select an entry by turning the COMAND controller and press to confirm.
The address entry menu appears again. The junction selected has been entered.
- ▶ Start route calculation (▷ page 56).

Selecting a destination from the destination memory (e.g. My address)

Introduction

The destination memory always contains an entry named "My address". You may wish to assign your home address to this entry, for example (▷ page 57), and select it for route guidance. This entry is always located at the top of the list in the destination memory.

- ▶ **To switch on navigation mode:** press the function button.
- ▶ **To show the menu:** press the COMAND controller.
- ▶ Select **Destination** in the navigation system menu bar by turning the COMAND controller and pressing to confirm.

- ▶ Select **From memory** and press to confirm.

You will see the destination memory list either with the character bar (option 1) or as a selection list (option 2).

Option 1: destination memory list with character bar

- ▶ Enter a destination, e.g. "My address". Instructions for entering characters using town input as an example can be found in the "Entering characters in navigation mode (entering a town)" section ([▷ page 25](#)).

P82.87-5325-31

Option 2: destination memory list as a selection list

P82.87-5836-31

Destination memory list

- ▶ Select **My address** by turning the COMAND controller.

- ▶ Irrespective of the option, press to confirm your selection.

The address entry menu appears again. "My address" has been entered.

P82.86-6367-31

- ① To start route calculation

- ▶ **To start route calculation:** select **Start** and press .

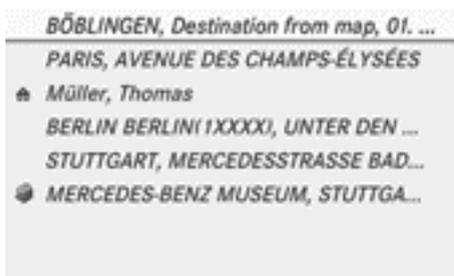

Entering a destination from the list of last destinations

- ▶ **To switch on navigation mode:** press the **NAVI** function button.

- ▶ **To show the menu:** press the COMAND controller.

- ▶ Select **Destination** in the navigation system menu bar by turning the COMAND controller and pressing to confirm.

- ▶ Select **From last destinations** and press to confirm.

P82.87-6477-31

"Last destinations" list

- ▶ Select the desired destination by turning **⏪** the COMAND controller and press **⏩** to confirm.
The address entry menu appears again. The destination address selected has been entered.

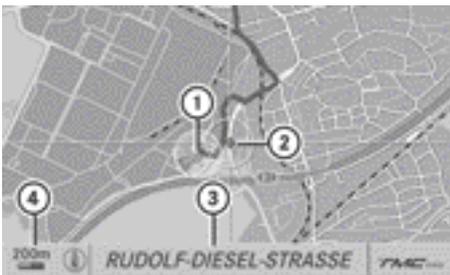

- ▶ **To start route calculation:** select **Start** and press **⏩** to confirm.
Once the route has been calculated, route guidance begins (▷ page 75).

i Further information on the "Last destinations" memory can be found on (▷ page 95).

Entering a destination using the map

Calling up the map

- ▶ **To switch on navigation mode:** press the **NAVI** function button.
- ▶ **To show the menu:** press **⏪** the COMAND controller.
- ▶ Select **Destination** in the navigation system menu bar by turning **⏪** the COMAND controller and pressing **⏩** to confirm.
- ▶ Select **Using map** and press **⏩** to confirm.
You see the map with the crosshair.

P82.86-6348-31

- ① Current vehicle position
- ② Crosshair
- ③ Details of the crosshair position
- ④ Map scale selected

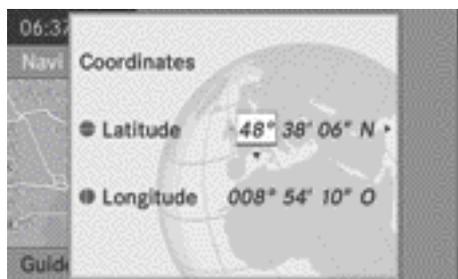

Display **③** depends on the settings selected in "Map information in the display" (▷ page 99). The current road name can be shown, provided the digital map contains the necessary data, or it may show the geo-coordinate position of the crosshair if the geo-coordinates display is switched on.

Moving the map and selecting the destination

- ▶ **To move the map:** slide **←→**, **↑↓** or **↶↷** the COMAND controller.
- ▶ **To set the map scale:** as soon as you turn **⏪** the COMAND controller, the scale bar appears.
▶ Turn **⏪** until the desired scale is set.
Turning clockwise zooms out from the map; turning anti-clockwise zooms in.
- ▶ **To select a destination:** press **⏪** the COMAND controller.
If the crosshair lies outside the digital map, COMAND uses the nearest digitised road for route calculation. You will see the **The crosshair is off the map** message. If the crosshair is located over a body of water, you will see the message: **The destination is located in a body of water. Please select another destination.**
▶ Select **OK** and press **⏩** to confirm.
If the destination is within the limits of the digital map, COMAND attempts to assign the destination to the map.
If the destination can be assigned, you will see the address entry menu with the address of the destination. If not, you will see the **Destination from map** entry.
- ▶ **To start route calculation:** select **Start** and press **⏩** to confirm.

Entering a destination using geo-coordinates

- ▶ **To switch on navigation mode:** press the **NAVI** function button.
- ▶ **To show the menu:** press **COMAND** the COMAND controller.
- ▶ Select **Destination** in the navigation system menu bar by turning **COMAND** the COMAND controller and pressing **COMAND** to confirm.
- ▶ Select **Using geo-coordinates** and press **COMAND** to confirm.
An entry menu appears.

You can now enter the latitude and longitude coordinates.

- ▶ **To change a value:** turn **COMAND** the COMAND controller.
- ▶ **To move the mark within the line:** slide **COMAND** the COMAND controller.
- ▶ **To move the mark between the lines:** slide **COMAND** the COMAND controller.
- ▶ **To confirm the value:** press **COMAND** the COMAND controller.

i If the selected position is outside the digital map, COMAND uses the nearest digitised road for route calculation. You will see the **The position is off the map** message. If the selected position is located over a body of water, you will see the message: **The destination is located in a body of water. Please select another destination.**

Entering an intermediate stop

Introduction

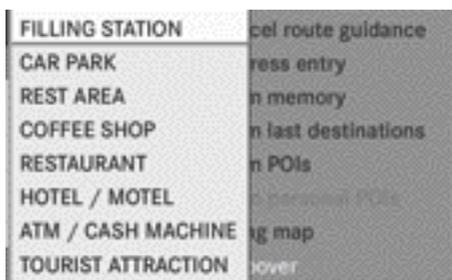

You can use this function to enter an intermediate stop while the vehicle is in motion. COMAND provides a selection of predefined destinations in eight categories for this purpose, e.g. **FILLING STATION** or **CAFÉ**.

When you have entered your intermediate stop, COMAND automatically recalculates the route to the main destination.

Entering predefined destinations

- ▶ **To switch on navigation mode:** press the **NAVI** function button.
- ▶ **To show the menu:** press **COMAND** the COMAND controller.
- ▶ Select **Destination** in the navigation system menu bar by turning **COMAND** the COMAND controller and pressing **COMAND** to confirm.
- ▶ Select **Stopover** and press **COMAND** to confirm.

Option 1: the route does not have an intermediate stop.

Intermediate stop categories

- ▶ Select a category, see option 2.

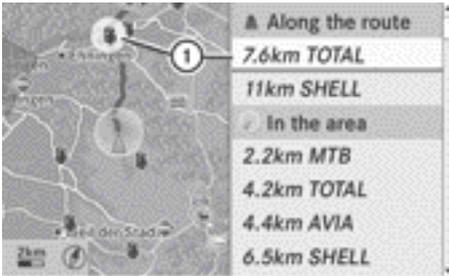

Option 2: the route already has an intermediate stop.

- ▶ Select **Change stopover** and press **COMAND** to confirm.

- ▶ **To select a category:** select a category by turning **[⊙]** the COMAND controller and press **[OK]** to confirm.

COMAND first searches in the selected category for destinations along the route. If there are no destinations available there, COMAND searches for destinations within a radius of up to 100 km of the vehicle position.

If COMAND finds destinations, a list appears on the right-hand side of the display.

PR2.87-6370-31

Search result for the selected category FILLING STATION (example)

- ① Highlighted intermediate stop, current distance from the vehicle position and name of the intermediate stop

The intermediate stops along the route are displayed at the top of the list, sorted by increasing distance from the vehicle's current position. Below this you will see the intermediate stops that COMAND finds in the vicinity of the vehicle's current position.

- ❗ For intermediate stops that are not located along the calculated route, the linear distance is shown.
- ▶ Select the intermediate stop by turning **[⊙]** the COMAND controller and press **[OK]** to confirm.
The address entry menu appears, showing the destination address.
- ▶ **To start route calculation:** select **Start** and press **[OK]** to confirm.

If COMAND does not find any destinations, you will see a message to this effect.

- ▶ Confirm **OK** by pressing **[OK]**.
- ▶ Select a different category.

Deleting an intermediate stop

If an intermediate stop has already been entered, you can delete it.

- ▶ **To switch on navigation mode:** press the **[NAVI]** function button.
- ▶ **To show the menu:** press **[⊙]** the COMAND controller.
- ▶ Select **Destination** in the navigation system menu bar by turning **[⊙]** the COMAND controller and pressing **[OK]** to confirm.
- ▶ Select **Stopover** and press **[OK]** to confirm.
- ▶ Select **Delete stopover** and press **[OK]** to confirm.
COMAND deletes the intermediate stop and recalculates the route to the main destination.

Entering waypoints

Introduction

You can map the route yourself by entering up to two waypoints. The sequence of the waypoints can be changed at any time.

- ❗ An intermediate stop is always between the current position of the vehicle and the first waypoint.

Creating waypoints

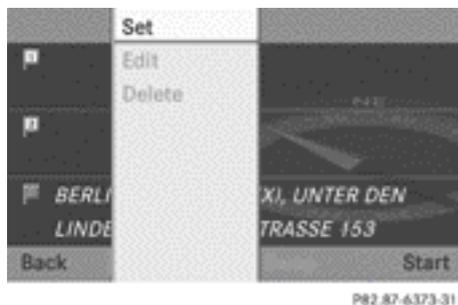

- ▶ **To switch on navigation mode:** press the **[NAVI]** function button.
- ▶ **To show the menu:** press **[⊙]** the COMAND controller.

- ▶ Select **Dest.** in the navigation system menu bar by turning  the COMAND controller and pressing  to confirm.
- ▶ Select **Way points** and press  to confirm.
The destination is entered in the menu.

Waypoint menu without waypoints

- ▶ Confirm the symbol for waypoint 1 by pressing  the COMAND controller.

- ▶ Confirm **Set** by pressing  the COMAND controller.
- ▶ Enter the waypoint via one of the following options.

Selection	Step
Address entry	▶ Enter a destination by address (▷ page 53).
From memory	▶ Select a destination from the destination memory (▷ page 59).

Selection	Step
From last destinations	▶ Select a destination from the list of last destinations (▷ page 60).
From POIs	▶ Enter a special destination (▷ page 66).
From personal POIs	▶ Enter a destination from the personal special destinations (▷ page 74).
Using map	▶ Enter a destination using the map (▷ page 61).
Using geo-coordinates	▶ Enter a destination using the geo-coordinates (▷ page 62).

When the entry is complete, the waypoint appears.

- ▶ **To accept the waypoint:** confirm **OK** by pressing .
- ▶ **To display the details:** select **Details** by turning  the COMAND controller and press .
- ▶ **To make a call:** select **Call** with the COMAND controller and press .

firm. COMAND switches to telephone mode (▷ page 125).

- i** This menu item is available if the waypoint has a telephone number and a mobile phone is connected to COMAND (▷ page 114).
- ▶ **To call up the map:** select **Map** with the COMAND controller and press **↵** to confirm.
- ▶ You can move the map and select the destination.
- ▶ **To store the waypoint in the destination memory:** select **Presets** with the COMAND controller and press **↵** to confirm.

When you have accepted the waypoint, it is entered in the waypoint menu. The example shows the menu with two entered waypoints.

Waypoint menu with two waypoints

Editing waypoints

You can:

- change waypoints
- change the sequence in the waypoint menu
- delete waypoints

To change the sequence, both waypoints must be entered.

- ▶ **To change waypoints:** select the symbol for waypoint 1 or 2 in the waypoint menu

by turning **⏪** the COMAND controller and press **↵** to confirm.

- ▶ Select **Edit** and press **↵** to confirm.
- ▶ Use one of the destination entry options offered.
- ▶ **To change the sequence of the waypoints:** select **Swap** in the waypoint menu by turning **⏪** the COMAND controller and press **↵** to confirm. The entries are swapped.
- ▶ **To delete waypoints:** select the symbol for waypoint 1 or 2 in the waypoint menu by turning **⏪** the COMAND controller and press **↵** to confirm.
- ▶ Select **Delete** and press **↵** to confirm.

- i** You can delete a waypoint directly after entry using this menu item.

Accepting waypoints for the route

- ▶ Select **Start** in the waypoint menu by turning **⏪** the COMAND controller and press **↵** to confirm. The route is calculated with the entered waypoints.

- i** **Continue** is displayed instead of **Start** when **Calculate alternative routes** is activated in the navigation menu (▷ page 82), option 2.

In the example, there is an intermediate stop **□** and a waypoint.

Entering a special destination

Calling up the special destinations menu

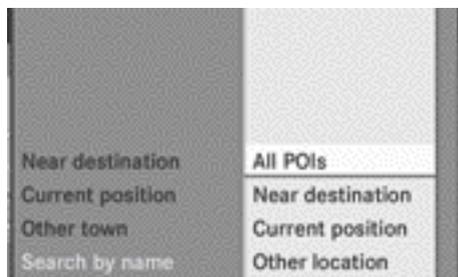

Special destinations are predefined destinations within categories, e.g. a filling station in the **AUTOMOTIVE** category.

You can look for special destinations:

- in the vicinity of the destination
- near the current vehicle position
- in the vicinity of another town
- using its name

You can also select special destinations in the map that are available on the map view shown.

- ▶ **To switch on navigation mode:** press the **NAVI** function button.
- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Destination** in the navigation system menu bar by turning  the COMAND controller and press  to confirm.
- ▶ Select **From POIs** and press  to confirm. A menu appears.

PE2.87-64/8-31

Special destinations menu ("Search by name" selected)

Defining the position for the special destination search		
Selection	Characteristic	Instructions
Near destination	Entry is only possible when route guidance is active.	<ul style="list-style-type: none"> ▶ Select Near destination from the special destinations menu (> page 66) and press  to confirm. ▶ Select a special destination category (> page 68).
Current position	The system looks for a special destination in the vicinity of the current vehicle position.	<ul style="list-style-type: none"> ▶ Select Current position in the special destinations menu and press  to confirm. ▶ Select a special destination category (> page 68).
Other town	After entering a town, the system looks for the special destination within the town.	<p>Option 1</p> <ul style="list-style-type: none"> ▶ Select Other town in the special destinations menu and press  to confirm. ▶ Select the country, if desired (> page 54). ▶ Enter the town. Proceed as described in the "Entering a town" section (> page 54). ▶ Select a special destination category (> page 68). <p>Option 2</p> <ul style="list-style-type: none"> ▶ Enter a town in the address entry menu (> page 53). ▶ Select POI and press  to confirm. ▶ Select a special destination category.
Search by name	You can call up all the special destinations in the digital map or focus your search on the three previously selected positions.	<ul style="list-style-type: none"> ▶ Select Search by name in the special destinations menu and press  to confirm. ▶ Select All POIs or one of the three previously selected positions. The special destination list with character bar appears. ▶ Proceed as described in the "Special destination list with character bar" section (> page 70).

Search by special destination category

After selecting the menu items, the special destination categories appear:

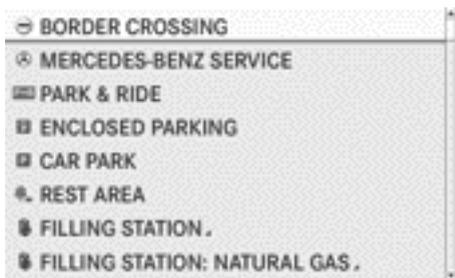

- Near destination
- Current position
- Other town (after entering a town)

i If you have selected **Search by name** and then defined the position for the search, the special destination list with character bar appears (▷ page 70).

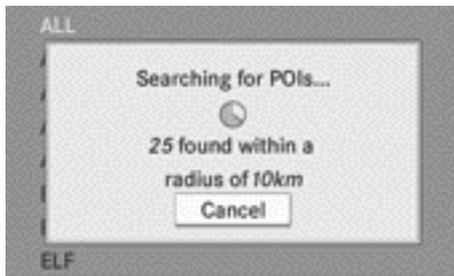

P82.87-6350-31

- ▶ Select a special destination category by turning **⏮** the COMAND controller and press **⏹** to confirm. In the example, the **AUTOMOTIVE** category has been selected. The **▶** arrow behind an entry shows that other categories are available.

P82.87-6351-31

- ▶ Select a category and press **⏹** to confirm. In the example, the **FILLING STATION** category has been selected.
- ▶ Select the **ALL** entry or one of the different filling station brands. The search for special destinations begins in the vicinity of the selected position.

P82.87-6352-31

Special destination search near the current position (example)

i The special destination search is cancelled when 50 special destinations have been found. COMAND searches within a radius of 100 km.

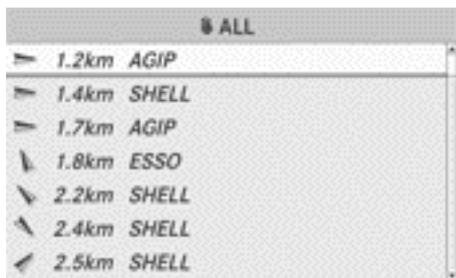

If COMAND does not find any special destinations within this radius, it extends its search range to approximately 200 km. If COMAND finds one special destination within this radius, it finishes the search.

Once the search is completed, the special destination list is displayed.

Special destination list

Introduction

The special destination list displays the search results for the selection made.

PR2.87-4353-31

Special destination list (example)

An entry contains the following information:

- an arrow that shows the linear direction to the special destination
- the linear distance to the special destination
- the name of the special destination

i The arrow and linear distance to the destination are not visible if you have entered a special destination within a specific town. The arrow is not shown either when entering a special destination in the vicinity of the destination.

Depending on the special destination selected, COMAND uses different reference points in determining the linear distance to the destination:

- vicinity of current position: the linear distance is the distance from the current vehicle position to the special destination.
- vicinity of destination: the linear distance is the distance from the destination entered to the special destination.

Selecting a special destination

The example has been selected in the special destination category **BAR & RESTAURANT**.

- ▶ Select the special destination in the special destination list by turning **⏪** the

COMAND controller and press **⏩** to confirm.

The complete address of the special destination selected is shown.

PR2.86-9836-31

- ① Special destination with address
- ② To start route calculation
- ③ To store an address in the destination memory
- ④ To display details
- ⑤ To make a call when available
- ⑥ To display a special destination's position on the map

▶ **To start route calculation:** select **Start** and press **⏩** to confirm.

▶ **To store an address in the destination memory:** select **Save** and press **⏩** to confirm. You can now select storage options (▶ page 94).

▶ **To show the detailed view:** select **Details** and press **⏩** to confirm.

▶ **To make a call:** select **Call** and press **⏩** to confirm. COMAND switches to telephone mode (▶ page 125).

i This menu item is available if the special destination has a telephone number and a mobile phone is connected to COMAND (▶ page 114).

▶ **To call up the map:** select **Map** and press **⏩** to confirm.

▶ You can move the map and select the destination (▶ page 61).

Special destination list with character bar

If you have selected **Search by name** in the special destination menu (▷ page 66) and then defined the position for the search (▷ page 67), the special destination list with character bar appears.

Depending on your selection, you can select all available special destinations on the digital map or the special destinations in the vicinity of the selected position.

Search by name in the vicinity of the destination (example)

Proceed as described in the "Searching for a phone book entry" section (▷ page 130).

i If COMAND can assign the characters entered to one entry unambiguously, the address entry appears automatically.

▶ **To start route calculation:** select **Start** and press **OK** to confirm.

Selecting a special destination using the map

You can select special destinations that are available in the selected (visible) section of the map.

▶ **To switch on navigation mode:** press the **NAVI** function button.

▶ **To show the menu:** press **OK** the COMAND controller.

▶ Select **Guide** in the navigation system menu bar by turning **OK** the COMAND controller and press **OK** to confirm.

If special destinations are available:

Depending on the map scale selected, special destination icons appear on the map. The scale at which the icons are displayed on the map varies according to the icon. You can select the icons that COMAND will display (▷ page 98).

If no special destinations are available, you will see a message to this effect.

i You also see this message if you have selected the **No symbols** menu item under "Map display" (▷ page 98).

▶ **To confirm the message:** press **OK** the COMAND controller.

Special destination on the map

The special destination is highlighted on the map, you will see information on the upper edge of the display.

▶ **To select a special destination:** select **Next** or **Previous** and press **OK** to confirm.

▶ **To show details for the selection:** select **Details** and press **OK** to confirm.

▶ **To change to the map:** slide **↑** the COMAND controller. You can move the map and select the map section.

- ▶ **To start route calculation:** select **Start** and press to confirm.
A prompt appears asking whether the special destination should be used as the destination.
- ▶ Select **Yes** or **No** and press to confirm.
If you select **Yes**, route guidance starts.
If you select **No**, you can choose a new special destination.

i **Continue** is displayed instead of **Start** when **Calculate alternative routes** is activated in the navigation menu (▷ page 82), option 2.

Personal special destinations

Settings

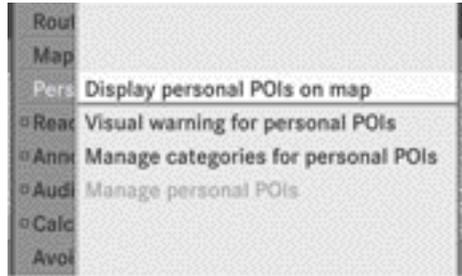

Overview

Personal destinations can be:

- displayed on the map
- highlighted on the map as you approach them
- managed in categories
- managed

Calling up the "Personal special destinations" menu

- ▶ **To switch on navigation mode:** press the **NAVI** function button.
- ▶ **To show the menu:** press the COMAND controller.
- ▶ Select **Navi** in the main function bar by sliding and turning the COMAND controller and press to confirm.
- ▶ Select **Personal POIs** and press to confirm.

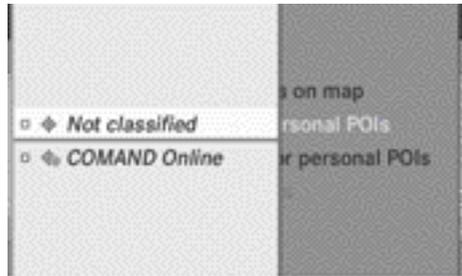

P82.87-4355-31

Displaying personal special destinations on the map

The personal special destinations are shown on the map with an icon according to their category.

- ▶ Select **Display personal POIs on map** in the menu and press to confirm.
You can select different categories.

P82.87-4358-31

Selection	Explanation
<input type="checkbox"/> Not classified	Standard entry for personal special destinations
<input type="checkbox"/> COMAND Online	Personal special destinations which you have imported via COMAND Online (▷ page 168).

If you have created your own categories (e.g. "Café", "Top 10") (▷ page 72), they are also displayed.

- ▶ Select a category and press to confirm. The icon display is switched on or off , depending on the previous status.

i The icons are displayed on the map scales 50 m, 100 m and 200 m.

Visual information for personal special destinations

When the vehicle is approaching a personal special destination and the display of the relevant category is switched on, it is highlighted on the map.

- ▶ Select **Visual warning for personal POIs** in the menu and press to confirm.
- ▶ Press to confirm the entry. This will switch the visual information for the personal special destinations of this category on or off , depending on the previous setting.

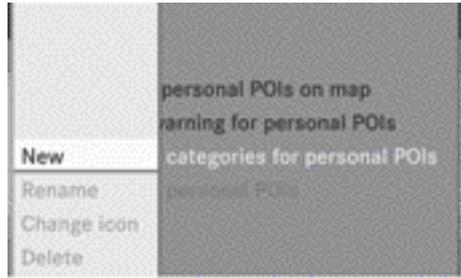

PBZ.87-6359-31

Visual information for a personal special destination (example)

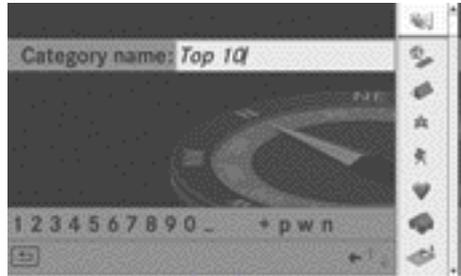

Managing categories for personal special destinations

- ▶ Select **Manage categories for personal POIs** in the menu and press to confirm.

PBZ.87-6356-31

- ▶ **To create a new category:** select **New** and press to confirm.
- ▶ Enter the name of the category. Proceed as described under "Entering characters" in the "Entering characters in the address and phone books" section (▶ page 28).
- ▶ Select the icon and press to confirm. A list with icons appears. You can assign an icon to the category.

PBZ.87-6357-31

- ▶ Select an icon by turning the COMAND controller and press to confirm. You have created a new category with a name and icon. This category appears when selecting the display on the map or when selecting the destination.
- ▶ **To rename a category, to change an icon:** select **Rename** or **Change icon** and press to confirm.
- ▶ Proceed as described under "To create a new category".

- ▶ **To delete a category:** select **Delete** and press  to confirm.
A prompt appears asking whether the category should be deleted.
- ▶ **i** If you delete a category, all special destinations of this category are also deleted.
- ▶ Select **Yes** and press  to confirm.
If you select **Yes**, the category will be deleted.
If you select **No**, the process will be aborted.

Managing personal special destinations

- ▶ Select **Manage personal POIs** in the menu and press  to confirm.
- ▶ Select **Not classified, COMAND Online** or your own category and press  to confirm.
- ▶ Select a personal special destination and press  to confirm.
The personal special destination is displayed.

The following functions are described in the "Select as destination" section (▷ page 74):

- renaming
- changing the category
- deleting

Saving personal special destinations

There are three ways of saving personal special destinations. You must insert an SD memory card to do so. The **No memory card** message otherwise appears.

Option 1

- ▶ Insert the SD memory card (▷ page 196).
- ▶ Press  the COMAND controller for longer than two seconds.
The current position of the vehicle is saved as a personal special destination on the SD memory card in the "Unclassified" category.

- ▶ **i** The crosshair position is saved while scrolling the map (▷ page 61).

Option 2

- ▶ Insert the SD memory card (▷ page 61).
- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Position** in the navigation system menu bar by turning  the COMAND controller and press  to confirm.
- ▶ Select **Save position as pers. POI** or **Save crosshair pos. as personal POI** ("Move map" function active) and press  to confirm.
The current position of the vehicle or the crosshair is saved as a personal special destination on the SD memory card in the "Unclassified" category.

Option 3

- ▶ Insert the SD memory card (▷ page 196).
- ▶ Select **Save** in the address entry menu and press  to confirm.
- ▶ Select **Save as personal POI** and press  to confirm.
- ▶ Select a category.
- ▶ Enter the name.
The current address is saved as a personal special destination on the SD memory card.

Importing personal special destinations via COMAND Online

You can import personal special destinations via COMAND Online (▷ page 168). When importing, you can choose whether to write files to the SD memory card or to file them in the address book. The imported personal special destinations have their own icon and are filed in the "COMAND Online" category.

Selecting as the destination

- ▶ Insert the SD memory card (▷ page 196).
- ▶ **To switch on navigation mode:** press the **NAVI** function button.
- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Destination** in the navigation system menu bar by turning  the COMAND controller and press  to confirm.
- ▶ Select **From personal POIs** and press  to confirm. A menu appears.

P82.87-4341-31

- ▶ Select an entry and press  to confirm.

Selection	Explanation
Not classified	Standard entry for personal special destinations.
COMAND Online	Personal special destinations which you have imported via COMAND Online (▷ page 168).
Café	Icon and category that you have created yourself (▷ page 72).

In the example, **COMAND Online** has been selected. The received special destinations are displayed.

P82.87-6419-31

- ▶ Select a personal special destination and press  to confirm.

P82.87-6363-31

- ▶ **To rename a personal special destination:** select **Rename** and press  to confirm.
 - ▶ **To change the category:** select **Change category** and press  to confirm.
 - ▶ **To change to the map:** select **Map** and press  to confirm. The position of the personal special destination is shown in the map.
- i** An icon is displayed according to the "Displaying personal special destinations on the map" setting (▷ page 71).
- ▶ **To start route calculation:** select **Start** and press  to confirm. If route guidance has been activated, a prompt will appear asking whether you wish to accept the personal special destination as the destination.

If route guidance has not been activated, route calculation for the personal special destination will start immediately.

- ▶ Select **Yes** or **No** and press  to confirm. If you select **Yes**, the personal special destination is accepted as the destination. If you select **No**, the process will be aborted.
- ▶ **To make a call:** select **Call** and press  to confirm. COMAND switches to telephone mode (▷ page 125).
- i** This menu item is available if the personal special destination has a telephone number and a mobile phone is connected to COMAND (▷ page 114).
- ▶ **To delete a personal special destination:** select **Delete** and press  to confirm. A prompt appears asking whether you wish to delete the special destination.
- ▶ Select **Yes** or **No** and press  to confirm. If you select **Yes**, the personal special destination is deleted. If you select **No**, the process will be aborted.

Route guidance

General notes

Risk of accident

COMAND calculates the route to the destination without taking account of the following, for example:

- traffic lights
- stop and give way signs
- parking or stopping restrictions
- lane narrowing
- other road and traffic rules and regulations

COMAND may give incorrect driving recommendations if the data on the digital map does not correspond to the actual conditions, e.g. the road layout has changed.

For this reason, you must always observe the respective road and traffic rules and regula-

tions during your journey. Road and traffic rules and regulations always have priority over system driving recommendations.

Route guidance begins once a route has been calculated (▷ page 56).

COMAND guides you to your destination by means of navigation commands in the form of audible navigation announcements and route guidance displays.

The route guidance displays can only be seen if the display is switched to navigation mode.

If you do not follow the navigation announcements or if you leave the calculated route, COMAND automatically calculates a new route to the destination.

If the digital map contains the corresponding information, the following applies:

- when selecting a route, COMAND tries to avoid roads that only have limited access, e.g. roads closed to through traffic and non-residents.
- roads that have time restrictions (e.g. closed on Sundays and public holidays) are considered for route guidance on days when they are open. For this purpose, the relevant times must be correctly stored in the database.

Change of direction

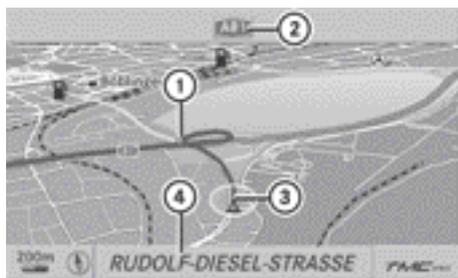

Introduction

Changes of direction have three phases:

- preparation phase
- announcement phase
- change-of-direction phase

Preparation phase

COMAND prepares you for the upcoming change of direction. Based on the example display below, the change of direction is announced by the **Prepare to turn right** message. You see the full-screen map.

Example display: preparation phase

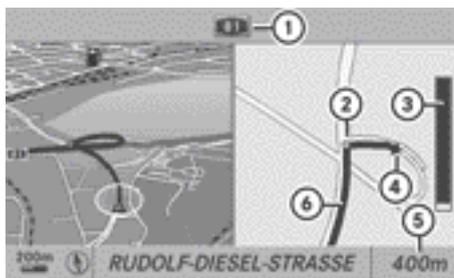

- ① Point at which the change of direction takes place (light blue dot)
- ② Next road
- ③ Current vehicle position (the tip of the triangle indicates the vehicle's direction of travel)
- ④ Current road

Display ④ depends on the setting selected for "Information in map" (▷ page 99).

Announcement phase

COMAND announces the imminent change of direction. Based on the following example, the change of direction is announced with the **In 400 metres turn right onto the A81** message.

The display is now split into two sectors. In the left half, you see the normal map view. The right half shows an enlarged section of the area around the junction (Crossing Zoom) or a 3D image of the road's course with the route indicating the next manoeuvre.

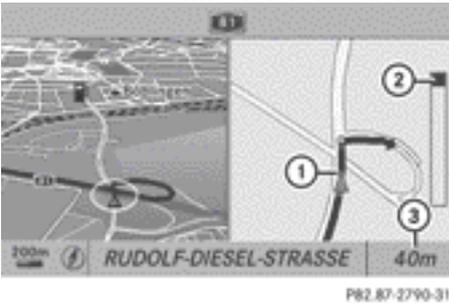

Example display: announcement phase

- ① Next road
 - ② Point at which the change of direction takes place (light blue dot, shown in both the left and right half of the display)
 - ③ Graphic representation of the distance to the next change of direction
 - ④ Change of direction (turn right here)
 - ⑤ Distance to the next change of direction
 - ⑥ Route (blue line, shown in both the left and right half of the display)
- i** The filled-in section of visual display for distance ③ gets shorter the nearer you get to the announced change of direction.

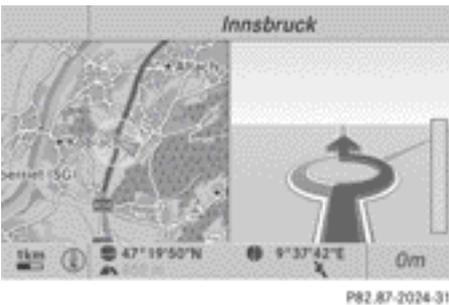

Change-of-direction phase

COMAND announces the imminent change of direction. Based on the example display below, the change of direction is announced 40 metres before the change of direction with the **Now turn right** message. The display is split into two halves, as in the announcement phase.

Example display: change-of-direction phase

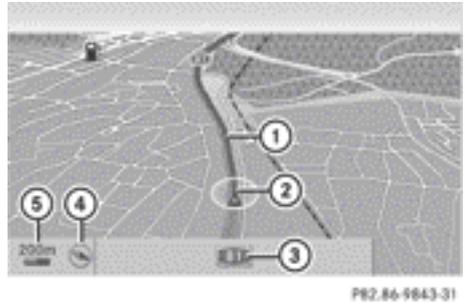

- ① Current vehicle position (the tip of the triangle indicates the vehicle's direction of travel)
- ② Graphic representation of the distance to the next change of direction
- ③ Distance to the next change of direction

Example display: roundabout

Once the change of direction is completed, COMAND automatically switches back to full-screen display.

Example of a display without changes of direction

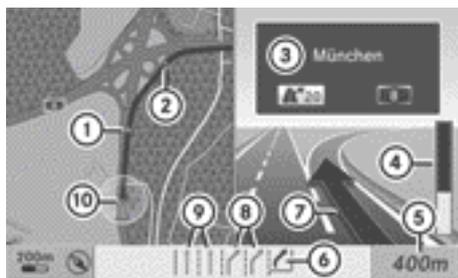

- ① Route (highlighted in blue)
- ② Current vehicle position
- ③ Current road
- ④ Map orientation selected
- ⑤ Map scale selected

Lane recommendations

Overview

On multilane roads, COMAND can display lane recommendations for the next change of direction. The relevant data must be available on the digital map.

COMAND displays lane recommendations ⑥, based on the next two changes of direction. The number of lanes applies to the point at which the next change of direction is required.

Lane recommendations (example)

- ① Point of the next change of direction
 - ② Point of the change of direction after next
 - ③ Direction display, number of junction and of motorway
 - ④ Graphic representation of the distance to the next change of direction
 - ⑤ Distance to the next change of direction
 - ⑥ Recommended lane (dark blue)
 - ⑦ Next change of direction (in this case, exit to the right)
 - ⑧ Possible lanes (light blue)
 - ⑨ Not recommended lanes (light brown)
 - ⑩ Current vehicle position (the tip of the triangle indicates the vehicle's direction of travel)
- i** The multifunction display also shows lane recommendations, Only the recommended lanes are displayed here (▷ page 80).

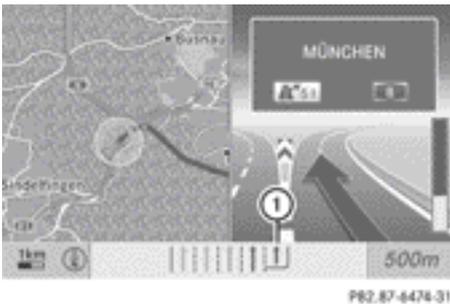

Display and description of lane recommendations

The colours used in the lane recommendation display vary depending on whether day or night design is switched on.

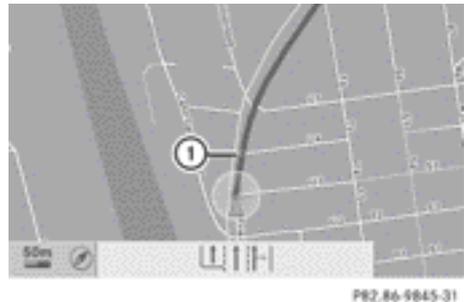

Lane	Day design	Night design
Recommended lane ⑥ In this lane, you will be able to complete the next two changes of direction without changing lanes.	Dark blue	Light blue
Possible lane ⑧ In this lane, you will only be able to complete the next change of direction without changing lanes.	Light blue	Dark blue
Lane not recommended ⑨ In this lane, you will not be able to complete the next change of direction without changing lane.	Light brown	Grey

Further display examples

During the change of direction, there may be additional lanes which are displayed differently.

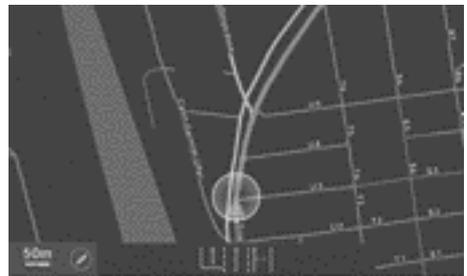

- ① New lane (dark blue)

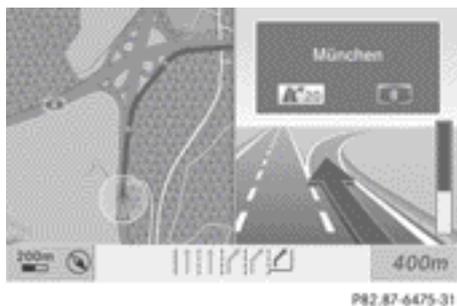

Day design (example)

- ① The displayed lane recommendations apply to this position (light blue circle)

Night design (example)

Lane recommendations at a motorway junction (example)

Example display: multifunction display

► Use or to select the **Navi** menu.

- ① Road to which the change of direction leads
- ② Distance to the change of direction and distance graphic
- ③ Lane recommendation
- ④ Change of direction icon

On multilane roads, the system can display lane recommendation ③ for the next change of direction. During the change of direction, additional lanes may be displayed.

Announcing the street names

If the function is switched on, the name of the street which you are turning into is announced.

Street names may be announced in the following languages:

- Danish
- German
- English
- French
- Dutch
- Portuguese
- Swedish

Announcements are not made in these languages in all countries. They are made when relevant street names for the selected language are available in the database.

- **To switch on navigation mode:** press the function button.
- **To show the menu:** press the COMAND controller.
- Select **Navi** in the main function bar by sliding the COMAND controller and press to confirm.
- Select **Announce street names** and press to confirm.
Depending on the previous status, the function is switched on or off .

Canceling or continuing route guidance

Canceling route guidance

- **To switch on navigation mode:** press the function button.
- **To show the menu:** press the COMAND controller.
- Select **Dest.** in the navigation system menu bar by turning the COMAND controller and pressing to confirm.
- Select **Cancel route guidance** and press to confirm.

Continuing route guidance

- ▶ **To switch on navigation mode:** press the  function button.
- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Dest.** in the navigation system menu bar by turning  the COMAND controller and pressing  to confirm.
- ▶ Select **Continue route guidance** and press  to confirm. COMAND calculates the route.

Destination or area of destination reached

When you reach your destination, COMAND displays a chequered flag and route guidance is automatically ended.

If the destination is not in close proximity to a digitised street, the **Area of destination reached** message appears when the destination is reached.

Navigation announcements

Repeating navigation announcements

- i** Audible navigation announcements are muted during a telephone call.
- If you have missed an announcement, you can call up the current announcement at any time.
- ▶ **To show the menu:** press  the COMAND controller.
 - ▶ Select  in the navigation system menu bar by turning  the COMAND controller and press  to confirm.

Switching navigation announcements on/off

- ▶ **To switch off:** press the  button during an announcement. You will briefly see the message: **The guidance instructions have been muted.**
- ▶ **To switch on:** press  the COMAND controller.
- ▶ Select  in the navigation system menu bar by turning  the COMAND controller and press  to confirm.

- i** COMAND automatically switches the navigation announcements back on when:
 - it receives RDS-TMC traffic reports during dynamic route guidance (▷ page 88) and recalculates the route accordingly.
 - you have a new route calculated.
 - you switch COMAND back on again or start the engine.

Reducing volume during a navigation announcement

The volume of an active audio or video source can be automatically reduced during a navigation announcement.

- ▶ Select **Navi** in the main function bar by sliding  and turning  the COMAND controller and press  to confirm.
- ▶ Select **Audio fadeout** and press  to confirm. Depending on the previous status, the function is switched on or off .

Setting the volume manually

- ▶ Adjust the volume using the  control knob during a navigation announcement.
- or
- ▶ Select  in the map view with the menu shown and adjust the volume using the  control knob.

Avoiding a section of the route blocked by a traffic jam

This function blocks a section of the route ahead of you. You can set the length of the blocked route section. If possible, COMAND calculates a detour around the blocked section of the route.

- ▶ **To switch on navigation mode:** press the **NAVI** function button.
- ▶ **To show the menu:** press **☺** the COMAND controller.
- ▶ Select **Route** in the navigation system menu bar by turning **⏪** the COMAND controller and press **☺** to confirm.
- ▶ Select **Detour** and press **☺** to confirm.
- ▶ **To block a section of the route:** select **Longer** or **Shorter** repeatedly and confirm using **☺** until the desired section has been selected.

i The total length of the section that can be blocked is defined by the digital map. The menu items are available accordingly.

PR2.86-9849-31

- ① Length of the blocked route section
- ② Name of route section
- ③ Blocked route section

- ▶ **To start route calculation:** select **Start** and press **☺** to confirm.

- ▶ **To delete the blocked section:** select **Delete** while the message is shown and press **☺** to confirm. COMAND calculates the route without the block.

Selecting an alternative route

Introduction

With the "Alternative route" function, routes other than the original one can be calculated.

- i** Ensure that the "Alternative routes" setting is activated in the navigation menu (option 2).

Option 1

- ▶ **To switch on navigation mode:** press the **NAVI** function button.
- ▶ **To show the menu:** press **☺** the COMAND controller.
- ▶ Select **Route** in the navigation system menu bar by turning **⏪** the COMAND controller and press **☺** to confirm.
- ▶ Select **Alternative route** and press **☺** to confirm. On the right-hand side, you will see information on the currently selected alternative route, e.g. distance, estimated remaining driving time and estimated time of arrival. Route sections used (e.g. motorways, tunnels) are displayed as symbols.

PR2.87-6333-31

Route 1 (example)

The route is shown in the map with a dark blue line.

Route 1 is calculated with the current settings for the route type and route options (▷ page 52). The alternative routes 2 to 4 are calculated with the same route options as for route 1. Route 4 is the economic route (eco route).

Route 4 (example: eco route)

The route is shown in the map with a green line.

Option 2

- ▶ **To switch on navigation mode:** press the **NAVI** function button.
- ▶ **To show the menu:** press **☺** the COMAND controller.
- ▶ Select **Navi** in the main function bar by sliding **↑** **☺** the COMAND controller and press **☺** to confirm.
- ▶ Select **Calculate alternative routes** and press **☺** to confirm.

Depending on the previous status, the function is switched on or off .

Function is activated: alternative routes are calculated directly after the destination is entered.

Menu functions

- ▶ **To select the next or previous alternative route:** select **Next** or **Previous** and press **☺** to confirm.

- ▶ **To start route guidance using the selected alternative route:** select **Start** and press **☺** to confirm.
COMAND calculates the alternative route.

Displaying destination information

You can display destination information for the destination, for both waypoints and the intermediate stop, if they are part of the route.

- ▶ **To switch on navigation mode:** press the **NAVI** function button.
- ▶ **To show the menu:** press **☺** the COMAND controller.
- ▶ Select **Route** in the navigation system menu bar by turning **⏪** the COMAND controller and press **☺** to confirm.
- ▶ Select **Destination information** and press **☺** to confirm.
Destination information is displayed.

Destination information (example)

The example shows:

- the destination **☒**
- two waypoints
- the relevant information on distance, estimated time of arrival and estimated remaining driving time

- i** If a mobile phone is connected to COMAND (▷ page 114) and a phone number is included in the destination information, you can call it.

- ▶ **To call up further destination information:** turn  the COMAND controller.
- ▶ **To close the destination information:** slide  the COMAND controller or press the  back button.

Route overview

You can use the route overview to move along the active route section by section and view information and details about each section of the route.

- ▶ **To switch on navigation mode:** press the  function button.
- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Route** in the navigation system menu bar by turning  the COMAND controller and press  to confirm.
- ▶ Select **Route browser** and press  to confirm.

P82.86-9852-31

Route overview (example)

At the top of the display, you will see information about the highlighted route section, for example the distance to be driven on the road and road designation. The highlighted route section is marked in white with a red border on the map.

- ▶ **To view the next or previous route section:** select **Next** or **Previous** and press  to confirm.

i If the first or last route section is highlighted, you cannot select **Previous** or **Next**.

- ▶ **To zoom in or out of the map:** select  or  and press  to confirm.
- ▶ **To close the route overview:** select **Back** and press  to confirm.

Route display

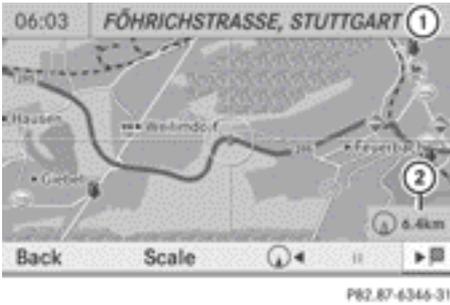

You can see the route before starting your journey. This function is only available when the vehicle is stationary.

- ▶ **To switch on navigation mode:** press the  function button.
- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Route** in the navigation system menu bar by turning  the COMAND controller and press  to confirm.
- ▶ Select **Route demonstration** and press  to confirm.
The map with the crosshair appears.

P82.87-6473-31

- ▶ **To get to the destination:** press  to confirm the highlighted symbol.
- ▶ **To stop the route display:** confirm the  symbol by pressing .

Route display stopped (example)

- ① Road name and location display
- ② Distance of the crosshair from current vehicle position

- ▶ **To get to the current vehicle position:** press to confirm the symbol for the current vehicle position.
- ▶ **To change the map scale:** select **Scale** and press to confirm. The scale bar appears.
- ▶ Turn the COMAND controller and press to confirm.

Recording the route

Notes

If you have activated COMAND and the SD memory card has been inserted, you should not take it out of the slot.

When you record a route, COMAND uses so-called support points and displays the route as a series of lines. If the route is then calculated, COMAND attempts to align the recorded route with the digital map.

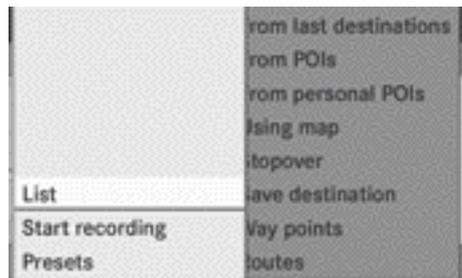

The support points of the route may not be on a digitised road.

This is often the case with routes which are drawn up using other map data and imported via COMAND Online, e.g.:

- routes from the Google™ special destination search (> page 165)
- routes from the special destination download (> page 168)

Calling up the "Routes" menu

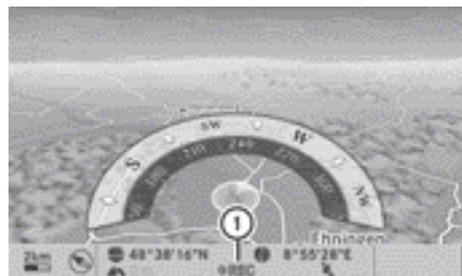

- ▶ Insert the SD memory card (> page 196).
- ▶ **To switch on navigation mode:** press the **NAVI** function button.
- ▶ **To show the menu:** press the COMAND controller.
- ▶ Select **Destination** in the navigation system menu bar by turning the COMAND controller and pressing to confirm.
- ▶ Select **Routes**.

P82.87-6342-31

Starting/ending recording

- ▶ **To start recording:** select **Start recording** in the "Routes" menu by turning the COMAND controller and press to confirm. The route is recorded and entered in a list. • **REC** is displayed in red ①.

P82.87-6349-31

- ▶ **To end recording:** select **End recording** in the "Routes" menu by turning the

COMAND controller and press  to confirm.

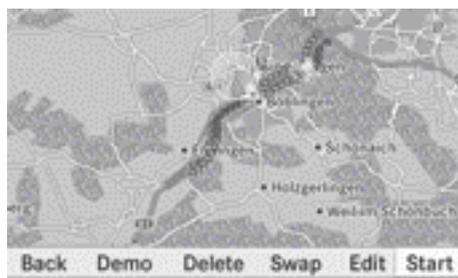

Displaying and editing the recorded route

- ▶ Insert the SD memory card (▷ page 196).
- ▶ Select **List** in the "Routes" menu by turning   the COMAND controller and press  to confirm. Previously recorded routes are displayed.

P82.87-6343-31

- ▶ Select a route and press  to confirm. The map appears with a menu. The recorded route is shown in the map with a blue dotted line.

P82.87-6344-31

Turning off from the route on the map

- ▶ Select **Demo** by turning   the COMAND controller and press  to confirm. The map with the crosshair appears.
- ▶ Proceed as described in the "Route display" section (▷ page 84).

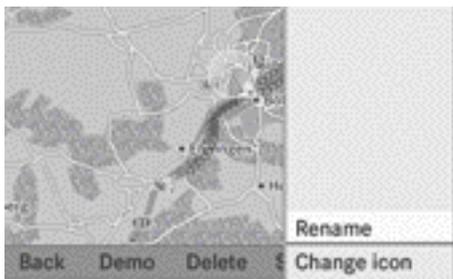

Starting route calculation

- ▶ Select **Start** in the menu by turning   the COMAND controller and press  to confirm. COMAND attempts to align the recorded route with the digital map.

Editing the route

You can change the route name and the icon.

- ▶ Select **Edit** in the menu by turning   the COMAND controller and press  to confirm.

P82.87-6347-31

- ▶ **To change the route name:** select **Rename** and press  to confirm.

 The name cannot be changed while the vehicle is in motion.

- ▶ **To change the icon:** select **Change icon** and press  to confirm.

▶ A description for both entries can be found in the "Personal special destinations" section under "Managing categories for personal special destinations" (▷ page 72).

Changing direction for route calculation

You can set the icon for the route to the starting point or to the destination thereby changing the direction for route calculation.

 During route calculation, one-way streets or turn restrictions, for example, are taken into account. Therefore, the outward and return routes may differ from each other.

- ▶ Select **Swap** in the menu by turning **⏮** the COMAND controller and press **⏹** to confirm.

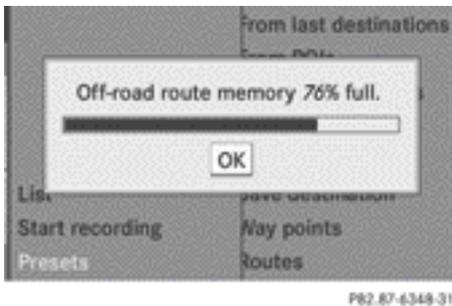

Deleting the route

- ▶ Select **Delete** in the menu by turning **⏮** the COMAND controller and press **⏹** to confirm.
A prompt appears asking whether the route should be deleted.
- ▶ Select **Yes** or **No** and press **⏹** to confirm.
If you select **Yes**, the route will be deleted.
If you select **No**, the process will be aborted.

Scanning the memory

The SD memory card is inserted.

- ▶ Select **Memory** in the "Routes" menu (▶ page 85) by turning **⏮** the COMAND controller and press **⏹** to confirm.
The route memory is displayed.

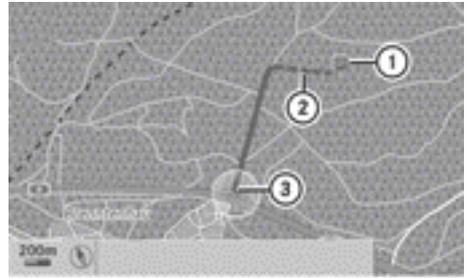

Off-road and off-map

Route guidance to a destination that is not on a digitised road

COMAND can guide you to destinations which are within the area covered by the digital map, but which are not themselves recorded on the map.

These destinations are known as off-road destinations, which you can enter using the map, for example. In these cases, COMAND guides you for as long as possible with navi-

gation announcements and displays on roads known to the system.

Route guidance to an off-road destination (example)

- ① Off-road destination
- ② Off-road route section (dashed blue)
- ③ Current vehicle position (the tip of the triangle indicates the vehicle's direction of travel)

Shortly before you reach the last known point on the map, you will hear the "Area of destination reached" announcement. The display shows a direction arrow with the linear distance to the destination.

Route guidance from an off-road location to a destination

If the vehicle position is within the area covered by the digital map, but the map does not contain any information about that location, the vehicle is in an off-road location. COMAND is also able to guide you to a destination even from an off-road location.

At the start of the route guidance, you will see the **Off road** message, an arrow and the distance to the destination. The arrow shows the compass heading to the actual destination.

The route is highlighted blue, starting from the last recognised street the vehicle was on before it left the map.

As soon as the vehicle is back on a road known to the system, route guidance continues in the usual way.

Route guidance from an off-map location to a destination

If the vehicle position is outside the area covered by the digital map, then the vehicle is in an off-map location. COMAND is also able to guide you to a destination even from an off-map location.

At the start of the route guidance, you will see the **Off road** message, an arrow and the distance to the destination. The arrow shows the compass heading to the road left last.

The route is highlighted blue from the nearest road known to the system.

As soon as the vehicle is back on a road known to the system, route guidance continues in the usual way.

Off-road during route guidance

Due to roadworks, for example, there may be differences between the data on the digital map and the actual course of the road.

In such cases, the system will temporarily be unable to locate the vehicle position on the digital map and thus considers the vehicle to be in an off-road position.

In the display, you will see the **Off road** message, an arrow and the distance to the destination. The arrow shows the compass heading to the last road you were driving on.

As soon as the system can assign the vehicle position to the map again, route guidance continues in the usual way.

Dynamic route guidance

Introduction

An RDS-TMC radio station transmits RDS-TMC traffic reports in addition to the radio programme. COMAND can receive the RDS-TMC traffic reports and take them into consideration for dynamic (traffic-dependent) route guidance. The navigation system can, for example, guide you around a traffic jam.

⁶ RDS-TMC is not available in all countries.

In Germany, COMAND uses the high-quality traffic data from T-systems Traffic for the TMCPro traffic jam warning system. In contrast to the public TMC service, TMCPro uses exclusive traffic data that is detected with an automated sensor network, in addition to the messages generated by the TMC service. The traffic data received from the traffic jam warning services named above could differ.

There may also be differences between the traffic reports received and the actual road and traffic conditions.

The respective traffic data being received appears at the bottom right of the display with the symbols "TMCPro" or "TMC". If there is no reception, no symbol is displayed.

Switching dynamic route guidance on/off

- ▶ **To switch on:** set **Dynamic route** as the route type⁶ (▷ page 52).
- ▶ **To switch off:** select the **Fast route** or **Short route** route type (▷ page 52).

i COMAND calculates a new route if you change the route type setting with route guidance active. If you change the route type setting when route guidance is inactive, COMAND uses the new setting for the next route guidance.

RDS-TMC displays on the map

COMAND can show certain traffic incidents on the map. These displays can be seen on map scales 50 m (0.05 miles) to 20 km (20 miles).

- ▶ **To set the map scale:** turn **[⊙]** the COMAND controller until the desired map scale is set.
Turning clockwise zooms out from the map; turning anti-clockwise zooms in.

Traffic jam on the route (example)

i COMAND uses corresponding icons to highlight the entire section of the affected route, regardless of how long the incident actually is. The icons are placed on the side of the carriageway affected by the incident.

The following illustration shows the RDS-TMC icons used.

RDS-TMC icons

- ① Traffic jam on the route
- ② Slow-moving traffic on the route
- ③ Road blocked
- ④ Road blocked
- ⑤ Traffic jam (red)
- ⑥ Slow-moving traffic (yellow)

Displaying RDS-TMC traffic reports

Displaying the report list

► **To switch on navigation mode:** press the **NAVI** function button.

► **To show the menu:** press **⏸** the COMAND controller.

► Select **TMC** in the navigation system menu bar by turning **⏸** the COMAND controller and pressing **⏸** to confirm. COMAND scans for RDS-TMC stations within reception range.

No RDS-TMC station found: a message to this effect appears.

► To close the message: confirm **OK** by pressing **⏸** the COMAND controller.

RDS-TMC station found: COMAND scans for traffic reports.

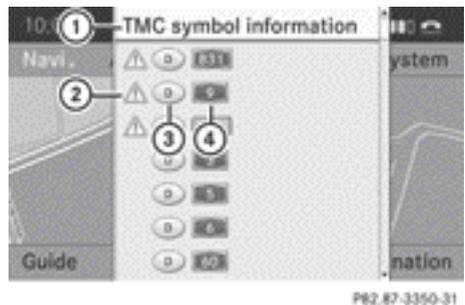

If there are no traffic reports, you will see a message to this effect.

► To close the message: confirm **OK** by pressing **⏸** the COMAND controller.

If there are traffic reports, you will see a list. The content of the list depends on whether route guidance is active.

List when route guidance is not active

The list shows all the roads, areas or regions for which reports are available.

- ① To call up TMC icon information
- ② Icon for warning message
- ③ Country designation
- ④ Road affected

i A report may also relate to an area or region rather than a road, e.g. impaired visibility due to fog.

► **To show traffic report:** select a road (area, region) by turning  the COMAND controller and press  to confirm. You will find an example of a traffic report on (> page 91).

► **To show TMC symbols:** select **TMC symbol information** by turning  the COMAND controller and press  to confirm.

Example display

- ① Affected section of motorway
- ② Icon for incident (traffic jam in the example shown)
- ③ Icon display for the section of route affected

► **To show the next/previous incident:** select **Next** or **Previous** (if available) and press  to confirm.

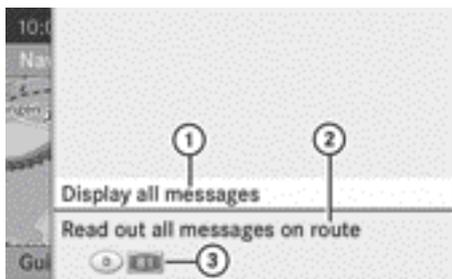

► **To show the detailed view:** select **Details** and press  to confirm.

► **To scroll the map:** select **Map** and press  to confirm.

You can move the map (> page 61) to enable further traffic reports to be displayed.

List when route guidance is active

By default, the list shows the roads, areas and regions that lie along the route and are affected by traffic reports.

- ① To display all reports (including those not affecting the route)
- ② To have traffic reports read out on route (> page 91)
- ③ Affected roads, areas or regions (only available when there are traffic reports for the route)

► **To show all traffic reports:** select **Display all messages** and press  to confirm.

You will see a list of all roads, areas or regions for which reports are available, including those that do not affect the route.

► **To show a traffic report:** select a road, an area or a region and press  to confirm. You will find an example of a traffic report below.

► **To exit the list:** slide  the COMAND controller once or several times.

Example message

P82.86-9858-31

- ① Depending on your selection: **Messages on the route** or **All messages**
- ② Icon for report type (e.g. warning message)
- ③ Country designation
- ④ Road, area or region for which there is a traffic report
- ⑤ Report 1 of 1 (example) for the road affected
- ⑥ Report text

The icons for possible report types are shown below.

P82.50-6788-31

- ① Traffic jam
- ② Slow-moving traffic
- ③ Warning message
- ④ Road blocked

► **To scroll within a report or to access the next report:** turn the COMAND controller.

► **To return to the list of messages:** press or slide the COMAND controller.

Reading out traffic reports on the route

Calling up traffic reports

The read-aloud function is only available when route guidance is active. You can set the language (▷ page 47) and the text reader speed (▷ page 44).

► **To switch on navigation mode:** press the function button.

► **To show the menu:** press the COMAND controller.

► Select **TMC** in the navigation system menu bar by turning the COMAND controller and pressing to confirm.

► Select **Read out all messages on route** and press to confirm. COMAND reads out the messages in sequence.

i The **Read out all messages on route** menu item has no function if there are no reports relating to the route.

► **To cancel the read-aloud function:** select **Cancel read-aloud function** and press to confirm.

The current traffic report is read out to the end and the function is then deactivated.

or

► Press the button briefly. The function is deactivated immediately.

i COMAND interrupts the read-aloud function automatically as it recalculates the route following a new RDS-TMC traffic announcement.

Automatic read-aloud function

You can have TMC traffic reports on your route read aloud automatically. Announcements are made as you approach traffic incidents.

- ▶ **To switch the automatic read-aloud function on/off:** select **Navi** in the main function bar by sliding \uparrow and turning $\left[\right]$ the COMAND controller and press \odot to confirm.
- ▶ Select **Read traffic messages automatically** and press \odot to confirm. Depending on the previous status, the function is switched on or off .

Destination memory

Home address (My address)

Entering the home address via address entry

- ▶ Initially proceed as described in the "Adopting an address book entry as a home address" and confirm **My address** by pressing \odot .
- ▶ **To enter the home address for the first time:** confirm **New entry** by pressing \odot .
- ▶ **To change the home address:** select **Change** in the menu showing the home address by turning $\left[\right]$ the COMAND controller and press \odot to confirm.
- ▶ Confirm **New entry** by pressing \odot .
- ▶ In both cases, enter the home address as a destination, e.g. as a town, street and house number (▷ page 53). Then save the home address (▷ page 57).

Adopting an address book entry as a home address

- ▶ **To switch on navigation mode:** press the **NAVI** function button.
- ▶ **To show the menu:** press \odot the COMAND controller.
- ▶ Select **Dest.** in the navigation system menu bar by turning $\left[\right]$ the COMAND controller and pressing \odot to confirm.

- ▶ Select **From memory** and press \odot to confirm.

You will see the destination memory list either with the character bar (option 1) or as a selection list (option 2).

Option 1: destination memory list with character bar

① Entry contains data that can be used for navigation

② To call up options

- ▶ Slide \uparrow the COMAND controller repeatedly until the destination memory list appears as a selection list.

Option 2: destination memory list as a selection list

The **My address** entry is listed as the first entry in the destination memory.

- ▶ Select **My address** by turning $\left[\right]$ the COMAND controller and press \odot to confirm.

i If you have not yet entered any characters, the **My address** entry is automatically highlighted in the selection list.

If no home address has been stored yet, you can now assign an address book entry. If a home address already exists, it is displayed and you can alter it.

- i** If you select **New entry**, you are also offered the option of entering the home address for the first time. You can then save the home address without having to start route guidance.
- ▶ **To enter the home address for the first time:** select **Assign to address book entry** and press  to confirm.
- ▶ Select **Home** or **Work** and press  to confirm.
- ▶ **To change the home address:** select **Change** and press  to confirm.
- ▶ Select **Assign to address book entry** and press  to confirm.
- i** If you select **New entry**, you are also offered the option of changing the home address by entering an address. You can then save the Home address without having to start route guidance.
- ▶ Select **Home** or **Work** and press  to confirm.
In both cases, you will see the address book either with the character bar or as a selection list.
- ▶ **To select an address book entry:** proceed as described in the "Searching for an address book entry" section (▷ page 141).
- ▶ **To confirm the selection:** press  the COMAND controller.
If no home address has been stored, COMAND saves the entry. You will see a message and then the address menu with the selected address. **Start** is highlighted automatically.
If a home address has already been stored, you will see a prompt asking you whether the **My address** entry should be overwritten.

- ▶ Select **Yes** or **No** and press  to confirm.
If you select **Yes**, COMAND overwrites the destination. You will see a message and then the address menu with the selected address. **Start** is highlighted automatically.

If you select **No**, the list will appear again.

Selecting the home address for route guidance

- ▶ Proceed as described in the "Selecting a destination from the destination memory" section (▷ page 59).

Storing a destination in the destination memory

Notes

This function also stores the destination in the address book.

When the address book is full, no destinations can be saved in the destination memory. You must first delete address book entries (▷ page 141).

After destination entry

- ▶ The destination has been entered and is shown in the address entry menu (▷ page 56).
- ▶ Select **Save** by sliding  and turning  the COMAND controller and press  to confirm.
You can now select storage options (▷ page 94).

During route guidance

- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Dest.** in the navigation system menu bar by turning  the COMAND controller and pressing  to confirm.

- ▶ Select **Save destination** and press  to confirm.
You can now select storage options (▷ page 94).

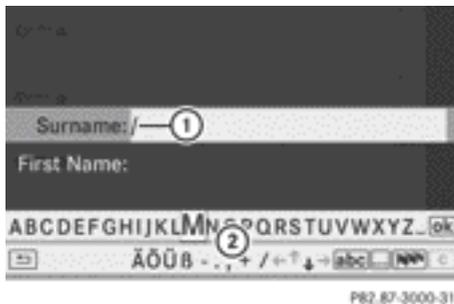

From the list of previous destinations

- ▶ **To show the menu:** press  the COMMAND controller.
- ▶ Select **Dest.** in the navigation system menu bar by turning  the COMMAND controller and pressing  to confirm.
- ▶ Select **From last destinations** and press  to confirm.
The list of last destinations appears.
- ▶ Select a destination by turning  the COMMAND controller and press  to confirm.
The destination address is shown.
- ▶ Select **Save** and press  to confirm.
You can now select storage options.

Selecting storing options

- ▶ **To save the destination without a name:** select **Save without name** and press  to confirm.
COMMAND stores the destination in the destination memory and uses the address as the destination name.
- ▶ **To save the destination as My address:** select **Save as "My Address"** and press  to confirm.
COMMAND stores the destination in the destination memory as **My address**. If the selected address book entry already contains address data that can be used for navigation ( icon), a prompt will appear asking whether you wish to overwrite the existing data.
- ▶ Select **Yes** or **No** and press  to confirm.
If you select **Yes**, the entry is overwritten.
If you select **No**, the process will be aborted.

- ▶ **To save the destination with a name:** select **Save with name** and press  to confirm.
- ▶ Select a category, e.g. **Home**, and press  to confirm.
The input menu appears with data fields and the character bar.

Saving a destination with a name (example)

- ① Selected data field with cursor
- ② Character bar
- ▶ Proceed as described under "Entering characters using the character bar" in the "Entering characters in navigation mode (entering a town)" section (▷ page 28).
- ▶ Then, select  and press  to confirm.
COMMAND stores the destination under the name entered.

Assigning a destination to an address book entry

An address with complete address data that is suitable for navigation can be assigned to a pre-existing address book entry. You can then later start route guidance to this address straight from the address book (▷ page 143).

- ▶ Select **Assign to address book entry** and press  to confirm.
- ▶ Select a category, e.g. **Home**, and press  to confirm.
You will see the address book either with the character bar or as a selection list.

- ▶ **To select an address book entry:** proceed as described in the "Searching for an address book entry" section (▷ page 141).
COMAND stores the data if the address book entry selected does not yet contain navigable address data.
If the selected address book entry already contains navigable address data, a prompt will appear asking whether you wish to overwrite the existing data.
- ▶ Select **Yes** or **No** and press  to confirm.
If you select **Yes**, COMAND stores the data.

Deleting a destination or the home address from the destination memory

- ▶ **To switch on navigation mode:** press the  function button.
- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Dest.** in the navigation system menu bar by turning  the COMAND controller and pressing  to confirm.
- ▶ Select **From memory** and press  to confirm.
You will see the destination memory list either with the character bar (option 1) or as a selection list (option 2).
- ▶ **Option 1: destination memory list with character bar:** proceed as described in the "Entering characters using the character bar" section (▷ page 28).
- ▶ **Option 2: destination memory list as selection list:** select a destination by turning  the COMAND controller and press  to confirm.
You see the address data of the selected entry.
- ▶ Select **Delete** and press  to confirm.
A prompt appears asking whether you wish to delete the destination.

- ▶ Select **Yes** or **No** and press  to confirm.
If you select **Yes**, COMAND deletes the destination. You will see a message to this effect.

If you select **No**, the process will be aborted.

- ▶ **i** If the navigable address data for the destination being deleted is also assigned to an address book entry, COMAND will also delete this data from there. If the corresponding address book entry does not contain any further data, such as telephone numbers, COMAND deletes the entire address book entry.

Previous destinations

Introduction

COMAND automatically stores the previous destinations for which the route calculation has been started. If the memory is full, COMAND deletes the oldest destination. You can also save a destination from the list of previous destinations in the destination memory. It will be stored there permanently.

Storing a destination permanently in the destination memory

- ▶ Proceed as described in the "From the list of previous destinations" section (▷ page 94).

Storing the vehicle position in the list of previous destinations

- ▶ **To switch on navigation mode:** press the  function button.
- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Position** in the navigation system menu bar by turning  the COMAND controller and press  to confirm.

- ▶ Select **Save vehicle position** and press to confirm.
COMAND stores the current vehicle position as a destination in the list of previous destinations.

Storing the crosshair position in the list of previous destinations

A crosshair appears on the map if you have moved the map manually. You can store the crosshair position as a destination in the list of previous destinations.

- ▶ **To show the menu:** press the COMAND controller.
- ▶ Select **Position** in the navigation system menu bar by turning the COMAND controller and press to confirm.
- ▶ Select **Save crosshair position** and press to confirm.

Deleting one of the previous destinations

- ▶ **To switch on navigation mode:** press the **NAVI** function button.
- ▶ **To show the menu:** press the COMAND controller.
- ▶ Select **Destination** in the navigation system menu bar by turning the COMAND controller and pressing to confirm.
- ▶ Select **From last destinations** and press to confirm.
The list of last destinations appears.
- ▶ Select the desired destination and press to confirm.
The destination address appears.
- ▶ Select **Delete** and press to confirm.
A prompt appears asking whether the entry should be deleted.

- ▶ Select **Yes** or **No** and press to confirm.
If you select **Yes**, the entry is deleted.
If you select **No**, the process will be aborted.

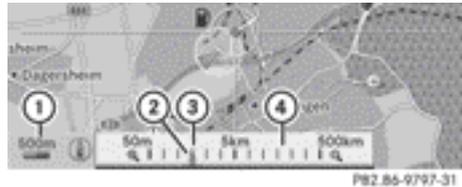

Map operation and settings

Note

Company logos displayed on the map are trademarks of the respective companies and used solely for the purpose of indicating the location of these companies. The use of such logos on the map does not indicate approval of, support of or advertising by these companies for the navigation system itself.

Setting the map scale

- ▶ **To hide the menu:** slide the COMAND controller and, when the **Full screen** menu item is shown, press .
- ▶ **To call up the scale bar:** as soon as you turn the COMAND controller, scale bar appears.
- ▶ Turn until the desired scale is set.

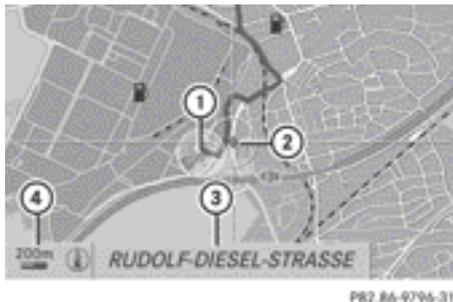

- ① Currently set map scale expressed as a number with unit, in this case 500 m
- ② New map scale
- ③ Currently set map scale as indicated by the needle on the scale bar
- ④ Map scale

Unit of measurement ① in the COMAND display depends on the selection made for the instrument cluster (see the vehicle Owner's Manual).

Moving the map

Showing the crosshair

- ▶ **To hide the menu:** slide $\uparrow \odot$ the COMAND controller and, when the **Full screen** menu item is shown, press \odot .
- ▶ **To move the map:** slide $\leftarrow \odot \rightarrow$, $\uparrow \odot \downarrow$ or $\swarrow \odot \searrow$ the COMAND controller.
A crosshair appears on the map. If you slide it again, the map moves in the corresponding direction under the crosshair.

Map with crosshair

- ① Current vehicle position
- ② Crosshair
- ③ Details of the crosshair position
- ④ Map scale selected

Display ③ may be the name of a street, for example, provided the digital map contains the necessary data. Alternatively, it may show the geo-coordinate position of the crosshair if the **Geo-coordinates** display is switched on (▷ page 100).

Hiding the crosshair and centring the map on the vehicle position or destination

- ▶ Press the \leftarrow back button twice.
The crosshair disappears and the map is set to the vehicle position.
- or
- ▶ Set the map to the vehicle position; see the explanation below.

Centring the map on the vehicle or destination position

Centring the map on the vehicle position

- ▶ **To show the menu:** press \odot the COMAND controller.
- ▶ Select **Position** in the navigation system menu bar by sliding $\odot \downarrow$ and turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm.
- ▶ Select **Vehicle position map** and press \odot to confirm or, if the crosshair is shown, press the \leftarrow back button.
This hides the crosshair.

Centring on the destination

This function requires that a route to a destination has been calculated. If the route includes waypoints and an intermediate stop, the map can also be set to these positions.

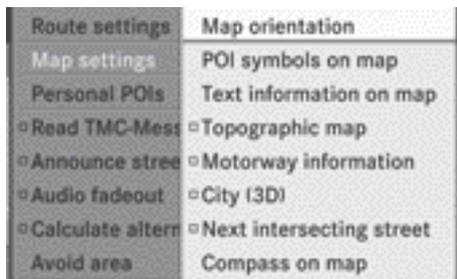

- ▶ **To show the menu:** press \odot the COMAND controller.
- ▶ Select **Position** in the navigation system menu bar by sliding $\odot \downarrow$ and turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm.
- ▶ Select **Destination position map** and press \odot to confirm.
The crosshair position is set to the relevant destination.

Map settings

Calling up the map settings menu

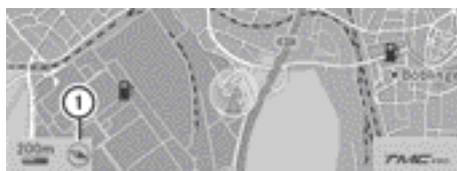

- ▶ **To show the menu:** press \odot the COMAND controller.
- ▶ Select **Navi** in the main function bar by sliding $\uparrow \odot$ and turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm.

- ▶ Select **Map settings** and press to confirm.
The map settings menu appears.

PR2.87-6300-31

Setting the map orientation

PR2.87-3029-31

Map orientation

- ① Current map orientation

The following display modes are possible:

- North orientation (the map view is displayed so that north is always up).
- Orientation in direction of travel (the map is displayed so that the direction of travel is always up; the orange point of the icon points north).
- Bird's-eye view (the map is displayed so that the direction of travel is always up; the map projection reproduces the curvature of the earth and the orange point of the icon points north).
- 3D map (the map is displayed so that the heading is always up; at a scale of 1 km or less, the map displays elevation; the orange point of the icon points north)

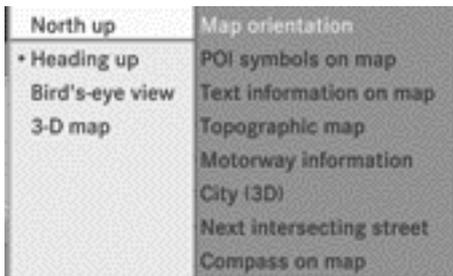

- ▶ **To show the menu:** press the COMAND controller.

- ▶ Select **Navi** in the main function bar by sliding and turning the COMAND controller and press to confirm.

- ▶ Select **Map settings** and press to confirm.
The map settings menu appears.

- ▶ Select **Map orientation** and press to confirm.

A • dot indicates the current setting.

PR2.87-6299-31

Map orientation menu

- ▶ Select **North up**, **Heading up**, **Bird's-eye view** or **3-D map** by turning the COMAND controller and press to confirm.

A • dot indicates the new setting.

Setting the special destination icons in the map

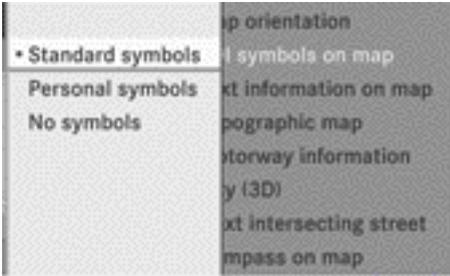

You can set the special destinations you wish to have displayed as symbols on the map. Special destinations are, for example, filling stations, hotels, cinemas and restaurants.

The following settings are possible:

- **Standard symbols**
Symbol display determined by the factory settings.
- **Personal symbols**
You can determine the symbols yourself.
- **No symbols**
The map does not show any symbols.

- ▶ **To show the menu:** press the COMAND controller.

- ▶ Select **Navi** in the main function bar by sliding and turning the COMAND controller and press to confirm.
- ▶ Select **Map settings** and press to confirm.
The map settings menu appears.
- ▶ Select **POI symbols on map** and press to confirm.

P82.87-6301-31

- ▶ Select **Standard symbols**, **Personal symbols** or **No symbols**.
If you select **Personal symbols**, the list of special destinations appears.

P82.87-6472-31

- ▶ **To switch the symbol display on/off:** select a special destination by turning the COMAND controller and press to confirm.
Depending on the previous state of the symbols, they will either be shown or hidden . You can switch on the symbol

displays for more than one special destination.

- ▶ **To switch all personal symbols on/off:** select **All** and confirm with .

Depending on the previous state of the personal symbols, they will either be shown or hidden .

If the function is switched on , the individual special destinations are greyed out and the previously selected settings remain unchanged.

If the function is switched off , you can reselect the individual special destinations. They show the most recently selected settings.

- i** The list shows all symbols that are contained on the digital map across all countries. However, not all special destinations are available in all countries. As a result, certain special destination symbols may not be displayed on the map, even if the symbol display is switched on.

- ▶ **To exit the menu:** press the back button.

Map information in the display

Showing text information

During route guidance, you can have map information displayed at the bottom edge of the display.

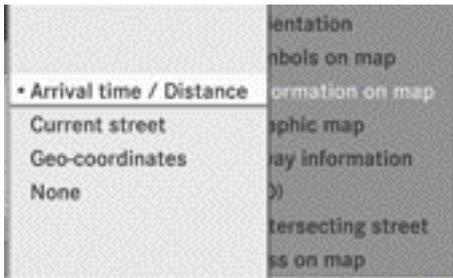

- ▶ **To show the menu:** press the COMAND controller.

- ▶ Select **Navi** in the main function bar by sliding and turning the COMAND controller and press to confirm.

- ▶ Select **Map settings** and press to confirm.
The map settings menu appears.

- ▶ Select **Text information on map** and press to confirm.

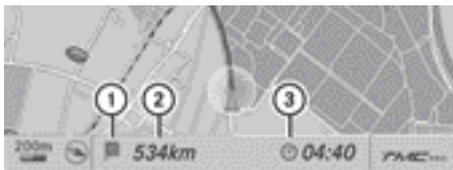

A • dot indicates the current setting.

PB2.87-6302-31

- ▶ Select **Arrival time / Distance**, **Current street**, **Geo-coordinates** or **None** and press to confirm.
- ▶ **To exit the menu:** slide the COMMAND controller.

Arrival time/distance to the destination

PB2.87-3032-31

Arrival time/distance display switched on

- ① Icon for destination
- ② Distance to the destination
- ③ Estimated time of arrival

You can only see this display during route guidance. While scrolling the map (> page 61), you will see additional data, e.g. road names, depending on the crosshair position, if the digital map supports this data.

- i** During route calculation, or if the vehicle is travelling on a non-digitised road, the linear distance to the destination is shown. In this case, the display will be greyed out.

Road display

PB2.87-3033-31

Road display active

- ① Road name or designation

Geo-coordinate display

PB2.87-3034-31

Geo-coordinate display active

- ① Current height above average sea level (rounded to the nearest 10 m)
- ② Current vehicle position: latitude coordinates
- ③ Current vehicle position: longitude coordinates
- ④ Number of GPS satellites currently being used

There must be sufficient GPS reception for all displays to be shown. If this is not the case, the display will be greyed out. Height display ① may vary from the actual value, because the navigation system uses the GPS signals for the calculation.

While scrolling the map (> page 61), you will see the geo-coordinates of the crosshair position. Height display ① and number of satellites used ④ are not displayed.

"None" menu option

Display switched off

① Current map orientation

i While scrolling the map, you can see additional data, depending on the position of the crosshair, such as a road name, if the digital map supports this data.

Switching the topographical map on/off

The topographical map uses different colours to depict elevation. The colour key generally reflects the topography's dominant vegetation or the ground's perceived colour when seen from the air, for example:

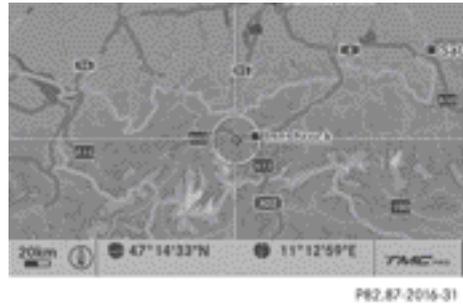

- green (grass) for lowland
- yellow, brown (woodland) for hills
- grey (stone) and white (snow) for mountains.

▶ **To show the menu:** press the COMAND controller.

▶ Select **Navi** in the main function bar by sliding and turning the COMAND controller and press to confirm.

▶ Select **Map settings** and press to confirm.
The map settings menu appears.

▶ Select **Topographic map** and press to confirm.
Depending on the previous state, switch the option on or off .

Topographical map (example)

Motorway information

When driving on motorways, you can have the nearest filling stations, rest areas, etc., as well as your current distance from them, shown on the right-hand side of the display.

▶ **To switch on navigation mode:** press the **NAVI** function button.

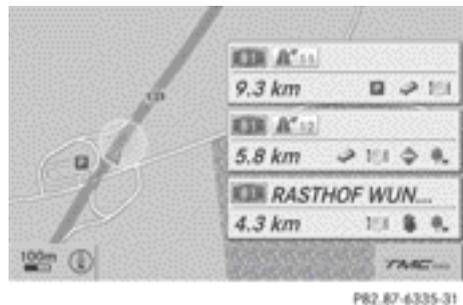

▶ **To show the menu:** press the COMAND controller.

▶ Select **Navi** in the main function bar by sliding and turning the COMAND controller and press to confirm.

▶ Select **Map settings** and press to confirm.
The map settings menu appears.

▶ Select **Motorway information** and press to confirm.

Depending on the previous state, switch the option on or off .

Motorway information (example)

The entries show the number of the motorway and motorway exits as well as their distance from the vehicle's current position.

Switching the city model on/off

When the city model is switched on, the map shows buildings as 3D models.

i The city model is only shown for "Bird's-eye view" or "3D map".

It is available for map scales 50 m and 100 m.

The data required for displaying buildings is not available for all towns.

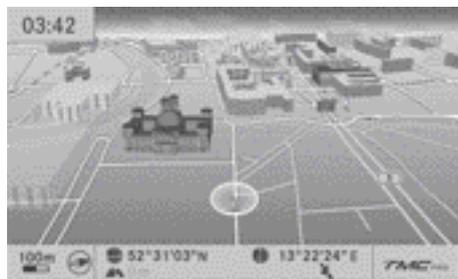

► **To show the menu:** press  the COMAND controller.

► Select **Navi** in the main function bar by sliding  and turning  the COMAND controller and press  to confirm.

► Select **Map settings** and press  to confirm.

The map settings menu appears.

► Select **City (3D)** and press  to confirm. Depending on the previous state, switch the option on or off .

P82.87-6493-31

City model (example)

Showing/hiding intersecting streets

If route guidance is inactive, intersecting streets can be shown on the upper edge of the display.

► **To show the menu:** press  the COMAND controller.

► Select **Navi** in the main function bar by sliding  and turning  the COMAND controller and press  to confirm.

► Select **Map settings** and press  to confirm.

The map settings menu appears.

► Select **Next intersecting street** and press  to confirm.

Depending on the previous state, switch the option on or off .

P82.87-6339-31

Intersecting street (example: city route)

P82.87-6340-31

Intersecting street (example: motorway route)

Coordinates on the map

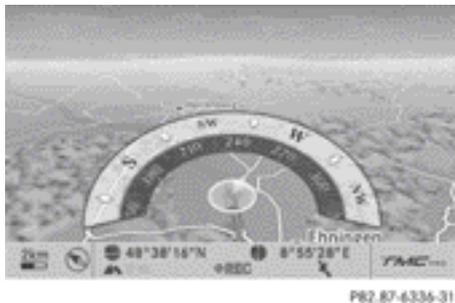

► **To show the menu:** press  the COMAND controller.

► Select **Navi** in the main function bar by sliding  and turning  the COMAND controller and press  to confirm.

► Select **Map settings** and press  to confirm.

The map settings menu appears.

- ▶ Select **Compass on map** and press  to confirm.
A menu appears.
- ▶ Select **Never**, **When street unknown** or **When route guidance inactive** and press  to confirm.
The selected setting is accepted.

Topographical 3D map with compass (example)

Speed Limit Assist

Information and requirements

If COMAND supports Speed Limit Assist and the function is switched on in COMAND, it can show the permissible speed limit in the COMAND display.

- i** The display appears if Speed Limit Assist detects traffic signs stating the maximum permissible speed. Speed Limit Assist detects these traffic signs using a camera (see the vehicle Owner's Manual).

Restricted speed limits may also be displayed.

Restrictions include:

- **when wet** – applies only if the road is wet
- **when icy** – applies only if the road is slippery (due to cold)
- **in fog** – applies only in foggy weather
- **temporary** – applies only at certain times
- **Limited** – COMAND cannot identify the type of restriction

If corresponding data is available, you see the information at the bottom left of the

COMAND display directly above the map scale indicator, e.g. "120" or "80 when wet". The displays also appear in the multifunction display in the Assistance menu (see vehicle Owner's Manual).

- i** The speed limits displayed may be incorrect if:
 - the data is outdated.
 - the camera has failed to identify a traffic sign correctly.

Switching Speed Limit Assist on/off

- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Navi** in the main function bar by sliding  and turning  the COMAND controller and press  to confirm.
- ▶ Select **Speed Limit Assist** and press  to confirm.
Depending on the previous state, switch the option on or off .

Additional settings

Avoiding an area

General information

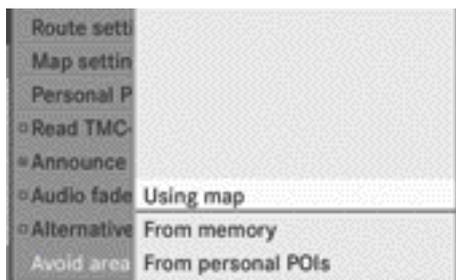

COMAND makes it possible to avoid areas you do not wish to drive through.

If you activate or deactivate a route block while route guidance is active, COMAND will calculate a new route. If you activate or deactivate a route block while route guidance is inactive, COMAND will use the new setting for the next route guidance.

- i** Motorways within blocked areas are always taken into consideration in the route calculation.
- ▶ **To switch on navigation mode:** press the **NAVI** function button.
- ▶ **To show the menu:** press  the COMAND controller.

- ▶ Select **Navi** in the main function bar by sliding $\uparrow \odot$ and turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.
- ▶ Select **Avoid area** and press \odot to confirm.
If you have not yet set an area to be avoided, a menu appears (option 1).
If you have already set one or more areas to be avoided, a list appears (option 2).

Option 1: the menu appears

P82.87-6471-31

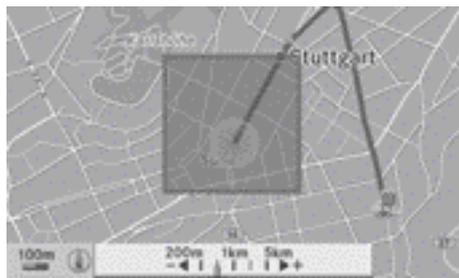

- ▶ Select **Using map**, **From memory** or **From personal POIs** and press \odot to confirm.
If you select **Using map**, the map with the crosshair appears.
If you select **From memory** or **From personal POIs**, either the destination memory (▷ page 92) or a menu (▷ page 74) appears.
- ▶ Select a destination and press \odot to confirm.
- ▶ When the destination address is displayed, select **Map** and press \odot to confirm.
The map appears.

P82.86-9802-31

The crosshair marks the centre of the area that is to be avoided.

- ▶ **To move the map:** slide $\leftarrow \odot \rightarrow$, $\uparrow \odot \downarrow$ or $\left\{ \odot \right\}$ the COMAND controller.
- ▶ **To set the map scale:** as soon as you turn $\left\{ \odot \right\}$ the COMAND controller, the scale bar appears. Turning clockwise zooms out from the map; turning anti-clockwise zooms in.
- ▶ Turn $\left\{ \odot \right\}$ until the desired scale is set.
- ▶ **To apply a block:** press \odot the COMAND controller.
A red square appears on the map.

P82.86-9803-31

- ▶ **To adjust the size of the square:** turn $\left\{ \odot \right\}$ the COMAND controller.
The square is enlarged or reduced.
- ▶ **To confirm the settings:** press \odot .
The list appears. The previously selected area to be avoided has been added and activated.
- ▶ Follow the instructions listed under "Option 2: the list appears".

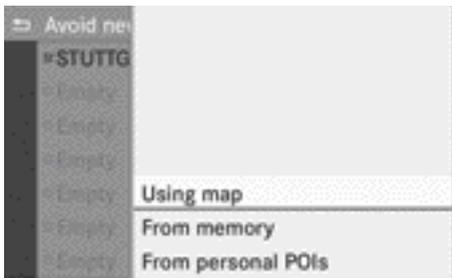

Option 2: the list appears

P82.87-4503-31

"Avoid area" list (example)

- ❶ Available list places are named **Area** <X> and are shown in grey.
- ▶ Select **Avoid new area** by turning **⏻** the COMAND controller and press **⏻** to confirm.
A menu appears.

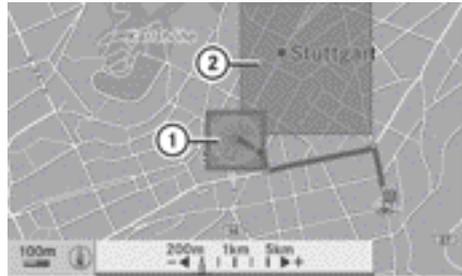

P82.87-4338-31

- ▶ Select **Using map**, **From memory** or **From personal POIs** and press **⏻** to confirm. If you select **Using map**, the map with the crosshair appears.
If you select **From memory** or **From personal POIs**, either the destination memory (▶ page 92) or a menu (▶ page 74) appear.
- ▶ Select destination and press **⏻** to confirm.
- ▶ When the destination address is displayed, select **Map** and press **⏻** to confirm.
The map appears.
- ▶ Proceed according to the instructions under "Option 1: the menu appears" if you

wish to set a new area to be avoided in the map.

The following illustration shows an example with two areas that are to be avoided.

P82.86-9806-31

- ❶ New area to be avoided, the size of which can still be adjusted
- ❷ Area currently being avoided

Switching an avoided area on/off

- ▶ Select an entry in the list by turning **⏻** the COMAND controller and press **⏻** to confirm.
The avoided area is switched on or off depending on the previous status.

Displaying and changing an avoided area

- ▶ Select an entry in the list by turning **⏻** the COMAND controller.
- ▶ Select **Options** by sliding **⏻** the COMAND controller and pressing **⏻** to confirm.
- ▶ Select **Display/Change** and press **⏻** to confirm.
The area to be avoided is indicated in the map.
- ▶ **To change the location of the area:** slide the COMAND controller **←→**, **↑↓** or **↶↷**.
The area is moved on the map.

- ▶ **To adjust the size of the area:** turn  the COMAND controller. The area is enlarged or reduced.
- ▶ **To confirm the change:** press  the COMAND controller. The list appears and the change is entered.

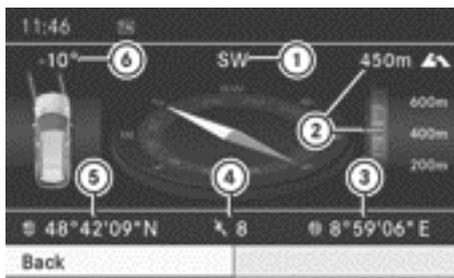

Deleting a set area

- ▶ Select an entry in the list by turning  the COMAND controller.
- ▶ Select **Options** by sliding  the COMAND controller and pressing  to confirm.
- ▶ Select **Delete** and press  to confirm. A query appears asking whether the entry should be deleted.
- ▶ Select **Yes** or **No**. If you select **Yes**, the entry is deleted. If you select **No**, the process will be aborted.

Compass function

In the compass view, you can see the current direction of travel, the current height above sea level and the coordinates of the vehicle position, for example.

- ▶ **To switch on navigation mode:** press the  function button.
- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Position** in the navigation system menu bar by sliding  and turning  the COMAND controller and press  to confirm.
- ▶ Select **Compass** and press  to confirm.

Compass (example)

- ① Current direction of travel
- ② Current height above average sea level, rounded
- ③ Current vehicle position: longitude coordinates
- ④ Number of GPS satellites currently being used
- ⑤ Current vehicle position: latitude coordinates
- ⑥ Currently set steering angle of the front wheels

i To display current height ②, the system must be able to receive at least four satellites. Steering angle ⑥ can be a maximum of 35° in both directions.

- ▶ **To exit the display:** confirm **Back** by pressing  or press the  button.

Showing the map data version

- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Navi** in the main function bar by sliding  and turning  the COMAND controller and press  to confirm.
- ▶ Select **Map version** and press  to confirm.

The map data version number is shown. Information about new versions of the digital map can be obtained from a Mercedes-Benz Service Centre.

Updating the digital map

Introduction

The digital maps generated by the map software become outdated in the same way as conventional road maps. Optimal route guidance can only be provided by the navigation system in conjunction with the most up-to-date map software.

Information about new versions of the digital map can be obtained from a Mercedes-Benz Service Centre. You can have the digital map updated there with a DVD, or you can update it yourself.

i The update process can take a long time (over an hour), depending on the size of the digital map. During this time, you will only be able to switch on radio mode and to accept incoming calls. The update will be completed more quickly if the vehicle is stationary.

If you carry out the update with the engine switched off and the starter battery has insufficient power, COMAND may automatically switch off during the process in order to protect the battery. If this occurs, restart the update with the engine running.

⚠ Risk of poisoning

Never run the engine in an enclosed space. The exhaust fumes contain poisonous carbon monoxide. Inhaling exhaust fumes is hazardous to your health and can lead to loss of consciousness and death.

Updating process

- ▶ Depending on your vehicle's equipment, insert the DVD into the DVD single drive (> page 193) or the DVD changer (> page 193). COMAND checks whether the digital map on the DVD is compatible with the navigation system and system software. A prompt then appears asking if you want to install the database. Versions of the database currently installed and the database that is to be installed are displayed.
- ▶ Select **Yes** or **No** and press  to confirm. After selecting **Yes**, an activation code must be entered when installing a database for the first time. You will receive the activation code when you buy the navigation DVD.

If you select **No**, the process will be aborted.

- ▶ Enter the activation code. After entering the activation code correctly, COMAND starts updating the digital map. Once the update is finished, you will see a message.
- ▶ **To confirm the message:** press  the COMAND controller.
- ▶ Take the DVD out of the slot.

While the update is running, you will see a message to this effect and a progress bar. The navigation system is not operational until the update is complete.

i You cannot eject the DVD during the update. If you switch off COMAND during the update, the update is interrupted. It then continues from where it was interrupted when the system is restarted.

COMAND may prompt you to change the DVD during the update.

- ▶ Press the  (for DVD changer) or  (for DVD single drive) load/eject button.
- ▶ Take the DVD out of the slot.

- ▶ Insert the requested DVD.
Once the update has been successfully completed, you will see a message to this effect.
- ▶ **To confirm the message:** press  the COMAND controller.
- ▶ Take the DVD out of the slot.
The update is complete.
If the update is not successfully completed, you will see a message that the map update is not possible.
- ▶ **To confirm the message:** press  the COMAND controller.
- ▶ Take the DVD out of the slot.

Problems with the navigation system

Problem	Possible causes/consequences and ► Solutions
COMAND is unable to continue route guidance after the journey has been interrupted.	<p>Route guidance is cancelled if you interrupt the journey for more than two hours.</p> <p>"Interrupting the journey" refers to stopping the vehicle.</p> <p>"Continuing route guidance" refers to switching COMAND back on and driving on.</p> <p>► Continue route guidance (► page 81).</p>
COMAND is unable to determine the vehicle's position.	<p>COMAND has to redetermine the position of the vehicle if the vehicle has been transported (e.g. by ferry, by motorail or after towing).</p> <p>► Start the vehicle and pull away.</p> <p>COMAND determines the vehicle's position. Depending on the driving situation, this may take some time.</p> <p>Route guidance may be restricted during the determination of the vehicle's position.</p> <p>When positioning is complete, route guidance is resumed with navigation announcements and route guidance displays.</p>
The Navigation unavailable message appears.	<p>COMAND has an integrated hard drive on which the digital map is stored.</p> <p>To protect the integrated hard drive against damage, COMAND deactivates it at very high and low temperatures. The navigation system will then be temporarily unavailable.</p> <p>► Let the vehicle and COMAND cool down.</p> <p>► To hide the message: switch COMAND off and then on again.</p> <p>If an area of the hard disk has a fault, COMAND can no longer access the map data in this area, for example when calculating a route.</p> <p>► To hide the message: switch COMAND off and then on again. The navigation system will be operational again until it has to access the faulty area of the hard drive once more. The message will then reappear.</p> <p>► Consult a Mercedes-Benz Service Centre.</p>

Problem	Possible causes/consequences and ► Solutions
You see a message informing you that the DVD containing the digital map is incompatible with the system software.	<p>The DVD containing the digital map cannot be used for the update.</p> <p>► To confirm the message: press  the COMAND controller.</p> <p>► Eject the DVD.</p> <p>► Have the system database checked at a Mercedes-Benz Service Centre.</p>

Problem	Possible causes/consequences and ► Solutions
The map software update has failed.	<p>The DVD is dirty.</p> <p>► Clean the DVD.</p> <p>► Restart the update.</p>
	<p>The DVD is scratched.</p> <p>► Consult a Mercedes-Benz Service Centre.</p>
	<p>There is overheating due to excessive temperatures in the vehicle interior.</p> <p>► Wait until the vehicle interior has cooled down.</p> <p>► Restart the update.</p>
	<p>COMAND's integral hard drive is faulty.</p> <p>► Consult a Mercedes-Benz Service Centre.</p>

Problem	Possible causes/consequences and ► Solutions
COMAND asks for an activation code during the map update.	<p>The digital map is secured with an activation code.</p> <p>► Consult a Mercedes-Benz Service Centre.</p>

Vehicle equipment

i These Operating Instructions describe all standard and optional equipment available for your vehicle at the time it was purchased. Please note that your vehicle may not be equipped with all features described.

General notes

Introduction

COMAND offers three types of telephony:

- Bluetooth® interface telephony
- Convenience telephony
- SAP telephony

i As an enhancement to convenience telephony, a permanently installed telephone can be fitted (Bluetooth® telephone module with SAP profile). In addition to a SIM card slot, mobile phones, which support the SIM Access Profile (SAP), can also be connected to it.

SAP telephony is described in separate operating instructions.

When connecting Bluetooth®-capable mobile phones with PBAP (Phone Book Access Profile) or a convenience telephone, the contacts are automatically downloaded to COMAND.

Basic telephony, in conjunction with a Bluetooth®-capable mobile phone, enables you to phone via the Bluetooth interface. With a suitable mobile phone, you can use the hands-free system and receive vCards via the Bluetooth® interface.

If your vehicle is equipped with convenience telephony, you can obtain mobile phone brackets for specific mobile phones at your Mercedes-Benz Service Centre and have them installed in the armrest.

In the bracket the mobile phone battery is charged and a connection is made to the vehicle's exterior aerial.

Using a suitable mobile phone, the hands-free system is available with convenience telephony.

You can use the text message function (receiving and reading) if the following conditions are met:

- the mobile phone bracket and the mobile phone support the function (convenience telephony)
- the mobile phone supports the MAP Bluetooth® profile (**M**essage **A**ccess **P**rofile), (basic telephony).

i If your vehicle is equipped with convenience telephony, you can still connect a Bluetooth®-capable mobile phone to COMAND via the Bluetooth® interface.

You can obtain more detailed information about suitable mobile phones and about connecting Bluetooth®-capable mobile phones to COMAND from your Mercedes-Benz Service Centre or on the Internet (<http://www.mercedes-benz.com/connect>).

Safety notes

Risk of accident

You must observe the legal requirements for the country in which you are currently driving when operating mobile communications equipment in the vehicle.

If it is permitted to operate communications equipment while the vehicle is in motion, you may only operate such equipment when road and traffic conditions permit. You may otherwise be distracted from the traffic conditions, cause an accident and injure yourself and others.

Two-way radios or fax machines without low-reflection exterior aerials may interfere with the vehicle electronics and thereby compromise the operational safety of the vehicle and your safety. Therefore, only use these if they are properly connected to a separate, low-reflection exterior aerial.

Risk of injury

Excessive electromagnetic radiation may constitute a health hazard to yourself and others.

There is scientific discussion surrounding the possible health risks posed by electromagnetic fields. You can reduce this risk by using an exterior aerial.

Therefore, only use mobile communication equipment if it is connected to the exterior aerial of the vehicle.

Call disconnection while the vehicle is in motion

A call may be disconnected if:

- there is insufficient GSM network coverage in certain areas.
- you move from one GSM or UMTS transmitter/receiver area (GSM/UMTS cell) into another and no channels are free.
- you use a SIM card which is not compatible with the network available.
- you are using a mobile phone with "Twin-card" and the mobile phone with the second SIM card is already logged into the network.

Operating options

You can operate the telephone by:

- using the COMAND controller:
turn 
slide  or 
press .
- pressing the  or  button and using the telephone keypad on COMAND
- the  or  button on the multifunction steering wheel
- using LINGUATRONIC (see the separate LINGUATRONIC operating instructions)

Unless stated otherwise, the descriptions and illustrations in this section refer to COMAND.

Function restrictions

You will not be able to use the telephone, will no longer be able to use the telephone, or you may have to wait before using it, in the following situations:

- when the mobile phone is switched off
- when the "Bluetooth®" function is switched off in COMAND
- when the Bluetooth® function is switched off on the mobile phone if you are using Bluetooth® interface telephony
- if the mobile phone is not logged into a mobile phone network

 The telephone automatically tries to log on to a network. If no network is available, you may not be able to make a "999" or "112" emergency call. If you attempt to make an outgoing call, the **No Service** message will appear for a short while.

If you switch COMAND off during a call in hands-free mode, the call will be terminated. You can prevent this as follows:

Bluetooth® interface telephony

- ▶ Switch the mobile phone to "Private mode" before switching off COMAND (see the mobile phone operating instructions).

Convenience telephony

- ▶ Before switching off COMAND, remove the mobile phone from the bracket and, if necessary, switch the mobile phone to "Private mode" (see the mobile phone operating instructions).

"999" or "112" emergency call

The following conditions must be fulfilled in order to make a **112** emergency call:

- the mobile phone must be switched on.
- a network must be available.
- a valid and operational SIM card must be inserted in the mobile phone.
- the PIN must have been entered.

If you cannot make an emergency call, you must arrange rescue measures yourself.

- i** The **999** or **112** emergency call number is a public service. Any misuse is punishable by law.

Telephony via the Bluetooth® interface

Conditions

On the mobile phone

If your vehicle is equipped with convenience telephony and you wish to make calls via the Bluetooth® interface, your mobile phone should not be inserted in the mobile phone bracket or connected to the mobile phone bracket. Doing so could result in a malfunction, depending on the type of mobile phone.

For telephony via COMAND's Bluetooth® interface, a Bluetooth®-capable mobile phone is required.

Not all mobile phones available on the market are equally suitable. You can obtain more detailed information about suitable mobile phones and about connecting Bluetooth®-capable mobile phones to COMAND from your Mercedes-Benz Service Centre or on the Internet (<http://www.mercedes-benz.com/connect>).

The battery of the mobile phone should always be kept sufficiently charged in order to prevent malfunctions.

In preparation for telephoning via the Bluetooth® interface, you should check the following items on your mobile phone (see the mobile phone operating instructions):

- ▶ Hands-Free Profile
The mobile phone must support Hands-Free Profile 1.0 or above.
- i** Some displays (e.g. the signal strength) depend on the supported version of the Hands-Free Profile.

- ▶ Bluetooth® visibility
On certain mobile phones, the device itself must be made "visible" for other devices, as well as activating the Bluetooth® function (see the mobile phone operating instructions).
- ▶ Bluetooth® device name
Every Bluetooth® device has its own Bluetooth® device name. This device name is freely definable, but can be identical for all devices from the same manufacturer. It is therefore recommended that you change this name so that you can easily recognise your mobile phone (see the mobile phone operating instructions).
- ▶ Switch on the mobile phone and enter the PIN when prompted to do so (see the mobile phone operating instructions).
- ▶ Activate Bluetooth® functions and, where necessary, Bluetooth® visibility on the mobile phone (see the mobile phone operating instructions).

On COMAND

- ▶ Activate the Bluetooth® function in COMAND (▷ page 46).

Connecting a mobile phone

General information

Before using your mobile phone with COMAND for the first time, you will need to connect it.

When you authorise a new mobile phone, it is connected automatically.

Connecting comprises:

- searching for a Bluetooth®-capable mobile phone
- subsequently authorising it

You can connect up to 15 mobile phones.

During connection, the phone book, call lists and text messages are automatically downloaded to COMAND.

Searching for a mobile phone

- ▶ Press the **TEL** function button on COMAND.
- ▶ Select **Telephone** in the telephone basic menu by sliding **○↓** and turning **⌂(○)⌂** the COMAND controller and press **⌂** to confirm.
- ▶ Select **Bluetooth telephones** and press **⌂** to confirm.
- ▶ Select **Update** and press **⌂** to confirm. COMAND searches for Bluetooth® telephones within range and adds them to the Bluetooth® telephone list.

The duration of the search depends on the number of Bluetooth® telephones within range and their characteristics.

- i** Mobile phones which are connected to the optionally available permanently installed telephone (Bluetooth® telephone module with SAP profile), are displayed in their own telephone list. These can be called up by selecting the **SAP telephones** menu item, see the separate operating instructions.

P82.87-4385-31

Bluetooth® phone list (example)

- ① Currently connected **●** and authorised mobile phone **✓**
- ② Mobile phone not within range but previously authorised (**⌂** appears in grey)

- ③ Mobile phone in range and authorised (**⌂** appears in black)
- ④ Newly detected mobile phone within range but not yet authorised (no icon yet **✓**)

The Bluetooth® telephones list shows all mobile phones within range and all previously authorised mobile phones, whether or not they are in range.

- i** If the Bluetooth® telephones list is already full, you will be requested to de-authorise a mobile phone (▷ page 118). If COMAND does not find your mobile phone, external authorisation (▷ page 116) may be necessary.

- i** If you call up the telephone list again, the unauthorised devices are removed from the list. In this case, start a new search to update the Bluetooth® telephone list.

Authorising (registering) a mobile phone

Option 1: using the passcode (access code)

- ▶ In the Bluetooth® telephones list, select the not yet authorised mobile phone by turning **⌂(○)⌂** the COMAND controller.
- ▶ Select the list symbol to the right of the entry by sliding **○→** the COMAND controller and press **⌂** to confirm.
- ▶ Select **Authorise** and press **⌂** to confirm. The input menu for the passkey appears.

P82.87-4386-31

The passcode is any one to sixteen-digit number combination which you can determine yourself. You must enter the same number combination in COMAND and in the Bluetooth®-capable mobile phone (see the operating instructions of the mobile phone).

- i** Some mobile phones require the input of a four-digit passcode or longer number sequences.

If you want to re-authorise a mobile phone following de-authorisation, you can select a different passcode.

- ▶ **To enter a passcode in COMAND:** press the number keys in turn.
 is highlighted after the first number has been entered.

or

- ▶ Select the digits in the digit bar one by one by turning **⏪** the COMAND controller and press **⏩** to confirm. Then, select .

- ▶ **To confirm an entry in COMAND:** press **⏩** the COMAND controller.

- ▶ Now enter the same passcode in the mobile phone.

To make entries on the mobile phone: if the Bluetooth® connection is successful, you will be requested to enter the passcode (access code, passkey) (see mobile phone operating instructions).

- ▶ Enter the same passcode in the mobile phone as already entered in COMAND.

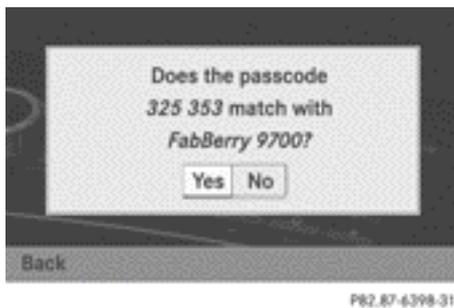

- i** After entering the passcode, you may also need to enter a confirmation in your mobile phone to connect calls. Please check your mobile phone display.

If the COMAND display shows the message: **Authorisation procedure unsuccessful**, you may have exceeded the prescribed time period. Repeat the procedure.

The mobile phone is connected to COMAND (authorised). You can now phone using the COMAND hands-free system.

Option 2: via Secure Simple Pairing

The mobile phone (or the Bluetooth® audio device) must support the Bluetooth® version 2.1 for connection via Secure Simple Pairing. COMAND creates a six-digit code, which is displayed on both devices that are to be connected.

- ▶ If the code is the same on both devices, confirm **Yes** by pressing **⏩**.
 If you select **Yes**, authorisation continues and the mobile phone is connected.
 If you select **No**, the process will be aborted.
- ▶ Confirm the message on the mobile phone.

External authorisation

If COMAND does not detect your mobile phone, this may be due to particular security settings on your mobile phone. In this case, you can test if your mobile phone can find COMAND. The Bluetooth® device name of COMAND is **MB Bluetooth**.

Please note the following: some mobile phones require that you establish the connection to COMAND again once you have entered the passcode (see the mobile phone operating instructions). The mobile phone cannot otherwise be authorised.

- ▶ Press the **TEL** function button on COMAND.
- ▶ Select **Telephone** in the telephone basic menu by sliding **⊙↓** and turning **⌂⊙** the COMAND controller and press **⊙** to confirm.
- ▶ Select **Bluetooth telephones** and press **⊙** to confirm.
- ▶ Select **Update**.
- ▶ Select the list symbol to the right of the entry by sliding **⊙→** the COMAND controller and press **⊙** to confirm.
- ▶ Select **External authorisation** and press **⊙** to confirm.
- ▶ Start the Bluetooth® search on the mobile phone (see the mobile phone operating instructions).
- ▶ Select COMAND (**MB Bluetooth**) on the mobile phone.
- ▶ **Option 1:** when requested to do so, enter the passkey first on the mobile phone and then in COMAND.
- ▶ **Option 2:** confirm the displayed codes on the mobile phone and in COMAND (Secure Simple Pairing).

Automatic reconnection

COMAND always searches for the last connected mobile phone.

If no connection can be made to the most recently connected mobile phone, the system searches for the mobile phone which was connected before that one.

Connecting another mobile phone

If you have authorised more than one mobile phone, you can switch between the individual phones.

- i** You can only switch to another authorised phone if you are not currently making a call.

- ▶ Select the mobile phone in the Bluetooth® telephones list by turning **⌂⊙** the COMAND controller and press **⊙** to confirm.
The selected mobile phone is searched for and connected if it is within Bluetooth® range and if Bluetooth® is activated.
Only one mobile phone can be connected at any one time. The currently connected mobile phone is indicated by the • dot in the Bluetooth® telephones list (▷ page 115).

Displaying details

- ▶ Press the **TEL** function button on COMAND.
- ▶ Select **Telephone** in the telephone basic menu by sliding **⊙↓** and turning **⌂⊙** the COMAND controller and press **⊙** to confirm.
- ▶ Select **Bluetooth telephones** and press **⊙** to confirm.
- ▶ Select the desired mobile phone in the Bluetooth® telephones list.
- ▶ Select the list symbol to the right of the entry by sliding **⊙→** the COMAND controller and press **⊙** to confirm.
- ▶ Select **Details** and press **⊙** to confirm.
The following information concerning the selected mobile phone is shown:
 - Bluetooth® name
 - Bluetooth® address
 - availability status (is shown after a new search)
 - authorisation status
- ▶ **To close the detailed view:** turn **⌂⊙** or slide **←⊙→** the COMAND controller.

De-registering (de-authorising) a mobile phone

i Mercedes-Benz recommends de-authorisation in COMAND and on the mobile phone. Subsequent authorisation may otherwise fail.

- ▶ Press the **TEL** function button on COMAND.
- ▶ Select **Telephone** in the telephone basic menu by sliding **⊙↓** and turning **⊙⊙** the COMAND controller and press **⊙** to confirm.
- ▶ Select **Bluetooth telephones** and press **⊙** to confirm.
- ▶ Select the desired mobile phone in the Bluetooth® telephones list.
- ▶ Select the list symbol to the right of the entry by sliding **⊙→** the COMAND controller and press **⊙** to confirm.
- ▶ Select **De-authorise** and press **⊙** to confirm.
A prompt appears asking whether you really wish to revoke authorisation for this device.
- ▶ Select **Yes** or **No**.
If you select **Yes**, the device will be deleted from the Bluetooth® telephones list.
If you select **No**, the process will be aborted.

i Before re-authorising the mobile phone, you should also delete the device name **MB Bluetooth** from your mobile phone's Bluetooth® list.

Telephone basic menu (Bluetooth® interface)

- ▶ Press the **TEL** function button.

If the mobile phone is ready for use, the following display appears:

P82.87-6387-31

Telephone basic menu (Bluetooth® interface)

- ① Network provider's name (depends on the connected phone)
- ② Signal strength of mobile phone network
■■■■■
- ③ Receiver icon  or 
- ④ To display call lists
- ⑤ Character bar
- ⑥ Bluetooth® name of the currently connected mobile phone
- ⑦ To display the COMAND phone book

i Displays ① and ② are shown, depending on the mobile phone connected.

Bars ② display the current signal strength of the mobile phone network. If all the bars are filled, you have optimum reception. If all the bars are empty, there is very poor reception or none at all.

Receiver icon ③ shows whether a call is active/being connected  or not .

SMS display in telephone basic menu

The **SMS** menu item is available if the Bluetooth® telephone supports the MAP Bluetooth® profile (**M**essage **A**ccess **P**rofile) and the text message has been downloaded from the Bluetooth® telephone. The menu item is otherwise greyed out and is not available.

The  mail icon is displayed when you have an unread text message. The symbol disappears once you have read the text message. The  mail symbol is displayed when the

text message memory is full. The symbol disappears once you delete at least one text message.

You will find further information in the "Text message" section (▷ page 137).

Convenience telephony

Connecting a mobile phone

Establishing a connection

For convenience telephony with COMAND, you require a mobile phone bracket and a suitable mobile phone.

- ❶ Some mobile phones are connected via Bluetooth® to the mobile phone bracket. In such cases, you can use convenience telephony (without the charging and antenna functions) even when the mobile phone is not in the bracket.

You can obtain more detailed information about suitable mobile phones and about connecting convenience telephones to COMAND from your Mercedes-Benz Service Centre or on the Internet at <http://www.mercedes-benz.com/connect>.

- ▶ Insert the bracket into the fixture in the armrest (see the vehicle Owner's Manual).
- ▶ Insert the mobile phone into the bracket (see vehicle Owner's Manual).

Example

- ❶ To engage the mobile phone
- ❷ Connector contact
- ❸ Mobile phone bracket

- ▶ Switch on the mobile phone (see the mobile phone operating instructions).
- ❶ Some mobile phones can switch on automatically when inserted into the bracket.
- ▶ If Bluetooth® interface telephony is active: press the **[TEL]** function button.
- ▶ Select **Telephone** in the telephone basic menu by turning **[⏪]** the COMAND controller and press **[⏩]** to confirm.
- ▶ Select **Bluetooth telephones** and press **[⏩]** to confirm.
- ▶ Select **Convenience phone** and press **[⏩]** to confirm.
You may be requested to enter the PIN via COMAND.

PIN entry

- ❶ If you have entered an incorrect PIN twice via COMAND, you will not see a warning to inform you that you only have one more attempt. If you enter the PIN incorrectly three times, you must unlock the SIM card via the mobile phone (see mobile phone operating instructions).

You can enter the PIN in COMAND using the character bar or the number keys.

If your vehicle is equipped with LINGUATRONIC (see the separate operating instruc-

tions), you can also enter the PIN using voice commands.

- ① PIN entry line
- ② To confirm the pin (available if entered)
- ③ Character bar

You can enter the PIN using the character bar (option 1) or the number keypad (option 2).

► **Option 1:** select the digits in character bar ③ by turning the COMAND controller and press to confirm.

► Select icon ② in character bar ③ and press to confirm or press the button.

Further information on deleting can be found in the "Searching for a phone book entry" section (► page 130).

► **Option 2:** enter the digits using the number keys.

Once you have entered the first digit, icon ② is highlighted in the character bar.

► Confirm symbol ② by pressing the COMAND controller or press the button.

In both cases, COMAND will check the PIN. If the PIN is entered correctly, the telephone basic menu appears.

Telephone basic menu (convenience telephony)

- Press the function button.

When the mobile phone is inserted in the bracket and is operational, the following display is shown:

Telephone basic menu (convenience telephony)

- ① Network provider icon
- ② Signal strength of mobile phone network
- ③ Receiver icon or
- ④ To display call lists
- ⑤ Character bar
- ⑥ Convenience phone connected
- ⑦ To display the COMAND phone book

i Bars ② display the current signal strength of the mobile phone network. If all the bars are filled, you have optimum reception. If all the bars are empty, there is very poor reception or none at all.

Receiver icon ③ shows whether a call is active/being connected or not .

SMS display in telephone basic menu

The mail icon is displayed when you have an unread text message. The symbol disappears once you have read the text message. The mail symbol is displayed when the text message memory is full. The symbol disappears once you delete at least one text message.

The **SMS** menu item is available if the function is supported by the convenience telephone and the mobile phone bracket and once the convenience telephone has completed the download of the text message.

The menu item is greyed out and is not available:

- when you switch from the convenience telephone to phoning via the Bluetooth® interface and the Bluetooth® telephone does not support the MAP Bluetooth® profile
- when COMAND first downloads the text messages from the mobile phone after the mobile phone has been inserted in the bracket

The duration of the download, depends on the number of text messages (SMS) stored on the phone and the make of the phone.

Switching between Bluetooth® and convenience telephony

Switching telephony type during operation

If your vehicle is equipped with convenience telephony, you can switch between telephony types.

You can switch the telephony type in the Bluetooth® telephone list by selecting either a Bluetooth® telephone or the convenience telephone.

- ▶ Call up the Bluetooth® telephones list (▷ page 115).
- ▶ Select a mobile phone by turning the COMAND controller and press to confirm.

i SAP telephony: mobile phones which are connected to the optionally available "Bluetooth® telephone module with SAP profile" permanently installed telephone (SAP module), are displayed in their own telephone list. These can be called up by selecting the **SAP telephones** menu item, thereby switching to SAP telephony. See the separate operating instructions.

Switching telephony type when switching on

Note

COMAND starts the telephony type depending on whether:

- a Mercedes-Benz SAP module is inserted into the fixture or not
- a bracket is inserted for the mobile phone or not.

If neither an SAP module nor a bracket are inserted, COMAND immediately changes to Bluetooth® telephony.

SAP module is inserted

COMAND starts SAP telephony.

- i** You must set up your SAP module before first use so it is recognised by COMAND, see the separate operating instructions.

If no mobile phone is connected to the SAP module, the **Ready for SAP connectivity...** message appears. Approximately two minutes after switching on COMAND, a prompt will appear asking whether you wish to switch to Bluetooth® telephony.

If you confirm by selecting **Yes**, the **Ready for Bluetooth telephony...** message will appear. COMAND will search for the two mobile phones last connected via the Bluetooth® interface. If one of the two mobile phones is found, the telephone basic menu for Bluetooth® telephony (▷ page 118) appears. If neither of the mobile phones are found, the **Ready for Bluetooth telephony...** message remains in the display. You now have to connect your mobile phone (▷ page 114).

After confirming **No**, the message **Ready for SAP connectivity...** reappears.

SAP module is not inserted

If there is no Mercedes-Benz SAP module fitted, COMAND checks whether a bracket is inserted.

Bracket for the mobile phone is inserted

COMAND starts convenience telephony.

If no mobile phone is in the bracket the following message appears: **Phone not inserted**. Approximately two minutes after you switch on COMAND, you are asked if you want to switch to Bluetooth® telephony.

If you confirm by selecting **Yes**, the **Ready for Bluetooth telephony...** message will appear. COMAND will search for the two mobile phones last connected via the Bluetooth® interface. If one of the two mobile phones is found, the telephone basic menu for Bluetooth® telephony (▷ page 118) appears. If neither of the mobile phones are found, the **Ready for Bluetooth telephony...** message remains in the display. You now have to connect your mobile phone (▷ page 114).

After confirming **No**, the message **No telephone inserted** reappears.

If there is a mobile phone in the bracket, the PIN query (▷ page 119) or the telephone basic menu for convenience telephony (▷ page 120) appears.

Mobile phone bracket is not inserted

COMAND starts telephony via the Bluetooth® interface and searches for the last two mobile phones to have been connected via the Bluetooth® interface. If one of the two mobile phones is found, the telephone basic menu for Bluetooth® telephony (▷ page 118) appears. If neither of the mobile phones are found, the **Ready for Bluetooth telephony...** message remains in the display. You now have to connect your mobile phone (▷ page 114).

i The Bluetooth® connection with the mobile phone remains active until the next time COMAND is switched off unless you connect a different mobile phone via the phone list. While the Bluetooth® connection is active, only the Bluetooth® interface functions are available to you.

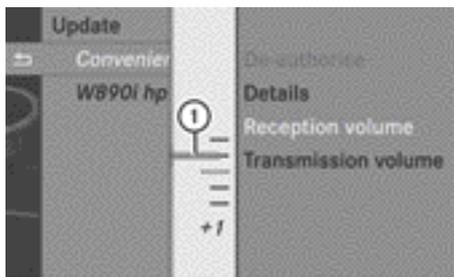

Reception and transmission volume

The following information is valid for Bluetooth® interface telephony and convenience telephony.

Once the mobile phone has been authorised, you can optimise the transmission and reception volume settings. To find out about the best possible settings for your mobile phone, contact a Mercedes-Benz Service Centre or visit <http://www.mercedes-benz.com/connect>.

i Incorrect settings may have a significant impact on the quality of calls.

- ▶ Press the **TEL** function button.
- ▶ Select **Telephone** in the telephone basic menu by turning **⏪** the COMAND controller and press **⏩** to confirm.
- ▶ Select **Bluetooth telephones** and press **⏩** to confirm.
- ▶ Select an authorised mobile phone from the list by turning **⏪**.
- ▶ Select the list symbol to the right of the entry by sliding **⊖→** the COMAND controller and press **⏩** to confirm.
- ▶ Select **Reception volume** or **Transmission volume** and press **⏩** to confirm.

P82.87-6417-31

- ①** Scale with indicator showing current volume

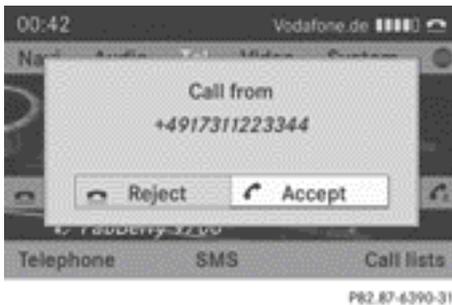

- ▶ Select a volume setting by turning  the COMAND controller.
- ▶ **To close the setting scale:** press  or slide .

Telephone operation

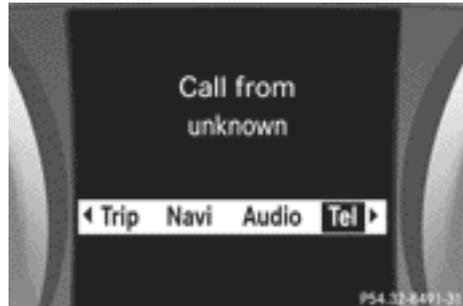

Incoming call

Rejecting or accepting a call

When there is an incoming call, you see a corresponding window in the display.

- ▶ **To reject:** select **Reject** by turning  the COMAND controller and press  to confirm.
- or
- ▶ Press the  button on COMAND or the multifunction steering wheel.
 - ▶ **To accept:** confirm **Accept** by pressing .
- or
- ▶ Press the  button on COMAND or the multifunction steering wheel.

Multifunction display (example)

- i** You can also accept the call by voice command using LINGUATRONIC (see the separate operating instructions).

Once you have accepted the call, you can use hands-free mode. The call volume can be adjusted (▶ page 31). For more information, see the "Functions during a single call connection" section (▶ page 125).

The display shows the phone number or the name and phone number (if the entry is stored in the address book) or shows the **Unknown** (phone number withheld) message.

- i** You can also accept a call as described above when another main function is switched on in COMAND. Once you have accepted the call, the display switches to telephone mode. After the call is finished, you see the display of the previous main application again.

The display does not switch to telephone mode if you:

- hide the window with the  button next to the COMAND controller and then
- accept the call with the  button on the multifunction steering wheel.

Making a call

Entering a telephone number using the number keypad

- ▶ Call up the telephone basic menu:

- convenience telephony (▷ page 120)
 - telephony via the Bluetooth® interface (▷ page 118)
- ▶ Enter the digits using the number keypad.
- ▶ **To connect the call:** press the  button on COMAND.
- or
- ▶ Press the   buttons on the multifunction steering wheel to select the **Te**l menu and press the  button.

Entering a telephone number using the telephone basic menu

- ▶ Call up the telephone basic menu:
- convenience telephony (▷ page 120)
 - telephony via the Bluetooth® interface (▷ page 118)
- ▶ Select the digits one by one by turning  and sliding   the COMAND controller and press  to confirm.
- ▶ **To connect a call:** select  in the character bar and press  to confirm.

or

- ▶ Press the  button on COMAND or the multifunction steering wheel.

Redialling a number

On COMAND

- ▶ Call up the telephone basic menu:
- convenience telephony (▷ page 120)
 - telephony via the Bluetooth® interface (▷ page 118)
- ▶ Select  in the character bar and press  to confirm.
- or
- ▶ If the telephone basic menu is displayed, press the  button in COMAND. In both cases, the calls dialled list appears. The most recently dialled number is at the top.

- ▶ **To select a call:** turn  the COMAND controller.
- ▶ **To connect the call:** press  the COMAND controller.

Using the multifunction steering wheel

- ▶ Press the   buttons to select the **Te**l menu.
- ▶ Press the  button to open the list of dialled numbers.
- ▶ Press the   buttons to select the desired name or phone number.
- ▶ **To connect a call:** press  or  on the multifunction steering wheel.

Connecting a call to an entry on a call list or in the COMAND phone book

- ▶ Open a call list and select an entry (▷ page 134).
- or
- ▶ Call up the COMAND phone book and select an entry (▷ page 130).
- ▶ **To connect a call:** press  the COMAND controller or the  button.

Connecting a call to a COMAND phone book entry via the multifunction steering wheel

- ▶ Use  or  to select the **Te**l menu.
- ▶ Press   or  to switch to the phone book.
- ▶ Press  or  to select the name you want.
- i** The saved names are displayed alphabetically.
- i** If you hold down the  or  button for longer than one second, rapid scroll begins. The multifunction display goes from the 7th entry displayed to the first entry under the following letter. Release the button to stop.

► **To connect a call:** press  or  on the multifunction steering wheel.

The **Connecting call...**, message appears in the multifunction display along with the number being dialled and the name, if it is stored in the phone book.

The number dialled is stored in the corresponding call list.

i If there are several numbers for this name, you see a list of sub-entries..

- Press  or  to select the phone number you want.
- Press the  or  button again to place the call.

Making a call via speed dial

Phone book entries are saved in the speed dial list (▷ page 136).

Option 1:

► Hold down one of the number keys for longer than two seconds.

Option 2:

- Call up the telephone basic menu:
 - convenience telephony (▷ page 120)
 - telephony via the Bluetooth® interface (▷ page 118)
- Select **Speed dial preset list** by turning  the COMAND controller and press  to confirm.

The speed dial list appears.
- Select the storage location and press  to confirm.

Irrespective of the option chosen, the telephone basic menu appears and displays the selected entry. This initiates dialling.

Functions available during a call

Overview

Telephone operation with a single call

- ① Person you are calling
- ② Icon for active telephone connection
- ③ To switch hands-free microphone on/off
- ④ To send DTMF tones (not possible with all mobile phones)
- ⑤ To end a call

Switching the hands-free microphone on/off

This function is also available during an active phone call.

- Call up the telephone basic menu:
 - convenience telephony (▷ page 120)
 - telephony via the Bluetooth® interface (▷ page 118)
- **To switch off:** select **Mike off** and press  to confirm.

If the microphone is switched off, the display shows the  icon and the **The microphone is off** message appears for a short period.
- **To switch on:** select **Mike on** and press  to confirm.

The  symbol disappears. You will briefly see the **The microphone is on** message.

Ending an active call

- ▶ Select  in the telephone basic menu and press  to confirm.

or

- ▶ Press the  button on COMAND or the multifunction steering wheel. The call on hold is activated.

Rejecting or accepting a waiting call

Overview

The Call waiting function must be supported by the mobile phone network provider and be enabled. Depending on the mobile phone used, the system behaviour differs when accepting a call (option 1 and 2).

If you have a call in progress and receive another call, a new window appears in the display. You also hear a tone. You can accept or reject the call.

- ▶ **To reject:** select **Reject** and press  to confirm.

or

- ▶ Press the  button on COMAND or the multifunction steering wheel.

- ▶ **To accept:** select **Accept** and press  to confirm.

or

- ▶ Press the  button on COMAND or the multifunction steering wheel.

Option 1: if you accept the waiting call, the active call is ended.

The active call will also be ended if you accept the waiting call using LINGUATRONIC (see the separate operating instructions).

Option 2: if you accept the waiting call, the active call is put on hold. You can then switch back and forth between both calls (toggling), (> page 126).

- i** The second option is available if your mobile phone supports the toggling function (via Bluetooth®).

Valid for both options: if you accept the waiting call using the mobile phone, the active call is put on hold. You then have two calls. The call you have just accepted is active.

The COMAND display changes. If you continue to operate functions on the mobile phone, the COMAND display may differ from that of the mobile phone.

Making a further call

You can make a second call while on the phone with someone else. This action puts the previous call on hold. The function is available if your mobile phone supports this function via Bluetooth®.

- 1** Symbol for making a second call

- ▶ Select the symbol **1** by turning  the COMAND controller and press  to confirm.

or

- ▶ Press the  button on COMAND.

- ▶ Enter the phone number:
 - manually (> page 123)
 - using the phone book (> page 128)
 - from the call lists (> page 134)
 - using speed dial (> page 125)

Call waiting

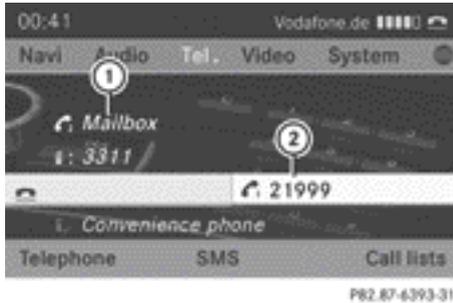

Overview

You can switch back and forth between calls with this function. The function is available if

your mobile phone supports the toggling function (via Bluetooth®).

You can use the function if you are answering a second call or making a second call.

Switching between the active call and the call on hold

- ① Active call
- ② Call on hold

► Confirm symbol ② by pressing .

or

► Press the  button on COMAND or the multifunction steering wheel.
The previous call on hold is activated.

Ending an active call

► Select  in the telephone basic menu and press  to confirm.

or

► Press the  button on COMAND or the multifunction steering wheel.
The call on hold is activated.

Conference call

You can interconnect calls (active and on hold) on the mobile phone. This permits several parties to hear one another and speak with one another.

You can also make a further call in COMAND (▷ page 126).

Sending DTMF tones

This function is not supported by all mobile phones.

Answering machines or other devices can be controlled by DTMF tones, e.g. for remote query functions.

► If you would like to listen to the messages on your answering machine, for example, select the corresponding number.

► **To transmit individual characters:** once a connection has been established to the answer phone, select the desired characters in the character bar and press  to confirm.

or

► Press the corresponding key on the COMAND number keypad.
Every character selected will be transmitted immediately.

► **To send a phone book entry as a DTMF sequence:** select **Name** by turning  the COMAND controller and press  to confirm.

► Select the desired phone book entry and press  to confirm.
The entry is sent as a DTMF character string.

► **To return to the call display:** select **Back** and press .

i You can also send DTMF tones using LIN-GUATRONIC (see the separate operating instructions).

Transferring a call (convenience telephony)

Note

When using a bracket connected to the mobile phone via Bluetooth®: if you wish to continue a call in private mode, you will need to perform the necessary steps on the mobile phone (see the mobile phone operating instructions).

From the hands-free system to the mobile phone

- ▶ Remove the mobile phone from the bracket and, if necessary, switch the mobile phone to "Private mode" (see the mobile phone operating instructions).

The **Telephone not inserted** message appears in the COMAND display. Subsequent operation is only possible using the mobile phone.

From the mobile phone to the hands-free system

- ▶ Insert the mobile phone into the bracket. Once the call has been transferred to hands-free mode, all the functions described in the section "Functions during a single call connection" will be available to you (▷ page 125).

Using the phone book

Introduction

The phone book displays the names and phone numbers of all of the address book entries saved in the COMAND address book. If an address book entry does not have a telephone number, it does not appear in the phone book.

In addition, **MB Contact** is listed as the first entry. This allows you to place a call to the Mercedes-Benz Service hotline (▷ page 147).

You can store telephone numbers in the phone book or import contacts. The phone book of the mobile phone is automatically downloaded to COMAND after connection.

You can import contacts from the memory card and the USB device into the phone book, or receive vCards via Bluetooth®.

The functions:

- importing contacts
- receiving vCards
- deleting contacts

are described in detail in the "Address book" section (▷ page 145).

- i** The stored phone book and the vCards remain in COMAND, even if you use COMAND with another mobile phone. The entries can be viewed without a mobile phone. For this reason, delete the phone book before selling or transferring ownership of your vehicle.

Calling up the phone book

Overview

- ▶ Select **Name** in the telephone basic menu by sliding  and turning  the COMAND controller and press  to confirm.

If the phone book contains entries, they will be displayed in alphabetical order. The character bar at the bottom of the display is active.

The character bar is used for fast selection of an entry.

- ▶ **To close the phone book:** select  in the character bar by sliding  and turning  the COMAND controller and press  to confirm.

or

- ▶ Press the  button.

Symbol overview

Icon	Explanation
	Address book entry that has been entered or changed via COMAND Imported contact that has been saved in the phone or address book
	Address book entry with voice tag i These entries have also been assigned a voice tag. Voice tags are available in vehicles with LINGUATRONIC (see the separate operating instructions).
	Contact imported from a mobile phone that supports PBAP or imported from a convenience telephone
	Entry which has been imported from the SD memory card or USB device
	Entry imported via the Bluetooth® interface

Using the multifunction steering wheel

- ▶ Use  or  to select the **Te1** menu.
- ▶ Use  or  or  to call up the phone book.

Searching for a phone book entry

With character bar

You determine the first letter of the entry you are looking for with the first character you enter.

- ▶ Select a character by turning  the COMAND controller and press  to confirm.
The first entry in the list that starts with the letter selected is highlighted. If there are similar entries, the next different character is shown. For example, with entries such as **Christel** and **Christine**, the beginnings of the names are similar. In this case you will be offered a choice between **E** and **I**.

- ▶ Select the characters of the entry you are searching for one by one and press  to confirm.
When the selection is clear, COMAND switches automatically to the selection list.
- ▶ **To complete the search:** switch from the phone book with character bar to the selection list (▶ page 131).
The last list entry is automatically highlighted.

With number keypad

Alternatively, you can also enter digits using the number keypad (direct entry) (▶ page 26).

Deleting characters

- ▶ **To delete individual characters:** select  by turning  the COMAND controller and press  briefly.
or
- ▶ Briefly press the  button
Each time a character is deleted, the entry most closely resembling the remaining characters is shown at the top of the list.
- ▶ **To delete the entry:** select  by turning  the COMAND controller and press

and hold  until the entire entry has been deleted.

or

- ▶ Press and hold the  button until the entire entry is deleted.

Changing the language of the character bar

- ▶ Select  and press .
- ▶ Select the desired language.

Changing the character set of the character bar

- ▶ Select  and press  to confirm.
The character set changes each time you make this selection.

Selecting an entry directly from the list

You can switch to the list at any time during character entry.

- ▶ Slide  the COMAND controller repeatedly or press and hold  until the character bar disappears.

or

- ▶ Select  and press  to confirm.
- ▶ **To select an entry:** turn  the COMAND controller until the desired entry is highlighted and press  to confirm.

To select a phone number: the  icon indicates that an entry contains more than one phone number.

- ▶ Select a phone book entry with the  icon and press  to confirm.
The sub-entries appear. The  icon changes to .

PR2.87-6414-31

Phone book entry with several entries

- ▶ Select a sub-entry by turning  and press  to confirm.
- ▶ **To return to the phone book with character bar:** select **Back** in the list and press  to confirm.

or

- ▶ Press the  back button.

Selecting an entry using the multifunction steering wheel

- ▶ Use  or  to select the **Te1** menu.
- ▶ Use  or  or  to call up the phone book.
- ▶ Press and hold the  or  button until the desired entry is highlighted.

- ▶ **i** If you press the  or  button for longer than a second, the on-board computer shows the names in rapid scroll. After a short time, rapid scroll speeds up. It stops when you release the button again or the end of the list is reached.

If an entry has several phone numbers, these are displayed.

- ▶ Select a phone book entry and press the  or  button.
The sub-entries appear.
- ▶ Select the desired sub-entry with the  or  button.
- ▶ **To make a call:** press the  or  button.

Displaying details for an entry

- ▶ Select an entry in the selection list by turning $\left[\odot \right]$ the COMAND controller.
- ▶ Select the list symbol to the right of the entry by sliding $\odot \rightarrow$ the COMAND controller and press \odot to confirm.
- ▶ Select **Details** and press \odot to confirm. The detailed display appears.
- ▶ **To close the detailed view:** slide $\leftarrow \odot \rightarrow$ repeatedly until the entry is highlighted again or press the $\left[\leftarrow \right]$ back button.

Deleting an entry from the phone book

If the entry contains only phone numbers, it is deleted from the phone book and address book.

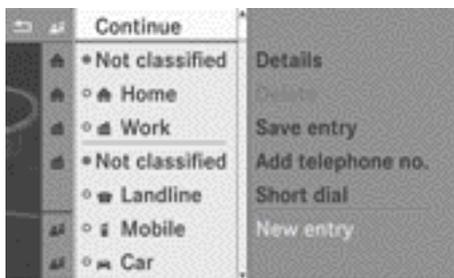

If there is additional data included along with the phone number, e.g. a navigable destination, the entry is deleted from the phone book but retained in the address book.

- ▶ Select an entry in the selection list by turning $\left[\odot \right]$ the COMAND controller.
- ▶ Select the list symbol to the right of the entry by sliding $\odot \rightarrow$ the COMAND controller and press \odot to confirm.
- ▶ Select **Delete** and press \odot to confirm. A prompt appears asking whether the entry should be deleted.
- ▶ Select **Yes** or **No** and press \odot to confirm. If you select **Yes**, the entry is deleted in accordance with the rules described above. If you select **No**, the process will be aborted.

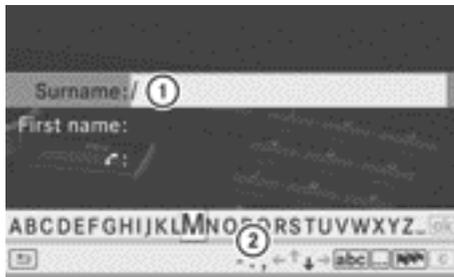

Creating a new entry in the phone book

- ▶ Slide $\uparrow \odot$ the COMAND controller repeatedly in the phone book until the selection list appears.

- ▶ Select the list symbol on the right in the selection list by sliding $\odot \rightarrow$ the COMAND controller and press \odot to confirm.
- ▶ Select **New entry** and press \odot to confirm.
- ▶ Select a category for the number, e.g. **Home**, and press \odot to confirm.
- ▶ Select a category for the phone, e.g. **Mobile**, and press \odot to confirm.

- ▶ Select **Continue** and press \odot to confirm. The input menu with data fields appears.

- ① Selected data field with cursor
- ② Character bar
- ▶ Enter characters and save the entry. Proceed as described under "Entering characters" in the "Entering characters in the address and phone books" section (▷ page 27).

- ❗ The entry is created in the phone book and in the address book.

Adding telephone numbers to an existing phone book entry

- ▶ Select an entry in the selection list by turning the COMAND controller.
- ▶ Select the list symbol to the right of the entry by sliding the COMAND controller and press to confirm.
- ▶ Select **Add telephone no.** and press to confirm.
- ▶ Select a category for the number, e.g. **Home**, and press to confirm.
- ▶ Select a category for the phone, e.g. **Mobile**, and press to confirm.
- ▶ Select **Continue** and press to confirm. COMAND stores the data if there are fewer than five numbers assigned to the entry you are searching for in the selected number category.

If five numbers are stored for the entry in the selected number category, a prompt will appear asking whether you wish to overwrite one of the existing numbers.

- ▶ Select **Yes** or **No** and press to confirm. If you select **Yes**, a selection list will appear containing the five existing numbers. If you select **No**, the process will be aborted.
- ▶ Select the number to be overwritten by turning the COMAND controller and press to confirm. An input menu appears. The data field for entering the new phone number is highlighted.
- ▶ Enter characters and save the entry. Proceed as described under "Entering characters" in the "Entering characters in the address and phone books" section (▷ page 27).

Using call lists

Introduction

COMAND displays lists of calls received (including missed calls) and made during

phone operation. Call lists are not available unless a mobile is connected to COMAND.

COMAND supports the PBAP Bluetooth® profile. For this reason, note that the system behaviour differs, especially when telephoning via the Bluetooth® interface:

- Convenience telephone or Bluetooth® telephone with PBAP Bluetooth® profile:
The call lists are downloaded automatically from the mobile phone by COMAND as soon as the mobile phone is connected to COMAND. COMAND displays entries without time information if they have been downloaded from a convenience telephone.
- Bluetooth® telephone without PBAP Bluetooth® profile:
The call lists are created and displayed by COMAND.

i For Bluetooth® telephones without the Bluetooth® profile PBAP, the call lists in COMAND are not synchronised with those on your mobile phone. These calls may or may not be listed on your mobile phone, depending on the model.

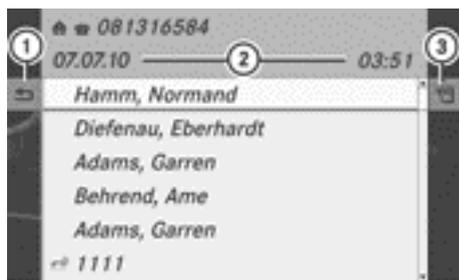

i If no mobile phone is connected, then the **Call lists** menu item is greyed out and cannot be selected. If you connect a mobile phone other than the previous one to COMAND, the previously available call lists and their entries will be deleted automatically. They are still available on the mobile phone itself.

i The respective menu item can only be selected if calls have already been made or received in COMAND.

Displaying missed calls in the COMAND display is not supported by all mobile phones.

Opening the call list and selecting an entry

- ▶ Press the **TEL** function button.
- ▶ Select **Call lists** in the telephone basic menu by sliding $\odot \downarrow$ and turning $\{\odot\}$ the COMAND controller and press \odot to confirm. A menu appears.
- ▶ Select **Incoming calls** or **Calls dialled** using $\{\odot\}$ and press \odot to confirm. The corresponding list appears.

P62.87-4408-31

List of selected phone numbers (example)

- ① To close the list
 - ② Date/time (if available), symbol (if assigned) and phone number of the selected entry
 - ③ To call up options
- i** You can also call up the list of dialled calls by pressing the button when the telephone basic menu is shown. In this case, the list will only show phone numbers.
- ▶ Select an entry by turning $\{\odot\}$ the COMAND controller.
 - ▶ **To dial a phone number:** press \odot .
 - ▶ **To close the list:** select **Back** and press \odot to confirm or press the button.

Displaying details about a list entry

COMAND can also show a shortened list entry in full.

- ▶ Select a list entry by turning $\{\odot\}$ the COMAND controller.
- ▶ Select the list symbol to the right of the entry by sliding $\odot \rightarrow$ the COMAND controller and press \odot to confirm.
- ▶ Select **Details** and press \odot to confirm. The detailed display appears.
- ▶ **To go back to the list:** slide $\leftarrow \odot \rightarrow$ repeatedly until the list is highlighted.

Storing a phone number which has not yet been stored

Introduction

For incoming calls from a person who is not in the address book, COMAND displays the phone number in the call list. You can save this entry.

Storing as a new entry in the address book

- ▶ Open a call list and select an entry (\triangleright page 134).
 - ▶ Select the list symbol to the right of the entry by sliding $\odot \rightarrow$ the COMAND controller and press \odot to confirm.
 - ▶ Select **Save** and press \odot to confirm.
- i** **Save** is shown in grey if the selected list entry has already been saved in the address book.
- ▶ Select **New entry** and press \odot to confirm.
 - ▶ Select a category for the number, e.g. **Home**, and press \odot to confirm.
 - ▶ Select a category for the phone, e.g. **Mobile**, and press \odot to confirm.

Number category	Display (phone book and address book)
Not classified	No symbol
Home	
Work	

Phone category	Display (phone book and address book)
Not classified	
Landline	
Mobile	
Car	

- ▶ Select **Save** and press  to confirm. An input menu with data fields is shown. The data field for the telephone number is filled in automatically.

- ① Data field with cursor
 - ② Telephone number and symbol for the phone category are automatically entered
 - ③ Character bar
- ▶ Proceed as described under "Entering characters" in the "Entering characters in the address and phone books" section (▷ page 27).

Adding a phone number to an address book entry

- ▶ Open a call list and select an entry (▷ page 134).
- ▶ Select the list symbol to the right of the entry by sliding  the COMAND controller and press  to confirm.
- ▶ Select **Save** and press  to confirm.

i Save is shown in grey if the selected list entry has already been saved.

- ▶ Select **Add telephone no.** and press  to confirm.
- ▶ Select a category for the number, e.g. **Home**, and press  to confirm.
- ▶ Select a category for the phone, e.g. **Mobile**, and press  to confirm.
- ▶ Select **Save**.

The search menu for address book entries appears.

- ▶ Search for the desired entry. Proceed as described under "Searching for a phone book entry" (▷ page 130).
- ▶ Press  when you have finished searching. COMAND stores the data if there are fewer than five numbers assigned to the entry you are searching for in the selected number category.

You will see a message to this effect.

If five numbers are stored for the entry you are searching for, a prompt will appear asking whether you wish to overwrite one of the existing numbers.

- ▶ Select **Yes** or **No** and press  to confirm. If you select **Yes**, a selection list with the five existing numbers is displayed. If you select **No**, the process will be aborted.
- ▶ Select the number to be overwritten in the list by turning  the COMAND controller and press  to confirm. COMAND overwrites the selected number with the new data.

Deleting call lists

This function is available when COMAND creates and manages the call lists. This is the case if you use a Bluetooth® telephone without the support of the Bluetooth® profile PBAP or use a convenience telephone.

If you use call lists from a Bluetooth® telephone with the support of the Bluetooth® profile PBAP or a convenience telephone, you cannot delete them from COMAND.

i If you delete the call lists from the mobile phone (separate mobile phone operating instructions), COMAND updates the call list display the next time it connects. The call lists are empty in the case described.

- ▶ Select **Call lists** in the telephone basic menu by turning **[⊙]** the COMAND controller and press **[✓]** to confirm.
- ▶ Select **Delete call lists** and press **[✓]** to confirm.
A prompt appears asking whether you wish to delete all call lists.
- ▶ Select **Yes** or **No** and press **[✓]** to confirm.
If you select **Yes**, the call lists are deleted.
If you select **No**, the process will be aborted.

Using the speed-dial list

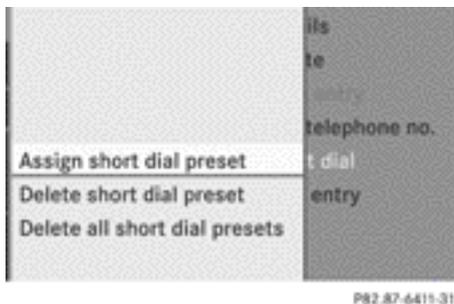

Storing a phone book entry in the speed dial list

You can assign ten speed dial presets (0 - 9) to the speed dial list. There are two options available for this purpose.

Option 1:

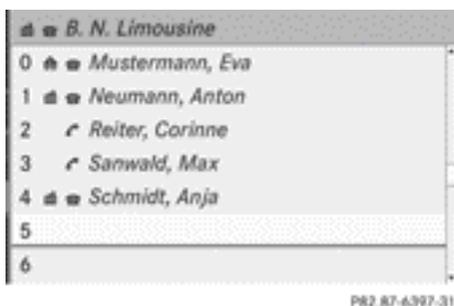

- ▶ Search for a phone book entry in the phone book (▷ page 130).
- ▶ If an entry has several phone numbers, select the desired number by turning **[⊙]** the COMAND controller.

- ▶ Select the list symbol to the right of the entry by sliding **[⊙]** the COMAND controller and press **[✓]** to confirm.
A menu appears.
- ▶ Select **Speed dial** by turning **[⊙]** the COMAND controller and press **[✓]** to confirm.
A menu appears.

Speed dial menu

- ▶ Confirm **Assign speed dial preset** by pressing **[✓]**.
The speed dial list appears. The selected phone book entry is listed as the first entry. The next available speed dial preset is highlighted.

- ▶ Select the speed dial preset by turning **[⊙]** the COMAND controller and press **[✓]** to confirm.
The phone book entry is saved in the speed dial preset.

Option 2

- ▶ Call up the telephone basic menu:

- convenience telephony (▷ page 120)
 - telephony via the Bluetooth® interface (▷ page 118)
- ▶ Select **Call lists** by sliding  and turning  the COMAND controller and press  to confirm.
- ▶ Select **Speed dial preset list** and press  to confirm.
The speed dial list appears.
- ▶ Select the list symbol to the right of the entry by sliding  the COMAND controller and press  to confirm.
- ▶ Confirm **Assign speed dial preset** by pressing .
- ▶ Proceed as described under option 1.

Making a call via speed dial

A description can be found in the "Making a call" section (▷ page 125).

Deleting a speed dial number

- ▶ **To delete a speed dial number:** select **Delete speed dial preset** in the "Speed dial" menu by turning  the COMAND controller and press  to confirm.
The speed dial number is deleted.
- ▶ **To delete all speed dial numbers:** select **Delete all speed dial presets** in the "Speed dial" menu by turning  the COMAND controller and press  to confirm.
You will be asked whether you want to continue.
- ▶ Select **Yes** or **No** and press  to confirm.
If you select **Yes**, all speed dial numbers will be deleted from the speed dial list.
If you select **No**, the process will be aborted.

Text message (SMS)

Information and requirements

The following conditions must be fulfilled in order to use the functions:

Type of telephony	Conditions
Bluetooth® interface telephony	<ul style="list-style-type: none"> • The Bluetooth® mobile phone supports the MAP Bluetooth® profile (Message Access Profile)
Convenience telephony	<ul style="list-style-type: none"> • The mobile phone is inserted in the bracket and switched on. • The PIN has been entered. • The mobile phone is logged into a mobile phone network.

-  Telephony via the SAP module, see the separate operating instructions.

When the mobile phone is connected, the 30 most recent text messages which are currently stored on the phone are loaded to the COMAND's text message inbox and displayed.

-  COMAND may not load all the most recent text messages:

This may occur in exceptional cases, for example when using certain mobile phones/brackets and when the mobile phone inbox holds many text messages.

If the above conditions are met, new incoming text messages appear in the COMAND text message inbox. In addition, a tone sounds and the  icon appears. The symbol disappears once you have read the text message. The  mail symbol is displayed when the text message memory is full. The symbol disappears once you delete at least one text message.

Displaying the text message (SMS) inbox

Overview

- ▶ Press the **TEL** function button.
- ▶ Select **SMS** in the telephone basic menu by turning **⏮** the COMAND controller and press **⏹** to confirm.
The text message inbox appears.

Text message (SMS) inbox

The shortened text or sender of the selected text message (depending on the settings) as well as the date and time at which the selected text message was received are displayed at the top and in the middle. The **☑** symbol appears if a text message has not yet been read.

Reading a text message (SMS)

- ▶ Select a text message in the text message inbox by turning **⏮** the COMAND controller and press **⏹** to confirm.
The text message appears.
- ▶ **To scroll through the display or select phone numbers in a text message:** turn **⏮** the COMAND controller.
The display scrolls up or down line by line, or skips to the next or previous telephone number and automatically highlights it.
- ▶ **To return to the list:** press **⏹** and select **Back**.

Listening to a text message

You can set the language (▷ page 47) and the speed of the read-aloud function (▷ page 44).

- ▶ Press **⏮** while a text message is being displayed, select **Read aloud** and press **⏹** to confirm.
COMAND reads out the text message.
- ▶ **To cancel the read-aloud function:** press the **⏮** button.
or
- ▶ Press **⏮**, select **Cancel read-aloud function** and press **⏹** to confirm.

Switching the display

You can switch between displaying the text message sender or the text message content. The sender display shows the sender of the text message. If the sender is stored in the COMAND phone book, the name is displayed. The text display shows the first few words of a text message.

- ▶ Select a text message in the text message inbox by turning **⏮** the COMAND controller.
- ▶ **To switch to the text display:** select the list symbol to the right of the text message by sliding **⊙→** the COMAND controller and press **⏹** to confirm.
- ▶ Select **Display text** and press **⏹** to confirm.
The view changes.
- ▶ **To switch to the sender display:** select the list symbol to the right of the text message by sliding **⊙→** the COMAND controller and press **⏹** to confirm.
- ▶ Select **Display sender** and press **⏹** to confirm.
The view changes.

Displaying details and phone numbers

COMAND can also show a shortened sender display in full.

- ▶ Select a text message in the text message inbox by turning  the COMAND controller.
- ▶ Select the list symbol to the right of the text message by sliding  the COMAND controller and press  to confirm.
- ▶ Select **Details** and press  to confirm. The detailed display appears.
- ▶ **To close the detailed view:** slide  the COMAND controller.

Returning to the telephone basic menu

- ▶ Press the  back button.

Managing text messages

Calling a text message (SMS) sender

- ▶ Press  the COMAND controller while the text message is being displayed.
- ▶ Select **Call sender** and press  to confirm. The telephone makes the call to the sender.

Using phone numbers in the text

You can use numbers that are red and underlined in text messages (SMS).

-  It is possible that a highlighted numerical sequence may not contain a telephone number.
- ▶ Select a usable number when the text message is displayed.

P82.87-4406-31

-  Usable numerical sequence
- ▶ Press  the COMAND controller and select **Use**.
- ▶ Select **Call**. The telephone makes the call.
-  You can use the "New entry" or "Add no." functions to save this telephone number or to add it to an existing entry.

Storing the sender as a new address book entry

This function is not possible if the sender's telephone number is already stored in the address book.

- ▶ Press  the COMAND controller while the text message is being displayed.
- ▶ Select **Save number** and press  to confirm.
- ▶ Select **New entry** and press  to confirm.
- ▶ Proceed as described in the "Storing as a new entry in the address book" section ([▷ page 134](#)).

Storing a text message sender in an existing address book entry

- ▶ Press  the COMAND controller while the text message is being displayed.
- ▶ Select **Save number** and press  to confirm.

- ▶ Select **Add telephone no.** and press  to confirm.
- ▶ Proceed from the step "Select a number category" in the "Adding telephone numbers to an existing phone book entry" section (▷ page 133).

Deleting a text message (SMS)

- ▶ Select a text message in the text message inbox by turning  the COMAND controller.
- ▶ Select the list symbol to the right of the text message by sliding  the COMAND controller and press  to confirm.
- ▶ Select **Delete** and press  to confirm. A deletion prompt appears.
- ▶ Select **Yes** or **No** and press  to confirm. If you select **Yes**, the text message is deleted. If you select **No**, the process will be aborted.

 This delete function is not supported by all mobile phones. The **Delete failed** message appears.

Using the address book

Introduction

The address book organises and stores entries which are entered from different sources (mobile phone, memory card, USB device, COMAND telephone book, navigation system).

You can use these entries to make telephone calls and for navigation.

 Address book entries remain stored when the mobile phone is disconnected. Therefore, you should delete your personal data using the reset function before selling your vehicle, for example (▷ page 48).

Calling up the address book

Option 1:

- ▶ Press the  function button. You see the telephone basic menu or the address book if it was open previously.
- ▶ When the telephone basic menu is displayed, press the  function button again.

Option 2:

- ▶ With the telephone basic menu shown, select **Te1** by sliding  the COMAND controller and press  to confirm.
- ▶ Select **Address book** from the menu and press  to confirm.

Address book with address book entry  and navigable data 

 An address book entry can contain the following information: surname, first name, company, two addresses, geo-coordinates and up to five telephone numbers.

- ▶ **To browse in the address book:** turn  the COMAND controller.
- ▶ **To close the address book:** press the  button.

Searching for an address book entry

- ▶ Call up the address book (▷ page 140).
- ▶ Select **Search** in the address book by sliding $\odot \downarrow$ and turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm. If there are more than eight entries, the search menu and the character bar appear.

Search menu with character bar

- ① symbol for address book entry
- ② symbol for complete address data from the navigation
- ③ Character bar
- ④ symbol for phone book entry from the mobile phone
- ⑤ Entry with voice tag

Additional icons are described in the "Symbol overview" section (▷ page 130).

- ▶ Proceed as described under "Searching for a phone book entry" (▷ page 130).

Creating a new entry in the address book

You can enter address data directly into the address book. If you store telephone numbers in the COMAND phone book, these are also saved in the address book. If you store a navigation destination, COMAND creates an address book entry which includes the complete navigable address data.

- ▶ Call up the address book (▷ page 140).

- ▶ Select **New** in the address book by sliding $\odot \downarrow$ and turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm. An input menu with data fields appears.

Input menu with data fields

- ① Selected data field with cursor
- ② Character bar

- ▶ Enter characters and save the entry. Proceed as described under "Entering characters" in the "Entering characters in the address and phone books" section (▷ page 27).

Deleting an address book entry

- ▶ **Option 1:** select **Delete** by sliding $\odot \downarrow$ and turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.
- ▶ **Option 2:** search for an address book entry (▷ page 141).
- ▶ Select the list symbol to the right of the entry by sliding $\odot \rightarrow$ the COMAND controller and press \odot to confirm.
- ▶ Select **Delete** and press \odot to confirm. Irrespective of the option chosen, a prompt will appear.
- ▶ Select **Yes** or **No** and press \odot to confirm. If you select **Yes**, the entry will be deleted. If you select **No**, the process will be aborted.

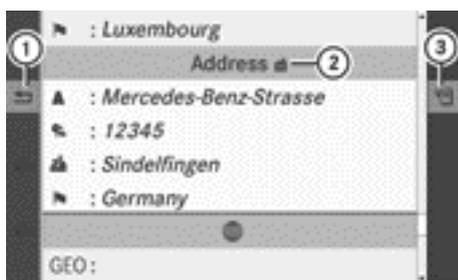

Displaying details for an address book entry

Selecting an entry

- ▶ Search for an address book entry and turn  the COMAND controller to select it in the selection list (▷ page 141).

or

- ▶ Select an address book entry by browsing (▷ page 140).
- ▶ In both cases, press . The detailed display appears.

PE2.87-6479-31

Detailed display for business details

- ① To go back to the previous menu
- ②  icon for business details
- ③ To call up options

Starting route guidance to an address

- ▶ Select the address data field by turning  the COMAND controller and press  to confirm.

The route to the destination address is calculated and route guidance starts (▷ page 56).

Calling a telephone number

- ▶ Select the phone number data field by turning  the COMAND controller and press  to confirm.

This initiates dialling and you can then make your call (▷ page 125).

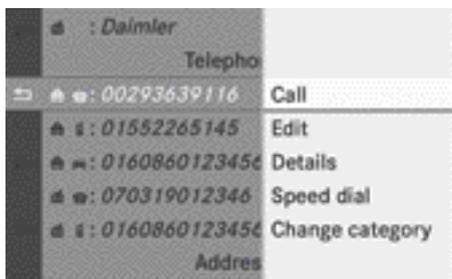

Showing the details of an address book entry

- ▶ Select the list symbol to the right of the entry by sliding  the COMAND controller and press  to confirm.
- ▶ Select **Details** and press  to confirm. The display is shown in full.
- ▶ **To close the detailed display:** press the  button.

Changing an address book entry

Changing an entry

- ▶ **Option 1:** search for an address book entry and turn  the COMAND controller to select it in the selection list (▷ page 141).
- ▶ Select the list symbol to the right of the entry by sliding  the COMAND controller and press  to confirm.
- ▶ Select **Edit** and press  to confirm.

PE2.87-6403-31

- ▶ **Option 2:** call up the detailed view for an address book entry (▷ page 142).
- ▶ Select the list symbol to the right of the entry by sliding  the COMAND controller and press  to confirm.
- ▶ Select **Edit** and press  to confirm. Irrespective of the option, the input menu containing data fields appears.
- ▶ Proceed as described under "Entering characters" in the "Entering characters in the address and phone books" section (▷ page 27).

Changing the category of a telephone number data field

- ▶ Display the detailed view for an address book entry (▷ page 142) and highlight the telephone number data field.
- ▶ Select the list symbol to the right of the entry by sliding the COMAND controller and press to confirm.
- ▶ Select **Change category** and press to confirm.
- ▶ Select a number category, e.g. **Home**.
- ▶ Select a telephone category, e.g. **Mobile**.
- ▶ If desired, select **Preferred** and press to confirm.
Depending on the previous state, switch the option on or off . The phone number is displayed as the first number in the phone book and can be dialled immediately.
- ▶ Select **Save** and press to confirm.
The new category is stored.

Calling a number stored in an entry

Conditions

The mobile phone must be inserted in the bracket or be connected via the Bluetooth® interface.

Option 1

- ▶ Displaying details for an address book entry (▷ page 142).
- ▶ Select the phone number data field by turning the COMAND controller and press to confirm.
The telephone makes the call. The display switches to telephone mode.

Option 2

- ▶ Displaying details for an address book entry
- ▶ Select the phone number data field by turning the COMAND controller.
- ▶ Select the list symbol to the right of the data field by sliding the COMAND controller and press to confirm.
- ▶ Select **Call** and press to confirm.
The telephone makes the call.

Storing the phone number as a speed dial number

- ▶ Displaying details for an address book entry
- ▶ Select the phone number data field by turning the COMAND controller.
- ▶ Select the list symbol to the right of the data field by sliding the COMAND controller and press to confirm.
- ▶ Select **Speed dial** and press to confirm.
You can now store the number in one of the ten speed dial presets.

Starting route guidance to an entry

Note

This function is available as soon as you have stored a destination in the destination memory (▷ page 93). COMAND also saves destinations in the address book together with all the data required for route guidance.

Option 1

- ▶ Search for an address book entry (▷ page 141) with the  icon and select it from the list.
- ▶ Displaying details for an address book entry (▷ page 142).
- ▶ Select the address data field by turning   the COMAND controller and press  to confirm.

Option 2

- ▶ Search for an address book entry (▷ page 141) with the  icon and select it from the list.
- ▶ Select the list symbol to the right of the entry by sliding  the COMAND controller and press  to confirm.
- ▶ Select **Navigate** and press  to confirm. Irrespective of the option chosen, route guidance starts.

Option 3

Route guidance can also be started for an address book entry without the  symbol. If the address data or designations do not match the digital map, COMAND prompts you to re-enter the address.

-  It is best to then store the new address under the address book entry. This will provide you with an address book entry that is suitable for navigation.
- ▶ Enter the destination address (▷ page 53).
- ▶ Select **Save** from the address entry menu and press  to confirm.
- ▶ Assigning a destination to an address book entry (▷ page 94).

Voice tags

Adding or changing a voice tag

You can enter voice tags via LINGUATRONIC (see the separate operating instructions). Once you have assigned a voice tag to an address book entry, you can vocally call up this entry and dial a phone number, for example. You can add one voice tag per address book entry.

- ▶ Search for an address book entry with or without a voice tag () symbol (▷ page 141).
- ▶ Select the list symbol to the right of the entry by sliding  the COMAND controller and press  to confirm.
- ▶ Select **Voice tag** and press  to confirm.
- ▶ Select **Add or Change** and press  to confirm. Subsequent operation is voice-controlled. LINGUATRONIC guides you through the dialogues.

Deleting a voice tag

- ▶ Search for an address book entry with a voice tag (▷ page 141).
- ▶ Select the list symbol to the right of the entry by sliding  the COMAND controller and press  to confirm.
- ▶ Select **Voice tag** and press  to confirm.
- ▶ Select **Delete** and press  to confirm. A deletion prompt appears.
- ▶ Select **Yes** or **No** and press the  button to confirm. If you select **Yes**, COMAND deletes the voice tag. If you select **No**, the process will be aborted.

Listening to a voice tag

- ▶ Search for an address book entry with a voice tag (▷ page 141).
- ▶ Select the list symbol to the right of the entry by sliding  the COMAND controller and press  to confirm.
- ▶ Select **Voice tag** and press  to confirm.
- ▶ Select **Listen** and press  to confirm. You hear the voice tag.

Storing a phone book entry from the mobile phone in the address book

You can use this function to store phone book entries:

- imported from a mobile phone
- from the memory card
- from the USB device
- via the Bluetooth® interface

in the address book. These entries are indicated in the phone book by the different symbols (▷ page 130).

- ▶ Search for an entry in the phone book on the mobile phone  (▷ page 130).
- ▶ Select the list symbol to the right of the entry by sliding  the COMAND controller and press  to confirm.
- ▶ Select **Save entry** and press  to confirm.

The **Saving procedure successful** message appears. The phone book entry is now saved as an address book entry.

The  icon is replaced by the  icon.

Importing contacts

Information and requirements

You can import contacts (vCards) from the memory card and a USB device into the address book, or receive vCards via Bluetooth®.

Depending on the source of the contact data, different requirements apply:

Source	Conditions
Memory card	The SD memory card must be inserted (▷ page 196) and must contain importable contact data.
USB device	The USB device is inserted in the USB port and contains importable contact data.

Requirements for receiving vCards via Bluetooth®

You can receive vCards from devices (e.g. from a PC) which support the sending of vCards via Bluetooth®.

It is not necessary to authorise the device in COMAND to do so.

Please bear the following in mind:

- Bluetooth® is activated in COMAND and on the Bluetooth® device (see operating instructions for the device).
- the Bluetooth® device can send vCards via Bluetooth® (see operating instructions for the device).
- the Bluetooth® device in the vehicle must be switched on.

Importing from the memory card or USB device

Entries imported from the memory card or from a USB device have the  symbol.

The following conditions must be fulfilled in order to import vCards:

- vCards (vcf files) may be located in the main directory or in folders. COMAND allows for a targeted selection of the corresponding directories.
- vCards must have the file extension ".vcf".

 A vCard can also contain several vCards.

COMAND supports vCards in versions 2.1 and 3.0.

- ▶ Select **Address book** in the address book or, if the telephone basic menu is shown, select **Telephone** by sliding $\odot \downarrow$ and turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm.

- ▶ Select **Import contacts** and press \odot to confirm.
A menu appears.

- ▶ Select **From the memory card** or **From the USB device** in the menu by turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm.

- ▶ Select **Add** or **Overwrite** and press \odot to confirm.
Add imports the entries from the memory card or USB device into the address book.

Overwrite imports the entries from the memory card or USB device and overwrites all entries in the address book with the $\left[\text{BT} \right]$ symbols. The previous entries are then no longer available.

After the contact data has been imported successfully, you will see a message to this effect. The address book or the respective telephone basic menu is displayed.

- i** You can select the **Overwrite** menu item if the address book already contains corresponding entries. A message notifies you when the address book is full.

Receiving vCards via Bluetooth®

Received vCards are identified by the $\left[\text{BT} \right]$ symbol.

- i** If you switch to another main function, e.g. navigation, while receiving vCards, the reception of vCards will be terminated.
- ▶ Select **Address book** in the address book or, if the telephone basic menu is shown, select **Telephone** by sliding $\odot \downarrow$ and turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm.

ing $\left[\odot \right]$ the COMAND controller and press \odot to confirm.

A menu appears.

- ▶ Select **Import contacts** and press \odot to confirm.

- ▶ Select **Received business cards** in the menu by turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm.

This interrupts the Bluetooth® connection between COMAND and your active mobile phone. COMAND is, however, ready to receive vCards from another Bluetooth® device (PC, mobile phone).

- ▶ Start the data transfer on the external Bluetooth® device (see the operating instructions for the device).

The number of vCards received is displayed.

- ▶ **To end reception:** press \odot or the $\left[\leftarrow \right]$ back button.

COMAND then reconnects with the mobile phone. The new contacts are contained in the address book with the **BT** addendum.

Deleting contacts

- ▶ Select **Address book** in the address book or, if the telephone basic menu is shown, select **Telephone** by sliding $\odot \downarrow$ and turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm.
A menu appears.

- ▶ Select **Delete contacts** and press \odot to confirm.

► Select one of the following options:

- [Internal contacts](#)
- [Contacts from storage media](#)
- [Received business cards](#)
- [Delete all](#)

A prompt corresponding to your selection appears.

► Select **Yes** or **No** and press  to confirm.

If you select **Yes**, the contacts are deleted according to your selection.

If you select **No**, the process will be aborted.

Mercedes-Benz Contact

Introduction

Mercedes-Benz Contact is ready to help at any time, e.g. if you have queries about your vehicle or if you need help in the event of a breakdown.

This function enables you to call the Mercedes-Benz Customer Centre, subject to a fee. All important vehicle data is sent at the same time so that you receive optimum support.

The following data is transmitted:

- the vehicle identification number
- the total distance recorder reading
- the vehicle position
- the telephone number

You can make use of the function with an operational mobile phone connected to COMAND via the Bluetooth® interface or convenience telephony.

i Please note that Mercedes-Benz Contact is a Mercedes-Benz customer service. In emergencies, always call the national emergency services first, using the standard national emergency service telephone numbers.

i Currently (as of June 2010), this service is available in the following European countries:

- Belgium
- Germany
- France
- United Kingdom
- Ireland
- Italy
- Luxembourg
- Netherlands
- Austria
- Poland
- Switzerland
- Slovakia
- Spain
- Czech Republic
- Hungary

Placing a call to the Mercedes-Benz Customer Centre

► Call up the COMAND phone book
(► page 128)

The "MB Contact" entry is the first entry in the COMAND phone book. The entry is highlighted.

You have two different means by which to contact the Mercedes-Benz Customer Centre:

► Press  the COMAND controller.

or

► This initiates a call. When the call is connected, a voice message prompts you to confirm the data transmission by entering the stated number via the COMAND control panel. After confirmation, COMAND sends the required vehicle data.

i Alternatively, you can initiate a call using the multifunction steering wheel (see the vehicle Owner's Manual).

Data transmission is shown in the display. This may take a moment. You can then select

the desired service and are connected with a specialist at the Mercedes-Benz Customer Centre.

Your Mercedes-Benz Service Centre can provide further information on Mercedes-Benz Contact, the range of services offered and on using the function.

Vehicle equipment

- i** These Operating Instructions describe all standard and optional equipment available for your vehicle at the time it was purchased. Please note that your vehicle may not be equipped with all features described.

General notes

Conditions for using COMAND Online and Internet access

COMAND Online and Internet access are only available for telephony via the Bluetooth® interface, not for convenience telephony.

In order to use the functions, the following conditions are necessary:

- the mobile phone supports the DUN Bluetooth® profile (**Dial-Up Networking**) and is connected to COMAND via the Bluetooth® interface (▷ page 114). The DUN Bluetooth® profile enables the mobile phone to establish a dial-up connection to the Internet.
 - you need a valid mobile service contract with a data option, which is used to calculate the associated connection costs.
 - the access data of the connected mobile phone must be set in COMAND (▷ page 151).
- i** You can obtain more detailed information about suitable mobile phones from your Mercedes-Benz Service Centre or on the Internet (<http://www.mercedes-benz.com/connect>).
 - i** If you use incorrect access data, additional costs may be incurred. This happens when you use details that are different from the contract or details from another contract/data package.

Connection difficulties while the vehicle is in motion

The connection may be lost if:

- there is insufficient GSM or UMTS network coverage in certain areas.
- you move from one GSM or UMTS transmitter/receiver area (GSM/UMTS cell) into another and no data channels are free.
- you use a SIM card which is not compatible with the network available.
- you are using a mobile phone with "Twin-card" and the mobile phone with the second SIM card is already logged into the network.

Function restrictions

You will not be able to use the mobile phone, will no longer be able to use the mobile phone, or you may have to wait before using it, in the following situations:

- when the mobile phone is switched off
- when the "Bluetooth®" function is switched off in COMAND
- when the "Bluetooth®" function is switched off on the mobile phone if you are using Bluetooth® interface telephony
- if the mobile phone is not logged into a mobile phone network
- if neither the mobile phone network nor the mobile phone allow simultaneous use of a phone and an Internet connection.

Roaming

When you are driving your vehicle in a different country and using the COMAND Online and Internet functions, you may incur additional costs (roaming fees). When you are in a different country, your SIM card must be enabled for data roaming. If your mobile phone network provider does not have a data roaming agreement with the roaming partner,

it may not be possible to establish an Internet connection.

Setting access data

Introduction

The Internet access data for your connected mobile can be obtained from your mobile phone network provider. The required setting for the Internet access data in COMAND is described below.

A selected/manually set mobile phone network provider applies for the connected mobile phone.

- i** Additional costs may incur if the incorrect access data (details that are different from the contract or details from another contract/data package) is set.
- i** When you are driving your vehicle in a different country and using the COMAND Online and Internet functions, additional costs (roaming fees) may incur.
- i** While initialising the mobile phone for the Internet connection, access data which is already on the mobile phone may be overwritten. You should therefore check the settings on the mobile phone (see the mobile phone operating instructions).
- i** Adjust the access data settings when the vehicle is stationary.

Selecting/setting Internet access data

Calling up the list of mobile phone network providers

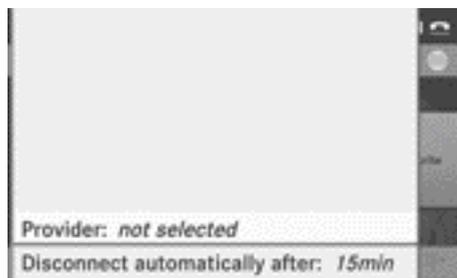

- ▶ Select the globe icon in the main function bar by sliding **↑** and turning **⌂** the COMAND controller and press **⏹** to confirm.
The carousel view appears.

- ▶ Select **Settings** by sliding **⊙** and turning **⌂** the COMAND controller and press **⏹** to confirm.

When you connect the mobile phone to COMAND for the first time (▷ page 114), there is no mobile phone network provider preset. **Provider:** is followed by the entry **not selected**.

If a mobile phone is already connected and a mobile phone network provider has been selected or manually set, their name appears here.

- ▶ Press **⏹** the COMAND controller.
The list of mobile phone network providers appears.

P82.87-6230-31

List of mobile phone network providers (empty)

You can now select predefined access data of the mobile phone network provider (option 1) or manually set the access data of the mobile phone network provider (option 2).

Option 1: selecting the access data of the mobile phone network provider

i The access data of the mobile phone network provider is selected once for the connected mobile phone.

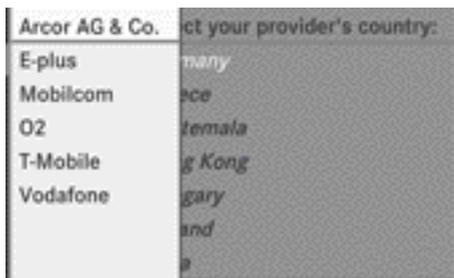

- ▶ Select **Search for providers** in the mobile phone network providers list (> page 152) by turning **⏏** the COMAND controller and press **⏏** to confirm. A list of countries appears.

P82.87-6236-31

- ▶ Select the country of your mobile phone network provider, e.g. **Germany**, and press **⏏** to confirm.

The list of available mobile phone network providers appears.

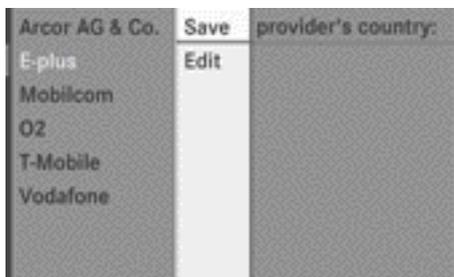

P82.87-6237-31

- i** You must set the access data of the mobile phone network provider who provides the SIM card or the associated data package (access settings) for the connected mobile phone. The access data remains the same when you are in a different country (roaming). The access data of another network is **not** selected.

There are mobile phone network providers who supply various access data (e.g. depending on the data package used).

- ▶ **The mobile phone network provider only has one access setting:** select the mobile phone network provider by turning **⏏** the COMAND controller and press **⏏** to confirm.

A menu appears.

P82.87-6238-31

- ▶ To check the preset access data before connection, select **Edit** and press **⏏** to confirm. The list of access data appears.

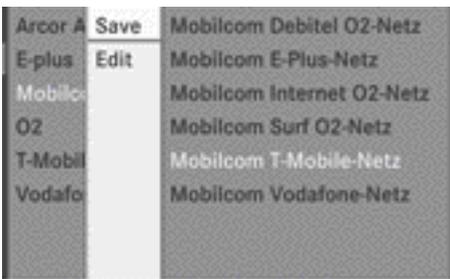

Editing the access data

- ▶ Proceed as described in "Making entries" (▷ page 155) in the "Manually setting the access data of the mobile phone network provider" section.

When you confirm the edited access data, the list of mobile phone network providers appears and displays the selected provider.

Access data is correct

- ▶ Press the  back button or select  and press  to confirm.
You can now accept the access data of the mobile phone network provider.
- ▶ Confirm **Save** by pressing .
The list of mobile phone network providers appears, the access data of the provider have been accepted.
- ▶ **The mobile phone network provider has several access settings:** if several access settings are displayed after selecting the mobile phone network provider, select the appropriate access setting by turning  the COMAND controller and press  to confirm.
A menu appears.

- ▶ To check the preset access data settings before connection, select **Edit** and press  to confirm.
The list of access data appears.

Editing the access data

- ▶ Proceed as described in "Making entries" (▷ page 155) in the "Manually setting the

access data of the mobile phone network provider" section.

When you confirm the edited access data, the list of mobile phone network providers appears and displays the selected provider.

Access data is correct

- ▶ Press the  back button or select  and press  to confirm.
You can now accept the access data of the mobile phone network provider.
- ▶ Confirm **Save** by pressing .
The list of mobile phone network providers appears, the access data of the provider have been accepted.

List of mobile phone network providers with the selected provider

The currently selected access settings (• dot in front of the entry) are used for the connected mobile phone.

- ▶ **To return to the carousel view:** press the  back button twice.
- or
- ▶ Press  the COMAND controller and then the  back button.

Option 2: manually setting the access data of the mobile phone network provider

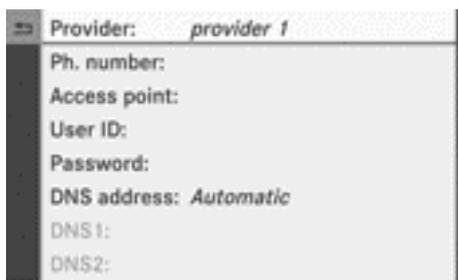

Calling up the list of access data

- ❗ The access data of the mobile phone network provider is set once for the connected mobile phone.

P82.87-6482-31

- Confirm **New provider** in the list of mobile phone network providers by pressing  the COMAND controller. The list of access data appears. The standard name **provider <x>** is automatically entered into the **Provider:** field. You can now make the entries.

P82.87-6231-31

List of access data (new provider)

Input field	Meaning
Provider:	Name of the provider, to be displayed in the list of mobile phone network providers. The name can be selected at will. The standard entry is provider <x> .
Ph. number:	Access number for establishing the connection. i The access number depends on the mobile phone used. For GSM/UMTS mobile phones, *99**1# is used as a standard.
Access point:	APN network access point (Access Point Name) You can obtain this information from your mobile phone network provider. i Entry is not necessary for all mobile phone network providers/mobile phones.
User ID:	The user identification can be obtained from your mobile phone network provider. i Entry is not necessary for all mobile phone network providers.
Password:	The password can be obtained from your mobile phone network provider. i Entry is not necessary for all mobile phone network providers.

Input field	Meaning
DNS address:	The DNS addresses (Domain Name Service) can be negotiated automatically or must be entered manually. The required information can be obtained from your mobile phone network provider. i Most mobile phone network providers support the Automatic function. If you selected the Manual option, you are usually required to enter a DNA address.
DNS 1: DNS 2:	Fields for entering the DNS server addresses manually. The address can be obtained from your mobile phone network provider.

Making entries

- ▶ **To enter the provider:** in the list of access data (▷ page 154) confirm the **Provider** input field by pressing . An input menu appears.

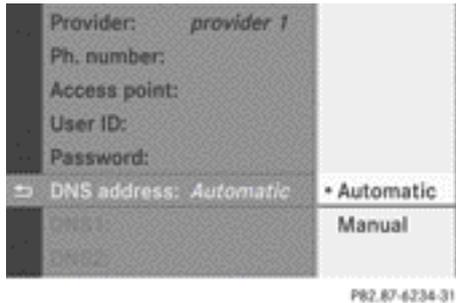

- ▶ Enter the provider. Instructions for entering characters using the controls can be found in the "Operating COMAND" section (▷ page 27).

- ▶ **To enter the phone number:** in the list of access data (▷ page 154), select the **Ph. number:** input field by sliding  or turning  the COMAND controller and press  to confirm. The input menu for the phone number appears.

- ▶ Enter the telephone number. Instructions for entering characters using the controls can be found in the "Operating COMAND" section (▷ page 27).
- ▶ **To enter the access data:** in the list of access data (▷ page 154) confirm the **Access point:** input field by pressing .
- ▶ Instructions for entering characters using the controls can be found in the "Operating COMAND" section (▷ page 27).
- ▶ **To enter the user ID:** in the list of access data (▷ page 154) confirm the **User ID:** input field by pressing .
- ▶ Instructions for entering characters using the controls can be found in the "Operating COMAND" section (▷ page 27).
- ▶ **To enter the password:** in the list of access data (▷ page 154) confirm the **Password:** input field by pressing .
- ▶ Instructions for entering characters using the controls can be found in the "Operating COMAND" section (▷ page 27).

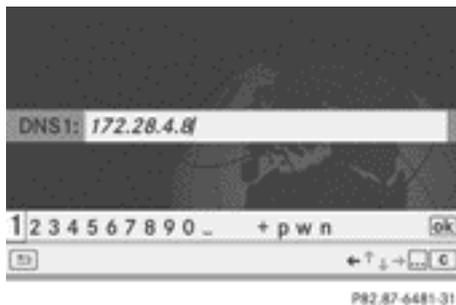

- **To set the DNS address:** in the list of access data (▷ page 154) confirm the **DNS address**: input field by pressing . The **•** dot in front of an entry indicates the current setting.

- Select **Automatic** or **Manual** with the COMAND controller and press  to confirm. **Automatic** negotiates the DNS addresses automatically. **Manual** uses the entries in DNS 1 and DNS 2.

Entering the example DNS

- After selecting **Manual**, select the **DNS1** input field with the COMAND controller and press  to confirm.
- For example, enter **172.28.4.81**. Instructions for entering characters using the controls can be found in the "Operating COMAND" section (▷ page 27).

Entering the DNS 1

Using previously set Internet access data for another mobile phone

If the access data is already available in the list of mobile phone network providers, you can use it for another mobile phone.

The following prerequisites are required for this:

- the mobile phone must be connected
 - the access data must apply to the mobile phone contract of the currently connected mobile phone
- Select a provider in the list of mobile phone network providers (▷ page 153) by turning  the COMAND controller and press  to confirm.
- After you select the provider, the list of mobile phone network providers is closed. The selected provider is entered.
- Slide  the COMAND controller to call up the carousel view.

Managing access data of the mobile phone network provider

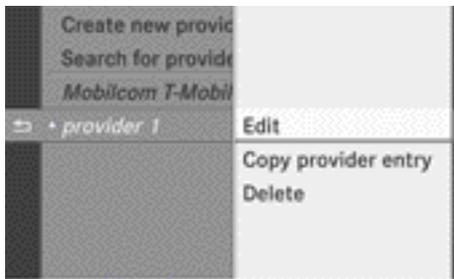

Overview

The access data of the mobile phone network provider can be:

- edited
 - copied, edited and accepted for a new provider name
 - deleted
- i** Changes that you make to the access data of a mobile phone network provider apply for all mobile phones that use this access data.

Editing the access data

- ▶ Select a provider in the list of mobile phone network providers (▷ page 153) by turning **Ⓜ** the COMAND controller.
- ▶ Select the symbol to the right of the entry by sliding **Ⓜ** the COMAND controller and press **Ⓜ** to confirm.

- ▶ Confirm **Edit** by pressing **Ⓜ**. The access data is displayed.
- ▶ Edit the access data. A description of the entry can be found in "Making entries" in the "Manually setting the access data of the mobile phone network provider" section (▷ page 155).

Copying, editing and saving access data under a new provider name

- ▶ Select a provider in the list of mobile phone network providers (▷ page 153) by turning **Ⓜ** the COMAND controller.
- ▶ Select the symbol to the right of the entry by sliding **Ⓜ** the COMAND controller and press **Ⓜ** to confirm.
- ▶ Confirm **Copy provider entry** by pressing **Ⓜ**. The access data is displayed.
- ▶ Edit the access data. A description of the entry can be found in "Making entries" in the "Manually setting the access data of the mobile phone network provider" section (▷ page 155).

Deleting access data of the mobile phone network provider

- ▶ Select a provider in the list of mobile phone network providers (▷ page 153) by turning **Ⓜ** the COMAND controller.
- ▶ Select the symbol to the right of the entry by sliding **Ⓜ** the COMAND controller and press **Ⓜ** to confirm.
- ▶ Confirm **Delete** by pressing **Ⓜ**. A prompt appears asking whether you wish to delete the access data.
- ▶ Select **Yes** or **No** and press **Ⓜ** to confirm. If you select **Yes**, the access data is deleted and the name of the provider is removed from the list of mobile phone network providers. If you select **No**, the process will be aborted.

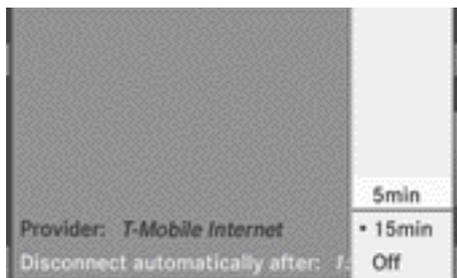

i When the Internet connection is active, you cannot edit or delete the access data of the currently set mobile phone network provider.

Selecting the length of time for automatic disconnection of the Internet

COMAND automatically disconnects the Internet after a preset time has elapsed during which neither COMAND Online nor the Internet have been used.

An active Internet connection is identified by the double arrows on the top right of the display.

- ▶ Select **Settings** in the carousel view (▷ page 151) by sliding **Ⓜ** and turning **Ⓜ** the COMAND controller and press **Ⓜ** to confirm.
- ▶ Select **Disconnect automatically after:** and press **Ⓜ** to confirm. The **•** dot indicates the current setting.

P82.87-6242-31

- ▶ Select **5 min**, **15 min** or **Off** and press to confirm.
Off switches the function off.

Establishing/ending a connection

Establishing the connection

- i** The conditions for establishing a connection are described in the "General notes" section (▶ page 150).
- ▶ **To establish the connection:** select the globe icon in the main function bar by sliding and turning the COMAND controller and press to confirm. The carousel view appears.
- ▶ Turn or slide the COMAND controller until the COMAND Online panel or a favourite are brought to the front, if these have been created (▶ page 180).

or

- ▶ Enter a URL (web address) (▶ page 174).

P82.87-6228-31

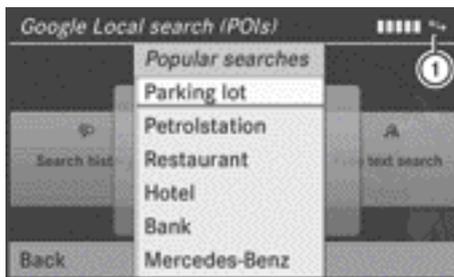

COMAND Online panel

P82.87-6316-31

Favourite (example)

- ▶ Press the COMAND controller. The Internet connection is established. An active Internet connection is identified with symbol . The example shows a menu in the Google™ POI search (▶ page 166).

P82.87-6516-31

- i** If a phone call is made at the same time as the active Internet connection, the symbol is displayed in . The Internet connection remains active depending on the mobile phone and mobile phone network used.

- ▶ **To cancel the connection:** while the connection is being established, confirm **Cancel** by pressing .

or

- ▶ Press the button on COMAND or the multifunction steering wheel.

P82.87-6510-31

Ending the connection

- ▶ Press the button on COMAND or the multifunction steering wheel.

or

- ▶ Select the scissors symbol on the bottom right of the carousel view and press to confirm.

- i** If the mobile phone Internet connection is cancelled, COMAND tries to reconnect. You should therefore always close the connection in COMAND or on the multifunction steering wheel.

Options

Introduction

You can select options for the following COMAND Online services:

- POI search
- weather display
- POIs download

You can reset the selected options to the default settings.

Calling up the options menu

- ▶ Select the globe icon in the main function bar by sliding and turning the

COMAND controller and press to confirm.

The carousel view appears.

- ▶ Bring the **COMAND Online** panel to the front by turning the COMAND controller and press to confirm.
- ▶ Select **Options** by sliding and turning the COMAND controller and press to confirm.

P82.87-6273-31

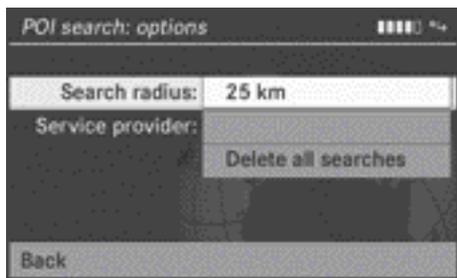

Options menu

Selecting options for the POI search

Overview

You can adjust the following features for the POI search:

- search radius
- service provider
- ▶ Select **Local search (POIs)** in the options menu by turning the COMAND controller and press to confirm.
The menu shows the current settings.

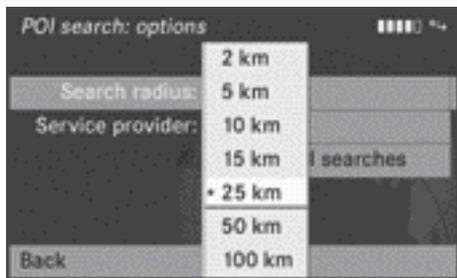

P82.87-6274-31

- ▶ **To exit the menu:** select **Back** by turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.

Setting the search radius

- ▶ Confirm the entry after **Search radius:** by pressing \odot .
The • dot indicates the currently selected search radius.

P82.87-6275-31

- ▶ Select an entry by turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.
The selected setting is accepted.

Selecting a service provider

- ▶ Select the entry after **Service provider:** by turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.
The • dot indicates the currently selected service provider.

i If the entry is greyed out, you cannot select the service provider.

- ▶ Select an entry and press \odot to confirm.
The selected service provider is accepted.

Deleting/saving search queries

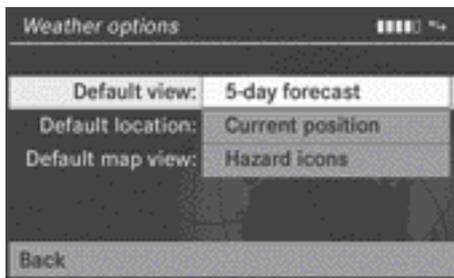

- ▶ Select the **Delete all searches** entry by turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.
The • dot indicates the current setting.
- ▶ Select an entry and press \odot to confirm.
The selected setting is accepted.

Selecting options for the weather display

Overview

You can adjust the following features for the weather display:

- default view (e.g. current weather)
- default location (e.g. current vehicle position)
- weather data for the map view (e.g. precipitation radar)
- ▶ Select **Weather** in the options menu (▶ page 159) by turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.
The menu shows the current settings.

P82.87-6278-31

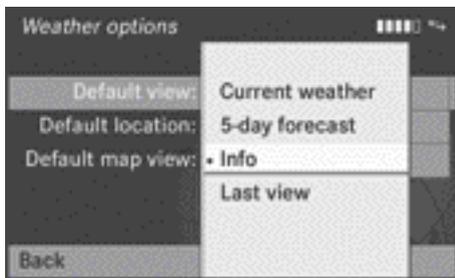

- ▶ **To exit the menu:** select **Back** by turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.

Setting the default view

You can specify which view is called up after activating the weather display (> page 169).

You can make the following settings:

- current weather
 - 5-day forecast
 - info
 - last view
- Confirm the entry after **Default view:** by pressing . The • dot indicates the currently selected default view.

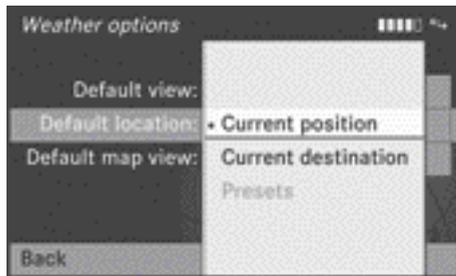

P82.87-6279-31

- Select an entry by turning  the COMAND controller and press  to confirm. The selected view is accepted.

Setting the default location

You can make the following settings:

- current position
 - current destination
 - presets
- Select the entry after **Default location:** (> page 160) by turning  the COMAND controller and press  to confirm. The • dot indicates the currently selected default location.

P82.87-6276-31

- Select an entry by turning  the COMAND controller and press  to confirm. The selected location is accepted.

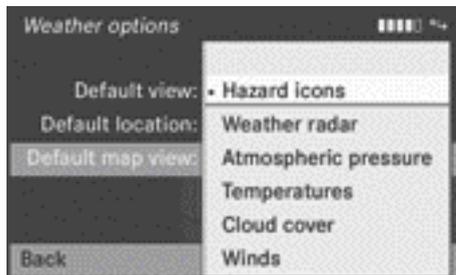

Selecting weather data for the map view

The weather map can display the following weather data:

- hazard reports (e.g. storms, slippery conditions)
- precipitation radar (e.g. rain, snow)
- atmospheric pressure conditions
- temperatures
- cloud cover
- wind direction and speeds

You can select one feature each for the map view.

- Select the entry after **Default map view:** (> page 160) by turning  the COMAND controller and press  to confirm. The • dot indicates the currently selected feature.

P82.87-6277-31

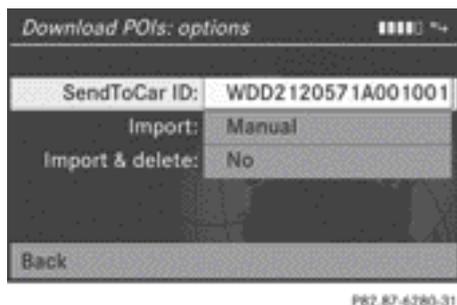

- ▶ Select an entry and press  to confirm. The selected feature is accepted.

Setting the options for the POIs download

Overview

You can make the following settings:

- specify the ID for the download
- specify the type of import
- delete/save POIs after they have been imported to the server
- ▶ Select **Download POIs** in the options menu (> page 159) by turning  the COMAND controller and press  to confirm. The menu shows the current settings.

- ▶ **To exit the menu:** select **Back** by turning  the COMAND controller and press  to confirm.

Specifying the ID for the download

You can choose between the vehicle identification number (SendToCar ID) and your e-mail address. The vehicle identification number is usually entered.

- ▶ Confirm the entry after **SendToCar ID:** (> page 162) by pressing . An input menu appears.

- ▶ Enter an e-mail address. Instructions for entering characters can be found in the "Entering characters in the phone book and address book" section (> page 27).
- ▶ After entry, select  and press  to confirm. The e-mail address is entered in the menu. An e-mail will be sent to your e-mail address shortly afterwards. You must confirm it within 48 h, as your current ID will otherwise continue to be used.
- ▶ To complete the settings, check your mailbox and follow the link in the e-mail.

Setting the type of import

You can choose between manual and automatic importing.

- ▶ Select the entry after **Import:** (> page 162) by turning  the COMAND controller and press  to confirm. The **•** dot indicates the current setting.
- ▶ Select **Manual** or **Automatic** and press  to confirm. The setting is accepted.

Deleting/saving POIs after they have been imported to the server

- ▶ Select the entry after **Import & delete:** (> page 162) by turning  the COMAND controller and press  to confirm. The **•** dot indicates the current setting.
- ▶ Select **Yes** or **No** and press  to confirm. The setting is accepted.

Yes deletes the POIs after importing to the server.

No does not delete the POIs on the server.

- Routes and destinations are automatically deleted on the server after seven days.

Resetting adjustments

- ▶ Select the globe icon in the main function bar by sliding $\uparrow \odot$ and turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm. The carousel view appears.
- ▶ Bring the **COMAND Online** panel to the front by turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm.
- ▶ Select **Options** by sliding $\odot \downarrow$ and turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm.
- ▶ Select **Reset** and press \odot to confirm. A prompt appears asking whether you really wish to reset.
- ▶ Select **Yes** or **No** and press \odot to confirm. If you select **Yes**, the settings are reset. If you select **No**, the process will be aborted.

Special destination search

Introduction

There are three options for the POI search:

- top search queries
- free text search
- all search queries

Calling up the POIs search menu

- ▶ Select the globe icon in the main function bar by sliding $\uparrow \odot$ and turning $\left[\odot \right]$ the

COMAND controller and press \odot to confirm.

The carousel view appears.

- ▶ Bring the **COMAND Online** panel to the front by turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm. The COMAND Online menu appears.
- ▶ Bring the **Google Local search (POIs)** panel to the front and press \odot to confirm.

- ▶ **To exit the menu:** select **Back** by sliding $\odot \downarrow$ and turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm.

Free text search

Entry restriction

It is only possible to enter a search term in the input menu when the vehicle is stationary.

Entering a search term

- ▶ Confirm **Free text search** in the POI search menu by pressing \odot . An input menu appears.

P82.87-6305-31

► **To enter using the character bar:** enter the search term. Instructions for entering characters using the character bar can be found in the "Entering characters in the phone book and address book" section (▷ page 28).

► **To enter characters using the number pad:** press the number keys in rapid succession.

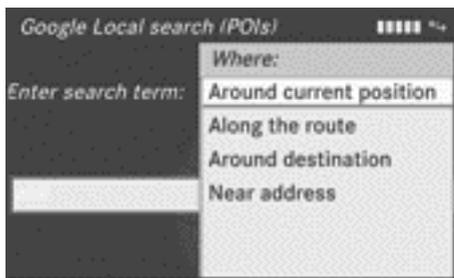

The character appears when the key is pressed. The first available letter is highlighted. Instructions for entering characters using the number pad can be found in the "Entering characters in navigation mode" section (▷ page 25).

P82.87-6305-31

► After entering the search term, select  by turning  the COMAND controller and press  to confirm.

A menu appears. Here, you can select where the POI search should begin.

P82.87-6307-31

► Select an entry by turning  the COMAND controller and press  to confirm.

COMAND searches for available POIs for the search term entered:

- near the current vehicle position
- along the calculated route
- near the destination
- near an address

► After selecting **Near address**, enter an address and confirm. Instructions for entering characters can be found in the "Entering characters in navigation mode" section (▷ page 25).

The search results are displayed.

P82.87-6308-31

Google™ search results (example)

Five search results per page are shown.

► **Scrolling forwards/backwards through pages:** select **Query results 6-10** in the

Selecting the search position

The POI is entered and confirmed.

example by turning **⏪** the COMAND controller and press **⏩** to confirm.
The entry **Back to results 1-5** is available on the next page for scrolling back-wards.

Using search results

- ▶ Select an entry in the list of search results by turning **⏪** the COMAND controller and press **⏩** to confirm.
A menu appears.

- ▶ **To show the detailed view:** confirm **Details** by pressing **⏩** the COMAND controller.
The address of the POI is displayed.

- ▶ **To use a POI as the destination:** select **Navigate to** by turning **⏪** the COMAND controller and press **⏩** to confirm.
You then switch to navigation mode and can start route calculation (▷ page 56).

- ❗ The POI is stored in the "Last destinations" memory at the same time

(▷ page 95). You can adopt the POI from this memory and save it permanently in the destination memory (▷ page 94).

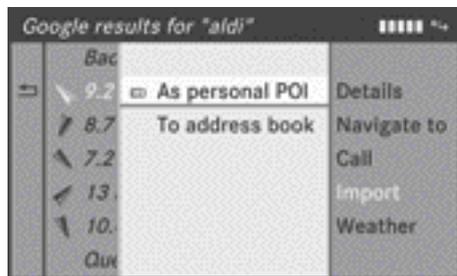

- ▶ **To call up a POI:** select **Call** with the COMAND controller and press **⏩** to confirm.
You then switch to the telephone function and make the call (▷ page 123).

- ❗ The menu item is greyed out if there is no phone number available.

- ▶ **To import a POI:** select **Import** with the COMAND controller and press **⏩** to confirm.
You can choose whether you want to save the POI as a personal POI on the SD memory card or in the address book.

- ❗ If there is no SD memory card in the slot, the **As personal POI** menu item is greyed out.

- ▶ Insert the SD memory card (▷ page 196).

- ▶ **To save as a personal POI:** confirm **As personal POI** by pressing **⏩** the COMAND controller.
The entry is saved as a personal POI on the SD memory card.

- ❗ You can use a personal POI in navigation mode for route calculation, see the "Personal POIs" section under "Selecting as the destination" (▷ page 74).

If the personal POI is saved on the SD memory, you can also use it for route calculation in another vehicle.

- ▶ **To save to the address book:** select **To address book** by turning **⏏** the COMAND controller and press **⏏** to confirm. The entry is stored in the address book.
- ▶ **To display the weather data:** select **Weather** by turning **⏏** the COMAND controller and press **⏏** to confirm. The weather data is displayed at the POI location (▷ page 169).

Top search queries

This function allows you to search using predefined search criteria.

P82.87-6312-31

- ▶ Bring **Popular searches** in the POI search menu to the front by turning **⏏** the COMAND controller and press **⏏** to confirm. A menu displays the available search criteria.

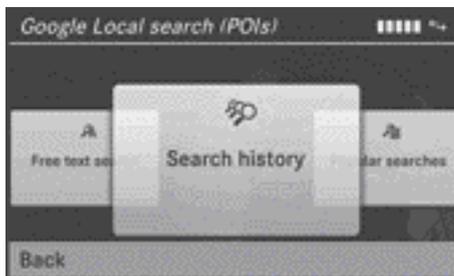

P82.87-6313-31

- ▶ Select the search criteria and press **⏏** to confirm.
- ▶ Proceed as described in the "Selecting the search position" section (▷ page 164).

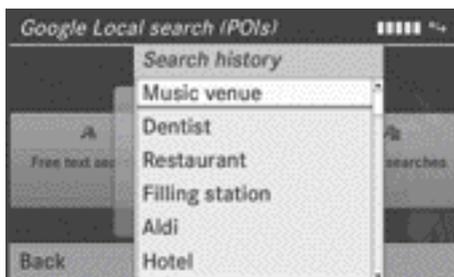

All search queries

This function offers you all the previous search queries.

P82.87-6314-31

- ▶ Bring **Search history** in the POI search menu to the front by turning **⏏** the COMAND controller and press **⏏** to confirm. The previous search queries are displayed.

P82.87-6315-31

- ▶ Select the search criteria and press **⏏** to confirm.
- ▶ Proceed as described in the "Selecting the search position" section (▷ page 164).

Downloading special destinations

Introduction

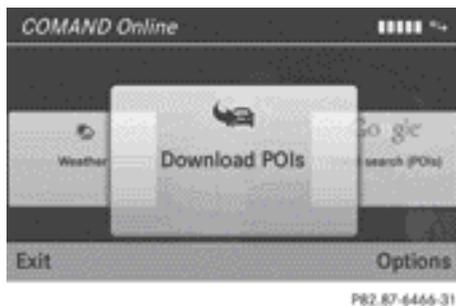

You can send POIs from Google™ maps to the server and download these via the COMAND Online POIs download. POIs are routes or destinations, special destinations and geo-coordinates. You can use POIs for route guidance and save them for further use.

Step 1: sending POIs to the server

- ▶ Call up the website for Google™ maps on the Internet.
 - ▶ Select a POI.
 - ▶ Select "Mercedes-Benz" as the company entry.
 - ▶ Select the identification for the download (e-mail address or vehicle identification number).
- i** Instructions for setting the identification can be found in the "Setting the options for the POI download" section (▷ page 162).
- ▶ Confirm "Send" on the Google™ maps website.
The POIs are sent to the server.

Step 2: downloading POIs from the server

- ▶ Select the globe icon in the main function bar by sliding **↑** and turning **↻** the COMAND controller and press **⏵** to confirm.
The carousel view appears.
- ▶ Bring the **COMAND Online** panel to the front by turning **↻** the COMAND controller and press **⏵** to confirm.
The COMAND Online menu appears.
- ▶ Bring the **Download POIs** panel to the front.

With **Exit** you quit the POIs download.

With **Options** you set the options for the POI download (▷ page 162).

- ▶ Confirm the **Download POIs** panel by pressing **⏵**.
Existing POIs are downloaded from the server and displayed in a list. Entries from the server are identified by the **@** symbol.

List with one route and two destination entries

You can download up to 20 routes and 50 destinations, POIs or geo-coordinates and display them in a list. When you download more navigation information, the oldest entries are deleted.

- i** The POIs sent from Google™ maps to the server are automatically deleted from there after seven days.

Step 3: using POIs**Calling up the menu**

- ▶ Select an entry in the list by turning  the COMAND controller and press  to confirm. A menu appears.

**Displaying details**

- ▶ Confirm **Details** in the menu by pressing  the COMAND controller. The route or destination is displayed.

Example of a route with a start and destination

Example of a destination address

- ▶ **To call up a POI:** confirm the entry by pressing .

i You can use this function when a mobile phone is connected (▶ page 114) and the destination address includes a phone number.

Using a POI as the destination

- ▶ Select **Navigate to** in the menu by turning  the COMAND controller and press  to confirm. You then switch to navigation mode and can start route calculation (▶ page 56).

i The POI is stored in the "Last destinations" memory at the same time (▶ page 95). You can take the POI from this memory and save it permanently in the destination memory (▶ page 94).

Importing POIs

When importing, you can choose whether you want to save the POI as a personal POI on the SD memory card or in the address book. You can only save routes as personal POI, but not in the address book.

- ▶ Select **Import** in the menu with the COMAND controller and press  to confirm.

i If there is no SD memory card in the slot, the **As personal POI** menu item is greyed out.

- ▶ Insert the SD memory card (▷ page 196).
- ▶ **To save as a personal POI:** confirm **As personal POI** by pressing  the COMAND controller.
The entry is saved as a personal POI on the SD memory card.

i You can use a personal POI in navigation mode for route calculation (▷ page 74).

You can also use a personal POI in another vehicle for route calculation.

- ▶ **To save to the address book:** select **To address book** by turning  the COMAND controller and press  to confirm.
The entry is stored in the address book.

Deleting POIs

- ▶ Select an entry in the list by turning  the COMAND controller and press  to confirm.
- ▶ Select **Delete** and press  to confirm.
A prompt appears asking whether you wish to delete the POI.
- ▶ Select **Yes** or **No** and press  to confirm.
If you select **Yes**, the POI is deleted.
If you select **No**, the process will be aborted.

Weather

Introduction

COMAND can receive weather forecasts anywhere in the world via online connection and display it in an information chart (current day, 5-day forecast) or in the weather map.

The weather map can display the following weather data with symbols:

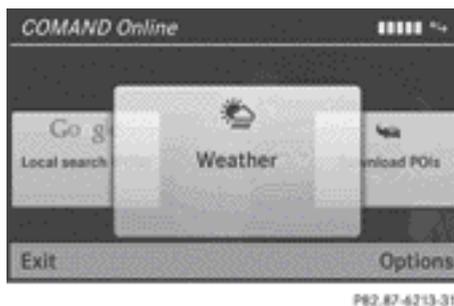

- hazard reports (e.g. storms, slippery conditions)
- precipitation radar (e.g. rain, snow)
- atmospheric pressure conditions
- temperatures

- cloud cover
- wind direction and speeds

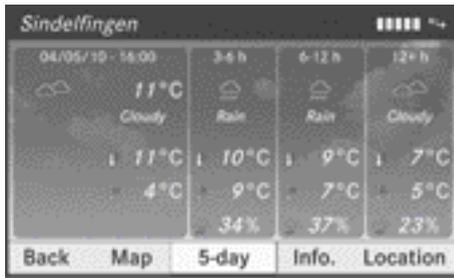

Switching the weather display on/off (COMAND Online)

Switching on

- ▶ Select the globe icon in the main function bar by sliding  and turning  the COMAND controller and press  to confirm.
The carousel view appears.
- ▶ Turn  the COMAND controller until **COMAND Online** is brought to the front and press  to confirm.
The carousel view for COMAND Online appears.

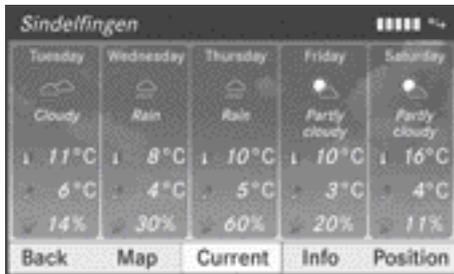

- ▶ Turn  the COMAND controller until **Weather** is brought to the front and press  to confirm.
The information chart displays the current weather in the previously selected location (▷ page 170), in the example, the current vehicle position.

P82.87-6214-31

You see the following information:

- the time of the current weather report
 - the current temperature
 - information on the weather (e.g. cloudy, rain)
 - the maximum daytime temperature
 - the minimum daytime temperature
 - the probability of rain
 - the forecast for the current day (three time intervals)
- **To switch to a five-day forecast:** confirm **5-day** by pressing .
- The information chart displays the forecast for the next five days in the currently selected location.

P82.87-6215-31

- **To return to the current weather information:** confirm **Current** by pressing .

Switching off

- Press the button.

or

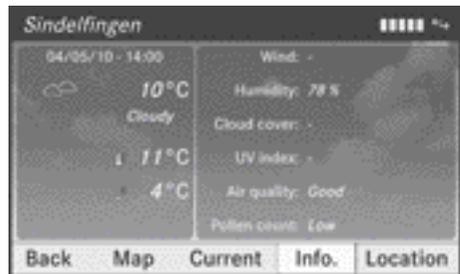

- Select **Back** by turning the COMAND controller and press to confirm. Irrespective of the option chosen, the carousel view will appear.

Displaying additional information

In addition to the current temperatures, you can also display information such as humidity and air quality (if the information is available).

- Select **Info** in the information chart by turning the COMAND controller and press to confirm.

The information chart displays information for the selected location.

P82.87-6216-31

Selecting the location

Introduction

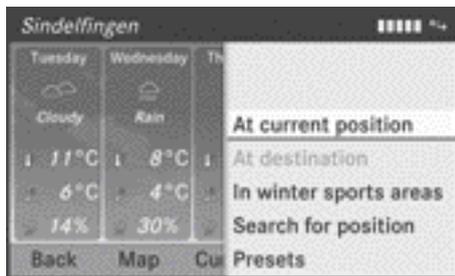

You can select the following options for the weather forecast:

- the current vehicle position
- the destination
- a winter sports area
- a location anywhere in the world

You can select the location in the information chart (option 1) or in the map (option 2). Weather information is supplied by the nearest weather station.

Option 1: selecting the location in the information chart

- ▶ Select **Position** in the information chart by turning  the COMAND controller and press  to confirm.
A menu appears.

P82.87-4217-31

- ▶ **To select the current vehicle position:** confirm **Current position** by pressing .
- ▶ **To select the destination:** select **At destination** in the menu by turning  the COMAND controller and press  to confirm.

i You can select **At destination** if the route has been calculated (▷ page 56). The menu item is otherwise greyed out.

- ▶ **To select a winter sports area:** select **In winter sports areas** in the menu and press  to confirm.
A list of countries appears.

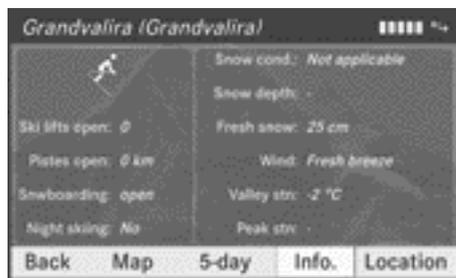

P82.87-4218-31

- ▶ Select a country, e.g. **ANDORRA** and press  to confirm.
The available winter sports areas are displayed.

P82.87-4219-31

- ▶ Select a winter sports area from the menu and press  to confirm.
The information chart shows information on:
 - type of skiing
 - snow conditions
 - temperatures

P82.87-4220-31

- ▶ **To select the location:** select **Search area** in the menu by turning  the COMAND controller and press  to confirm.
An input menu appears.

P82.87-6221-31

- ▶ Enter the search area. Instructions for entering characters can be found in the "Entering characters in navigation mode" section (▷ page 25).
The information chart with the weather forecast appears when the search area has been entered.

Entry	Example
Postcode	10117
City	Berlin
Address	Unter den Linden
Airport code	TXL (Tegel Airport)

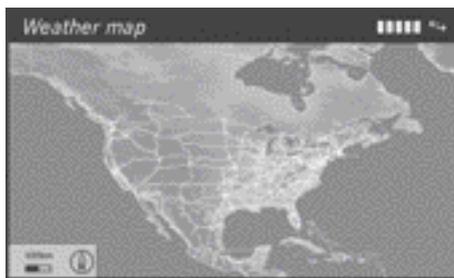

Option 2: selecting the location in the weather map

- ▶ Call up the weather map and move to the desired location (▷ page 172).
- ▶ Press the COMAND controller.
The menu bar is shown.
- ▶ Press the COMAND controller again and confirm **Display weather**.
The information chart displays the current weather for the selected location.

Weather map

Calling up the weather map

- ▶ Select **Map** in the information chart by turning the COMAND controller and press to confirm.
The map appears in a scale of 20 km.

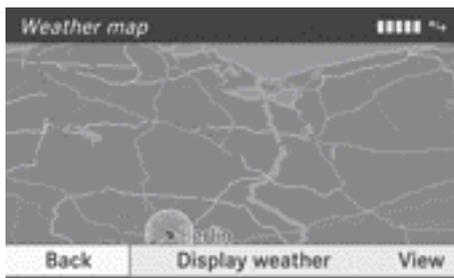

P82.87-6223-31

- ▶ **To move the weather map:** slide the COMAND controller to display the crosshair.
- ▶ Slide or the COMAND controller.
The weather map moves in the corresponding direction under the crosshair.
- ▶ **To change the map scale:** as soon as you turn the COMAND controller, the scale bar appears.
- ▶ Turn until the desired scale is set.

Data is downloaded again from the server for these functions which may delay the map being displayed.

Showing/hiding the menu in the weather map

- ▶ **To show:** press the COMAND controller in the weather map.

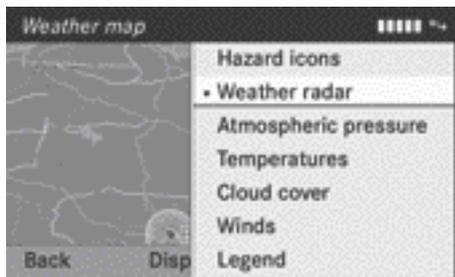

P82.87-6224-31

- ▶ **To hide:** slide up the COMAND controller.

Switching the weather information display in the map on/off

- ▶ Display the menu in the weather map (▷ page 172).
- ▶ Select **View** by turning  the COMAND controller and press  to confirm.

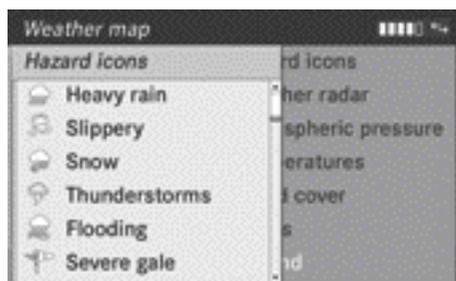

P82.87-4225-31

Weather characteristic	Display in the map
Hazard icons	Displays warnings, legend; see example (▷ page 173)
Weather radar	Displays the rain radar as a coloured area on the map, legend; see example (▷ page 173)
Atmospheric pressure	Displays air pressure with isobars and as a coloured area on the map
Temperatures	Displays the temperatures
Cloud cover	Displays the clouds
Winds	Displays wind direction with an arrow and wind speed with colouring

- ▶ Select a weather characteristic by turning  the COMAND controller and press  to confirm.
The • dot indicates which weather characteristic is currently displayed on the map. You can select one weather characteristic at a time.

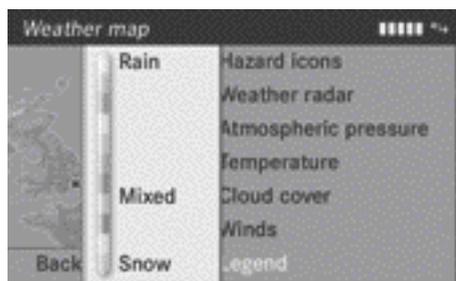

Legend

- ▶ Display the menu on the weather map (▷ page 172).
- ▶ Select **View** by turning  the COMAND controller and press  to confirm.
- ▶ Select **Legend** and press  to confirm.
The legend is displayed in accordance with the currently selected weather characteristic.

P82.87-4226-31

Legend for warnings

P82.87-4227-31

Legend for precipitation radar

Changing to the information chart

- ▶ Display the menu in the weather map (▷ page 172).
- ▶ Select **Display weather** and press to confirm.

Memory functions

Storing a location in the memory

You can save locations that are called up frequently in ten preset positions (0, 1 - 9).

- ▶ Select the location (▷ page 170).
- ▶ Press and hold a number key.
When the location is saved, the number of the selected preset comes before the name of the place in the caption.

Selecting a location from the memory

- ▶ **Quick selection:** when the weather display (COMAND Online) is switched on and an entry is available, press a number key, e.g. .
The information chart appears and displays the weather information.
- ▶ **From the weather memory:** select **Position** in the information chart by turning the COMAND controller and press to confirm.
- ▶ Select **Presets** and press to confirm.
- ▶ Select a preset position that has an entry by turning the COMAND controller and press to confirm.
The information chart appears and displays the weather information.

Internet

Calling up a website

Calling up the carousel view

- ▶ Select the globe icon in the main function bar by sliding and turning the COMAND controller and press to confirm.
The carousel view appears.

P62.67-6484-31

You can now enter a web address (URL) (option 1) or select it in the carousel view (option 2).

To select in the carousel view, you must first create favourites (▷ page 180).

Option 1: entering the URL

You can enter the web address (URL) using either the character bar or the number keypad.

- ▶ Select **Enter URL** by sliding and turning the COMAND controller and press to confirm.
An input menu appears.

P62.67-6317-31

- ▶ **To enter using the character bar:** enter the URL in the input line.

Instructions for entering characters can be found in the "At a glance" chapter (▷ page 28).

As soon as the first letter has been entered in the input line, a list appears below it. The list shows web addresses which begin with the letters you have entered and web addresses which have already been called up.

The list is empty the first time you call it up.

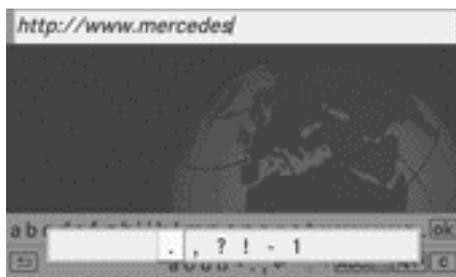

P82.87-4485-31

- ▶ **To enter characters using the number pad:** press the number keys in rapid succession.

The character appears when the key is pressed. The first available letter is highlighted.

Detailed instructions for entering characters can be found in the "At a glance" section (▷ page 26).

P82.87-4319-31

- ▶ After entering the web address (URL), select the  symbol by turning  or

sliding   the COMAND controller and press  to confirm.

The website is called up.

- ▶ **To select a web address in the list:** slide   the COMAND controller in the input menu with the character bar. The list is activated.

P82.87-4318-31

- ▶ Select the web address by turning   or sliding   the COMAND controller and press  to confirm. The web address is entered in the input line.
- ▶ Press  the COMAND controller. The website is called up. The **Establishing data connection to <provider name>...** message appears.

Option 2: selecting favourites

You must create at least one favourite in the carousel view for this function (▷ page 180).

P82.87-4316-31

- ▶ In the carousel view, bring a favourite to the front by turning   or sliding   the

COMAND controller and press  to confirm.

The website is called up.

PR2.87-6320-31

Navigating the website

Overview

Step	Activity
▶ Turn  the controller.	Navigates from one item that can be selected (e.g. link, text field or selection list) to the next and highlights the respective element on the website.
Sliding the controller: ▶ Left or right  ▶ Up or down  ▶ Diagonally 	Moves the pointer on the page.
▶ Press  the controller.	Calls up the menu or opens the selected item.
▶ Press the  button.	Calls up the previous page.
▶ Press the  button.	Closes the Internet browser or the current window, if there are several open.

Examples

Highlighting an item that can be selected

- ▶ Turn  the COMAND controller.
A button is highlighted in the example.

Entering text

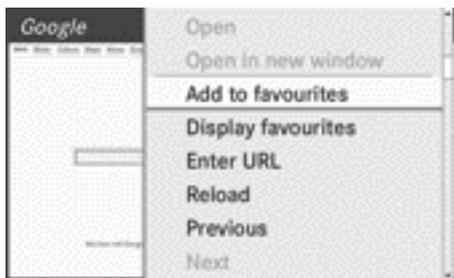

- ▶ Select an input line by turning  the COMAND controller and press  to confirm.
The character bar appears.

- ▶ Enter the text using the character bar or the number keypad.
Instructions for entering characters can be found in the "At a glance" section:
- Entering characters using the character bar (▷ page 28)
 - Entering characters using the number keypad (▷ page 26)
- ▶ If the text has been entered, select the  icon by turning  the COMAND controller and press  to confirm.
The text has now been entered.

Next

Calls up the next website.

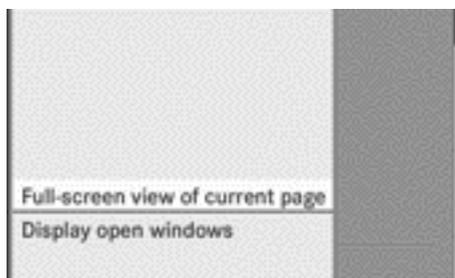

- ▶ Select **Next** by turning or sliding the COMAND controller and press to confirm.

View

You can use this function to:

- position a selection window on websites that are larger than the display
 - select a window that is already open.
 - ▶ Select **View** by turning or sliding the COMAND controller and press to confirm.
- or
- ▶ Press the key on the number keypad.

- ❗ You cannot use the key if a phone call is being made.

P82.87-6327-31

- ▶ **To position the selection window:** confirm **Full-screen view of current page** by pressing the COMAND controller. A selection window appears on the website.

P82.87-6328-31

- ▶ Slide $\leftarrow\rightarrow$, $\uparrow\downarrow$ or $\left\{\begin{smallmatrix} \uparrow \\ \downarrow \end{smallmatrix}\right\}$ the COMAND controller and position the selection window on the website.
- ▶ Press \odot the COMAND controller. The selected section is enlarged.
- ▶ **To display and select open windows:** select **Display open windows** by turning $\left\{\begin{smallmatrix} \uparrow \\ \downarrow \end{smallmatrix}\right\}$ or sliding $\uparrow\downarrow$ the COMAND controller and press \odot to confirm. The carousel view appears.

P82.87-6329-31

- ▶ Press \odot the COMAND controller. The website is displayed.

Link details

Displays the complete web address of the selected link (URL).

- ▶ Select **Link details** by turning $\left\{\begin{smallmatrix} \uparrow \\ \downarrow \end{smallmatrix}\right\}$ or sliding $\uparrow\downarrow$ the COMAND controller and press \odot to confirm. The URL appears.
- ▶ Press \odot the COMAND controller and close the display.

Settings

The settings are described in a separate section (\triangleright page 183).

Close active window

- ▶ Select **Close active window** by turning $\left\{\begin{smallmatrix} \uparrow \\ \downarrow \end{smallmatrix}\right\}$ or sliding $\uparrow\downarrow$ the COMAND controller and press \odot to confirm.

or

- ▶ Press the \boxed{c} button to the right of the COMAND controller.

i You cannot use the \boxed{c} button if a phone call is being made.

Exit

- ▶ Select **Exit** by turning $\left\{\begin{smallmatrix} \uparrow \\ \downarrow \end{smallmatrix}\right\}$ or sliding $\uparrow\downarrow$ the COMAND controller and press \odot to confirm. The Internet browser is closed. If other windows are opened in the background, another prompt appears.

Favourites

Introduction

Favourites are frequently visited websites.

You can create a favourite in the carousel view (option 1) or in the menu (\triangleright page 178) using the **Add to favourites** menu item (option 2).

Before creating a favourite in the carousel view, you must first close active connections (\triangleright page 159).

You can select and edit favourites that you have created.

Creating favourites

Option 1: creating in the carousel view

- ▶ Call up the carousel view (\triangleright page 174).

- ▶ Bring the **Create new favourite** panel to the front by turning **[OK]** or sliding **←○→** the COMAND controller.

P82.87-6483-31

- ▶ Press **[OK]** the COMAND controller. An input menu appears.

P82.87-6486-31

- ▶ Enter the web address (URL) and name using either the character bar or the number keypad.

Instructions for entering characters can be found in the "At a glance" section:

- Entering characters using the character bar (▷ page 28)
- Entering characters using the number keypad (▷ page 26)

- ▶ Select the **[OK]** icon and press **[OK]** to confirm. The favourite has been created.

Option 2: adding to favourites

- ▶ When a website is displayed, call up the menu (▷ page 178).
- ▶ Select **Add to favourites** in the menu and press **[OK]** to confirm.

Selecting favourites

- ▶ Call up the carousel view (▷ page 174).
- ▶ Select the favourite in the carousel view by turning **[OK]** or sliding **←○→** the COMAND controller and press **[OK]** to confirm. The favourite is opened.

Editing favourites

In the carousel view

- ▶ Select (▷ page 174) **Edit** in the carousel view by sliding **↓○** and turning **[OK]** the COMAND controller and press **[OK]** to confirm. An input menu appears.

P82.87-6331-31

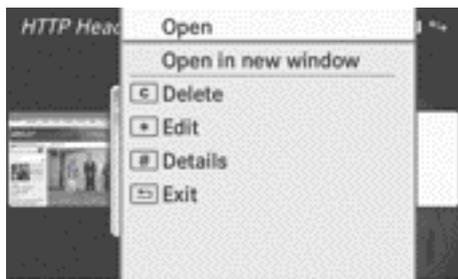

- ▶ Enter the web address (URL) and name using either the character bar or the number keypad.

Instructions for entering characters can be found in the "At a glance" section:

- Entering characters using the character bar (▷ page 28)
- Entering characters using the number keypad (▷ page 26)

In the favourites menu

- ▶ Select **Display favourites** in the menu (▷ page 178) by turning **[OK]** the COMAND controller and press **[OK]** to confirm. The favourite is displayed.
- ▶ Press **[OK]** the COMAND controller. The favourites menu appears.

P82.87-6330-31

Favourites menu

- ▶ Select **Edit** by turning $\left\{ \begin{smallmatrix} \uparrow \\ \downarrow \end{smallmatrix} \right\}$ or sliding $\uparrow \odot \downarrow$ the COMAND controller and press \odot to confirm.

or

- ▶ Press the $\boxed{*}$ button on the number keypad.
An input menu appears.

P82.87-6331-31

- ▶ Enter the web address (URL) and name using either the character bar or the number keypad.

Instructions for entering characters can be found in the "At a glance" section:

- Entering characters using the character bar (▷ page 28)
- Entering characters using the number keypad (▷ page 26)

Other functions in the favourites menu

Open

Opens the current favourites.

- ▶ Confirm **Open** in the favourites menu (▷ page 182) by pressing \odot the COMAND controller.

Open in new window

Opens the current favourites in a new window.

- ▶ Select **Open in new window** in the favourites menu (▷ page 182) by turning $\left\{ \begin{smallmatrix} \uparrow \\ \downarrow \end{smallmatrix} \right\}$ or sliding $\uparrow \odot \downarrow$ the COMAND controller and press \odot to confirm.

Calling up details

- ▶ Select **Details** in the favourites menu (▷ page 182) by turning $\left\{ \begin{smallmatrix} \uparrow \\ \downarrow \end{smallmatrix} \right\}$ or sliding $\uparrow \odot \downarrow$ the COMAND controller and press \odot to confirm.

or

- ▶ Press the $\boxed{\#}$ button on the number keypad.
The detailed display appears.

Exit

- ▶ Select **Exit** in the favourites menu (▷ page 182) by turning $\left\{ \begin{smallmatrix} \uparrow \\ \downarrow \end{smallmatrix} \right\}$ or sliding $\uparrow \odot \downarrow$ the COMAND controller and press \odot to confirm.

or

- ▶ Press the $\boxed{\leftarrow}$ button to the left of the COMAND controller.
The menu closes.

Deleting favourites

In the carousel view

- ▶ Select **Delete** in the carousel view (▷ page 174) by sliding $\uparrow \odot$ and turning $\left\{ \begin{smallmatrix} \uparrow \\ \downarrow \end{smallmatrix} \right\}$ the COMAND controller and press \odot to confirm.

A query appears.

- ▶ Select **Yes** and press \odot to confirm.
The favourite is deleted.

If you select **No**, the process will be aborted.

In the favourites menu

- ▶ Select **Delete** in the favourites menu (▷ page 182) by turning **Ⓢ** or sliding **↑Ⓢ↓** the COMAND controller and press **Ⓢ** to confirm.

or

- ▶ Press the **[c]** button to the right of the COMAND controller.
The favourite is deleted.

Settings

- ▶ Call up the menu (▷ page 178).
- ▶ Select **Settings** by turning **Ⓢ** or sliding **↑Ⓢ↓** the COMAND controller and press **Ⓢ** to confirm.

P82.87-6332-31

You can activate/deactivate the following settings:

- **Download images**

It may take some time to download the contents of websites that contain a large amount of images. Therefore, it may be useful to deactivate this option.

- **Block popups**

Popups are windows (usually with advertisements) which are displayed automatically when you call up a website. You can block these displays.

- **Enable Javascript**

Javascript makes it possible to display and interact with dynamic content on the website.

- **Enable cookies**

Some websites save information in small text files (cookies) in COMAND. You can determine whether cookies may be stored.

- ▶ Select a setting by turning **Ⓢ** the COMAND controller and press **Ⓢ** to confirm.
Switch the setting on or off .

You can make other settings:

- **Character size**

You can select the font size which is used when displaying the website.

- **Character code**

You can select a different character set here, e.g. if the characters of a website appear distorted.

- **Delete private data**

Deletes data which has been saved by the browser during Internet use.

- ▶ **i** If you change the settings, the websites may not be displayed correctly.

- ▶ Select **Character size** or **Character code** by turning **Ⓢ** or sliding **↑Ⓢ↓** the COMAND controller and press **Ⓢ** to confirm.

A menu appears.

- ▶ Select a setting using the COMAND controller and press **Ⓢ** to confirm.

- ▶ Select **Delete private data** and press **Ⓢ** to confirm.

A menu appears.

P82.87-6494-31

Option	Function
All	Deletes all private data.
Cache	Deletes data in the temporary storage.
Cookies	Deletes cookies that are created by websites which you have called up.
Websites visited	Deletes all websites visited (path).
<input checked="" type="checkbox"/> Delete all data on exiting	If this function is activated <input checked="" type="checkbox"/> , all private data is deleted when you exit the Internet browser.

- ▶ Select the setting by turning or sliding the COMAND controller and press to confirm.
The • dot in front of an entry indicates which setting is active.

or

- ▶ Select **Delete all data on exiting** and press to confirm.
Switch the setting on or off .

i These settings are deleted when you reset COMAND (▷ page 48).

Vehicle equipment	186
Radio mode and DAB radio mode	186
Audio CD/DVD and MP3 mode	192
Music search	205
MUSIC REGISTER	208
Operation with Bluetooth® audio	212
Media Interface mode	218
Audio AUX mode	223

Vehicle equipment

- i** This manual describes all the standard and optional equipment of your vehicle which was available at the time of purchase. Country-specific differences are possible. Bear in mind that your vehicle may not feature all functions described here. This also refers to safety-related systems and functions.

Radio mode and DAB radio mode

Introduction

- i** Portable electronic devices in the vehicle may seriously impair radio and DAB radio reception.

DAB (Digital Audio Broadcasting) is an optimised digital transmission standard designed for the mobile reception of radio transmissions. Several programmes are combined into so-called ensembles and transmitted on a single frequency. Digital radio stations can be transmitted nationally, regionally or locally.

Some stations only transmit programmes at certain times. If you have selected a station that is subsequently removed from the ensemble, it will no longer be received. You will continue to receive the other programmes in the ensemble. You must then select another programme.

- i** DAB cannot be received everywhere in Europe.

Switching on radio mode and DAB radio mode

Option 1

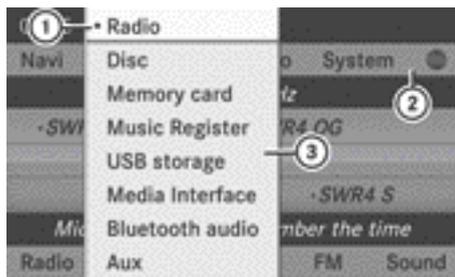

- ▶ Press the **RADIO** function button.
The radio or DAB radio display appears.
Radio mode: you will hear the last station played on the last waveband selected.

DAB radio mode: you will hear the last station played from the last ensemble selected.

- i** Repeatedly pressing the **RADIO** function button switches between the FM, MW, SW and LW wavebands in that order and then calls up DAB radio mode. Pressing the button again takes you back to FM radio mode.

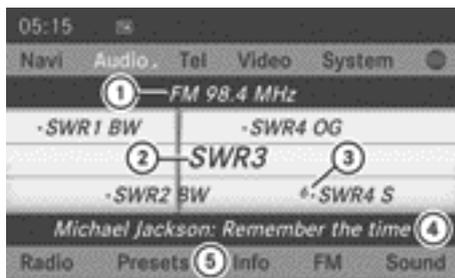

Option 2

- ▶ Select **Audio** in the main function bar by sliding **↑** and turning **⌚** the COMAND controller and press **⌚** to confirm.
If radio mode or DAB radio mode was the last mode selected, it is now active.
If another audio mode is switched on, you can now switch to radio mode in the audio menu.
You can select DAB radio mode in the radio display.
- ▶ Select **Audio** by sliding **↑** the COMAND controller and press **⌚** to confirm.
The audio menu appears.

PK2.87-6020-31

- ① Current audio operating mode
- ② Main function bar
- ③ Audio menu
- ▶ Select **Radio** by turning **⌚** the COMAND controller and press **⌚** to confirm.

P82.87-6021-31

FM radio display

- ① Waveband and frequency of the selected station
- ② Station name or station frequency of the selected station
- ③ Memory position of a station
- ④ Radio text plus display (if available)
- ⑤ Radio mode menu bar

► **To switch on DAB radio mode:** select **FM** in the radio display by sliding $\odot \downarrow$ and turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm.

P82.87-6022-31

► Select **DAB** and press \odot to confirm.

P82.87-6023-31

DAB radio display

- ① Name of the ensemble to which the selected station belongs
- ② Name of the selected station
- ③ Memory position of a station
- ④ Radio text plus display (if available)
- ⑤ DAB radio mode menu bar

i If reception is poor (e.g. in tunnels or mountain valleys), affected stations are shown in grey and playback of the currently selected station is interrupted. As soon as the reception quality is adequate, displays and playback return to normal.

Switching wavebands

Option 1

You can switch the radio between the FM, MW, LW and SW wavebands.

► Press the **RADIO** function button repeatedly until the desired waveband is selected.

Option 2

- Select **FM**, **DAB**, **MW**, **SW** or **LW** in the radio display by sliding $\odot \downarrow$ and turning $\left[\odot \right]$ the COMAND controller and press \odot to confirm.
- Select a waveband and press \odot to confirm. You will hear the last station played on the selected waveband.

- i** In the MW, LW and SW wavebands, COMAND shows the station frequency instead of the station name.

Ensembles (DAB radio mode)

An ensemble consists of multiple radio programmes. Every ensemble is transmitted in a certain area (national, regional or local) in the same way as a traditional AM/FM radio station.

Switching to an FM station automatically

If the reception of a DAB radio station deteriorates, COMAND automatically changes to the corresponding FM station under the following conditions:

- the FM station's frequency is available.
- the **Station fix** (▷ page 191) menu item is switched off.

- i** If you want to use this function, do **not** switch to FM radio.

If there is no reception, the display shows the **No reception** message.

Selecting a station

Selecting a channel from the channel list

The station list is available in the FM waveband and in DAB radio mode.

Radio mode: the station list contains all the stations that can currently be received and is sorted alphabetically. For stations without a programme service, the list shows the frequency instead of the name.

DAB radio mode: the station list contains the stations of all the ensembles that can currently be received and displays the current programme and a programme preview, if supported by the station operator. The station list is sorted alphabetically.

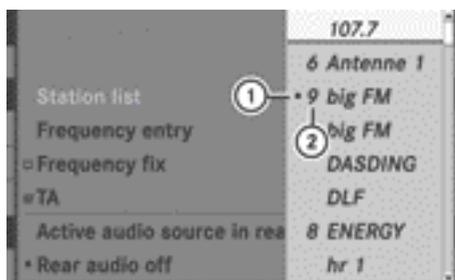

- ▶ **Quick select:** turn **⏪** or slide **←** to the COMAND controller while the display/selection window is active.

or

- ▶ Press the **⏪** or **⏩** button. The needle jumps to the left or right.

- ▶ **To make a selection in the station list:** select **Radio** by sliding **⊙** and turning **⏪** the COMAND controller and press **⏪** to confirm.

- ▶ Confirm **Station list** by pressing **⏪**. The station list appears.

P82.87-2257-31

Radio mode (example)

- ① Currently selected station
- ② Memory slot in station presets

P82.87-4024-31

DAB radio mode (example)

- ① Currently selected DAB radio station
- ② Current programme
- ③ Start and end times of the programme

- ▶ Select the station by turning **⏪** the COMAND controller and press **⏪** to confirm.

- ▶ **To call up the programme preview:** slide $\odot \rightarrow$ the COMAND controller.

The next programmes are shown for the displayed DAB radio stations.

- ▶ Switch back by sliding $\leftarrow \odot$.

Using the multifunction steering wheel

- ▶ Switch on radio mode in COMAND.
- ▶ Press \leftarrow or \rightarrow to select the **Audio** menu.

- ① Radio mode (FM) set
- ② Currently selected station

Station ② is displayed with the station frequency or station name. If the station has been stored, the associated preset is also displayed in ②.

- ▶ Press and hold \blacktriangle or \blacktriangledown .

Selecting a station using the station search function

In radio mode, the station search function is only available for the MW, LW and SW wavebands.

- ▶ Press the \lll or \ggg button.
Station search scans up or down and stops at the next station found.

Using the multifunction steering wheel

- ▶ Press \leftarrow or \rightarrow to select the **Audio** menu.
- ▶ Press and hold \blacktriangle or \blacktriangledown .

Selecting stations via the station presets

- ▶ **Quick setting:** press a number key, e.g.

- ▶ **Directly in the station presets:** select **Presets** by sliding $\odot \downarrow$ and turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.

or

- ▶ Press \odot the COMAND controller when the display/selection window is active.

The station preset memory appears. The

- dot indicates under which preset the currently selected station is stored.

- ▶ Select a station by turning $\left\{ \odot \right\}$ and press \odot to confirm or press a number key, e.g.

Using the multifunction steering wheel

- ▶ Press \leftarrow or \rightarrow to select the **Audio** menu.
- ▶ Press \blacktriangle or \blacktriangledown briefly.

Selecting stations by entering the frequency manually

This function is available in radio mode.

- ▶ **Option 1:** press the $\left[\begin{smallmatrix} * \\ * \\ * \end{smallmatrix} \right]$ button.
- ▶ **Option 2:** select **Radio** in the radio display by sliding $\odot \downarrow$ and turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.
- ▶ Select **Frequency entry** and press \odot to confirm.
Irrespective of the option chosen, an input menu will appear.
- ▶ Enter a frequency using the number keys.
COMAND tunes in to the frequency entered.

Waveband	Frequency
FM (VHF)	87.5 – 108.0 MHz
MW (medium wave)	531 – 1620 kHz
SW (short wave)	5800 – 6250 kHz
LW (long wave)	153 – 282 kHz

- i** You can only enter currently permitted numbers.
- i** If you enter a frequency in the MW, SW or LW wavebands that is outside the frequency range, COMAND sets the next lower frequency.

Storing stations

Storing stations manually

There are ten presets available for each waveband as well as for DAB radio mode.

- ▶ **Quick save:** press and hold a number key, e.g. **2**, until you hear a tone. The station is stored.

- ▶ **Directly in the station presets:** press the COMAND controller when the display/selection window is active.

or

- ▶ Select **Presets** by sliding $\odot \downarrow$ and turning $\{\odot\}$ the COMAND controller and press \odot to confirm. In both cases, the station presets appear. The \bullet dot indicates under which preset the currently selected station is stored.

P87.87-6025-31

Station presets in DAB radio mode

- ▶ Select a preset by turning $\{\odot\}$ the COMAND controller and press and hold \odot until you hear a tone. The station is stored under the preset.

Storing stations automatically

This function automatically stores stations with adequate reception under the presets. The search starts at the lowest frequency. COMAND stores any stations found, beginning with preset 1. The storing process ends once the highest frequency has been reached or once ten stations have been found. Any stations stored manually under the presets will be lost. COMAND may not occupy all memory slots when storing.

- ▶ **Option 1:** press \odot the COMAND controller when the display/selection window is active.
- ▶ Select **Autostore** in the presets by turning $\{\odot\}$ the COMAND controller and press \odot to confirm.
- ▶ **Option 2:** select **Presets** by sliding $\odot \downarrow$ and turning $\{\odot\}$ the COMAND controller and press \odot to confirm.
- ▶ Select **Autostore** and press \odot to confirm. In both cases, COMAND searches for stations that can be received. You will see a message to this effect. The available stations are automatically stored in the preset positions.

- ▶ **To cancel storing:** select **Cancel** and press  to confirm.

Radio Data System (RDS)

General notes

The Radio Data System (RDS) provides inaudible additional information in the FM waveband. The system consists of a listening receiver and a monitoring receiver.

The monitoring receiver constantly scans the FM waveband and collects data from all the stations with adequate reception, e.g. reception quality and RDS data such as programme names and alternative frequencies. COMAND stores the data and constantly updates the memory. The audio receiver is therefore able to switch automatically to an alternative frequency with a better signal.

- ▶ **i** RDS only functions for stations which transmit RDS data.

Switching RDS on/off

You can use the functions "Frequency fix" (FM mode) or "Station fix" (DAB mode) to prevent COMAND from switching between alternative frequencies. This is useful, for example, when the same content is broadcast with a time delay, or when there is interference on one of the frequencies.

- ▶ Select **Radio** in the radio display by sliding  and turning  the COMAND controller and press  to confirm.
- ▶ Select **Frequency fix** or **Station fix** by turning  the COMAND controller and press  to confirm.

Depending on the previous state, switch **Frequency fix** on or off .

Traffic Programme

Note

Many FM stations transmit traffic announcements (TA). You can also hear these in DAB radio mode.

Switching traffic announcements on/off

- ▶ **Option 1:** select **Radio** by sliding  and turning  the COMAND controller and press  to confirm.

The tick next to **TA** indicates that traffic announcement reception is switched on. You see the **TA** icon in the status bar.

- ▶ Select **TA** and press  to confirm. **TA** are switched on or off, depending on the previous status.
- ▶ **Option 2:** press and hold the  button on COMAND or on the multifunction steering wheel until **TA** lights up or goes out in the status bar.

A tone sounds.

Once traffic announcements have been switched on, COMAND selects an RDS station.

The Traffic Programme is retrieved from:

- the currently selected FM station
- an RDS station from the network of the currently selected FM station
- the RDS station with the best reception quality

When traffic announcements are switched on, a traffic announcement will interrupt the audio signal from the currently activated audio or video source.

- ▶ **i** Telephone conversations and navigation announcements are not interrupted.

A display message appears in the display in all audio operating modes.

Interrupting a traffic announcement

During a traffic announcement:

- ▶ Briefly press the  button on COMAND or on the multifunction steering wheel.

or

- ▶ Press the ,  or  button on the multifunction steering wheel. COMAND switches back to the audio source that was selected before the announcement. Any subsequent new announcements will continue to interrupt the audio source.

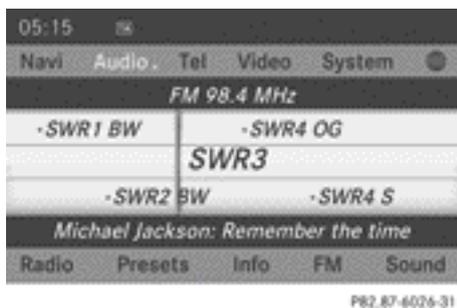

Radio text/radio text plus

Messages in the display

The function is available in FM mode and in DAB radio mode.

Radio text/radio text plus consists of additionally transmitted data, e.g. information on the current programme, which is displayed in the COMAND display.

If the station supports radio text plus, the artist and track are displayed.

Radio text plus (display: artist and track)

- ▶ **Showing/hiding the artist and track:** select **Radio** in the radio display by sliding  and turning  the COMAND controller and press  to confirm.
- ▶ Select **Display artist and track** and press  to confirm. This switches the function on or off .

- ▶ **To display radio text:** select **Info** in the corresponding radio display by sliding  and turning  the COMAND controller and press  to confirm.

If the station supports radio text and information is available, the system displays it.

Radio text (display for additional information on programme)

- ▶ **To return to the radio display:** confirm **Info** by pressing .
- ▶ Slide   the COMAND controller up.

Audio CD/DVD and MP3 mode

Important safety notes

Risk of injury

COMAND is classified as a class 1 laser product. You must not open the casing. If you open the casing, or if the casing is faulty or damaged, there is a risk of exposure to invisible laser radiation. This may damage your eyes, or those of others.

COMAND does not contain any parts that can be serviced by the user. For safety reasons, all maintenance work must be carried out by qualified aftersales technicians.

Risk of accident

Only when the vehicle is stationary should you:

- load a disc
- eject a disc

There is a risk of being distracted from the road and traffic conditions if this is done while the vehicle is in motion.

Inserting/ejecting CDs/DVDs

Notes

If the CD/DVD has a printed side, this must face upwards when the CD/DVD is inserted. If neither side is printed, the side to be played should face downwards. CDs/DVDs with copy protection may not be able to be played by the system.

- i** If a medium contains other files in addition to music files, the loading time before the first track starts to play may be longer.

Inserting a disc into the single DVD drive

- ▶ Press the  eject button. If there is a disc already inserted, it will be ejected.
- ▶ Take the disc out of the slot.
- ▶ Insert a disc into the slot. The disc is drawn in and playback starts if the disc has been inserted correctly and it is a permissible type of disc.

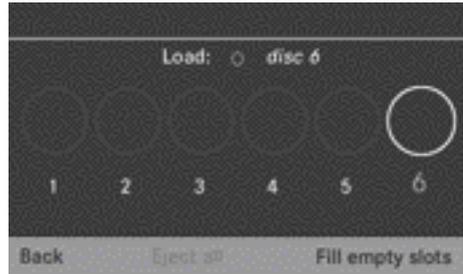

Ejecting a disc from the single DVD drive

- ▶ Press the  eject button.
- ▶ Take the disc out of the slot. If you do not take the disc out of the slot, COMAND will draw it in again automatically after a short while and load it again.

Inserting discs into the DVD changer

The DVD changer has a fixed magazine with six trays.

- ▶ **To insert a CD/DVD into the magazine tray:** press the  load/eject button. A menu shows the current load status of the magazine trays. The last tray selected is identified by a red digit.

- ▶ Select a magazine tray to be filled by turning  the COMAND controller and press  to confirm.

or

- ▶ Press a number key, e.g. . The DVD changer switches to the selected magazine tray. You see the **Please wait...** message. You then see the **Please insert disc <X>** message.

- i** Never insert a data medium before COMAND prompts you to do so. Never insert more than one disc at a time into a magazine tray.

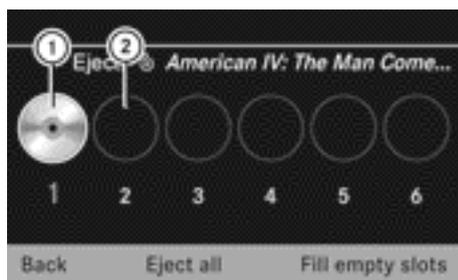

- ▶ Insert a disc into the disc slot with the printed side facing upwards.

The DVD changer loads the disc into the selected magazine tray. You see the message: **Loading disc <x>...**

- i** It may take some time for the disc to be loaded, depending on the type of disc. If no disc is inserted for approximately 20 seconds, the display returns to the magazine menu.

The DVD changer plays the disc if:

- it has been inserted correctly.
- it is a permissible type of disc

- ① Full magazine tray (eject function is available)
- ② Empty magazine tray (disc can be inserted)

► **To exit the menu:** press the  eject/load button again or press the  back button.

or

► Select **Back** by sliding  and turning  the COMAND controller and press  to confirm.

► **To fill empty magazine trays:** press the  load/eject button. The magazine menu appears.

► Select **Fill empty slots.** You see the **Please wait...** message. COMAND switches to the next empty magazine tray. You then see the **Please insert disc <x>** message.

- i** Never insert a data medium before COMAND prompts you to do so. Never

insert more than one disc at a time into a magazine tray.

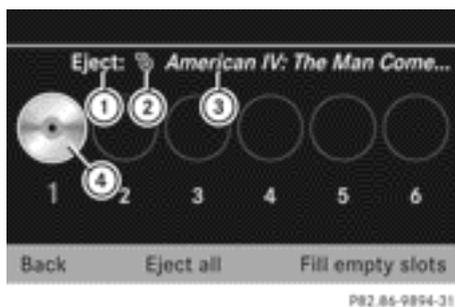

- Insert a disc into the disc slot with the printed side facing upwards. You see the **Please wait...** message. Once the disc is loaded, the DVD changer switches to the next empty tray. You see the message: **Please insert disc <x>.**
- Repeat this step until all trays are loaded. The DVD changer will play the last disc loaded if it has been inserted correctly and is of a permissible type. This applies even if not all trays have been loaded with a disc.
- **To cancel loading:** press the  eject/load button again or press the  back button.

- i** If you cancel loading with the  back button, the system loads and plays the last CD you inserted.

Ejecting discs from the DVD changer

If you remove one disc while playing another disc, the DVD changer interrupts playback. Playback continues once the disc has been ejected.

- **To eject a CD/DVD:** press the  load/eject button. The magazine menu appears. The magazine tray with the current disc is highlighted.

- ① Eject possible
- ② Data medium type
- ③ Disc name (only if stored on the disc)
- ④ Current disc

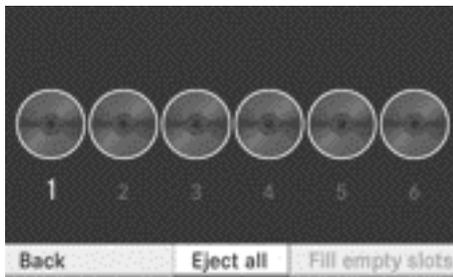

- ▶ Select a magazine tray containing a disc by turning the COMAND controller and press to confirm.

or

- ▶ Press a number key, e.g. . You see the message: **Ejecting disc <x>....** Then you see the following message:

- ▶ Take the disc out of the slot. If you do not take the disc out of the slot, COMAND will draw it in again automatically after a short while and load it again.
- ▶ **To eject all CDs/DVDs:** press the load/eject button. The magazine menu appears.

- ▶ Select **Eject all** by sliding and turning the COMAND controller and press to confirm.

The DVD changer ejects the last disc selected. You see the message: **Ejecting disc <x>....**

- ▶ Take the disc out of the disc slot when you see the **Please remove disc <x>** message.
- The DVD changer switches to the next loaded magazine tray and ejects the disc.
- ▶ Repeat the last step until the magazine is empty.
- ▶ **To exit the menu:** press the eject/load button again or press the back button.

or

- ▶ Select **Back** by sliding and turning the COMAND controller and press to confirm.

Inserting and ejecting an SD memory card

General information

COMAND supports SD memory cards (Secure Digital) and SDHC memory cards (Secure Digital High Capacity).

- i** Not all memory cards available on the market are designed for the temperatures which may be reached in the vehicle.

Due to the wide range of SD memory cards available on the market, playback cannot be guaranteed for all brands of SD memory card.

The readable storage capacity depends on the memory card used. Further information can be obtained from a Mercedes-Benz Service Centre.

Inserting an SD memory card

- ▶ Insert the memory card into the slot until it engages in place. The side with the contacts must face downwards and point towards the slot.
COMAND loads the memory card and shows a message to this effect. If no MP3 tracks can be found, you will see a message to this effect.

Ejecting an SD memory card

- ▶ Press the memory card.
The memory card is ejected.
- ▶ Take the memory card out of the slot (▷ page 15), position ⑫.

Connecting a USB device

The USB port is located in the stowage compartment in the centre console.

Electrical consumption at this connection must not exceed a continuous current of 500 mA. If the electrical consumption is higher, use a separate source to provide power for the USB device (e.g. 12 V power supply).

The following data formats are supported:

- AAC: fixed and variable bitrates (Low Complexity profile)
- MP3, WMA: fixed and variable bitrates up to 320 kbit/s
- ▶ Connect the USB device (e.g. USB stick) to the USB port.

Activating audio CD/DVD or MP3 mode

Option 1

- ▶ Insert a CD/DVD (▷ page 193), SD memory card (▷ page 196) or connect a USB device (▷ page 196).
COMAND loads the medium inserted and starts to play it.

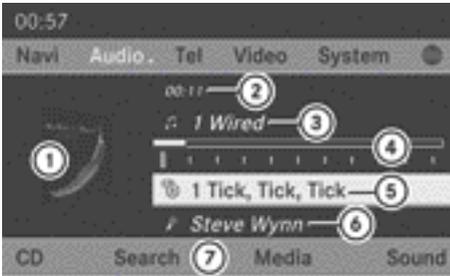

Option 2

- ▶ Press the **DISC** function button one or more times.
 - ❗ By pressing the function button repeatedly, you can change the operating mode in the following order:
 - audio CD/DVD/video DVD/MP3 CD/MP3 DVD in the DVD changer or single DVD drive (disc mode)
 - memory card mode
 - MUSIC REGISTER
 - USB storage device
 - Media Interface or audio AUX mode
 - Bluetooth® audio mode
- ▶ Select an audio medium from the media list (▷ page 198).

Option 3

- ▶ Select **Audio** in the main function bar by sliding **↑** and turning **⌂** the COMAND controller and press **⏻** to confirm.
The last active audio source is now activated.
You can activate another audio source via the audio menu.
- ▶ Select **Audio** by sliding **↑** and turning **⌂** the COMAND controller and press **⏻** to confirm.
The audio menu appears.
- ▶ Select **Disc, Memory card, MUSIC REGISTER, USB storage** or **Media Interface** and press **⏻** to confirm.
This switches to the desired audio source.
- ▶ Select an audio medium from the media list (▷ page 198).

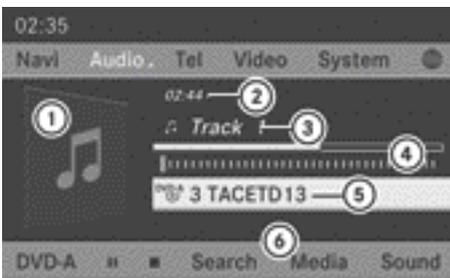

Example display: audio CD mode

P82.87-6287-31

- ① CD cover (if available)
- ② Track time
- ③ Track number and track name (only if stored on the disc as CD text or if Gracenote® data is available)
- ④ Graphic time and track display
- ⑤ Disc type, disc position in the media list and disc name (only if stored on the disc as CD text or if Gracenote® data is available)
- ⑥ Artist (only if stored on the disc as CD text or if Gracenote® data is available)
- ⑦ CD mode menu

Example display: audio DVD mode

P82.87-6288-31

- ① Cover (if available)
- ② Track time
- ③ Track number
- ④ Graphic time and track display
- ⑤ Disc type, disc position in the media list, disc name (only if stored on the disc)
- ⑥ Audio DVD mode menu

Example display: MP3 mode

P82.87-6289-31

- ① Cover (if available)
 - ② Track time
 - ③ Track number and track name
 - ④ Graphic time and track display
 - ⑤ Disc type, disc position in the media list, current folder
 - ⑥ Artists (if available)
 - ⑦ MP3 mode menu
- i** If no Media Interface (▷ page 218) is connected during operation with a DVD changer, ⑦ displays **Changer** instead of **Media**.

Pause function

In audio CD/DVD and MP3 mode

- ▶ **To pause playback:** briefly press the  button. The  icon appears at the top left in the status bar.
- ▶ **To continue playback:** briefly press the  button again. The  icon disappears.

Only in audio DVD mode

- ▶ **To pause playback:** switch on audio DVD mode (▷ page 196).
- ▶ Select  by sliding  and turning  the COMAND controller and press  to confirm.
The  display changes to .
- ▶ **To continue playback:** select  and press  to confirm.
Playback continues from the point where it was interrupted. The  display changes to .

Stop function

This function is only available in audio DVD mode.

- ▶ Switch on audio DVD mode (▷ page 196).
- ▶ **To interrupt playback:** select  by sliding  and turning  the COMAND controller and press  to confirm.
The  display changes to .  remains highlighted.
- ▶ **To continue playback:** select  and press  to confirm.
Playback continues from the point where it was interrupted.
- ▶ **To stop playback:** while playback is interrupted, select  again and press  to confirm.

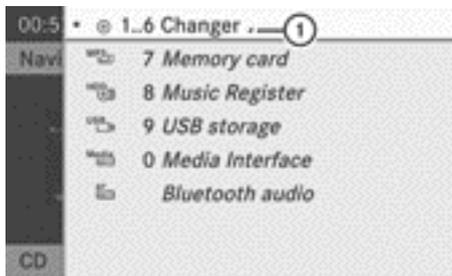

or

- ▶ Select  and confirm by pressing  twice in rapid succession.
 is highlighted.
- ▶ **To restart playback:** select  and press  to confirm.
Playback starts at the beginning of the DVD.

Selecting CD/audio DVD/MP3 discs

Selecting via the media list

- ▶ **In CD/audio DVD and MP3 mode:** select **Media** or **Changer** by sliding  and turning  the COMAND controller and press  to confirm.
The media list appears. The  dot indicates the current medium being played.

P82.87-6290-31

Media list when equipped with a DVD changer

- ① To display all magazine trays

The media list shows the discs currently available.

- ❗ If a disc cannot be read, an entry appears next to the corresponding magazine tray.

- ▶ **To display all magazine trays:** press  the COMAND controller while ① is highlighted.

P82.87-6291-31

Media list showing all magazine trays

The following tables list the selection options for the respective equipment variants.

For DVD changer

Magazine trays, positions 1 to 6: readable data media are audio CDs, MP3 CDs or MP3 DVDs, audio DVDs and video DVDs.

Memory card, position 7

MUSIC REGISTER, position 8

USB storage device, position 9

Media Interface, position 0

Bluetooth® audio

Equipped with a single DVD drive

DVD drive, position 1: readable data media are audio CDs, MP3 CDs or MP3 DVDs, audio DVDs and video DVDs.

Memory card, position 2

MUSIC REGISTER, position 3

USB storage device, position 4

Media Interface, position 5

Bluetooth® audio, position 6

- ▶ Select the data medium by turning  the COMAND controller and press  to confirm.

- i** If you select a video DVD, the system switches to video DVD mode (▷ page 232).

Selecting a track using the number keypad

- ▶ Press a number button, e.g. , when the display/selection window is active. The medium at the corresponding position in the media list is loaded and then played.

Selecting a track

Selecting by skipping to a track

- ▶ **To skip forwards or back to a track:** turn  the COMAND controller when the display/selection window is active.

or

- ▶ Press the  or  button.

The skip forward function skips to the next track.

The skip back function skips to the beginning of the current track if the track has been playing for more than 8 seconds. If the track has been playing for less than 8 seconds, it skips to the start of the previous track.

If you have selected the playback options [Random tracks](#) or [Random folder](#), the track order is random.

- ▶ **On the multifunction steering wheel:** switch COMAND to audio CD, audio DVD or MP3 mode (▷ page 196).
- ▶ Press  or  to select the [Audio](#) menu.

Display for DVD changer (example)

① Track display

- ▶ Press  or  briefly.
- ▶ Press and hold the  or  button until the desired track has been reached.

If you hold down  or , the system runs through the list more quickly. Not all audio drives or data carriers support this function.

If track information is stored on the audio drive or data storage device, the multifunction display shows the number and name of the track.

Selecting a track using the number keypad

▶ Press the  button on the number keypad.

A numerical entry field appears. The number of positions offered corresponds to the number of tracks on the CD/DVD. Only numbers that correspond to a track number on the CD/DVD can be entered.

▶ Enter the desired track number using the number buttons.

The track plays after the last possible number is entered.

i Pressing and holding a number button for 2 seconds or more completes entry and the corresponding track is played.

Selecting a track using music search

Select music via categories with the music search function.

If you select a category which does not contain any music data, COMAND starts a music search using the following media (if inserted or connected):

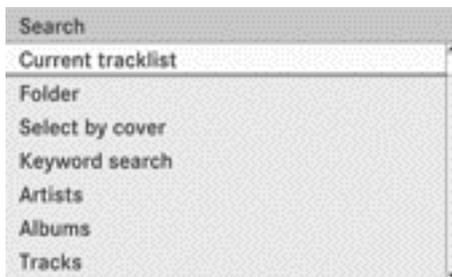

- disc (audio CD/DVD/MP3)
- memory card
- MUSIC REGISTER
- USB storage device

The **Track information is complete** message appears once the search is completed. COMAND stores the music data in its own database. You can now select the available music data within the desired category. You will find further information on searching for music in the "Music search" section (▶ page 205).

▶ In audio CD/audio DVD mode/MP3 mode, select **Search** by sliding  and turning

 the COMAND controller and press  to confirm.

The list of categories appears.

P82.87-6002-31

▶ Select **Current tracklist**, **Folder** or a category and press  to confirm.

P82.87-6292-31

i In MP3 mode, the list shows all the tracks in alphabetical order.

▶ Select the track by turning  the COMAND controller and press  to confirm.

The basic display appears and the track is played.

Fast forward/rewind

▶ While the display/selection window is active, slide  and hold the COMAND controller until the desired position has been reached.

or

▶ Press and hold the  or  button until the desired position is reached.

Gracenote Media Database

Introduction

This function is only available in audio CD mode.

There is a version of the music recognition software from Gracenote®, Emeryville, California, USA on the hard disk. You will recognise this by the logo which can be seen in the bottom right-hand corner of certain audio displays.

Many audio CDs contain CD text. COMAND uses the information contained therein to display the artist, album and track name.

If the audio CD does not contain any CD text information, COMAND can use the Gracenote Media Database to identify unknown audio tracks when running in audio CD mode. This is only possible if the relevant information is saved in the Gracenote Media Database and if the "Gracenote Media Database" function is activated.

If this is the case, COMAND will display the corresponding data such as artist, album and track name in the relevant displays and lists. If COMAND accesses the Gracenote Media Database when reading an audio CD, you will see the following message:

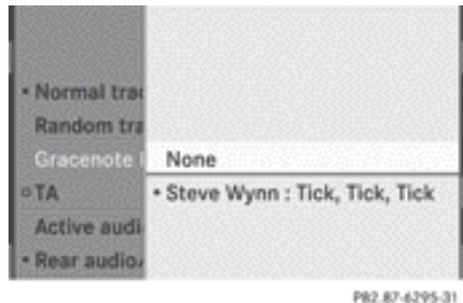

Selecting Gracenote® data to be displayed

If several entries exist for the CD of a particular artist, you can select which of the entries should be shown.

If the inserted CD does not contain any Gracenote® data, the **Gracenote Media Database** menu item is shown in grey and cannot be selected.

- ▶ Switch on audio CD mode (▷ page 196).
- ▶ Select **CD** by sliding $\odot \updownarrow$ and turning $\{\odot\}$ the COMAND controller and press \odot to confirm.
- ▶ Select **Gracenote Media Database** by turning $\{\odot\}$ the COMAND controller and press \odot to confirm. A menu appears.

The • dot indicates the current selection for the display.

- ▶ Select an entry by turning $\{\odot\}$ the COMAND controller and press \odot to confirm.

Switching the Gracenote® data display on/off

- ▶ Switch on audio CD mode (▷ page 196).
- ▶ Select **CD** by sliding $\odot \updownarrow$ and turning $\{\odot\}$ the COMAND controller and press \odot to confirm.
- ▶ Select **Gracenote Media Database** by turning $\{\odot\}$ the COMAND controller and press \odot to confirm.

- ▶ **To switch off the display:** select **None** and press to confirm.

In the basic display (▷ page 197), **Track 1**, **Track 2** etc. are shown instead of the Gracenote® data, for example.

- ▶ **To switch on the display:** select an entry in the menu by turning the COMAND controller and press to confirm.

Updating Gracenote® music recognition technology and the Gracenote Media Database

The digital data on the Gracenote Media Database becomes obsolete due to the release of new CDs. Optimum functionality can only be attained with up-to-date Gracenote® music recognition technology. Information about new versions can be obtained from a Mercedes-Benz Service Centre.

You can have your music recognition software updated there with a DVD, or you can update it yourself.

- The Gracenote Media Database is updated in conjunction with the navigation system's digital map (▷ page 107).

Displaying the track and album

- ▶ Press the button.
The current track and album are displayed in a window.

Displaying metadata (MP3 mode)

COMAND can also display the album name and artist (metadata) during playback, if this information has been entered into the system.

For USB devices, you can choose to display the metadata contained in the tags of the encoded music data, or to display the file and directory names during playback.

- ▶ **To display the album and artist name:** select **MP3** or **USB** in the basic display by

sliding and turning the COMAND controller and press to confirm.

- ▶ Select **Display track information** and press to confirm.

Setting the audio format

You can only set the audio format in audio DVD mode. The number of audio formats available depends on the DVD. The content of an audio DVD is called an "album", and this can be divided into up to nine groups. A group can contain music in different sound qualities (stereo and multichannel formats, for example), or bonus tracks. Each group can contain up to 99 tracks. If an audio DVD only contains one audio format, the **Group** menu item(s) cannot be selected.

- ▶ Switch on audio DVD mode (▷ page 196).
- ▶ Select **DVD-A** by sliding and turning the COMAND controller and press to confirm.
- ▶ Select **Group** by turning and press to confirm.
The list of available groups appears. The
 - dot indicates the group currently selected.
- ▶ Select **Group** by turning and press to confirm.
- ▶ **To exit the menu:** slide the COMAND controller or press the back button.

Selecting an active partition (USB mass storage devices only)

You can select this function for USB mass storage devices when the storage device is partitioned. Up to four partitions (primary or logical; FAT format) are supported.

- The Windows® formatting program supports FAT partitioning up to 32 GB as standard.

- ▶ Select **MP3** or **USB** in the basic display by sliding $\odot \downarrow$ and turning $\{\odot\}$ the COMAND controller and press \odot to confirm.
- ▶ Select **Select active partition** and press \odot to confirm.

Playback options

The following options are available to you:

- **Normal track sequence**

The tracks are played in the normal order (e.g. track 1, 2, 3, etc.).

In MP3 mode, the track order is determined by the order in which the tracks are written to the MP3 data carrier when it is created. Alphabetical order is the most common. Once all the tracks in a folder have been played, the tracks in the next folder are played.

- **Random media**

All the tracks on the medium are played in random order (e.g. track 3, 8, 5 etc.).

- **Random track list** (MP3 mode only)

The tracks in the current track list or the currently active folder are played in a random order.

- ▶ **To select options:** switch on audio CD/DVD or MP3 mode (▶ page 196).
- ▶ Select **CD**, **DVD-A** or **MP3** by sliding $\odot \downarrow$ and turning $\{\odot\}$ the COMAND controller and press \odot to confirm.
The options list appears. The • dot indicates the option selected.
- ▶ Select an option by turning $\{\odot\}$ and press \odot to confirm.
The option is switched on. For all options except "Normal track sequence", you will see a corresponding display in the display/selection window. See the example of the display in audio CD mode (▶ page 197).

- **i** The "Normal track sequence" option is automatically selected when you change the medium you are currently listening to

or when you select a different medium. If an option is selected, it remains selected after COMAND is switched on or off.

Notes on MP3 mode

General notes

Depending on the volume and format of the MP3 data, the length of time required for reading the data may increase.

Permissible discs

- CD-R and CD-RW
- DVD-R and DVD-RW
- DVD+R and DVD+RW
- SD memory card:
- USB storage device

Permissible file systems

- ISO 9660/Joliet standard for CDs
- UDF for audio and video DVDs
- FAT16 or FAT32 for SD memory cards and USB storage media

Multisession CDs

For multisession CDs, the content of the first session determines how COMAND will process the CD. COMAND plays only one session and gives priority to the audio CD session. If possible, use COMAND to play only CDs which have been written in one session.

File structure of a data carrier

When you create a disc with compressed music files, the tracks can be organised in folders. A folder can also contain subfolders. A disc can contain a maximum of 255 folders. Each folder can contain a maximum of 255 tracks and 255 subfolders.

The disc may contain no more than eight directory levels. Files beyond the eighth level will not be recognised by the system.

Track and file names

When you create a disc with compressed music files, you can assign names to the tracks and folders.

COMAND uses these names accordingly for the display. Folders which contain data other than MP3 or WMA tracks are not displayed by COMAND.

If MP3 or WMA files are stored in the root directory itself, the root directory will also be treated as a folder. COMAND will then show the name of the root directory as the folder name.

You must observe the following when assigning track names:

- track names must have at least 1 character.
- track names must have the extension "mp3" or "wma".
- there must be a full stop between the track name and the extension.

Example of a correct track name:
"Track 1.mp3".

Permissible formats

COMAND supports the following formats:

- MPEG1 Audio Layer 3 (MP3)
- Microsoft Windows Media Audio V8 and V9 (WMA) without copy protection
- additional music files in AAC format with the file extensions .aac, .mp4, .m4a and .m4b, but not copy-protected iTunes music files with the extension .m4p.

i If, as well as MP3 files, there are other music files in these audio formats stored on the disc, loading may require longer before the first track is played.

i The MP3 audio encoding method is under licence from Fraunhofer IIS (Institut Integrierte Schaltungen – Institute for Integrated Circuits) and Thomson.

Permissible bit and sampling rates

COMAND supports **MP3** files of the following types:

- constant and variable bit rates from 32 kbit/s to 320 kbit/s
- sampling rates of 8 kHz to 48 kHz

COMAND supports **WMA** files of the following types:

- fixed bit rates of 5 kbit/s up to 384 kbit/s
- sampling rates of 8 kHz to 48 kHz

COMAND does **not** support **WMA** files of the following types:

- DRM (Digital Rights Management) encrypted files
- variable bit rate
- WMA Pro
- 5.1 Surround

i Only use tracks with a bit rate of at least 128 kbit/s and a sampling rate of at least 44.1 kHz. Lower rates can cause a noticeable deterioration in quality. This is especially the case if you have activated a surround sound function.

Notes on copyright

MP3 or WMA tracks that you create or play back are generally subject to copyright protection in accordance with the applicable international and national regulations.

In many countries, reproductions, even for private use, are not permitted without the prior consent of the copyright holder.

Make sure that you know about the applicable copyright regulations and that you comply with these.

If you own these rights yourself, e.g. for your own compositions and recordings, or if the copyright holder has granted you permission, these restrictions do not apply.

Notes on CDs/DVDs

Discs with copy protection are not compatible with the audio CD standard and therefore may not be able to be played by COMAND.

There may be playback problems when playing copied discs. There is a wide range of data carriers, disc-writing software and writers available. This variety means that there is no guarantee that the system will be able to play discs that you have copied yourself.

There may be playback problems if you play CDs that you have copied yourself with a storage capacity of more than 700 MB. CDs of this type do not conform to the currently applicable standards.

i On many DVD audio discs, the last track does not contain any music and COMAND then switches to the next disc. This is normal system behaviour and does not mean that there is a malfunction.

! Do not affix stickers or labels to the discs. They could peel off and damage the drive.

The drive is designed to hold discs which comply with the EN60908 standard. Therefore, you can only use discs with a maximum thickness of 1.3 mm.

If you insert thicker discs, e.g. those that contain data on both sides (DVD on one side and audio data on the other), they cannot be ejected and can damage the drive.

Do not use discs with a diameter of 8 cm, even with an adapter. Only use round discs with a diameter of 12 cm.

i COMAND is able to play back audio CDs in multichannel audio format.

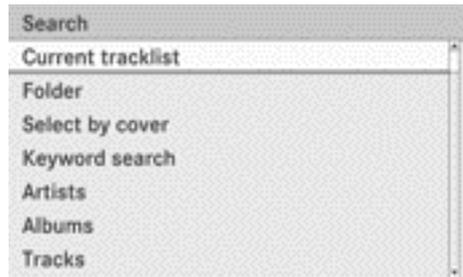

Music search

Calling up a category list

► Switch on an audio source and call up the basic display, e.g. CD mode (▷ page 197).

► Select **Search** by sliding and turning the COMAND controller and press to confirm.

The category list appears.

Category list

The categories are displayed according to the data available. The categories **Current tracklist**, **Folder**, **Playlists** (if available) and **Photos** (if available) are already assigned. The other available categories are filled by the music search.

Selecting a category

Starting a music search

The music search starts when you select a category from the category list which does yet have any contents.

The music search finds tracks via all available media. The search begins with the audio source that is currently active.

The following media are included for the music search:

- disc mode (audio CD/DVD/MP3)
- memory card
- MUSIC REGISTER
- USB storage device

► Select a category in the category list by turning the COMAND controller and press to confirm.

The **Reading data...** message appears.

The search may take some time, depending on the number of tracks available.

PB2.87-6001-31

The **Track information is complete** message appears once the search is completed. Playback then starts with the previously active audio source.

- ▶ **To cancel the music search:** confirm **Cancel** by pressing .

Selecting an album

- ▶ Select **Albums** in the category list by turning  the COMAND controller and press  to confirm.

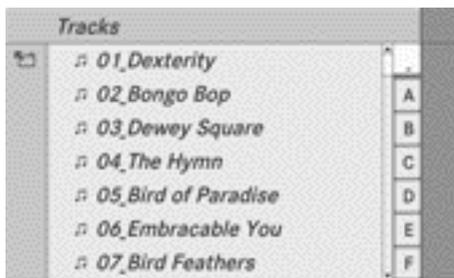

The available albums are displayed alphabetically. If there is a cover available for an album, it is displayed in front of the album name.

PB2.87-6003-31

Selecting a track

- ▶ Select **Tracks** in the category list (▷ page 205) by turning  the COMAND controller and press  to confirm. The available tracks are displayed.

PB2.87-6004-31

- ▶ Select a track and press  to confirm. Playback starts.

Selecting a year of publication

- ▶ Select **Year** in the category list (▷ page 205) by turning  the COMAND controller and press  to confirm.

PB2.87-6005-31

- ▶ Select an entry and press  to confirm. The genre list is displayed.
- ▶ Select a genre, e.g. pop, and press  to confirm. The track list is displayed.
- ▶ Select a track and press  to confirm. Playback starts.

Selecting a cover

- ▶ Select **Select by cover** in the category list (▷ page 205) by turning  the COMAND controller and press  to confirm. The available covers are displayed in alphabetical order of the artists.

P82.87-6006-31

- ▶ Select the desired cover by turning **⏪** the COMAND controller and press **⏹** to confirm. The corresponding album is played.

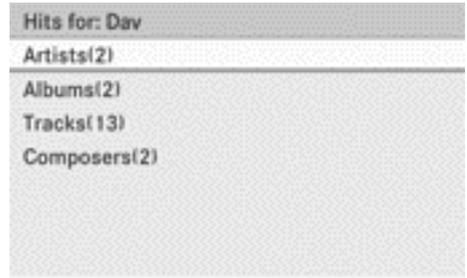

Selection via keyword search

- ▶ Select **Keyword search** in the category list (▷ page 205) by turning **⏪** the COMAND controller and press **⏹** to confirm. An input menu appears.

P82.87-6007-31

- ▶ Enter characters and confirm the entry. Instructions for entering characters can be found in the "Entering characters in the phone book and address book" section (▷ page 28). Depending on the entry, the hits are shown in a list.

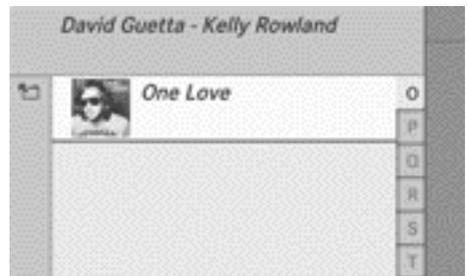

P82.87-6008-31

- ▶ Select an entry by turning **⏪** the COMAND controller and press **⏹** to confirm.

P82.87-6009-31

- ▶ Select an entry, e.g. **Artists**, and press **⏹** to confirm. The album and cover (if available) are displayed.

P82.87-6010-31

- ▶ Confirm the album with **⏹**. The tracks on the album are displayed.

P82.87-6011-31

- ▶ Select a track and press to confirm. Playback starts and the basic display appears.

MUSIC REGISTER

General notes

You can store music files in a compressed format in the MUSIC REGISTER (▷ page 209). The memory has a capacity of 10 GB.

- ! Retain the original music files in a secure location. If you, for example, accidentally reset COMAND to the factory settings with the reset function, all music files in the MUSIC REGISTER are deleted. Mercedes-Benz is not liable for any loss of data.

Switching to MUSIC REGISTER

Option 1

- ▶ Press the function button repeatedly until the MUSIC REGISTER is switched on.

By pressing the function button repeatedly, you can change the operating mode in the following order:

- audio CD/DVD/MP3 (disc)
- memory card mode
- MUSIC REGISTER
- USB storage device
- Media Interface or audio AUX mode
- Bluetooth® audio mode

If music files are available, playback begins at the point last listened to.

If there are no music files, you will see a message to this effect.

- ▶ Confirm the message by pressing the COMAND controller and then copy the music files in to the MUSIC REGISTER (▷ page 209).

Option 2

- ▶ Select **Audio** in the main function bar by sliding and turning the COMAND controller and press to confirm. If MUSIC REGISTER was the last mode selected, it is now switched on.

If another audio source is switched on, you can now switch on the MUSIC REGISTER in the audio menu.

- ▶ Select **Audio** by sliding and turning the COMAND controller and press to confirm. The audio menu appears.
- ▶ Select **Music Register** and press to confirm.

Option 3

- ▶ Press number key (for a DVD changer) or (for a single DVD drive). The MUSIC REGISTER is switched on.

P82.87-6282-31

MUSIC REGISTER (example)

- ① Cover (if available)
- ② Track time

- ③ Track number and track name
- ④ Graphic time and track display
- ⑤ Position of the medium in the media list and name of the medium, followed by the current playback option (no display for normal track sequence)
- ⑥ Artist
- ⑦ MUSIC REGISTER menu bar

Copying music data to the MUSIC REGISTER

Introduction

You can copy music files in the file formats MP3, WMA and AAC (with the file extensions .m4p, .m4a, .m4b and .aac) from the following media:

- discs in a DVD changer or a single DVD drive
- memory card
- USB storage device

- i** While copying, several functions will not be available. If this is the case, you will see a message to this effect.

1. Selecting a data medium

- ▶ Switch to MUSIC REGISTER (▷ page 208).
- ▶ Select **Music Register** by sliding $\odot \downarrow$ and turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.
- ▶ Select **Copy MP3 music files** and press \odot to confirm.
The media list appears. A data carrier from which files can be copied is selected automatically.

P82.87-4284-31

- ▶ Select the data medium by turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.

The data medium is loaded.

If the data carrier contains music files that can be copied, you see a menu.

P82.87-4284-31

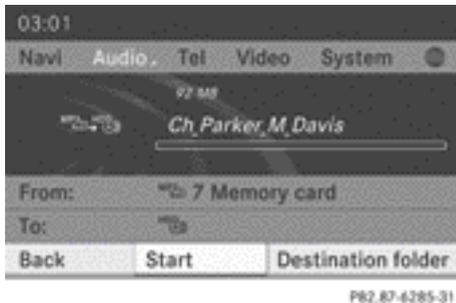

2. Selecting music files

- ▶ **To select all music files:** select **All music files** and press \odot the COMAND controller to confirm.
This function copies all music files on the selected data carrier. The icon in front of **All music files** is filled in and all following entries have a tick beside them.
- ▶ **To select a folder:** : turn $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.
A tick next to the folder entry highlights the selection.

3. Confirming your selection

- ▶ Select **Continue** by turning **⏪** the COMAND controller and press **⏩** to confirm.
The copying menu appears.

4. Starting the copying process

In the example, music files are copied from the memory card to the MUSIC REGISTER.

- ▶ **To select a target folder:** select **Destination folder** by turning **⏪** the COMAND controller and press **⏩** to confirm.
- ▶ Select **Folder** and press **⏩** to confirm.
The folder is selected .
- ▶ Select **Continue** and press **⏩** to confirm.
- ▶ Confirm **Start** by pressing **⏩**.
Copying begins. The progress bar indicates the status of the copying procedure.

! Under no circumstances should you remove the medium while you are copying data from it (SD memory card, USB storage device, CD/DVD). Doing so will generate unusable data in the MUSIC REGISTER.

i It may take some time for the copying process to be completed, depending on the amount of data. If there is not enough memory space, you will see a message to this effect.

Once copying is complete, you hear the first track on the album copied. The MUSIC REG-

ISTER display appears. Now you can copy more music files to the MUSIC REGISTER.

- ▶ **To cancel the copying process:** select **Cancel** and press **⏩** to confirm.
Music files are stored in the MUSIC REGISTER up until the point of cancellation.

Deleting all music files

This function deletes all music files from the MUSIC REGISTER.

- !** In order to prevent malfunctions, do not use COMAND during this time.
- ▶ Switch to MUSIC REGISTER (▷ page 208).
- ▶ Select **Music Register** by sliding **⏴** and turning **⏪** the COMAND controller and press **⏩** to confirm.
- ▶ Select **Delete all music files** and press **⏩** to confirm.
A query appears. **No** is highlighted.
If you select **Yes**, all music files are deleted. You see the **Please wait...** message. Then, you see the **Deletion procedure successful** message.
If you select **No**, the process will be aborted.

Calling up memory space info

- ▶ Switch to MUSIC REGISTER (▷ page 208).
- ▶ Select **Music Register** by sliding **⏴** and turning **⏪** the COMAND controller and press **⏩** to confirm.
- ▶ Select **Memory info** and press **⏩** to confirm.
The following is displayed:
 - storage capacity
 - available memory
 - occupied memory
 - content (folders, tracks)

Music search

The music search finds tracks via all available media. The search begins with the audio source that is currently active.

The following media are considered for the music search:

- disc (audio CD/DVD/MP3)
 - memory card
 - MUSIC REGISTER
 - USB storage device
- ▶ Switch to MUSIC REGISTER (▷ page 208).
 - ▶ Select **Search** by sliding $\odot \downarrow$ and turning $\{\odot\}$ the COMAND controller and press \odot to confirm.
The category list appears.
 - ▶ Select a track in a category (▷ page 205).

Example: opening a folder

- ▶ Select **Folder** in the category list by turning $\{\odot\}$ the COMAND controller and press \odot to confirm.

or

- ▶ Press \odot the COMAND controller when the display/selection window is active.
You see the contents of the current folder.

The name of the current folder is at the top and the track currently playing is indicated by a • dot.

- ▶ **To switch to the next folder up:** press the \leftarrow back button or slide $\leftarrow \odot$ the COMAND controller.

Changing the folder/track name

- ▶ Switch to MUSIC REGISTER (▷ page 208).
- ▶ Select **Music Register** by sliding $\odot \downarrow$ and turning $\{\odot\}$ the COMAND controller and press \odot to confirm.
- ▶ Select **Rename/delete files** and press \odot to confirm.
- ▶ Select a folder/track by turning $\{\odot\}$.
- ▶ Select **Options** by sliding $\odot \rightarrow$ and press \odot to confirm.
- ▶ Select **Change** and press \odot to confirm.
- ▶ Enter a name for the folder/track. Instructions for entering characters can be found in the "Entering characters in the phone book and address book" section (▷ page 28).
- ▶ **To save the changes:** select $\boxed{\text{ok}}$ and press \odot to confirm.

Deleting folders/tracks

- ▶ Switch to MUSIC REGISTER (▷ page 208).
- ▶ Select **Music Register** by sliding $\odot \downarrow$ and turning $\{\odot\}$ the COMAND controller and press \odot to confirm.
- ▶ Select **Rename/delete files** and press \odot to confirm.
- ▶ Select a folder/track by turning $\{\odot\}$.
- ▶ Select **Options** by sliding $\odot \rightarrow$ and press \odot to confirm.
- ▶ Select **Delete** and press \odot to confirm.
A query appears. **No** is highlighted.
If you select **Yes**, the folders/tracks are deleted. You see the **Please wait...** message. Then, you see the **Data deleted** message.
If you select **No**, the process will be aborted.

Playback options

The following options are available:

- **Normal track sequence**

The tracks are played in the normal order (e.g. track 1, 2, 3, etc.).

- **Random media**

All the tracks on the medium are played in random order.

- **Random track list** (MP3 mode only)

The tracks in the currently active folder/ track list are played in a random order.

- ▶ **To select options:** switch on the MUSIC REGISTER (▷ page 208).
- ▶ Select **Music Register** by sliding  and turning  the COMAND controller and press  to confirm. The options list appears. The  dot indicates the option selected.
- ▶ Select an option and press  to confirm. The option is switched on. For all options except **Normal track sequence**, you will see a corresponding display in the display/ selection window.

i The **Normal track sequence** option is automatically selected when you change the disc you are currently listening to or when you select a different medium. If an option is selected, it remains selected after COMAND is switched on or off.

Operation with Bluetooth® audio

Connecting Bluetooth® audio devices

Conditions

Bluetooth® audio device

Bluetooth® audio mode requires a Bluetooth®-capable audio device.

i Not all Bluetooth® audio devices available on the market are equally suitable. You can obtain more detailed information about suitable Bluetooth® audio devices and about connecting Bluetooth® audio devices to COMAND from your Mercedes-Benz Service Centre or on the Internet (<http://www.mercedes-benz.com/connect>).

Before using Bluetooth® audio mode, you should check your Bluetooth® audio device for the following (see the Bluetooth® audio device's operating instructions):

- ▶ **Bluetooth® audio profile**
The Bluetooth® audio device must support the A2DP and AVRCP Bluetooth® audio profiles.
- i** **A2DP** (Advanced Audio Distribution Profile): Bluetooth® audio profile for audio data transmission
AVRCP (Audio Video Remote Control Profile): Bluetooth® audio profile for audio data playback
- ▶ **Bluetooth® visibility**
On certain Bluetooth® audio devices, as well as activating the Bluetooth® function, the device itself must also be made "visible" for other devices (see the Bluetooth® audio device's operating instructions).
- ▶ **Bluetooth® device name**
Every Bluetooth® device has its own Bluetooth® device name. This device name is freely definable, but can be identical for all devices from the same manufacturer. You should therefore change the name of the device so that you can correctly identify your Bluetooth® audio device (see the Bluetooth® audio device's operating instructions).
- ▶ Activate Bluetooth® and Bluetooth® visibility on the Bluetooth® audio device.

On COMAND

- ▶ Activate the Bluetooth® function in COMAND (▷ page 46).

General information

Before using your Bluetooth® audio device with COMAND for the first time, you will need to authorise it.

When you authorise a new Bluetooth® audio device, it is connected automatically. Con-

nection involves first searching for a Bluetooth® audio device and then authorising it. You can authorise up to fifteen Bluetooth® devices.

i If you authorise a mobile phone that supports Bluetooth® audio, the A2DP and AVRCP Bluetooth® audio profiles are connected automatically. The mobile phone is then entered in both the Bluetooth® telephone list (▷ page 115) and in the Bluetooth® device list (▷ page 213).

Mercedes-Benz recommends authorising a mobile phone in Bluetooth® telephony (▷ page 115).

Searching for and authorising a Bluetooth® audio device

- ▶ Switch on Bluetooth® audio mode (▷ page 215).
If you see the **No Bluetooth audio device authorised** message, you will need to connect the Bluetooth® audio device first.
- ▶ Select **BT audio** by sliding  and turning  the COMAND controller and press  to confirm.
- ▶ Confirm **Bluetooth audio device list** by pressing the COMAND controller .
- ▶ **To search:** confirm **Update** by pressing the COMAND controller .
COMAND searches for Bluetooth® audio devices within range and adds them to the Bluetooth® device list. Bluetooth® audio devices are detected if they support the Bluetooth® audio profiles A2DP and AVRCP.
The duration of the search depends on the number of Bluetooth® audio devices within range and their characteristics.

Bluetooth® device list (example)

- ① Newly detected mobile phone with Bluetooth® audio function in range
- ② Bluetooth® audio player not within range but previously authorised (icon appears in grey)

The Bluetooth® device list displays all authorised devices, whether they are within range or not. After a device search, devices which are within range but not authorised are also displayed.

- ▶ **To authorise:** select an unauthorised Bluetooth® audio device from the list (example: ①) by turning  the COMAND controller.
- ▶ Select the symbol to the right of the Bluetooth® audio device by sliding  the COMAND controller and press  to confirm.
- ▶ Select **Authorise** and press  to confirm. Depending on the Bluetooth® audio device used, you now have two options for continuing with authorisation.
- ▶ **Option 1:** enter the passcode. To do so, proceed as described in the "Authorising (registering) a mobile phone" section (▷ page 115).
After successful authorisation, the Bluetooth® audio device is connected and starts playing.
- ▶ **Option 2 (Secure Simple Pairing):** if the digit code displayed in COMAND and on the

Bluetooth® audio device is the same, confirm **Yes** by pressing .

If you select **Yes**, authorisation continues and the Bluetooth® audio device is connected. Playback starts.

If you select **No**, authorisation will be cancelled.

- i** The Bluetooth® audio device must support the Bluetooth® version 2.1 for connection via Secure Simple Pairing. COMAND creates a six-digit code, which is displayed on both devices that are to be connected.

- ▶ **External authorisation:** COMAND may not be able to locate your Bluetooth® audio device due to the specific security settings of the Bluetooth® audio device itself. In this case, check whether your Bluetooth® audio device can locate the COMAND system (▷ page 116). The Bluetooth® device name of COMAND is **MB Bluetooth**. After successful authorisation, the Bluetooth® audio device is connected and starts playing.

- i** With some Bluetooth® audio devices, playback must be initially started on the device itself, so that COMAND can play the audio data.

Reconnecting a Bluetooth® audio device

The Bluetooth® audio profiles are connected automatically under the following circumstances:

- one of the last two mobile phones to have been connected has also been used as a Bluetooth® audio player.
- the mobile phone takes over the automatic connection itself.

A Bluetooth® audio player without telephone functions is not automatically reconnected, even if it was the last device connected.

If the **No Bluetooth audio device connected** message appears, you have two

options to connect a Bluetooth® audio device:

Option 1

- ▶ Confirm **Connect last device** in the basic display by pressing the COMAND controller .

If COMAND can locate the Bluetooth® audio device, it will be connected and start playing.

- i** With some Bluetooth® audio devices, playback must be initially started on the device itself, so that COMAND can play the audio data.

Option 2

- ▶ Select **BT audio** by turning  the COMAND controller and press  to confirm.

- ▶ Confirm **Bluetooth audio device list** by pressing the COMAND controller .

- ▶ Select a Bluetooth® audio device by turning  the COMAND controller and press  to confirm.

If COMAND can locate the Bluetooth® audio device, it will be connected and start playing.

- i** With some Bluetooth® audio devices, playback must be initially started on the device itself, so that COMAND can play the audio data.

Bluetooth® audio device and simultaneous search for mobile phones

During the search for mobile phones (▷ page 115), the connection with the Bluetooth® audio device is terminated. In the Bluetooth® audio (▷ page 216) basic display, you will see the **No Bluetooth audio device connected** message and the **Connect last device** menu item cannot be selected.

Displaying details

- ▶ Select a Bluetooth® audio device in the Bluetooth® device list.
- ▶ Select the symbol to the right of the Bluetooth® audio device by sliding  to the COMAND controller and press  to confirm.
- ▶ Select **Details** and press  to confirm. The following information concerning the selected mobile phone is shown:
 - Bluetooth® name
 - Bluetooth® address
 - availability status (is shown after a new search)
 - authorisation status
- ▶ **To close the detailed view:** turn  or slide  to the COMAND controller.

De-authorising (de-registering) a Bluetooth® audio device

- ▶ Select a Bluetooth® audio device in the Bluetooth® device list.
- ▶ Select the symbol to the right of the Bluetooth® audio device by sliding  to the COMAND controller and press  to confirm.
- ▶ Select **De-authorise** and press  to confirm. A prompt appears asking whether you really wish to revoke authorisation for this device.
- ▶ Select **Yes** or **No**.
 - If you select **Yes**, the device will be deleted from the Bluetooth® device list.
 - If you select **No**, the process will be aborted.
- i** Before re-authorising the Bluetooth® audio device, you should also delete the device name **MB Bluetooth** from your Bluetooth® audio device's Bluetooth® list (see the Bluetooth® audio device's operating instructions).

Switching on Bluetooth® audio mode

Option 1

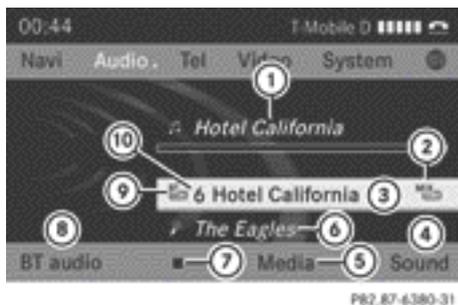

- ▶ Connecting (▷ page 212) or reconnecting (▷ page 214) a Bluetooth® audio device. COMAND activates the Bluetooth® audio device. The basic display appears and the device starts playing.

Option 2

- ▶ Press the **DISC** function button one or more times.
 - i** By pressing the function button repeatedly, you can change the operating mode in the following order:
 - Audio CD/DVD/MP3 (disc)
 - Memory card mode
 - MUSIC REGISTER
 - USB storage device
 - Media Interface or audio AUX mode
 - Bluetooth® audio mode

Option 3

- ▶ Select **Bluetooth audio** (▷ page 198) in the media list by turning  to the COMAND controller and press  to confirm. COMAND activates the connected device. You will see a message to this effect. The basic display then appears.

Bluetooth® audio basic display when equipped with a single DVD drive (example)

- ① Track name
 - ② Current playback settings (no symbol for "Normal track sequence")
 - ③ Album name
 - ④ Sound settings
 - ⑤ Media list
 - ⑥ Artist
 - ⑦ To stop or start playback
 - ⑧ To connect a Bluetooth® audio device, to switch traffic announcements on/off, to increase the volume on COMAND
 - ⑨ Bluetooth® Audio data medium type
 - ⑩ Data carrier position in the media list
- i** If the Bluetooth® audio device connected supports metadata and corresponding data is available, then the artist, track and album name can be displayed.

Starting/stopping playback

- ▶ **To start playback:** select by sliding and turning the COMAND controller and press to confirm. Playback starts. Selection is at .
- ▶ **To stop playback:** select by turning the COMAND controller and press to confirm. A message appears. Selection is at .

- ▶ **To continue playback:** select by turning the COMAND controller and press to confirm. A message appears. Selection is at .

Starting playback if the Bluetooth® audio device has been stopped

During the search for mobile phones (> page 115), the connection with the Bluetooth® audio device is terminated. In the Bluetooth® audio basic display (> page 216), you will see the **No Bluetooth audio device connected** message and the **Connect last device** menu item cannot be selected.

When the search is finished, the Bluetooth® audio device can be reconnected.

- ▶ Confirm **Connect last device** by pressing .
- Depending on the Bluetooth® audio device used, playback starts immediately or you must start playback manually. In this case, you will see the **Bluetooth audio device paused** message.

- ▶ **To start playback:** select by turning the COMAND controller and press to confirm. Playback then starts from the beginning.

Selecting a track

The function is not supported by all Bluetooth® audio devices.

- ▶ **To skip forwards or backwards to a track:** press the or button on COMAND.

or

- ▶ Press the or button briefly on the multifunction steering wheel.
- ▶ **Rapid scroll:** press and hold the or button on the multifunction steering wheel until the desired track is reached. If you hold down or , the system runs through the list more quickly.

Selecting playback options

If the Bluetooth® audio device supports the corresponding function, the following options are available:

- **Normal track sequence**

The tracks are played in the normal order (e.g. track 1, 2, 3, etc.).

Audio data playback is determined by the order in which the tracks are written to the data carrier. Alphabetical order is the most common. Once all the tracks in a folder

have been played, the tracks in the next folder are played.

- **Random tracks**

All the tracks on the medium are played in random order (e.g. track 3, 8, 5 etc.).

- ▶ Select **BT audio** by sliding and turning the COMAND controller and press to confirm.

The dot indicates the option selected.

- ▶ Select the option by turning the COMAND controller and press to confirm.

If you select **Random tracks**, you will see a corresponding icon in the display/selection window.

Switching Traffic Programme on/off

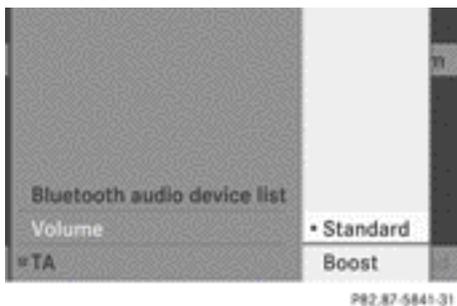

A description can be found in the "Radio Data System" section (▶ page 191).

Adjusting the sound settings

The sound settings are described using radio mode as an example in the "Basic functions of COMAND" section (▶ page 31).

Increasing the volume using COMAND

- ▶ Select **BT audio** by sliding and turning the COMAND controller and press to confirm.
- ▶ Select **Volume** and press to confirm. A menu appears. The dot indicates the current setting.

- ▶ Select **Standard** or **Boost** and press  to confirm.

You will find further information in the "Audio AUX Mode" section (▷ page 223).

Media Interface mode

Connection options

Overview

The connection sockets are located in the storage compartment in the centre console. Device-specific adapter cables, included in the Media Interface scope of delivery, are required to connect external devices to the Media Interface.

- i** Store individual parts in a safe place.
Only use genuine Mercedes-Benz connection cables.

You can connect the following data carriers to COMAND via the Media Interface:

- iPod®
- certain MP3 players

- i** iPod® is a registered trademark of Apple Inc., Cupertino, California, USA.

Supported devices

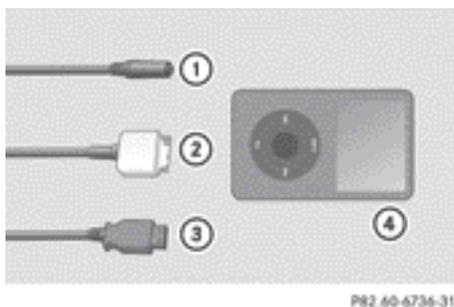

For further details and a list of supported devices, contact a Mercedes-Benz Service Centre or go to the website <http://www.mercedes-benz.com/connect>. Then,

follow the instructions in the "Media Interface" section.

Connecting an external device

- i** Do not leave external devices in the vehicle as their correct function cannot be guaranteed if they are subjected to extreme temperatures, e.g. if subjected to direct sunlight or very low outside temperatures (see the operating instructions of the respective device). Mercedes-Benz accepts no liability for damage to external devices.

Never connect more than one device at a time. You will otherwise not be able to play back from the external device.

- ① 4-pole socket for 3.5 mm stereo jack, e.g. for MP3 players (audio and video)
- ② iPod® plug, to connect an iPod®
- ③ USB socket, to connect an MP3 player
- ④ Example of device, iPod®

- ▶ Connect the external device with suitable socket ①, ② or ③.
COMAND activates the device, a message appears.

If you remove a device, the **No device connected** message appears.

- i** A connected iPod® or MP3 player should not be simultaneously operated via the Media Interface and the remote control (e.g. Bluetooth® remote control) or directly on the device itself as this may cause unforeseen technical difficulties.

- Connecting an exhaustively discharged iPod® or MP3 player can result in an extended initialisation period.

Error messages appear while the device is being activated if:

- COMAND does not support the device connected (**External device unavailable** message).
 - the connected device consumes too much power.
 - the Media Interface connection is faulty.
 - a mass storage device (e.g. USB stick or USB hard disc) is connected to the Media Interface (**Please connect the device to the other USB port** message).
- The separate USB port ensures fast access and additional options for selecting the media content.
 - Consult a Mercedes-Benz Service Centre if you have any queries.

Switching to Media Interface mode

General notes

In extreme cases, starting up individual functions can take up to several minutes – this depends on the external device and its content (e.g. video podcasts).

Only use the original programs to populate an iPod or MP3 player. Otherwise, some or all functions may not be available.

Option 1

- Connect an external device (> page 218). COMAND activates the device. The basic display then appears.

Option 2

- Press the **[disc]** function button one or more times.

By pressing the function button repeatedly, you can change the operating mode in the following order:

- Audio CD/DVD/MP3 (disc)
- Memory card mode
- MUSIC REGISTER
- USB storage device
- Media Interface or audio AUX mode
- Bluetooth® audio mode

Option 3

- Press number key **[0]** (for a DVD changer) or **[5]** (for a single DVD drive). This directly selects the connected external audio device.

Option 4

- Select the entry under position 0 (DVD changer) or position 5 (single DVD drive) in the media list (> page 198) by turning **[⏪]** the COMAND controller and press **[⏩]** to confirm.

COMAND activates the connected device. You will see a message to this effect. The basic display then appears.

If no device is connected, you will see the **Media Interface** entry instead of a device name.

P82.87-6377-31

Media Interface mode (iPod® mode) when equipped with a DVD changer

- ① Data medium type
- ② Track number

- ③ Elapsed track time (also in format 00:00:00 for audio books)
- ④ Track name
- ⑤ Graphic time display
- ⑥ Graphic track display
- ⑦ Sound settings
- ⑧ Media list
- ⑨ Album name (if available)
- ⑩ Music search
- ⑪ Position in the media list
- ⑫ Artist (if available)
- ⑬ Playback options

Type of device ① connected is indicated by the corresponding symbol for iPod® or MP3 player.

The current playback option (> page 203) is shown with a symbol behind album name ⑨ (no display for [Normal track sequence](#)).

- ❗ If the device connected does not contain any playable tracks, a message appears to this effect.

Selecting music files

Note

COMAND displays the data stored on the iPod® or MP3 player according to the filing structure used in the respective medium.

Selecting by skipping to a track

- ▶ **To skip forwards or back to a track:** turn  the COMAND controller when the display/selection window is active.

or

- ▶ Press the  or  button.
The skip forward function skips to the next track. The skip back function skips to the beginning of the current track if the track has been playing for more than eight seconds. If the track has been playing for less than eight seconds, it skips to the start of the previous track. If you have selected a

playback option other than [Normal track sequence](#), the track sequence is random.

- ▶ **On the multifunction steering wheel:** switch on Media Interface mode in COMAND (> page 219).
- ▶ On the multifunction steering wheel, press the  or  button to select the [Audio](#) menu.
- ▶ Briefly press the  or  button.
If you hold down  or , the system runs through the list more quickly. Not all media players support this function.
If track information is available on the media player, the multifunction display shows the number and name of the track.

Selecting using the number keypad

- ▶ **To make an entry:** press the  button.
An input menu appears. The number of characters available for input depends on the number of stored tracks.
- ▶ **To enter a track number:** press a number key, e.g. .
The digit is entered in the first position in the input line.

- ❗ COMAND will ignore and not display an invalid digit.
- ▶ Enter more numbers if desired.
The track plays after the last possible number is entered.
- ❗ Pressing and holding a number button for 2 seconds or more completes entry and the corresponding track is played.

Fast forward/rewind

- ▶ While the display/selection window is active, slide  and hold the COMAND controller until the desired position has been reached.

or

- ▶ Press and hold the  or  button until the desired position is reached.

- On an iPod®/iPhone®, fast rewind only functions within the current track.

Selecting a category/playlist/folder

Overview

iPod® and selected MP3 players

For an iPod® or MP3 player, you can select tracks using categories or folders.

Depending on the device connected, the following categories may be available, for example:

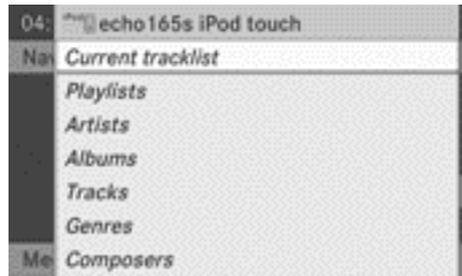

- [Current tracklist](#)
- [Playlists](#) (e.g. [All](#))
- [Artists](#)
- [Albums](#)
- [Tracks](#)
- [Podcasts](#)
- [Genres](#)
- [Composers](#)
- [Audiobooks](#)

- Some playback categories contain the entry [All](#). If this entry has been selected, the entire content of the category selected will be played.

Calling up a category list

- Select [Search](#) in the basic display by sliding $\odot \downarrow$ and turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm. The list of categories appears.

- The [Search](#) menu item is not available until the device has been activated.

P82.87-6378-31

Category list (example)

- Select [Current tracklist](#) by turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm. The contents of the current track list appear.

P82.87-6379-31

Current track list (example)

- ① Icon for next folder up
- ② Device icon and device name
- ③ Track symbol
- ④ Current track
- Select the track by turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm. The track is played.
- To switch to the next folder up:** slide $\leftarrow \odot$ the COMAND controller or press the \leftarrow button.

Playing back the contents of a category or folder

- ▶ Select the category or folder by turning  the COMAND controller.
- ▶ Press  the COMAND controller for longer than two seconds.
The content of the category or folder selected is played in accordance with the playback option (\triangleright page 203) selected.

Alphabetical track selection

iPod® and MP3 players

This function is available for alphabetically sorted categories and folders. This function is not available for albums or playlists, for example.

- ▶ Select a category, e.g. **Artists**, by turning  the COMAND controller and press  to confirm.
The available artists are displayed.
- ▶ Press the corresponding number key once or several times to select the first letter of the artist's name (e.g. for an artist beginning with the letter "C", press number key  three times).
The available letters are listed at the lower edge of the display.
After a message, the first entry in the list which matches the letter entered is highlighted.
- i** If no corresponding entry exists, the last entry corresponding to a previous letter is highlighted instead.
- i** For iPods® and MP3 players, the quality of the search results is highly dependent on the version and language variant of the software (e.g. iTunes® version) used to populate the device.
If different sorting rules are defined (e.g. in iTunes®), the search is cancelled without any result.

Playback options

The following options are available:

- **Normal track sequence**
Normal track sequence: you hear the tracks in their normal order (e.g. numerical or alphabetical).
 - **Random media**
All the tracks on the medium are played in random order.
 - **Random track list**
The tracks in the currently active category or folder, including any subfolders, are played in random order.
- i** For MP3 players, the random playlists offer a maximum of 300 tracks chosen at random.
- ▶ **To select a playback option:** select **Media Interface** in the basic display by sliding  and turning  the COMAND controller and press  to confirm.
The options list appears. The • dot indicates the option selected.
 - ▶ Select an option and press  to confirm.

Notes for the MP3 player

Data formats

MP3 and WMA are supported as data formats with fixed and variable bitrates (up to 320 kbits/s).

Notes on MP3 players

- Up to eight directory levels with up to 1,000 tracks per directory are supported.
Do not use USB extension leads or adapters. They can impair functionality.
- i** DRM (Digital Rights Management) protected files are not supported by the Media Interface.

Audio AUX mode

Notes on audio AUX mode

You can connect an external audio source (AUX) to COMAND. The socket for this is located in the glove compartment.

If COMAND is equipped with a Media Interface, external audio sources are connected using the cable set provided. The cable set then replaces the audio AUX socket. The connections for the Media Interface are located in the stowage compartment in the centre console.

- i** You can find more information on the Internet at <http://www.mercedes-benz.com/connect> and in the "Media Interface mode" section (▷ page 218).

Activating audio AUX mode

When you connect an external audio source, audio AUX is not selected automatically.

- ▶ Select **Audio** in the main function bar by sliding **↑** and turning **⌚** the COMAND controller and press **⌚** to confirm.
If AUX mode was the last mode selected, it will now be active.
If another audio source is switched on, you can now switch to audio AUX mode in the audio menu.
- ▶ Select **Audio** using **↑** and press **⌚** to confirm.
The audio menu appears.
- ▶ Select **Aux** using **⌚** and press **⌚** to confirm.
The audio AUX menu appears. The medium in the external audio source is played, if the source is connected and playback selected.

Please see the respective operating instructions for how to operate the external audio source.

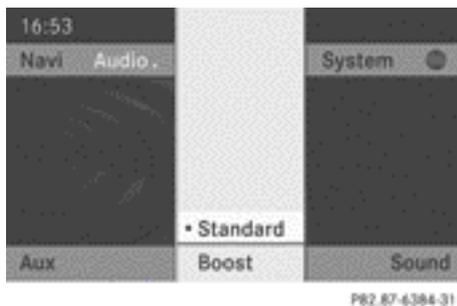

You will find details on volume (▷ page 30) and sound (▷ page 31) settings in the "At a glance" section.

⚠ Risk of accident

External audio sources may have different volumes, which can mean that system messages such as traffic announcements and navigation system announcements are much louder. If necessary, please deactivate the system messages or adjust their volume manually.

Increasing the volume using COMAND

- In some cases, the volume of the external audio device may be quieter or louder, or the usual maximum possible volume may be lower. On some devices, it is possible to adjust the volume separately. In this case, start at a medium volume and increase it gradually. This enables you to determine whether the system is able to play the music at high volume without distorting it.
- ▶ Select **VoLume** in the AUX display by turning **⌚** the COMAND controller and press **⌚** to confirm.
A menu appears. The **•** dot indicates the current setting.

- ▶ Select **Standard** or **Boost** and press  to confirm.

Standard: the volume of the external audio source is adjusted to a standard value.

Boost: the volume of the external audio source is raised by approximately 10 dB.

Vehicle equipment	226
General information	226
Basic settings	226
TV mode	227
Video DVD mode	232
Video AUX operation	238
Picture viewer	239

Vehicle equipment

i These Operating Instructions describe all standard and optional equipment available for your vehicle at the time it was purchased. Please note that your vehicle may not be equipped with all features described.

General information

Automatic picture shutoff

If the vehicle is travelling faster than approximately 5 km/h, the picture automatically switches off in the following modes:

- TV mode (with teletext)
- Video DVD mode

The following message appears in the display:

In order not to distract you from the traffic situation, the picture is faded out while the vehicle is in motion.

As soon as the vehicle speed drops below about 5 km/h, the picture switches back on again.

Background video mode

If another main function is active, e.g. navigation, you can perform the following operations in TV and video DVD mode. A window shows information about the selected function.

Using the  or  button, you can:

- select a TV channel
- select a scene or chapter (video DVD mode)
- fast-forward or rewind (video DVD mode)

Where operating steps can be carried out in the active main function using the number keys, the following functions are **not** possible:

- selecting TV channels from the channel presets
- storing TV channels in the channel presets

Basic settings

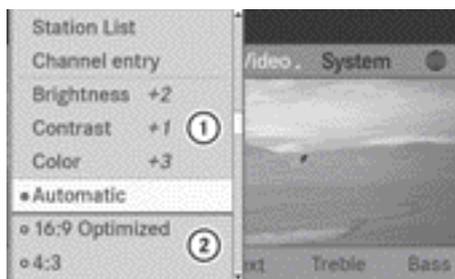

Picture settings

Adjusting the brightness, contrast or colour

The following describes the TV, video DVD and video AUX modes.

- ▶ Press  the COMAND controller in TV or video DVD mode and show the menu.
- ▶ Select **TV**, **DVD-V** or **Aux** by sliding  and turning  the COMAND controller and press  to confirm.

A menu appears.

P82.87-6420-31

Example display: TV mode

- ① Brightness, contrast and colour
- ② Picture formats

- ▶ Select **Brightness**, **Contrast** or **Colour** by turning  the COMAND controller and press  to confirm.

Changing the picture format

The following describes the TV, video DVD and video AUX modes.

- ▶ Press  the COMAND controller in TV or video DVD mode and show the menu.
- ▶ Select **TV**, **DVD-V** or **Aux** by sliding  and turning  the COMAND controller and press  to confirm.
A menu appears.
- ▶ Select **Automatic**, **16:9 optimised**, **4:3** or **Widescreen** and press  to confirm.
The dot in front of the entry indicates the currently selected format.
- ▶ Select a setting by turning  the COMAND controller and press  to confirm.

TV mode

Reception quality

Portable electronic devices in the vehicle may seriously impair TV reception.

The TV tuner is designed to receive analogue terrestrial TV channels (all standards) and digital TV channels conforming to the DVB-T standard⁷. If the reception deteriorates, the TV receiver automatically switches to an alternative frequency (digital or analogue transmission) transmitting the same programme content with better reception, as soon as a corresponding channel can be received.

The constantly changing reception conditions while the vehicle is in motion can interrupt the signal. If the reception is too poor, COMAND can switch off the sound and freeze or hide the picture. To indicate this, an icon of a radio tower, struck through, appears in the display.

Switching to TV mode

- ▶ Select **Video** in the main function bar by sliding  and turning  the COMAND controller and press  to confirm.
If TV mode was the last mode selected, it will now be active.
If another mode is switched on, you can now switch on TV mode in the video menu.
- ▶ Select **Video** and press  to confirm.
The video menu appears.

P82.87-6421-31

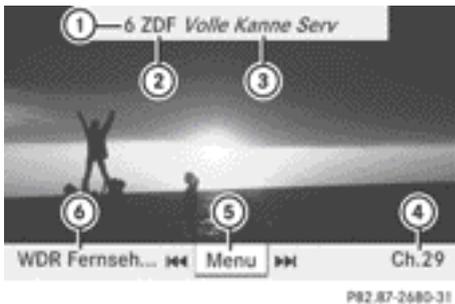

Video menu

- ▶ Select **TV** and press  to confirm.
You see the last TV channel selected, provided it can still be received.

Hiding/showing the navigation menu

- ▶ **To show:** turn  or slide  the COMAND controller.
- ▶ **To hide:** slide  the COMAND controller.
or
- ▶ Wait for approximately eight seconds.

⁷ DVB-T may not be available in some countries, or may not be available in all areas.

Navigation menu displayed

- ① Preset position of the selected TV channel
- ② Selected TV channel
- ③ Current programme (digital TV receiver only)
- ④ Next TV channel in the channel list (channel name or number)
- ⑤ To show the menu
- ⑥ Previous TV channel in the channel list (channel name or number)

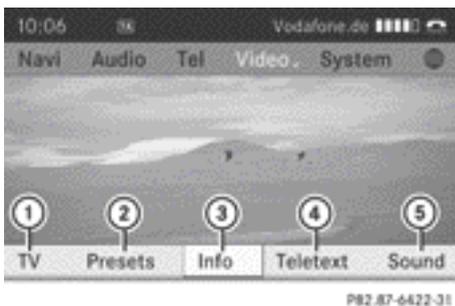

Showing/hiding the menu

► **To show:** press the COMAND controller.

or

► Select **Menu** while the navigation menu is shown and press to confirm.

► **To hide:** slide the COMAND controller and confirm **Full screen** by pressing .

Menu shown

- ① TV options
- ② Channel preset list

- ③ Information on the current programme (only for digital TV channels)
- ④ To switch on teletext
- ⑤ Sound settings

Selecting TV channels

Selecting channels from the navigation menu

► Turn or slide the COMAND controller.

or

► Press the or button.

The TV tuner selects the previous or next channel from the alphabetical channel list.

Selecting a station from the station list

As soon as the vehicle or COMAND is in operation, the background reception function of the TV tuner lists the channels that can currently be received in the channel list.

The channel list contains the following information, if it is transmitted and can be received:

- the names of the channels that can be received
- the name of the current and next programme on each channel
- information text about the current programme
- the name of digital radio stations; these are listed below the TV channels

The background reception function requires a certain amount of time to update this information. COMAND can only display the information if the TV channels are transmitting it and if the reception conditions are adequate. The electronic programme guide (EPG) supplies the titles of the current and upcoming programmes, as well as the information text about the current programme.

The channel list is sorted alphabetically and contains:

- analogue TV channels (all standards)
- digital TV channels (DVB-T standard)
- digital radio stations (DVB-T standard)

i The radio stations are optically separated from the TV channels by a dotted line.

- ▶ **To set a channel using COMAND:** press  the COMAND controller to show the menu.
- ▶ Select **TV** by sliding  and turning  the COMAND controller and press  to confirm.
- ▶ Select **Channel list** and press  to confirm. The channel list appears. The  dot in front of a list entry indicates the currently selected channel. A number before the list entry shows the memory slot in the channel presets.
- ▶ Select the channel and press  to confirm.
- ▶ **To set a channel using the multifunction steering wheel:** switch on TV mode in COMAND (▷ page 227).
- ▶ Press  or  to select the **Audio** menu.
- ▶ Press and hold  or .

Selecting channels via the channel presets

- ▶ **To set a channel using COMAND:** press  the COMAND controller to show the menu.
- ▶ Select **Preset**s by sliding  and turning  the COMAND controller and press  to confirm. The channel preset memory appears. The  dot in front of a preset position indicates that the currently selected channel is stored there.

Channel presets

- ▶ Select the channel by turning  the COMAND controller and press  to confirm.

or

- ▶ Press a number key, such as .

i If you press the  number key, for example, the preset view changes and the corresponding channel name becomes visible.

- ▶ **To set a channel using the multifunction steering wheel:** switch on TV mode in COMAND (▷ page 227).

- ▶ Press  or  to select the **Audio** menu.
- ▶ Press  or  briefly.

Selecting channels by entering the channel and programme number

Several programmes can be transmitted on one channel with digital TV. You can therefore enter a channel and the desired programme on this channel.

Only one programme can be sent on a channel with analogue TV. The programme entry function therefore has no effect.

- ▶ **Option 1:** press  the COMAND controller to show the menu.
- ▶ Select **TV** by sliding  and turning  the COMAND controller and press  to confirm.
- ▶ Select **Channel entry** and press  to confirm.

- ▶ **Option 2:** press the  button while the TV is playing. Irrespective of the option, an input bar appears at the top of the screen.
- ▶ Press the corresponding number keys to enter the channel/programme number.
- ▶ Confirm by pressing the COMAND controller  or press and hold the number key until the character bar disappears. The channel is set.

i If you have not entered a programme number, the first programme with adequate reception will be set for a digital channel.

i You can enter channels or programmes available in your country even if the reception is currently not adequate.

If you enter channels which are not intended for your country or are not allowed there, the **Invalid channel number** message appears.

- ▶ Press  the COMAND controller and confirm the message.

Storing TV channels

Storing channels manually

There are ten preset positions available.

- ▶ **To call up the channel presets:** press  the COMAND controller to show the menu.
- ▶ Select **Presets** by sliding  and turning  the COMAND controller and press  to confirm. The channel preset memory appears. The
 - dot in front of a preset position indicates that the channel currently selected is stored there.
- ▶ **To select a preset:** turn  the COMAND controller.

- ▶ **To store a channel:** press and hold the COMAND controller  until you hear a tone.

or

- ▶ Press and hold a number key such as  until you hear a tone.

Then, the TV picture reappears.

- i** If you press number key , for example, the channel preset display changes and the corresponding preset becomes visible.

Storing channels automatically

This function automatically stores channels with adequate reception in order of their reception quality. Any channels stored manually in the preset memory will be lost.

- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Presets** by sliding  and turning  the COMAND controller and press  to confirm.
- ▶ Select **Autostore** and press  to confirm. COMAND searches for channels with adequate reception. The available channels are automatically stored in the preset positions.

Information about the current programme

This function is only available for digital TV channels and digital radio stations.

- ▶ **To show the menu:** press  the COMAND controller.
- ▶ Select **Info** by sliding  and turning  the COMAND controller and press  to confirm.

You will see the information if it is provided by the selected TV channel. The information field otherwise remains empty.

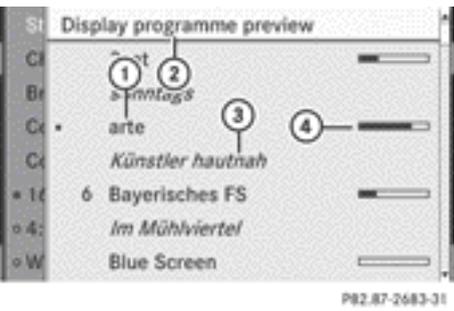

- i** It may take a few seconds for the information to appear.

Displaying the current programme or programme preview

This function is only available for digital TV channels and digital radio stations. The programme preview is also referred to as the electronic programme guide (EPG).

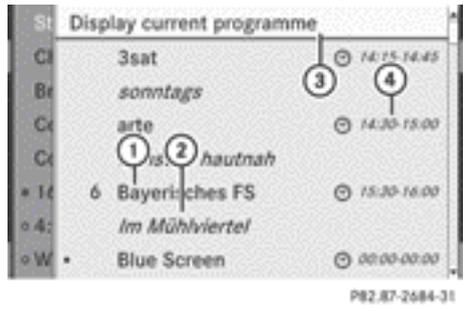

- ▶ **To show the menu:** press the COMAND controller.
- ▶ Select **TV** by sliding and turning the COMAND controller and press to confirm.
- ▶ Select **Channel list**.

The channel list appears. It shows the current programme on the digital TV channels and digital radio stations which have adequate reception. The dot in front of a list entry indicates the currently selected channel.

- ① Current TV channel
- ② To display the programme preview
- ③ Current programme
- ④ Visual display of the elapsed programme time

- ▶ **To show the programme preview:** select **Display programme preview** and press to confirm. The channel list shows the channel's next programme.

- ① TV channel
- ② Next programme
- ③ To display the current programme
- ④ The beginning and end of the programme

- ▶ **To show the current programme:** select **Display current programme** and press to confirm.
- ▶ **To close the display:** press the button.

Basic TV settings

Fixing the frequency

The TV tuner may automatically switch to an alternative channel with the same programme content but better reception, depending on reception quality. You can use **Channel fix** to prevent this channel switching. This is useful, for example, when the same content is broadcast with a time delay, or when there is interference on one of the frequencies.

- ▶ **To show the menu:** press the COMAND controller.
- ▶ Select **TV** by sliding and turning the COMAND controller and press to confirm.
- ▶ Select **Channel fix** and press to confirm.
- ▶ Depending on the previous status, the function is switched on or off . When the

function is switched on, **FIX** appears in the display window.

- ▶ **To exit the menu:** slide ←(○)→ the COMAND controller.

Setting the reception region

The correct reception region setting ensures that analogue TV channels can be received with the usual quality and functionality. COMAND is set to the correct reception region at the factory. If you are driving your vehicle in a different country or region, you should set COMAND accordingly. A Mercedes-Benz Service Centre can help you to select the correct reception region.

- ▶ **To show the menu:** press (○) the COMAND controller.

- ▶ Select **TV** by sliding (○)↕ and turning (⌂)(○) the COMAND controller and press (○) to confirm.

- ▶ Select **TV standard** and press (○) to confirm.

A list appears, showing the reception regions. The ● dot in front of a list entry indicates the currently selected reception area or country.

- ▶ Select the reception area and press (○) to confirm.

A message appears to inform you that if the wrong country is set, correct reception will not be possible.

- ▶ Select **Yes** or **No** and press (○) to confirm. If you select **Yes**, COMAND will switch to the country setting you have selected. If you select **No**, the country list will appear again.

Teletext

Introduction

Teletext can only be received if there is no interference in the picture reception. The teletext function receives all teletext pages for the channel currently set, excluding sub-

pages, and stores them in the system memory. If you set a different channel, the memory is cleared and refilled.

Switching teletext on/off

- ▶ **To show the menu:** press (○) the COMAND controller.

- ▶ **To switch on:** select **Teletext** by sliding (○)↕ and turning (⌂)(○) the COMAND controller and press (○) to confirm.

- ▶ **To switch off:** press and hold the (←) back button. The TV picture appears.

Selecting a teletext page

- ▶ **To access a page directly:** press the corresponding number keys.

i You can only enter pages that are permissible for teletext between 100 and 899.

- ▶ **To access the previous/next page:** turn (⌂)(○) or slide ↑(○) ↓ the COMAND controller.

Dynamic teletext page

A dynamic teletext page consists of several subpages. The display automatically changes to the next page after a certain time.

Video DVD mode

Safety notes

⚠ Risk of injury

COMAND is classified as a class 1 laser product. You must not open the casing. If you open the casing, or if the casing is faulty or damaged, there is a risk of exposure to invisible laser radiation. This may damage your eyes, or those of others.

COMAND does not contain any parts that can be serviced by the user. For safety reasons, all maintenance work must be carried out by qualified aftersales technicians.

⚠ Risk of accident

Only when the vehicle is stationary should you:

- load a disc
- eject a disc

There is a risk of being distracted from the road and traffic conditions if this is done while the vehicle is in motion.

Notes about discs

There may be playback problems when playing copied discs. There are a large variety of discs, DVD authoring software, writing software and writers available. This variety means that there is no guarantee that the system will be able to play discs that you have copied yourself.

! Do not affix stickers or labels to the discs, as they could peel off and damage COMAND. Stickers can cause the disc to bend, which can result in read errors and disc recognition problems.

! COMAND is designed to accommodate discs which comply with the EN 60908 standard. You can therefore only use discs with a maximum thickness of 1.3 mm.

If you insert thicker discs, e.g. those that contain data on both sides (DVD on one side and audio data on the other), they cannot be ejected and can damage COMAND. Use round discs with a diameter of 12 cm. Do not use discs with a diameter of 8 cm, even with an adapter.

DVD playback conditions

There are video DVDs available on the market which do not conform to the current standards. Such DVDs may have picture, sound or other playback problems.

COMAND can play back video DVDs produced according to the following standards:

- region code 2 (for Europe) or region code 0 (no region code)
- PAL or NTSC standard

You will generally find the relevant details either on the DVD itself or on the DVD case.

i If you insert a video DVD with a different region code, you will see a message to this effect.

i COMAND is set to region code 2 at the factory. This setting can be changed at a Mercedes-Benz Service Centre. This will allow you to play video DVDs with a different region code, provided that they are produced in accordance with the PAL or NTSC standard. The region code can be changed a maximum of five times.

Function restrictions

Depending on the DVD, it is possible that certain functions or actions will be temporarily blocked or may not function at all. As soon as you try to activate these functions or actions, you will see the  symbol in the display.

Inserting and removing DVDs

- ▶ Proceed as described in the "Inserting and ejecting CDs and DVDs" section (▷ page 193).

Activating video DVD mode**Option 1**

- ▶ **Single DVD drive:** insert a video DVD. COMAND loads the medium inserted and starts to play it.

- ▶ **DVD changer:** insert a video DVD.
- ▶ Press the **[disc]** function button or the **[←]** back button.
COMAND loads the medium inserted and starts to play it.

Option 2

- ▶ Press the **[disc]** function button one or more times.
COMAND switches to the previous disc operating mode.

i By pressing this function button repeatedly, you can change the operating mode in the following order:

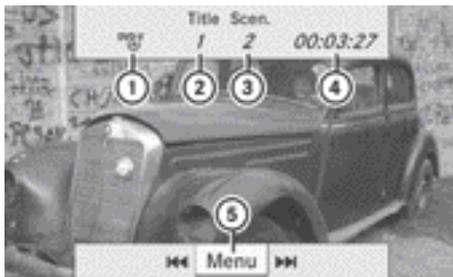

- audio CD/DVD/video DVD/MP3 in the DVD changer or DVD single drive (disc mode)
 - memory card mode
 - MUSIC REGISTER
 - USB storage device
 - Media Interface or audio AUX mode
 - Bluetooth® audio mode
- ▶ Select **Media** by sliding **⊙** and turning **⌂** the COMAND controller and press **⊗** to confirm.
 - ▶ Select a **DVD-V** video DVD from the media list (> page 236).

Option 3

- ▶ Select **Video** in the main function bar by sliding **↑** and turning **⌂** the COMAND controller and press **⊗** to confirm.
If video DVD mode was the last mode selected, it will now be active.
If another video source is switched on, you can now switch to video DVD mode in the video menu.
- ▶ Select **Video** by sliding **↑** and turning **⌂** the COMAND controller and press **⊗** to confirm.
The video menu appears.
- ▶ Select **Video-DVD** and press **⊗** to confirm.

Hiding/showing the navigation menu

- ▶ **To display:** slide **↑** **⊙** **↓** the COMAND controller.
 - i** This function is not available while the DVD's own menu (> page 236) is being displayed.
 - ▶ **To hide:** slide **↑** **⊙** **↓** the COMAND controller.
- or
- ▶ Wait for approximately eight seconds.

P82.87-2549-31

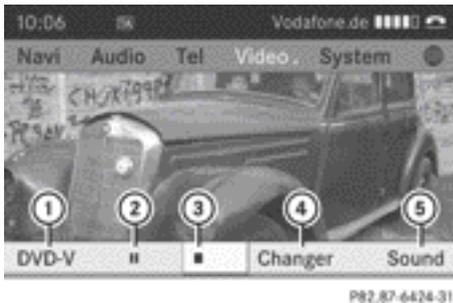

Navigation menu displayed

- ① Data medium type
- ② Current track
- ③ Current scene
- ④ Track time
- ⑤ To show the menu

Showing/hiding the menu

This function is not available while the DVD's own menu (> page 236) is being displayed.

- ▶ **To display:** in full-screen mode, press **⊗** the COMAND controller.
- or
- ▶ Select **Menu** while the navigation menu is shown and press **⊗** to confirm.
 - ▶ **To hide:** slide **↑** **⊙** the COMAND controller and confirm **Full screen** by pressing **⊗**.

Menu shown

- ① Video DVD options
- ② Pause function
- ③ Stop function
- ④ Media selection (**Changer** or **Media**)
- ⑤ Sound settings

Fast forward/rewind

- ▶ In full-screen mode, slide $\leftarrow \rightarrow$ and hold the COMAND controller until the desired position has been reached.

or

- ▶ Press and hold the \lll or \ggg button until the desired position is reached. You see the navigation menu.

Stop function

- ▶ Press \odot the COMAND controller to show the menu.
- ▶ **To interrupt playback:** select \blacksquare by turning $\{\odot\}$ the COMAND controller and press \odot to confirm. The \parallel display changes to \blacktriangleright . The video image is hidden.
- ▶ **To continue playback:** select \blacktriangleright and press \odot to confirm. Playback continues from the point where it was interrupted.

- ▶ **To stop playback:** while playback is interrupted, select \blacksquare again and press \odot to confirm.

or

- ▶ During playback, confirm \blacksquare by pressing \odot twice in rapid succession. Selection is at \blacktriangleright .
- ▶ **To restart playback:** confirm \blacktriangleright by pressing \odot . Playback restarts from the beginning.

Pause function

- ▶ Press \odot the COMAND controller to show the menu.
- ▶ **To pause playback:** select \parallel by turning $\{\odot\}$ the COMAND controller and press \odot to confirm. The \parallel display changes to \blacktriangleright .
- ▶ **To continue playback:** select \blacktriangleright and press \odot to confirm. The menu is hidden.

Selecting a scene/chapter

If the film is divided into scenes or chapters, you can select them directly while the film is running, or skip forwards step-by-step. Some DVDs do not permit this at certain points (e.g. during the opening credits).

It may also be possible to select the scene/chapter from within the menu stored on the DVD.

- ▶ **To skip forwards or back:** in full-screen mode, turn $\{\odot\}$ or slide $\leftarrow \rightarrow$ the COMAND controller.

or

- ▶ Press the \lll or \ggg button on the control panel. The navigation menu (\triangleright page 227) appears for approximately eight seconds.

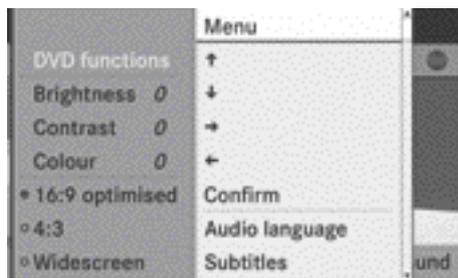

- ▶ **On the multifunction steering wheel:** switch on video DVD mode in COMAND (▷ page 233).
- ▶ Use the ◀ or ▶ button to select the **Audio** menu.
- ▶ Press ▲ or ▼ to select a scene/ chapter.
If you press and hold ▲ or ▼ for an extended period, rapid scroll begins.

Selecting a film/title

This function is only available if the DVD is divided into several films/tracks. If the DVD contains several films, these can be selected directly. A film can be selected either when the DVD is being played back or when it is stopped.

The film can also be selected from the menu on the DVD itself.

- ▶ Press ⏻ the COMAND controller to show the menu.
- ▶ Select **Video-DVD** by turning ⏻ the COMAND controller and press ⏻ to confirm.
- ▶ Select **DVD functions** and press ⏻ to confirm.
A menu appears.

P82.87-6425-31

DVD function menu

- ▶ Select **Title selection** by turning ⏻ the COMAND controller and press ⏻ to confirm.
- ▶ Select a film/title and press ⏻ to confirm.

Selecting a video DVD from the media list

- ▶ Press ⏻ the COMAND controller to show the menu.
- ▶ Select **Changer** or **Media** by sliding ⏻ and turning ⏻ the COMAND controller and press ⏻ to confirm.
The media list appears. The • dot indicates the current medium being played. Video DVDs are indicated by the ^{DVD}V icon.
- ▶ **Equipped with a single DVD drive:** press ⏻ the COMAND controller. COMAND loads the video DVD and begins playing it.
- ▶ **Equipped with a DVD changer:** press ⏻ the COMAND controller to display all magazine trays.
- ▶ Select a video DVD by turning ⏻ the COMAND controller and press ⏻ to confirm.
COMAND loads the video DVD and begins playing it.

i If you select a CD, an audio DVD or an MP3 medium, you switch to the respective audio mode. You can find further information about the media list on (▷ page 198).

DVD menu

Calling up the DVD menu

The DVD menu is the menu stored on the DVD itself. It is structured in various ways according to the individual DVD and permits certain actions and settings.

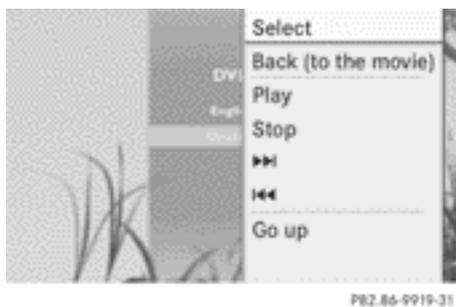

In the case of multi-language DVDs, for example, you can change the DVD language in the DVD menu.

- ▶ In full-screen mode, press ⏻ the COMAND controller to show the menu.
- ▶ Select **Video-DVD** in the menu by turning ⏻ the COMAND controller and press ⏻ to confirm.

- ▶ Select **DVD functions** and press  to confirm.
- ▶ Select **Menu** and press  to confirm.
The DVD menu appears.

Selecting menu items in the DVD menu

- ▶ Select a menu item by sliding   or turning   the COMAND controller and press  to confirm.
The menu appears.
- i** Menu items which cannot be selected are shown in grey.

- ▶ **To reconfirm your selection:** confirm **Select** by pressing .
COMAND executes the action.
Make a selection from the further options, if necessary.
COMAND then switches back to the DVD menu.

- i** Depending on the DVD, the menu items: **Back (to the movie)**, **Play**, **Stop**, ,  or **Go up** may not function or not function at certain points in the DVD menu. To indicate this, the  icon appears in the display.

Moving up one level in the DVD menu

- ▶ Select the corresponding menu item in the DVD menu and press  the COMAND controller to confirm.
- or

- ▶ Select any menu item in the DVD menu and press  the COMAND controller to confirm.
- ▶ Select **Go up** and press  to confirm.

Back to the film

- ▶ Press the  back button repeatedly until you see the movie.
- or
- ▶ Select the corresponding menu item in the DVD menu.
- ▶ Select the **Back (to the movie)** menu item in the menu and press  to confirm.

Setting the language and audio format

This function is not available on all DVDs. If it is available, you can set the DVD menu language, the audio language or the audio format. The number of settings is determined by the DVD content. It is possible that the settings may also be accessed in the DVD menu (▷ page 236).

- ▶ In full-screen mode, press  the COMAND controller to show the menu.
- ▶ Select **Video-DVD** in the menu by turning   the COMAND controller and press  to confirm.
- ▶ Select **DVD functions** and press  to confirm.
- ▶ Select **Menu language** or **Audio language** and press  to confirm.
In both cases, a menu appears after a few seconds. The  dot in front of an entry indicates the currently selected language.
- ▶ Select a setting by turning   the COMAND controller and press  to confirm.

Subtitles and camera angle

These functions are not available on all DVDs. The number of subtitle languages and camera angles available depends on the content of the DVD. It is possible that the settings may also be accessed in the DVD menu (▷ page 236).

- ▶ In full-screen mode, press  the COMAND controller to show the menu.
- ▶ Select **DVD-Video** in the menu by turning  the COMAND controller and press  to confirm.
- ▶ Select **DVD functions** and press  to confirm.
- ▶ Select **Subtitles** or **Camera angle** and press  to confirm.
In both cases, a menu appears. The  dot in front of an entry indicates the current setting.
- ▶ Select a setting by turning  the COMAND controller and press  to confirm.

Interactive content

DVDs can contain interactive content (e.g. a video game). In a video game, for example, you may be able to influence events by selecting and triggering actions. The type and number of actions depend on the DVD.

- ▶ Select an action by sliding   or  the COMAND controller and press  to execute it.
A menu appears and the first entry, **Select**, is highlighted.
- ▶ Press  the COMAND controller.

Video AUX operation

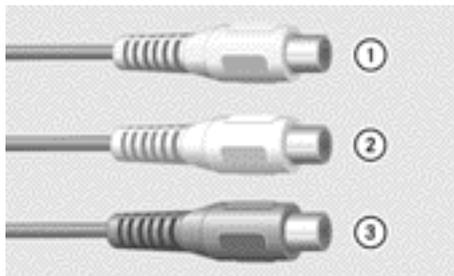

Connecting external video sources

If your vehicle is equipped with a Media Interface, you can connect an external video source.

You require an additional audio/video cable set to connect an external video source to the Media Interface.

For more details, please contact a Mercedes-Benz Service Centre or visit <http://www.mercedes-benz.com/connect>. Then, follow the instructions in the "Media Interface" section.

You will find the connection sockets in the glove compartment.

P82.87-2532-31

Audio/video sockets

- ① Video port (V) (yellow)
- ② Audio port (L) (white)
- ③ Audio port (R) (red)

 To facilitate correct playback, it may be necessary to set a suitable video standard in the external video source.

- ▶ Connect the external device to corresponding port ①, ② or ③.
COMAND activates the device.

Switching on video AUX mode

- ▶ Select **Video** in the main function bar by sliding  and turning  the COMAND controller and press  to confirm.
If video AUX mode was the last mode selected, it will now be active.

If another video source is switched on, you can now switch to video AUX mode in the video menu.

- ▶ Select **Video** and press  to confirm.
- ▶ Select **Aux** and press  to confirm.

The video AUX menu appears. You will hear and see the content of the external video source if it is connected and switched to playback.

Video AUX mode

For details on how to operate the external video source, see the respective device's operating instructions.

Showing/hiding the menu

- ▶ **To show:** press  the COMAND controller.
- ▶ **To hide:** slide  the COMAND controller and confirm **Full screen** by pressing .

Volume and sound settings

You will find details on volume (▷ page 30) and sound (▷ page 31) settings in the "At a glance" section.

Risk of accident

External video sources may have different volumes, which can mean that system messages such as traffic announcements and navigation system announcements are much louder. If necessary, please deactivate the system messages or adjust their volume manually.

- i** It may be the case that a device which is connected as an external video source seems quieter or louder in the vehicle, or that the usual maximum volume cannot be reached. On some devices, it is possible to adjust the volume separately. In this case, start at a medium volume and increase it gradually. This enables you to determine whether the system is able to play the sound at high volume without distorting it.

Increasing the volume using COMAND

- ▶ Select **Volume** in the AUX display by turning  the COMAND controller and press  to confirm.
A menu appears. The **•** dot indicates the current setting.
- ▶ Select **Standard** or **Boost** and press  to confirm.
Standard: the volume of the external video source is adjusted to a standard value.
Boost: the volume of the external video source is raised by approximately 10 dB.

Picture viewer

Introduction

If there are pictures on the active data medium, you can look at them.

Data medium	Supported picture formats
CD/DVD with picture files	jpeg, jpg
USB devices (sticks, hard drives)	jpeg, jpg
SD memory card:	

Calling up a category list

- ▶ Select a data medium (e.g. memory card) with pictures in the audio menu

(▷ page 186) or in the media list
(▷ page 198).

- ▶ Select **Search** in the basic display by sliding $\odot \downarrow$ and turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm. The category list appears.

Displaying pictures

- ▶ Select (▷ page 205) **Photos** in the category list by turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm. A folder directory appears.
- ▶ Select a folder with photos and press \odot to confirm. The folder displays the existing picture files (example).

P82.87-4427-31

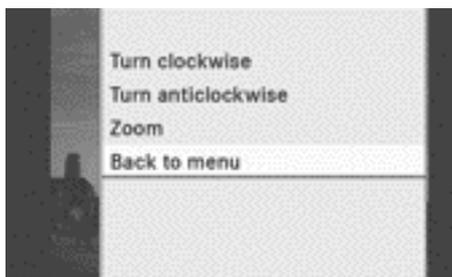

- ▶ Select a photo and press \odot to confirm. The photo is displayed and the music is stopped.

P82.87-4428-31

Changing the picture view

- ▶ Press \odot the COMAND controller. A menu appears.

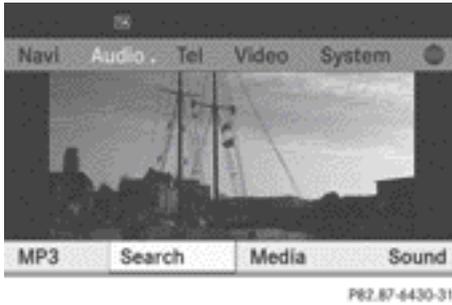

P82.87-4429-31

- ▶ **To turn the picture clockwise:** confirm **Turn clockwise** by pressing \odot the COMAND controller.
- ▶ **To turn the picture anti-clockwise:** select **Turn anti-clockwise** by turning the $\left\{ \odot \right\}$ COMAND controller and press \odot to confirm.
- ▶ **To zoom into a picture:** select **Zoom** by turning the $\left\{ \odot \right\}$ COMAND controller and press \odot to confirm. After you have zoomed into the picture, you can move the section of the picture.
- ▶ Slide $\uparrow \odot \downarrow \leftarrow \odot \rightarrow$ the COMAND controller.
- ▶ **To return to the original size:** press \odot the COMAND controller.

Exiting the picture viewer

- ▶ Select **Back to menu** in the menu by turning $\left\{ \odot \right\}$ the COMAND controller and press \odot to confirm.

- ▶ **To start playing music:** confirm **Search** by pressing . The category list appears (▷ page 205).
- ▶ Select a category by turning  the COMAND controller and press  to confirm.
- ▶ Select other entries within the category (e.g. track, album) until the music starts playing.

Vehicle equipment

- i** These Operating Instructions describe all standard and optional equipment available for your vehicle at the time it was purchased. Please note that your vehicle may not be equipped with all features described.

General information

Changing batteries

Notes

Batteries are required for the remote control and for the two sets of cordless headphones.

Risk of injury

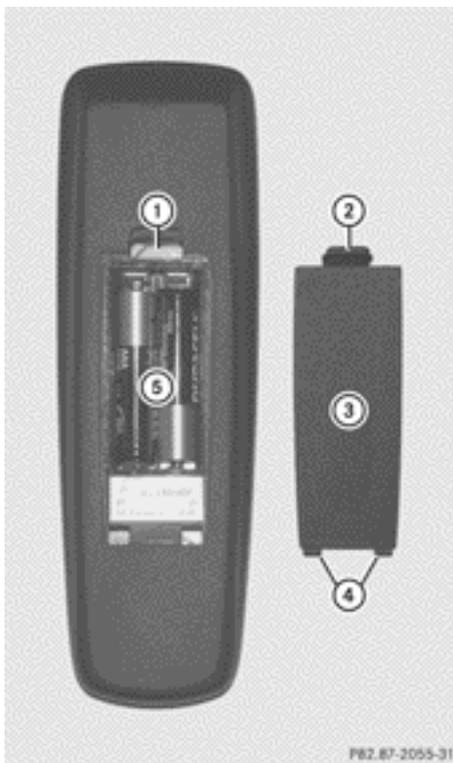

Keep batteries away from children. Consult a doctor immediately if a child should swallow a battery.

Do not dismantle, short-circuit or burn a battery.

Environmental note

Dispose of used batteries in an environmentally responsible manner.

On the remote control

- ① Battery compartment
- ② Catch tab
- ③ Battery compartment cover
- ④ Retaining lugs
- ⑤ Batteries

The remote control contains 2 type AAA, 1.5 V batteries.

- ▶ **To open the battery compartment:** remove battery compartment cover ③ on the back of the remote control.
- ▶ To do so, press down retaining lug ② and take off battery compartment cover ③.
- ▶ Remove discharged batteries ⑤ from the tray.

- ▶ Insert the new batteries. Observe the polarity markings on the batteries and battery compartment when doing so.
Left-hand battery: The positive pole (+) must face upwards.
Right-hand battery: The positive pole (+) must face downwards.
- ▶ **To close the battery compartment:** insert battery compartment cover ③ starting with retaining lugs ④ into the battery compartment and allow catch tab ② to engage in place.

On the cordless headphones

The battery compartment cover is located on the left headphone.

- ① Battery compartment cover

The wireless headphones contain 2 type AAA, 1.5 V batteries.

- ▶ **To open the battery compartment:** flip battery compartment cover ① upwards.
As you do so, hold the left-hand side of the headphones as shown to prevent the batteries from falling out.
- ▶ Remove the discharged batteries from the tray.
- ▶ Insert the new batteries. Observe the polarity markings on the batteries and battery compartment when doing so.
Left-hand battery: The positive pole (+) must face upwards.

Right-hand battery: The positive pole (+) must face downwards.

- ▶ **To close the battery compartment:** press battery compartment cover downwards until it engages into place.
If the batteries have been inserted correctly, the indicator lamp will light up green when the headphones are switched on.

Basic functions

Operating with headphones

You can use the cordless headphones supplied and/or up to two sets of corded headphones connected to the corresponding jack of the rear-compartment screens (▷ page 35).

The following information can be found in the "Cordless headphones" section:

- switching the wireless headphones on/off (▷ page 38).
- adjusting the headphone volume (▷ page 38).
- selecting a screen for the headphones (▷ page 38).

Using the main loudspeakers

This function is available in conjunction with COMAND.

You can use the vehicle loudspeakers to listen to a disc inserted in the rear-compartment drive. To do so, at least one of the rear-compartment screens must be set to disc mode.

- ▶ **Setting using COMAND:** press, for example, the **RADIO** function button to switch on an audio mode.
- ▶ Select **Audio** by sliding ↑⊙ the COMAND controller and press ⊙ to confirm.
The Audio menu appears.
- ▶ Select **Rear** by turning ⏪⊙ the COMAND controller and press ⊙ to confirm.

- i** The headphones' volume setting does not affect the main loudspeakers.

Adjusting the sound settings

You can select the sound settings in the audio CD/DVD/MP3, TV, video DVD and AUX modes.

- ▶ Switch on an operating mode (e.g. audio CD mode) (▷ page 249).
- ▶ Select **Treble** or **Bass** using the    buttons on the remote control and press the  button to confirm. An adjustment scale appears.
- ▶ Select a setting using the   buttons and press the  button to confirm.

Multiple users

Simultaneous use of the rear-compartment disc drive

The two rear-compartment screens can be operated almost entirely independently from one another. However, there can be a conflict in some menus if the two screens are used simultaneously.

If the rear-compartment disc drive is being used for both screens simultaneously, selecting certain menus or settings on one of the screens also affects the other screen.

The following functions affect both screens:

- changing playback options
- selecting a track (from a track list or folder)
- using the play, pause and stop functions
- fast forward/rewind or scrolling
- calling up the DVD menu and navigating within it
- setting the language, subtitles and camera angle
- calling up interactive DVD content

The following functions affect only one screen:

- audio and video functions as well as picture settings
- switching between full screen and the menu

Switching between operating modes

When you exit an operating mode (e.g. audio CD mode), the current setting is saved. If you call up this operating mode again later, there are two possibilities:

- the operating mode has been changed on the other screen.
- the operating mode has not been changed.

In the first case, the operating mode appears as it is on the other screen.

In the second case, the setting appears on the screen as it was when you last exited the operating mode.

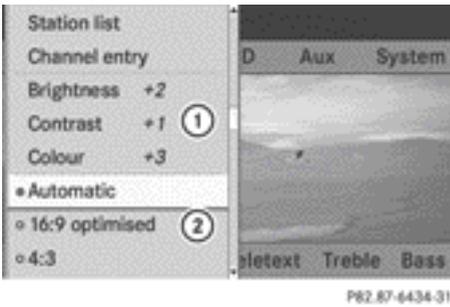

Picture settings

Overview

You can select these settings in TV, video DVD and AUX mode. Instructions for AUX mode are detailed later (▷ page 264).

Adjusting the brightness, contrast and colour

- ▶ Switch on TV mode (▷ page 227) or video DVD mode (▷ page 257).
- ▶ **To show the menu:** press the  button on the remote control.
or
- ▶ Select **Menu** while the navigation menu (▷ page 227) is shown and press the  button to confirm.
- ▶ In both cases, select **TV** or **Video-DVD** using the    buttons and press the  button to confirm.

TV mode (example)

① Brightness, contrast and colour

② Picture formats

- ▶ Select **Brightness**, **Contrast** or **Colour** using the buttons and press the button to confirm. An adjustment scale appears.
- ▶ Select a setting using the buttons and press the button to confirm.

Changing the picture format

- ▶ **To show the menu:** press the button on the remote control.

or

- ▶ Select **Menu** while the navigation menu (▷ page 227) is shown and press the button to confirm.
- ▶ Select **TV** or **DVD-V** using the buttons and press the button to confirm. The dot in front of one of the menu items **16:9 optimised**, **4:3** or **Widescreen** indicates the format currently selected.
- ▶ Select a format using the buttons and press the button to confirm.

System settings

Note

You can adjust almost all system settings individually for each screen without affecting

the other screen. You make these settings using the remote control (▷ page 36).

Selecting the display language

- ▶ Select **System** using the button on the remote control and press to confirm. You see the system menu on the selected rear screen.
- ▶ Select **Settings** using the button and press the button to confirm.
- ▶ Select **Language** using the buttons and press the button to confirm. The list of languages appears. The • dot indicates the current setting.
- ▶ Select a language using the buttons and press the button to confirm. The Rear Seat Entertainment System activates the respective language.

Switching the display design

- ▶ Select **Settings** in the system menu using the button on the remote control and press the button to confirm.
- ▶ Select **Day design**, **Night design** or **Automatic** using the buttons and press the button to confirm. The dot indicates the current setting.

Design	Explanation
Day design	The display is set permanently to day design.
Night design	The display is set permanently to night design.
Automatic	The display design changes depending on the vehicle instrument cluster illumination.

Setting the brightness

- ▶ Select **Settings** in the system menu using the  button on the remote control and press the  button to confirm.
- ▶ Select **Brightness** using the   buttons and press the  button to confirm. A scale appears.
- ▶ Adjust the brightness using the   buttons and press the  button to confirm. The brightness bar moves up or down. The picture becomes lighter or darker in accordance with the scale.

Showing/hiding the picture

- ▶ **To hide the picture:** select **Display off** in the system menu using the   buttons on the remote control and press the  button to confirm. The picture is hidden.
- ▶ **To display the picture:** press the  button.

Audio CD/DVD and MP3 mode

Safety note

Risk of injury

The CD/DVD drive is a class 1 laser product. You must not open the casing. There is a risk of exposure to invisible laser radiation if the casing is opened, or if the casing is faulty or damaged.

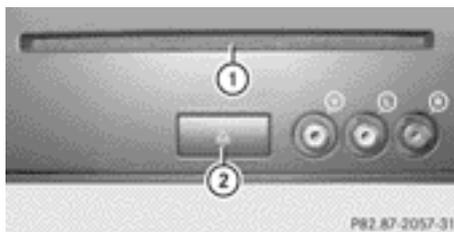

The Rear Seat Entertainment System contains no parts which you can repair yourself. For safety reasons, all maintenance work must be carried out by qualified aftersales technicians.

General notes

You will find information on the following topics in the Audio section:

- notes on CDs/DVDs (▷ page 205)
- notes on MP3 mode (▷ page 203)
- notes on copyright (▷ page 204)

Inserting a CD/DVD

- ① Disc slot
- ② Eject button

The CD/DVD drive is a single disc drive. If there is already a disc inserted, this must be ejected before another is inserted.

- ▶ Insert a disc into the disc slot.

The printed side of the disc must face upwards. If neither side of the disc is printed, the side you wish to play must face downwards.

The CD/DVD drive draws in the disc.

The CD/DVD drive plays the disc:

- if it has been inserted correctly and is a permissible disc, and
- after you have switched on disc mode (audio CD/audio DVD/MP3 mode) (▷ page 249).

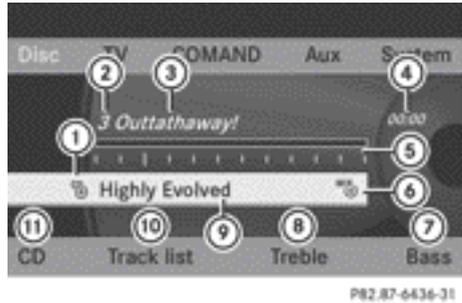

Data on an MP3 CD first needs to be loaded by the drive. Loading may take a some time, depending on the number of folders and tracks.

Removing a CD/DVD

- ▶ Press the  eject button. The drive ejects the disc.
- ▶ Take the disc out of the slot. If you do not take the disc out of the slot, the drive will draw it in again automatically after a short while.

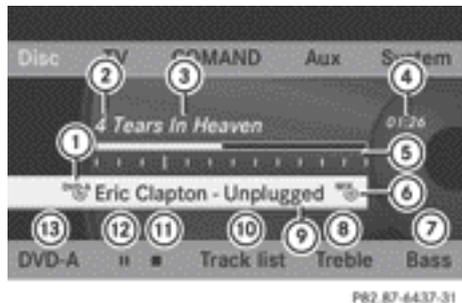

Switching to audio CD, audio DVD or MP3 mode

- ▶ Insert a CD/DVD (▷ page 248). The Rear Seat Entertainment System loads the inserted disc.
- ▶ Select **Disc** in the menu using the    buttons on the remote control and press the  button to confirm. The corresponding mode is switched on. The Rear Seat Entertainment System plays the disc.

Audio CD mode (example)

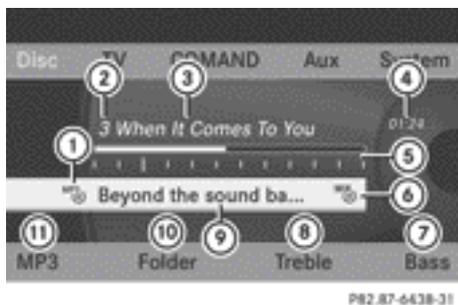

- ① Type of data medium 
- ② Track number
- ③ Track name (only if stored on the disc as CD text)
- ④ Track time
- ⑤ Graphic time and track display
- ⑥ Current playback settings (no symbol for "Normal track sequence")
- ⑦ To set the bass
- ⑧ To set the treble
- ⑨ Disc name (if stored on the disc as CD text)
- ⑩ To call up the track list
- ⑪ Playback options

Audio DVD mode (example)

- ① Type of data medium 
- ② Track number
- ③ Track name (if stored on the disc)
- ④ Track time
- ⑤ Graphic time and track display
- ⑥ Current playback settings (no symbol for "Normal track sequence")

- ⑦ To set the bass
- ⑧ To set the treble
- ⑨ Disc name (if stored on the disc)
- ⑩ To call up the track list
- ⑪ Stop function
- ⑫ Pause function
- ⑬ Playback options

MP3 mode (example)

- ① Type of data medium ^{MP3}
 - ② Track number
 - ③ Track name
 - ④ Track time
 - ⑤ Graphic time and track display
 - ⑥ Current playback settings (no symbol for "Normal track sequence")
 - ⑦ To set the bass
 - ⑧ To set the treble
 - ⑨ Disc name or current folder
 - ⑩ To call up the folder list
 - ⑪ Playback options, to switch track information on/off
- i** Variable bit rates in MP3 tracks can result in the elapsed time shown being different to the actual elapsed time.

Selecting a track

Selecting by skipping to a track

- ▶ **To skip forwards or backwards to a track:** press the ◀ or ▶ button on the remote control.

or

- ▶ Press the ◀◀ or ▶▶ button.

The skip forward function skips to the next track.

Skipping backwards restarts the current track (if it has been playing for more than eight seconds) or starts the previous track (if the current track has only been playing for a shorter time).

If you have selected the playback options [Random tracks](#) or [Random folder](#), the track order is random.

Selecting by track list

In audio CD mode, the track list contains all tracks on the disc currently playing.

In audio DVD mode, the track list contains all tracks in the currently active group; see "Setting the audio format" (▷ page 202).

In MP3 mode, the track list shows all tracks in the currently active folder as well as the folder structure, allowing you to select any track on the MP3 CD.

- ▶ Select [Track list](#) (audio CD/DVD mode) or [Folder](#) (MP3 mode) using the ▼ ◀ ▶ buttons on the remote control and press the Ⓞ button to confirm.

or

- ▶ Press the Ⓞ button when the display/selection window is selected. The track list appears. The ● dot indicates the current track.
- ▶ Select a track using the ▲ ▼ buttons and press the Ⓞ button to confirm.

Making a selection by entering the track number directly

- ▶ Press the **[*]** button on the remote control.

The track entry display appears.

Example: track 2

- ▶ Press the **[2ABC]** number button.

Example: track 12

- ▶ Press the corresponding number keys in rapid succession.
- i** It is not possible to enter numbers that exceed the number of tracks on the CD or in the currently active folder.
- ▶ Wait for approximately three seconds after making the entry.
You will hear the track which has been entered. The corresponding basic menu then reappears.

Fast forward/rewind

- ▶ With the display/selection window active, press the **[◀]** or **[▶]** button on the remote control repeatedly until you reach the desired position.

or

- ▶ Press and hold the **[⏮]** or **[⏭]** button until the desired position is reached.

Selecting a folder

This function is only available in MP3 mode.

- ▶ Select **Folder** in MP3 mode using the **[▼]** **[◀]** **[▶]** buttons on the remote control and press the **[OK]** button to confirm.

or

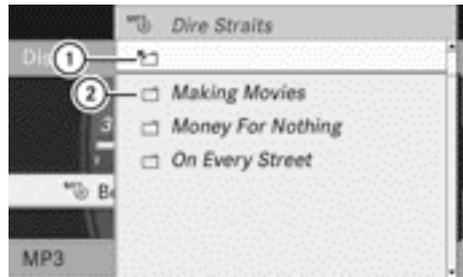

- ▶ Press the **[OK]** button when the display/selection window is selected.
The folder content appears.

P82.87-2041-31

- ① Folder selection symbol
- ② Current folder name
- ③ Track symbol

- ▶ **To switch to the superordinate folder:**
select icon ① using the **[▲]** **[▼]** buttons on the remote control and press the **[OK]** button to confirm.
The display shows the next folder up.

P82.87-2042-31

- ① Folder selection symbol
- ② Folder icon

- ▶ Select a folder using the **[▲]** **[▼]** buttons and press the **[OK]** button to confirm.
You will see the tracks in the folder.
- ▶ Select a track using the **[▲]** **[▼]** buttons and press the **[OK]** button to confirm.
The track is played and the corresponding folder is now the active folder.

Pause function

This function is only available in audio DVD mode.

- ▶ **To pause playback:** select  using the    buttons on the remote control and press the  button to confirm. The  display changes to .
- ▶ **To continue playback:** select  and press the  button to confirm. The  display changes to .

Stop function

This function is only available in audio DVD mode.

- ▶ **To interrupt playback:** select  using the    buttons on the remote control and press the  button to confirm. The  display changes to .
- ▶ **To continue playback:** select  and press the  button to confirm. Playback continues from the point where it was interrupted.
- ▶ **To stop playback:** while playback is interrupted, select  again and press the  button to confirm. Playback stops and returns to the beginning of the DVD.  is highlighted.
- ▶ **To restart playback:** select  and press the  button to confirm. Playback starts from the beginning of the DVD.

Setting the audio format

Further information on audio formats is available in the "Audio" section (▷ page 202).

- ▶ Select **DVD-A** using the    buttons on the remote control and press  to confirm.
- ▶ Select **Group** using the   buttons and press the  button to confirm. The list of available audio formats appears. The  dot indicates the format currently selected.

- ▶ Select an audio format using the   buttons and press the  button to confirm.
- ▶ **To exit the menu:** press the  or  button.

Playback options

Further information on playback options is available in the "Audio" section (▷ page 203).

- ▶ Select **CD, DVD-A** or **MP3** using the    buttons on the remote control and press the  button to confirm. The options list appears. The  dot indicates the option currently selected.
- ▶ Select **Normal track sequence, Random tracks** or **Random folder** using the   buttons and press the  button to confirm. The option is switched on. For all options except **Normal track sequence**, you will see a corresponding display in the display/selection window.

- i** If you change the disc, the **Normal track sequence** option is activated automatically. If an option is selected, it remains selected after the Rear Seat Entertainment System is switched on or off.

Switching track information on/off (MP3 mode only)

If the function is switched on, folder and track names are displayed.

If the function is switched off, disc and file names are displayed.

- ▶ Select **MP3** using the    buttons on the remote control and press the  button to confirm.

- ▶ Select **Display track information** using the   buttons and press the  button to confirm. The function is switched on or off , depending on the previous status.

TV mode

General information

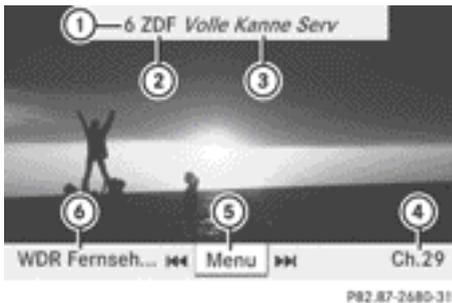

Further information on channel reception quality can be found in the "Video" section (▷ page 227).

Switching to TV mode

- ▶ Select **TV** using the    buttons on the remote control and press the  button to confirm. You see the last TV channel selected, provided it can still be received.

Hiding/showing the navigation menu

- ▶ **To show:** press the  or  button on the remote control.
 - ▶ **To hide:** press the  or  button.
- or
- ▶ Wait for approximately eight seconds.

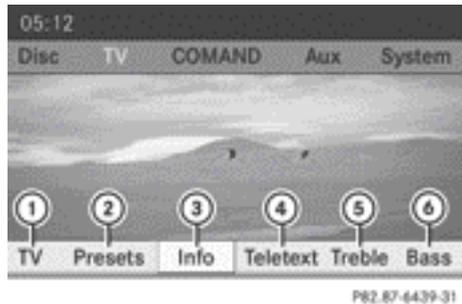

Navigation menu displayed

- ① Preset position of the selected TV channel
- ② Selected TV channel

- ③ Current programme (digital TV receiver only)
- ④ Next TV channel in the channel list (channel name or number)
- ⑤ To show the menu
- ⑥ Previous TV channel in the channel list (channel name or number)

Showing/hiding the menu

- ▶ **To show:** press the  button on the remote control.
- or
- ▶ Select **Menu** while the navigation menu is shown and press the  button to confirm.
 - ▶ **To hide:** press the  button, select **Full screen** and press the  button to confirm.

Menu shown

- ① To call up the TV options menu
- ② To call up the channel presets
- ③ Information on the current programme (only for digital TV channels)
- ④ To switch on teletext
- ⑤ To set the treble
- ⑥ To set the bass

Selecting TV channels

Selecting channels from the navigation menu

- ▶ Press the ◀ or ▶ button on the remote control while the display window is active.

or

- ▶ Press the ◀◀ or ▶▶ button. The TV tuner selects the previous or next channel from the alphabetical channel list.

Selecting channels via the channel presets

- ▶ **To show the menu:** press the OK button on the remote control.

or

- ▶ Select **Menu** while the navigation menu is shown and press the OK button to confirm.
- ▶ Select **Presets** using the ◀ ▶ buttons and press the OK button to confirm. The station preset memory appears. The • dot indicates where the selected channel is currently stored.

Channel presets

- ▶ Select a channel using the ▲ ▼ buttons and press the OK button to confirm.

or

- ▶ Press a number button.

Selecting a channel from the channel list

Notes on the channel list can be found in the "Video" section (> page 228). Information regarding COMAND also applies to the Rear Seat Entertainment System.

- ▶ **To show the menu:** press the OK button on the remote control.

or

- ▶ Select **Menu** while the navigation menu is shown and press the OK button to confirm.
- ▶ Select **TV** using the ◀ ▶ buttons and press the OK button to confirm.
- ▶ Select **Station list** and press the OK button to confirm. The channel list appears. The • dot in front of a list entry indicates the currently selected channel. A number before the list entry shows the memory slot in the channel presets.
- ▶ Select a channel using the ▲ ▼ buttons and press the OK button to confirm.

Selecting channels by entering the channel and programme number

Several programmes can be transmitted on one channel with digital TV. You can therefore enter a channel and the desired programme on this channel.

Only one programme can be sent on a channel with analogue TV. The programme entry function therefore has no effect.

- ▶ **To show the menu:** press the OK button on the remote control.

or

- ▶ Select **Menu** while the navigation menu is shown and press the OK button to confirm.
- ▶ **Option 1:** select **TV** using the ◀ ▶ buttons and press the OK button to confirm.
- ▶ Select **Channel entry** and press the OK button to confirm.

- ▶ **Option 2:** press the  button while the TV is playing. Irrespective of the option, an input bar appears at the top of the screen.
- ▶ **To set a channel:** enter the channel number using the number keys and press the  button to confirm.

or

- ▶ Press and hold the number key until the entry line is hidden. The channel is set.
- i** If you have not entered a programme number, the first programme with adequate reception will be set for a digital channel.
- i** You can enter channels or programmes available in your country even if the reception is currently not adequate. If you enter channels which are not intended for your country or are not allowed there, the **Invalid channel number** message appears.
- ▶ Press the  button and confirm the message.

Storing TV channels

Storing channels manually

There are ten preset positions available.

- ▶ **To show the menu:** press the  button on the remote control or confirm **Menu** by pressing the  button while the navigation menu is shown.
- ▶ Select **Presets** using the   buttons and press the  button to confirm. The station preset memory appears. The
 - dot indicates under which preset the currently selected channel is stored.

- ▶ **To store a channel:** select a preset using the   buttons and press and hold the  button until you hear a tone.

or

- ▶ Press and hold a number button until you hear a tone. Then, the TV picture reappears.

Storing channels automatically

This function automatically stores channels with adequate reception in order of their reception quality. Any channels stored manually in the preset memory will be lost.

- ▶ **To show the menu:** press the  button on the remote control or confirm **Menu** by pressing the  button while the navigation menu is shown.
- ▶ Select **Presets** using the   buttons and press the  button to confirm.
- ▶ Select **Autostore** and press the  button to confirm. The Rear Seat Entertainment System searches for channels it can receive. The available channels are automatically stored in the preset positions.

Information about the current programme

This function is only available on digital TV channels. If you are watching an analogue TV channel, this menu cannot be selected.

- ▶ **To show the menu:** press the  button on the remote control or confirm **Menu** by pressing the  button while the navigation menu is shown.
- ▶ Select **Info** using the   buttons and press the  button to confirm. If the current TV channel provides the corresponding information, this will be displayed.

- i** It can take a few seconds for the information to be displayed.

Displaying the current programme or programme preview

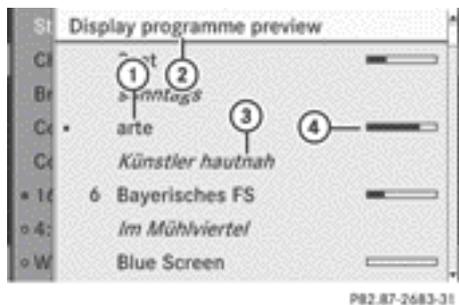

This function is only available on digital TV channels. The programme preview is also referred to as the electronic programme guide (EPG).

► **To show the menu:** press the **OK** button on the remote control or confirm **Menu** by pressing the **OK** button while the navigation menu is shown.

► Select **TV** using the **◀ ▶** buttons and press the **OK** button to confirm.

► Select **Station list** and press the **OK** button to confirm.

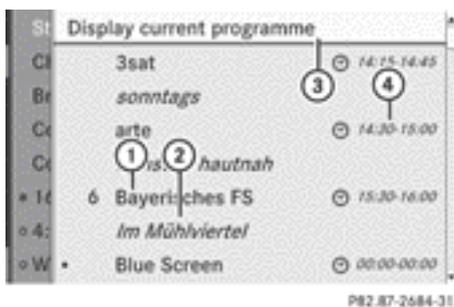

The channel list appears. It shows the current programme on the digital TV channels with adequate reception. The **•** dot in front of a list entry indicates the currently selected channel.

- ① Current TV channel
- ② To display the programme preview
- ③ Current programme
- ④ Visual display of the elapsed programme time

► **To show the programme preview:** select **Display programme preview** and press the **OK** button to confirm.

The channel list shows the channel's next programme.

- ① TV channel
- ② Next programme
- ③ To display the current programme
- ④ The beginning and end of the programme

► **To show the current programme:** select **Display current programme** and press the **OK** button to confirm.

► **To close the display:** press the **←** button.

Basic TV settings

Fixing the frequency

Further information on this function is available in the "Video" section (▷ page 231).

► **To show the menu:** press the **OK** button on the remote control or confirm **Menu** by pressing the **OK** button while the navigation menu is shown.

► Select **TV** using the **◀ ▶** buttons and press the **OK** button to confirm.

► Select **Channel fix** and press the **OK** button to confirm.

Depending on the previous status, the function is switched on or off . When the function is switched on, **FIX** appears in the display window.

► **To exit the menu:** press the **◀** or **▶** button.

Setting the reception region

Further information on this function is available in the "Video" section (▷ page 232).

- ▶ **To show the menu:** press the  button on the remote control or confirm **Menu** by pressing the  button while the navigation menu is shown.
- ▶ Select **TV** using the   buttons and press the  button to confirm.
- ▶ Select **TV standard** and press the  button to confirm.
A list appears, showing the reception regions. The  dot in front of a list entry indicates the currently selected reception area or country.
- ▶ Select the reception area and press the  button to confirm.
A message appears to inform you that if the wrong country is set, correct reception will not be possible.
- ▶ Select **Yes** or **No** and press the  button to confirm.
If you select **Yes**, the Rear Seat Entertainment System switches the country.
If you select **No**, the country list will appear again.

Teletext

Switching teletext on/off

- ▶ **To show the menu:** press the  button on the remote control.
- or
- ▶ Select **Menu** while the navigation menu is shown and press the  button to confirm.
 - ▶ **To switch on:** select **Teletext** using the   buttons and press the  button to confirm.
The first video text page is displayed.
 - ▶ **To switch off:** press the  back button.

Selecting a teletext page

- ▶ **To select a page directly:** press the corresponding number keys on the remote control.
- ▶  You can only enter pages that are permissible for teletext between 100 and 899.
- ▶ **To call up the next/previous page:** press the  or  button.

Dynamic teletext page

A dynamic teletext page consists of several subpages. The display automatically changes to the next page after a certain time.

Video DVD mode

General notes

Here you will find further information on the following topics:

- safety notes (▷ page 192)
- notes on DVDs (▷ page 232)

DVD playback conditions

There may be playback problems when playing copied discs. There are a large variety of discs, DVD authoring software, writing software and writers available. This variety means that there is no guarantee that the Rear Seat Entertainment System will be able to play video DVDs that you have copied yourself.

You will find further information in the Video section (▷ page 233). Information regarding COMAND also applies to the Rear Seat Entertainment System.

Function restrictions

Depending on the DVD, it is possible that certain functions or actions described in this section will be temporarily blocked or may not function at all. As soon as you try to activate

these functions or actions, you will see the  symbol in the display.

Inserting and removing a CD/DVD

- ▶ Proceed as described in the "Audio CD/DVD and MP3 mode" section ([▷ page 248](#)).

Activating video DVD mode

- ▶ Insert a video DVD.
The Rear Seat Entertainment System loads the disc.
If disc mode was the last mode selected, it will now be active.
If it was not, switch on video DVD mode as described in the following instruction.
- ▶ Select **Disc** in the menu using the    buttons on the remote control and press the  button to confirm.
If the video DVD fulfils the playback criteria: the film either starts automatically or the menu saved on the DVD appears. If the DVD menu appears, you must start the film manually.
- ▶ Select the corresponding menu item in the DVD menu.

Hiding/showing the navigation menu

- ▶ **To show:** press the  or  button on the remote control.
 - ▶ **To hide:** press the  or  button.
- or
- ▶ Wait for approximately eight seconds.

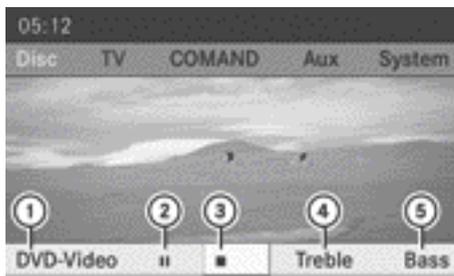

PB2.87-2043-31

- ▶ **To continue playback:** select  and press the  button to confirm.
The menu is hidden.

Stop function

- ▶ **To show the menu:** press the  button on the remote control.
or
- ▶ Select **Menu** while the navigation menu is shown and press the  button to confirm.

- ▶ **To interrupt playback:** select  and press the  button to confirm.
The  display changes to . The video image is hidden.
- ▶ **To continue playback:** select  and press the  button to confirm.
Playback continues from the point where it was interrupted. The menu is hidden.
- ▶ **To stop playback:** while playback is interrupted, select  again and press the  button to confirm.
Playback stops and returns to the beginning of the DVD.  is highlighted.
- ▶ **To restart playback:** select  and press the  button to confirm.
Playback starts from the beginning of the DVD.

Selecting a scene/chapter

Note

Further information on this function is available in the "Video" section (▷ page 235).

Skipping forwards/backwards

- ▶ Press the  or  button on the remote control.
or
- ▶ Press the  or  button.
The navigation menu (▷ page 227) appears for approximately eight seconds.

Selecting a scene/chapter directly

The examples illustrate how to select scene/chapter 5.

- ▶ **Option 1:** while the film is playing, press the  button on the remote control.
- ▶ Press the corresponding number key, such as .

- ▶ **Option 2:** while the film is playing, press the **OK** button on the remote control and show the menu.
- ▶ Select **DVD-Video** and press the **OK** button to confirm.
- ▶ Select **DVD functions** and press the **OK** button to confirm.
- ▶ Select **Scene selection** and press the **OK** button to confirm.
- ▶ Select **5** using the **▲** or **▼** button and press the **OK** button to confirm.
In both cases, playback will begin from the fifth scene/chapter after a brief pause.

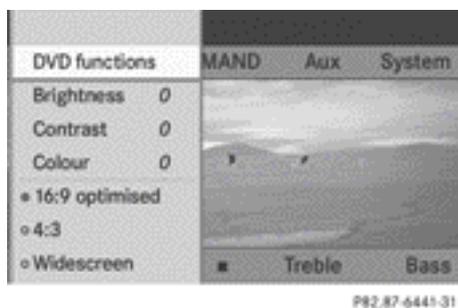

Selecting a film/title

Note

Further information on this function is available in the "Video" section (> page 236).

Option 1

- ▶ Press the **OK** button on the remote control and show the menu.
- ▶ Select **DVD-Video** and press the **OK** button on the remote control to confirm.

- ▶ Select **DVD functions** and press the **OK** button to confirm.
- ▶ Select **Title selection** and press the **OK** button to confirm.
- ▶ **To call up the selection list:** press the **OK** button.
- ▶ Select a film/track.

Option 2:

Example: selecting film 2

- ▶ Press the **2ABC** button.
After a brief pause, the second film is played.

DVD menu

Note

You will find further information on the DVD menu in the "Video" section (> page 236).

Calling up the DVD menu

- ▶ Press the **OK** button on the remote control and show the menu.
- ▶ Select **Video-DVD** and press the **OK** button on the remote control to confirm.
- ▶ Select **DVD functions** and press the **OK** button to confirm.
- ▶ Select **Menu** and press the **OK** button to confirm.
The DVD menu appears.

Selecting menu items in the DVD menu

- ▶ Select a menu item using the **▲**, **▼**, **◀**, **▶** buttons on the remote control and press the **OK** button to confirm.
A menu appears.

- ▶ **i** Menu items which cannot be selected are shown in grey.

- ▶ Confirm **Select** by pressing the  button. The Rear Seat Entertainment System executes the action or shows a submenu.
- ▶ If available, additional options can now be selected. The Rear Seat Entertainment System then switches back to the DVD menu.
- i** Depending on the DVD, the menu items: **Back (to the movie)**, **Play**, **Stop**, ,  or **Go up** may not function or not function at certain points in the DVD menu. To indicate this, the  icon appears in the display.

Stopping a film or skipping to the beginning or end of a scene

- ▶ Select any menu item from the DVD menu. The menu appears.
- ▶ **To stop the film:** select the **Stop** menu item and press the  button on the remote control to confirm.
- ▶ **To skip to the end of a scene:** select the  menu item and press the  button to confirm.
- ▶ **To skip to the beginning of a scene:** select the  menu item and press the  button to confirm.

Moving up one level in the DVD menu

- ▶ **Option 1:** press the  back button on the remote control or select the corresponding menu item in the DVD menu.
- ▶ **Option 2:** select any menu item in the DVD menu.
- ▶ Select the **Go up** menu item in the menu and press the  button to confirm.

Back to the film

- ▶ **Option 1:** press the  back button on the remote control repeatedly until you see the film or select the corresponding menu item in the DVD menu.

- ▶ **Option 2:** select any menu item in the DVD menu and press the  button to confirm.
- ▶ Select the **Back (to the movie)** menu item in the menu and press the  button to confirm.

Setting the audio format

This function is not available on all DVDs. If it is available, you can set the audio language or the audio format. The number of settings is determined by the DVD content. It is possible that the settings may also be accessed in the DVD menu.

- ▶ Press the  button on the remote control and show the menu.
- ▶ Select **DVD-Video** and press the  button on the remote control to confirm.
- ▶ Select **DVD functions** and press the  button to confirm.
- ▶ Select **Audio language** and press the  button to confirm. A menu appears after a short while. The
 - dot in front of an entry indicates the currently selected language.
- ▶ Select a language using the   buttons and press the  button to confirm.
- ▶ **To exit the menu:** press the  or  button.

Subtitles and camera angle

These functions are not available on all DVDs. The number of subtitle languages and camera angles available depends on the content of the DVD. It is possible that the settings may also be accessed in the DVD menu.

- ▶ Press the  button on the remote control and show the menu.
- ▶ Select **DVD-Video** and press the  button on the remote control to confirm.
- ▶ Select **DVD functions** and press the  button to confirm.

- ▶ Select **Subtitles** or **Camera angle** and press the **OK** button to confirm. In both cases, a menu appears after a few seconds. The **•** dot in front of an entry indicates the current setting.
- ▶ Select a setting using the **▲** **▼** buttons and press the **OK** button to confirm.
- ▶ **To exit the menu:** press the **◀** or **▶** button.

Interactive content

DVDs can also contain interactive content (e.g. a video game). In a video game, you may be able to influence events by selecting and triggering actions. The type and number of actions depend on the DVD.

- ▶ Select an action using the **▲** **▶** **▼** **◀** buttons on the remote control and press the **OK** button to execute it. A menu appears and the first entry, **Select**, is highlighted.
- ▶ Press the **OK** button.

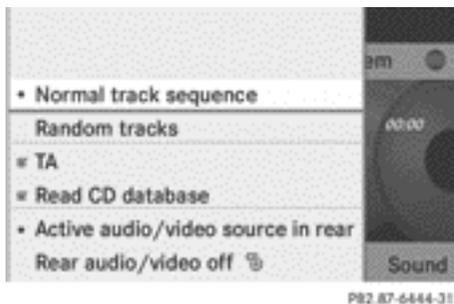

Active COMAND source mode

Switching the function on/off in COMAND

You can transfer an audio or video source selected in COMAND to the Rear Seat Entertainment System.

- i** If you subsequently switch modes in COMAND, the new source will not be transmitted to the Rear Seat Entertainment System.
- ▶ **To switch on the function in COMAND:** switch on the desired audio mode in COMAND, e.g. CD mode (▷ page 196), or show the menu in video DVD mode (▷ page 51).
- ▶ Select the menu item at the bottom left, e.g. **CD** in audio CD mode, by sliding **⊙** ↓

and turning **⌚** the COMAND controller and press **⊙** to confirm. A menu appears.

- ▶ Select **Active audio/video source in rear** and press **⊙** to confirm.

In the status bar at the top, you will see the headphones icon and the **⊙** icon for the source that has been switched on.

- ▶ **To switch off the function in COMAND:** switch on the desired audio mode in COMAND or show the menu in video DVD mode.
- ▶ Select the menu item at the bottom left, e.g. **CD** in audio CD mode, by sliding **⊙** ↓ and turning **⌚** the COMAND controller and press **⊙** to confirm.
- ▶ Select **Rear off** **⊙** and press **⊙** the COMAND controller to confirm.

Selecting an active COMAND source in the rear-compartment screen

Loading the active COMAND source

- ▶ Select **COMAND** using the    buttons on the remote control and press  to confirm. The audio or video source selected in COMAND is loaded in the Rear Seat Entertainment System.

P82.87-6445-31

When the loading process is complete, the audio or video source is set in the Rear Seat Entertainment System.

If **Rear off** is activated in COMAND, the **COMAND is off or there is no active COMAND source** message appears.

- setting the brightness, contrast and colour (▷ page 246)
- changing the picture format (▷ page 247)
- adjusting the sound settings (▷ page 246)

AUX mode

Introduction

You can connect one external video source to each of the displays of the Rear Seat Entertainment System (AUX display) and also one external video source to the rear-seat CD/DVD drive (AUX drive) with a sound and picture signal.

Please see the corresponding operating instructions for information on how to operate the external video source.

For further details about external video sources, please consult a Mercedes-Benz Service Centre.

Connecting AUX equipment

AUX drive

The AUX drive jacks are located on the CD/DVD drive next to the CD/DVD eject button (▷ page 37).

Display AUX

The AUX display jacks are located on the side of the screen (▷ page 35).

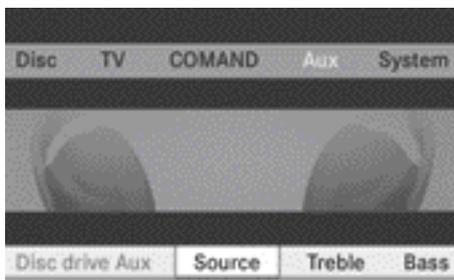

Audio and video connection

- ▶ Insert the audio plugs for the left and right signals into the corresponding **L** and **R** jacks.
- ▶ Insert the video plug into the **V** jack.

Activating AUX mode

AUX drive

- ▶ Select **Aux** in the menu using the  buttons on the remote control and press the **OK** button to confirm. The AUX menu appears.

AUX menu

- ▶ Select **Source** from the AUX menu and press the **OK** button to confirm.
- ▶ Select **Disc drive Aux** and press the **OK** button to confirm. You will hear and see the content of the external video source if it is connected to the CD/DVD drive and switched to play-

back. If no video image is available from the AUX source connected, you will see an audio menu.

Displaying AUX

- ▶ Select a screen using the thumbwheel on the remote control "(▷ page 36) until **L REAR**" (left-hand screen) or "**REAR R**" (right-hand screen) is highlighted in the window.
- ▶ Select **Aux** in the menu using the  buttons on the remote control and press the **OK** button to confirm.
- ▶ Select **Source** from the AUX menu and press the **OK** button to confirm.
- ▶ Select **Display Aux** and press the **OK** button to confirm. You will see and hear the content of the video source if it is switched to playback. If no video image is available from the AUX source connected, you will see an audio menu.

Adjusting treble and bass

- ▶ Select **Treble** or **Bass** in the AUX menu and press the **OK** button on the remote control to confirm. An adjustment scale appears.
- ▶ Select a setting using the  or  button and press the **OK** button to confirm.

Adjusting the brightness, contrast or colour

- ▶ Select **Display Aux** or **Disc drive Aux** in the AUX menu and press the **OK** button to confirm.
- ▶ Select **Brightness**, **Contrast** or **Colour** and press the **OK** button to confirm. An adjustment scale appears.
- ▶ Select a setting using the  or  button and press the **OK** button to confirm.

Changing the picture format

- ▶ Select **Display Aux** or **Disc drive Aux** in the AUX menu and press the **OK** button to confirm.
- ▶ Select **16:9 optimised, 4:3** or **Wide-screen** using the **▲** **▼** buttons and press the **OK** button to confirm.
The dot in front of a menu item indicates the current setting.
