Welcome

Congratulations on your new **TheTrustyOne Universal Bluetooth Car Kit** by novero.

TheTrustyOne is designed to serve as an in-car extension of your regular mobile phone, only easier to operate while in the car.

TheTrustyOne offers several features, which will satisfy many different user needs. After a quick and simple set-up, it is easy to make and receive handsfree calls and play your favourite music on either your phone or music player.

This user guide will help you get started as we present you with all the great features and conveniences that provide a truly customized user experience.

Enjoy!

Shortcuts

TheTrustyOne has an intuitive interface that is easy to operate without taking your eyes or mind off traffic. Below, you will find an overview of the basic shortcuts.

For your safety
Please remember that driving a car safely requires your full attention. Use your car kit with consideration and only when traffic conditions allow for safe use.

Turn power on / off

TheTrustyOne will automatically turn on when you start your car, and turn off when you switch off the ignition. – You can also manually turn the power of **TheTrustyOne** on and off.

Turn power on

Press and hold  to turn on the car kit.

Turn power off

Press and hold  to turn off the car kit.

Tip

If you have previously paired with a phone or player, **TheTrustyOne** will automatically try to connect with it when it is turned on.

If connection is successful you will hear a short beep.
If connection is unsuccessful you will hear a warning tone.

Support

Go through the list of suggestions below if you experience any inconvenience with **TheTrustyOne Universal Bluetooth Car Kit**.

- **If your phone does not connect automatically when you turn the ignition key:**

Go to the Bluetooth menu of your phone and set **TheTrustyOne** as authorized or trusted device to allow automatic connections without user confirmation.

- **If you do not hear a ringing tone:**

Make sure that your phone is not in silent mode.

- **If the person at the other end complains about the audio quality:**

Check that the microphone is pointing towards your mouth.

- **If you have problems voice-dialling:**

TheTrustyOne provides one-click access to the voice recognition functions of your phone. Please check the user guide of your phone regarding its voice recognition features. If you do not hear a tone, please try the feature without driving and look at the phone display to determine the recognition window.

- **If you want to update the software of your car kit:**

Go to www.novero.com and install the novero software update tool. Please install it on a PC and then connect **TheTrustyOne** with a USB cable through the micro-USB connector on the remote control.

- **If you do not find an answer to your question here:**

Please go to www.novero.com. If you wish to call our helpline, you will find the number for your country on our website. Please be prepared to provide the model and SW version of your phone, as this information will be helpful to identify the root cause and a solution to the problem.

Safety & disposal

1. Installation

- Always have a qualified professional handle the installation or any repairs on your car kit. Please refer to the installation guide for more information.

- Make sure that the car kit components are fastened in places where
 - 1) they are not close to an airbag or area where they could harm you in case of a collision
 - 2) they are in arm's reach from the driver's seat
 - 3) they do not impair the operation of the vehicle.

2. Using TheTrustyOne

- Always be cautious about using your car kit or phone while engaging in any activity that requires your full attention. Turn off your car kit and phone to keep you from being distracted and avoid accidents.

- Always focus on road safety and obey all local laws while operating a motor vehicle. Do not use your car kit if it interferes with your driving in any way.

- Always switch off your car kit if it may otherwise cause interference or danger. Please respect official recommendations and restrictions.

- If you use a pacemaker, hearing aid or other electronic medical device, please consult your physician before using the car kit.

- Never try to dismantle the product yourself. None of the internal components can be replaced or repaired by users. – Only authorized dealers or service centres may open the product. If any parts of your product require replacement for any reason, including normal wear and tear or breakage, contact your dealer.

3. Keep out of reach of children

- The plastic bags, which this product and its parts are wrapped in, are not toys for children. The bags themselves or the many small parts they contain may cause choking if ingested.

4. ACA TSoz8 – Ignition of flammable atmospheres

- Do not use your car kit in environments with risk of ignition of flammable gases.

5. Disposing of TheTrustyOne

- Dispose of all product parts in accordance with local regulations. If in doubt, please consult your local authorities.

- The product must be taken to separate collection at the product end-of-life. Do not dispose of components from this product as unsorted municipal waste.

6. Warranty

- novero offers a limited manufacturer's warranty of 12 months from the date of purchase. In some cases / countries the warranty time can be extended to 24 months. Please visit www.novero.com to find more details for warranty extension and warranty return options.

Reproduction, transfer, distribution or storage of part or all of the contents in this document in any form without the prior written permission of novero is prohibited. novero® is a registered trademark. Glossary

Bluetooth is a radio technology that connects devices, such as mobile phones and car kits, without wires or cords over a short distance (approx. 10 meters/33 feet). Bluetooth is safe to use and secure, too. Once two Bluetooth devices have been paired, no one can listen in and no other Bluetooth devices can interfere without authorisation. Get more information at www.bluetooth.com

Bluetooth profiles are the different ways that Bluetooth devices communicate with other devices. Bluetooth phones support the car kit profile, the handsfree profile or both. In order to support a certain profile, a phone manufacturer must implement certain mandatory features within the software of the phone.

Code or PIN is the code required to pair a Bluetooth device (e.g. a mobile phone) with your car kit.

Device refers to both a telephone or music player which can be paired with **TheTrustyOne**.

Mode is the state that **TheTrustyOne** is in, either telephone or music. The functions and options vary according to mode.

Pairing creates a unique and encrypted connection between two Bluetooth devices. Bluetooth devices will not work together if they have not been paired.

Voice dial enables you to dial a contact through voice recognition (saying the contact name aloud).
