# About Your Audio System

The audio system features AM/FM radio. It can also play audio CDs, WMA/MP3/AAC files, USB flash drives, iPod and *Bluetooth*®* devices.

You can operate the audio system from the buttons and switches on the panel, or the remote controls* on the steering wheel, or icons on the touchscreen interface*.

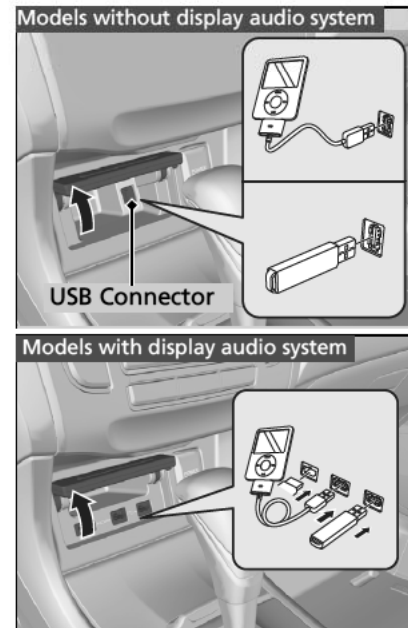

▶About Your Audio System

Video CDs, DVDs, and 8-cm mini CDs are not supported.

iPod and iPhone are registered trademark owned by Apple Inc.

Place your phone where you can get good reception.

Features

* Not available on all models

USB/HDMI®* Port

Models without display audio system

USB Connector

Models with display audio system

1. Press the lid to open it.
2. Install the iPod dock connector or the USB flash drive to the USB port.
3. Install the HDMI® cable to the HDMI® port*.

▷USB/HDMI®* Port

- Do not leave the iPod or USB flash drive in the vehicle. Direct sunlight and high temperatures may damage it.
- Do not connect the iPod or USB flash drive using a hub.
- Do not use a device such as a card reader or hard disk drive, as the device or your files may be damaged.
- We recommend backing up your data before using the device in your vehicle.
- Displayed messages may vary depending on the device model and software version.

If the audio system does not recognise the iPod, try reconnecting it a few times or reboot the device. To reboot, follow the manufacturer's instructions provided with the iPod or visit www.apple.com.cn/ipod.

Features

* Not available on all models

143

Auxiliary Input Jack*

Use the jack to connect standard audio devices.
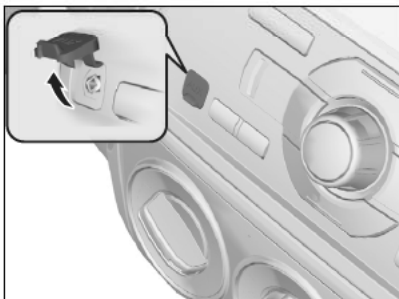

1. Open the AUX cover.
2. Connect a standard audio device to the input jack using a 3.5 mm stereo miniplug.
   ▶ The audio system automatically switches to the AUX mode.

>>Auxiliary Input Jack*

To switch the mode, press any of the audio mode buttons. You can return to the AUX mode by pressing the **CD/USB** button.

You cannot use the auxiliary input jack if you replace the audio system.

Features

* Not available on all models

Audio Remote Controls*

Allows you to operate the audio system while driving.
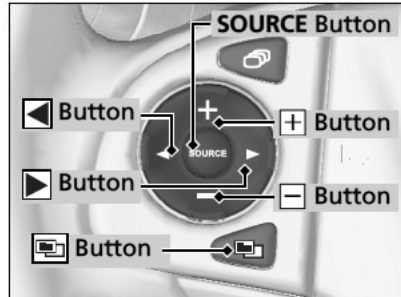

SOURCE Button

Cycles through the audio modes as follows:

FM→AM→CD→USB→iPod→
AppMode→*Bluetooth*®Audio→AUX

⊞ ⊟ (Volume) Buttons

Press ⊞: To increase the volume.
Press ⊟: To decrease the volume.

■Wallpaper Setup

You can change, store, and delete the wallpaper on the audio/information display.

■Import wallpaper

You can import up to five images, one at a time, for wallpaper from a USB flash drive.
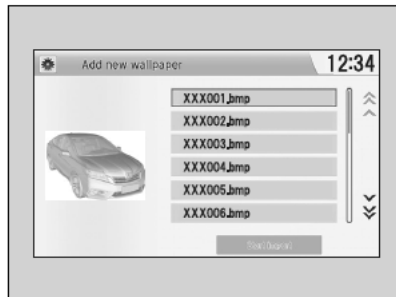

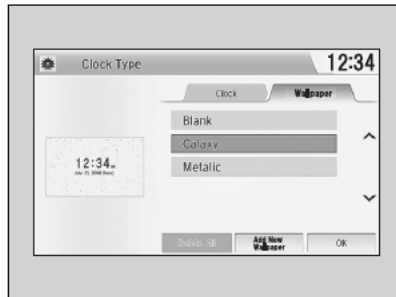

1. Connect the USB flash drive to the USB port.
   ⊇ **USB/HDMI®* Port** P. 143
2. Select **Settings** to go to the **Settings** screen.
3. Select **Info Settings**.
   ▶ Repeat the procedure to select **Clock/ Wallpaper Type**, then **Wallpaper**.
4. Select **Add New Wallpaper**.
   ▶ The picture name is displayed on the list.
5. Select a desired picture.
   ▶ The preview is displayed on the left side on the screen.
6. Select **Start import** to save the data.
   ▶ The confirmation message will appear. Then the display will return to the wallpaper list.

▶▶Wallpaper Setup

- When importing wallpaper files, the image must be in the USB flash drive's root directory. Images in a folder cannot be imported.
- The file name must be fewer than 64 characters.
- The file format of the image that can be imported is BMP (bmp) or JPEG (jpg).
- The individual file size limit is 5 MB.
- The maximum image size is 4,096 × 4,096 pixels. If the image size is less than 800 × 480 pixels, the image is displayed in the middle of the screen with the extra area appearing in black.
- Up to 255 files can be selected.
- If the USB flash drive does not have any pictures, the **No files detected** message appears.

Features

* Not available on all models

■ Select wallpaper

1. Select **Settings** to go to the **Settings** screen.

2. Select **Info Settings**.

▷ Repeat the procedure to select **Clock/Wallpaper Type**, then **Wallpaper**.

▷ The screen changes to the wallpaper list.

3. Select a desired wallpaper.

▷ The preview is displayed on the left side on the screen.

▷ The pop-up menu appears on the screen.

4. Select **Set**.

▷ The display will return to the wallpaper list.

■ Delete wallpaper

1. Select **Settings** to go to the **Settings** screen.

2. Select **Info Settings**.

▷ Repeat the procedure to select **Clock/Wallpaper Type**, then **Wallpaper**.

▷ The screen changes to the wallpaper list.

3. Select a wallpaper that you want to delete.

▷ The preview is displayed on the left side on the screen.

▷ The pop-up menu appears on the screen.

4. Select **Delete**.

▷ The confirmation message will appear.

5. Select **Yes** to delete completely.

▷ The display will return to the wallpaper list.

>>Wallpaper Setup

From the pop-up menu, select **Preview** to see a preview at full-size screen.
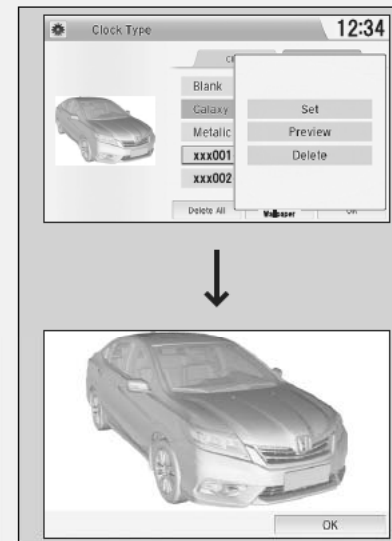

To go back to the previous screen, select **OK**, or **BACK**.

When the file size is large, it takes a while to be previewed.

To delete all wallpapers you add, select **Delete All**, then **Yes**.

Features

163

Adjusting the Sound

1. Select **Settings**.
2. Select **Audio Settings**.
3. Select **Sound**.

Select the tabs to adjust the following choices: **BASS**, **TREBLE**, **FADER**, **BALANCE**, **SUBW** (Subwoofer), **SVC** (Speed-sensitive Volume Compensation)
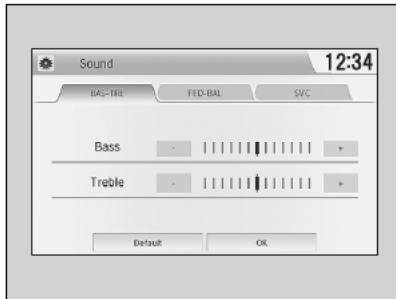

▶Adjusting the Sound

The SVC has four modes: **Off**, **Low**, **Mid**, and **High**. SVC adjusts the volume level based on the vehicle speed. As you go faster, audio volume increases. As you slow down, audio volume decreases.

Features

164

Display Setup

You can change the brightness or colour theme of the audio/information display.

■ Changing the Screen Brightness
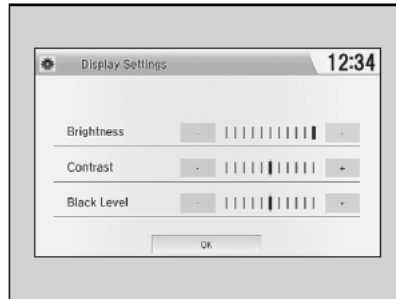

1. Select **Settings** to go to the **Settings** screen.
2. Select **System Settings**.
   ▶ Repeat the procedure to select **Display** tab.
3. Select **Display Setting**.
4. Select the setting.

■ Changing the Screen's Colour Theme
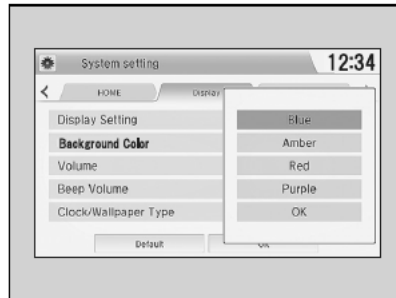

1. Select **Settings** to go to the **Settings** screen.
2. Select **System Settings**.
   ▶ Repeat the procedure to select **Display** tab.
3. Select **Background Color**.
4. Select the setting you want.

1≫Changing the Screen Brightness

You can change the **Contrast** and **Black Level** settings in the same manner.

Group Icons
Select ◄ or ► to change group.

1 Playing *Bluetooth*® Audio

Not all *Bluetooth*-enabled phones with streaming audio capabilities are compatible.
To check if your phone is compatible, visit *www.wdhachandsfree.cn.*

It may be illegal to perform some data device functions while driving.

Only one phone can be used with HFT at a time. When there are more than two paired phones in the vehicle, the first paired phone the system finds is automatically linked.

If more than one phone is paired to the HFT system, there may be a delay before the system begins to play.

In some cases, the name of the artist, album, or track may not appear correctly.

A **NO CONNECT** message may be displayed if:
● The phone is not linked to HFT.
● The phone is not turned on.
● The phone is not in the vehicle.
● An incompatible phone is connected.

The following functions may not be available on some devices:
● Pause function
● Group selection

*1: Depending on the *Bluetooth* device you connect, some or all of the lists may not be displayed.

Features
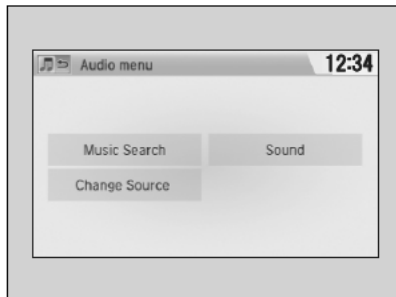

■ To Play *Bluetooth*® Audio Files
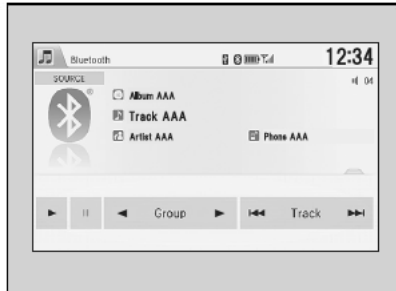

1. Make sure that your phone is paired and connected to the system.
2. Select the *Bluetooth*® Audio mode.

If the phone is not recognized, another HFT-compatible phone, which is not compatible for *Bluetooth*® Audio, may already be connected.

■ To pause or resume a file

Select the play icon or pause icon.

■ Searching for Music

1. Select **MENU**.
2. Select **Music Search**.
3. Select a search category (e.g., Albums).
4. Select an item.
   ▶ The selection begins playing.

▶▶To Play *Bluetooth*® Audio Files

To play the audio files, you may need to operate your phone. If so, follow the phone maker's operating instructions.

Switching to another mode pauses the music playing from your phone.

▶▶Searching for Music

Depending on the *Bluetooth* device you connect, some or all of the lists may not be displayed.

Digital AV Adapter

1▶Connecting Your iPhone

Make sure to plug in the digital AV adapter to the HDMI® jack first. If not, smartphone connection may not work properly.
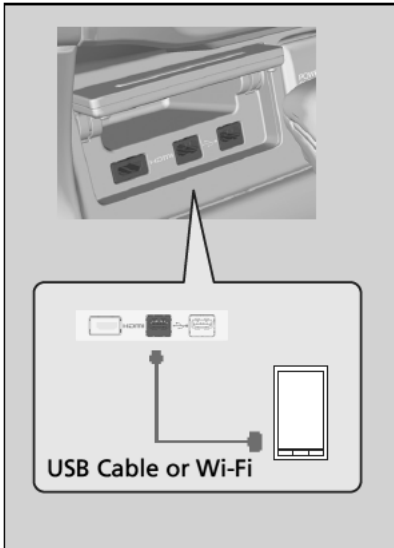

To recharge your phone, connect it to the USB jack, too.

Contact a dealer for the digital AV adapter purchasing information.

Features

183

Except iPhone

## ■ Connecting Your Smartphone

USB Cable or Wi-Fi

1. Connect your phone to the display audio via *Bluetooth*®.

　2 **Phone Setup** P. 214

2. Plug in your phone to the USB jack.

　▶ You may need to operate from the phone.

　▶ Wait until an arrow appears on **HOME** screen.

3. Select the arrow to display the available smartphone apps on the display audio.

4. Select an app you want to operate from the display audio.

　▶ **To go back to the previous screen, select HOME.**

⟫Connecting Your Smartphone

The phone is rechargeable while being connected to the USB jack. However, if the phone is overloaded with many operational tasks, the battery level may get lowered.

Features

■ Wi-Fi mode (setting for the first time)

If your phone has Wi-Fi connectivity, you can set smartphone connection in Wi-Fi mode.
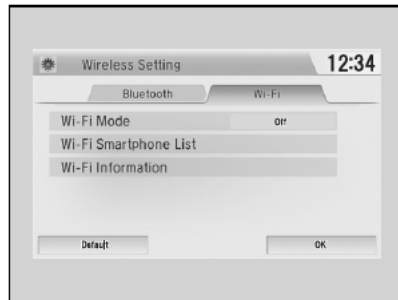

1. Connect your phone to the display audio via *Bluetooth*®.
   ⊇ **Phone Setup** P. 214
   ▶ Make sure your phone's Wi-Fi setting is in access point (tethering) mode.
2. Select **Settings** from the **HOME** screen.
3. Select **Wireless Settings**.
   ▶ Open the Wi-Fi tab.
4. Select **Wi-Fi Mode**, then **On**.
   ▶ A confirmation message appears on the screen. Select **Yes**.

⟩⟩Wi-Fi mode (setting for the first time)

You cannot go through the setting procedure while a vehicle is moving. Park in a safe place to set the display audio in Wi-Fi mode.

Some telecom carriers charge for tethering. Check your phone's subscribed package.

Check your phone manual to find out if the phone has Wi-Fi connectivity.

Features
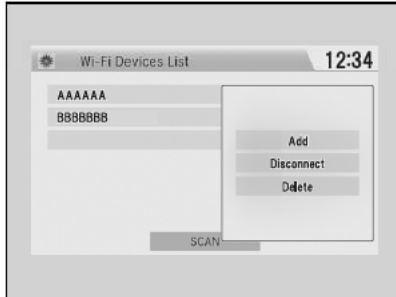

5. Select **Wi-Fi Smartphone List**.

▶ Select the phone you want to connect to the system.

▶ If you do not find the phone you want to connect in the list, select **Scan**.

6. Select **Add**.

▶ Enter a password set for your phone, and select **OK**.

7. Select **HOME** to go back to **HOME**.

8. Select the arrow to display the available smartphone apps on the display audio. Select an app you want to operate from the screen.

▶ To go back to the previous screen, select **HOME**.

≫Wi-Fi mode (setting for the first time)

On some phones, you may need to activate a particular app prior to display all the available apps in step 8.

■ Wi-Fi mode (after the initial setting has been done)

Make sure your phone's Wi-Fi setting is in access point (tethering) mode.

On some phones, you may need to activate a particular app prior to display all the available apps.

Siri Eyes Free Mode

You can talk to Siri using the Talk button on the steering wheel when your iPhone is paired to *Bluetooth*® Handsfreelink.
2 **Phone Setup** P. 214

■ Using Eyes Free Mode

◻ (Hang-up/back) button:
Press to deactivate Siri.

Appears when Siri is activated in Eyes Free mode

While in Eyes Free mode:
The display remains the same.
No feedback or **commands** appear.

◻ (Talk) button:
Press and hold until the display changes as shown.

Siri is a registered trademark owned by Apple Inc.

Eyes Free mode is capable of operating the following features by commands:
• Sending and reading text messages, and sending email messages.
▶You need to have your own email address on your iPhone.
• Setting up calendar entries, reminders, and alarms.
• Checking the weather.
• Turn-by-turn iPhone directions.
You can hear turn-by-turn directions through your vehicle only while listening to audio using your iPhone.

Some features may not be available for all countries or all areas. Check Apple Inc. website for more details.

We recommend against using Siri other than in Eyes Free mode while operating a vehicle.

Some commands work only on specific phone features or apps.
